

NUMERICAL ANALYSIS AND APPLIED MATHEMATICS ICNAAM 2012

International Conference of Numerical Analysis and Applied Mathematics

Kos, Greece 19 – 25 September 2012

Volume A

EDITOR

Theodore E. Simos

*European Society of Computational Methods in Sciences, Engineering, and Technology (ESCMSET),
European Academy of Sciences; European Academy of Sciences and Arts
European Academy of Arts, Sciences and Literature; King Saud University, Saudi Arabia
University of Peloponnese, Greece*

CO-EDITORS

George Psihoyios

*European Society of Computational Methods in Sciences, Engineering, and Technology (ESCMSET);
Fellow of the IMA; Greece*

Ch. Tsitouras

Technological Educational Institute of Chalkis, Greece

Zacharias Anastassi

School of Pedagogical & Technological Education (ASPETE), Athens, Greece

All papers have been peer reviewed.

Numerical Analysis and Applied Mathematics ICNAAM 2012
International Conference of Numerical Analysis and Applied Mathematics

Table of Contents

| | |
|--|----|
| Preface: Proceedings of the International Conference on Numerical Analysis and Applied Mathematics 2012 (ICNAAM-2012) | |
| Theodore E. Simos, George Psihoyios, Ch. Tsitouras, and Zacharias Anastassi | 1 |
| Conference Details | 3 |
| European Society of Computational Methods in Sciences, Engineering and Technology (ESCMSET) | 7 |
| VOLUME A | |
| INVITED PAPERS | |
| The importance of Pappus for the development of mathematics | |
| Gerhard Wanner | 9 |
| Explicit stabilized integration of stiff deterministic or stochastic problems | |
| Assyr Abdulle | 11 |
| Geometric integration by playing with matrices | |
| Luigi Brugnano and Felice Iavernaro | 16 |
| Stroboscopic averaging in Banach spaces: Application to NLS | |
| F. Castella, Ph. Chartier, F. Méhats, and A. Murua | 20 |
| Conjugate symplectic B-series | |
| Ernst Hairer and Christophe J. Zbinden | 23 |
| Foundations of Geometric Algebra computing | |
| Dietmar Hildenbrand | 27 |
| Convergence of piecewise deterministic processes modeling two-scale reaction networks | |
| Tobias Jahnke | 31 |
| The novel mathematics underlying hadronic mechanics for matter and antimatter | |
| Ruggero Maria Santilli | 35 |

| | |
|---|----|
| A new approach to high-order averaging | 42 |
| P. Chartier, A. Murua, and J. M. Sanz-Serna | |
| SYMPOSIA | |
| Preface of the “7th symposium on numerical analysis of fluid flow and heat transfer” | 45 |
| Pawel Kosinski | |
| Numerical investigation on heat transfer in power-law fluids with variable thermal diffusivity in the presence of viscous dissipation and radiation | 46 |
| Botong Li, Liancun Zheng, and Xinxin Zhang | |
| Marangoni convection flow and heat transfer in pseudoplastic non-newtonian nanofluids with radiation effects and heat generation or absorption effects | 50 |
| Yanhai Lin, Liancun Zheng, and Xinxin Zhang | |
| Numerical simulation of cavitating tube problems with isothermal model | 54 |
| Eric Goncalves and Jean Decaix | |
| Study of compressibility effects on turbulent cavitating flows | 58 |
| Jean Decaix and Eric Goncalves | |
| Hyperbolic systems of conservation laws for compressible multiphase flows based on thermodynamically compatible systems theory | 62 |
| E. Romenski | |
| Heat transfer coefficient of nanofluids in minichannel heat sink | 66 |
| Adi T. Utomo, Ashkan I. T. Zavareh, Heiko Poth, Mohd Wahab, Mohammad Boonie, Phillip T. Robbins, and Andrzej W. Pacek | |
| Numerical and experimental analysis of a flow confined by a wire screen | 70 |
| Herbert Obame Mve, Romuald Rullière, Rémi Goulet, and Philippe Haberschill | |
| Some advances in the characterization of gas and solid mixtures under low pressure conditions | 74 |
| J. R. García-Cascales, R. A. Otón-Martínez, F. Vera-García, S. Amat-Plata, F. J. Sánchez-Velasco, A. Bentaib, N. Meynet, and A. Bleyer | |
| Numerical simulation on gas-cooled closely-packed solid specimens | 78 |
| Yuming Chen and Frederik Arbeiter | |
| Lattice Boltzmann modeling of thermal explosion in dynamic mixtures | 82 |
| Vasily Novozhilov and Conor Byrne | |
| Modeling of low-capillary number segmented flows in microchannels using OpenFOAM | 86 |
| D. A. Hoang, V. van Steijn, L. M. Portela, M. T. Kreutzer, and C. R. Kleijn | |

| | |
|---|-----|
| Simulation of Rayleigh-Taylor instability by Smoothed Particle Hydrodynamics: Advantages and limitations | |
| Mostafa Safdari Shadloo and Mehmet Yildiz | 90 |
| Modelling of bubble rising by smoothed particle hydrodynamics method | |
| N. Tofighi, A. Zainali, and M. Yildiz | 95 |
| Multi-fluid pipe flow model for analysis of wellbore dynamics | |
| B. Krasnopolsky, A. Starostin, and A. Osiptsov | 99 |
| Representation of deformable bubbles by analytically defined shapes in an immersed boundary method | |
| S. Schwarz and J. Fröhlich | 104 |
| Parallelization of the SIP algorithm | |
| F. Dierich and P. A. Nikrityuk | 109 |
| Numerical simulations of the interaction between a settling particle and a rising microbubble | |
| Henrik Ström, Ebrahim Karimi Sibaki, and Srdjan Sasic | 113 |
| Modelling isothermal bubbly-cap flows using two-group averaged bubble number density approach | |
| S. C. P. Cheung, G. H. Yeoh, and J. Y. Tu | 117 |
| Large eddy simulation of atmospheric boundary layer over wind farms using a prescribed boundary layer approach | |
| H. Sarlak, J. N. Sørensen, and R. Mikkelsen | 121 |
| Knowledge based system for runtime controlling of multiscale model of ion-exchange solvent extraction | |
| Piotr Macioł, Leszek Gotfryd, and Andrzej Macioł | 125 |
| Unsteady heat transfer through a longitudinal fin: An investigation into the effects of key parameters | |
| C. Harley | 129 |
| Velocity field around a falling particle | |
| Zdenek Chara, Bohus Kysela, and Pavel Vlasak | 133 |
| Grooved surfaces for laminar drag reduction | |
| J. M. Floryan and H. V. Moradi | 137 |
| Numerical modeling and parameters identification of overland and channel flows in watersheds | |
| K. El Wassifi, A. Ouahsine, H. Smaoui, R. Khiri, and P. Sergent | 141 |

| | |
|---|-----|
| On the Stokes operator associated with the flow through a cascade of profiles Tomáš Neustupa | 145 |
| Buoyancy induced mobility in two-phase debris flow Shiva P. Pudasaini and Stephen A. Miller | 149 |
| Numerical solution of Newtonian fluids flow through the branching channel R. Keslerová, K. Kozel, and P. Louda | 153 |
| Advanced computational single- & multi-fluid flow and heat transfer using HPC systems Djamel Lakehal | 157 |
| Study of motion of flexible eel from the wake of bluff body in a cross flow Vai Kuong Sin, Wen Yue Deng, and Wei Hang Xiao | 161 |
| Compressible gas-solid mixture conservation laws simulations D. Zeidan, A. Slaouti, and R. Touma | 165 |
| Numerical simulation of cavitating tube problems with non-isothermal model E. Goncalves and D. Zeidan | 169 |
| Mathematical modeling of fluid flow in aluminum ladles for degasification with impeller - injector E. Ramos-Gómez, C. González-Rivera, and M. A. Ramírez-Argáez | 173 |
| Mathematical modeling of a gas jet impinging on a two phase bath J. Delgado-Álvarez, Marco A. Ramírez-Argáez, and C. González-Rivera | 177 |
| Modeling of generalized Newtonian fluid flow at a fluid-porous interface Marèt Cloete and Francois Smit | 181 |
| Numerical investigation of the flow around the KVLCC2 hull in static drift motion Oana Marcu and Adrian Lungu | 185 |
| RANS simulation of the planar motion mechanism tests for a VLCC hull Oana Marcu and Dan Constantin Obreja | 189 |
| CFD modeling of PEPT results of particle motion trajectories in a pipe over an obstacle Maryam Ghaffari, Yu-Fen Chang, Boris Balakin, and Alex C. Hoffmann | 193 |
| A real two-phase submarine debris flow and tsunami Shiva P. Pudasaini and Stephen A. Miller | 197 |
| Modeling of UF₆ enrichment with gas centrifuges for nuclear safeguards activities G. Mercurio, P. Peerani, P. Richir, W. Janssens, and G. Eklund | 201 |

| | |
|--|-----|
| An effective approach for designing circular pipes with the Colebrook-White formula Giacomo Viccione and Vincenzo Tibullo | 205 |
| Simulating fluid-structure interaction with SPH Giacomo Viccione, Vittorio Bovolin, and Eugenio Pugliese Carratelli | 209 |
| The energy spectrum for stochastic eddies with gamma distribution Rukiye Kara and Mine Caglar | 213 |
| Deposition capabilities of turbulent particle-laden flow passing an obstacle using experiment and CFD Maryam Ghaffari, Anders Vestvik, Boris Balakin, and Alex C. Hoffmann | 217 |
| Computational modeling of droplet based logic circuits Princia Anandan, Florinda Schembri, and Maide Bucolo | 220 |
| Preface of the "Fifth symposium on recent trends in the numerical solution of differential equations" Luigi Brugnano and Ewa Weinmüller | 224 |
| Numerical methods for nonlinear singular Volterra integral equations Teresa Diogo and Magda Rebelo | 226 |
| The construction of well-conditioned wavelet basis based on quadratic B-splines Dana Černá and Václav Finěk | 230 |
| Active and passive symmetrization of Runge-Kutta Lobatto IIIA methods A. Gorgey and R. P. K Chan | 234 |
| Recent advances on the parallelization of Gauss methods Luigi Brugnano, Felice Iavernaro, and Tiziana Susca | 238 |
| Finite difference approximation of hedging quantities in the Heston model Karel in 't Hout | 242 |
| Numerical solution of two-dimensional integral-algebraic systems using Legendre functions S. Nematy, P. Lima, and Y. Ordokhani | 246 |
| Generalized Adams methods for fractional differential equations Lidia Aceto, Cecilia Magherini, and Paolo Novati | 250 |
| A non-polynomial collocation method for fractional terminal value problems M. L. Morgado, M. Rebelo, and N. J. Ford | 254 |
| Where have all the digits gone? Sarah E. Reimer and Manfred R. Trummer | 258 |

| | |
|---|-----|
| Two-derivative Runge-Kutta methods for differential equations Robert P. K. Chan, Shixiao Wang, and Angela Y. J. Tsai | 262 |
| A smooth solution to singular ODEs G. Vainikko | 267 |
| Preface of the "9th symposium on Clifford analysis and applications" K. Guerlebeck and W. Sproessig | 271 |
| On modified quaternionic analysis, irrotational velocity fields and new applications of the Riesz system in \mathbb{R}^3 Dmitry Bryukhov | 275 |
| An overview on the inverse Fueter mapping theorem Fabrizio Colombo, Irene Sabadini, and Franciscus Sommen | 279 |
| On the structure of generalized Appell sequences of paravector valued homogeneous monogenic polynomials C. Cruz, M. I. Falcão, and H. R. Malonek | 283 |
| Complex dilations, shearings, and rotations Milton Ferreira | 287 |
| An explicit formula for the monogenic Szegő kernel function on 3D spheroids S. Georgiev and J. Morais | 292 |
| Selfdual 2-forms in dimension 4 and their Fischer decomposition Fred Brackx, Hennie De Schepper, Lukáš Krump, and Vladimír Souček | 296 |
| Exactness of the generalized Dolbeault complex for k Dirac operators in the stable rank Lukáš Krump and Tomáš Salač | 300 |
| Branching of monogenic polynomials F. Brackx, H. De Schepper, and R. Lávička | 304 |
| On a special finite element based on holomorphic functions S. Bock, K. Gürlebeck, and D. Legatiuk | 308 |
| Pascal's triangle and other number triangles in Clifford analysis G. Tomaz, M. I. Falcão, and H. R. Malonek | 313 |
| Geometric calculus-based postulates for the derivation and extension of the Maxwell equations Gene E. McClellan | 317 |

| | |
|---|-----|
| The generating function of the Clifford-Gegenbauer polynomials Hendrik De Bie, Dixan Peña Peña, and Frank Sommen | 321 |
| Schur analysis in the slice hypercomplex setting Daniel Alpay, Fabrizio Colombo, and Irene Sabadini | 325 |
| On motion Bernd Schmeikal | 329 |
| A fifth order conformally invariant higher spin operator on the sphere Dalibor Šmíd | 332 |
| Cauchy-type theorems on surfaces F. Sommen | 336 |
| The Fueter theorem by representation theory David Eelbode, Peter Van Lancker, and Vladimír Souček | 340 |
| Preface on the "3rd symposium on generating functions of special numbers and polynomials and their applications" Yilmaz Simsek | 344 |
| A study on the Hurwitz-Lerch zeta function and some identities on the Frobenius-Euler polynomials Veli Kurt | 345 |
| Remarks on the Frobenius-Euler polynomials on the umbral algebra Rahime Dere and Yilmaz Simsek | 348 |
| Some identities on the second kind Bernoulli polynomials of order α and second kind Euler polynomials of order α Burak Kurt | 352 |
| Weber functions and Weierstrass sigma function associated with Hecke operators A. Ahmet Aygunes | 356 |
| Bernoulli polynomial approach to high-order linear differential-difference equations Kübra Erdem and Salih Yalçınbaş | 360 |
| Some formulae for the Zagreb indices of graphs Ismail Naci Cangul, Aysun Yurttas, Muge Togan, and Ahmet Sinan Cevik | 365 |
| Determining the minimal polynomial of $\cos(2\pi/n)$ over \mathbb{Q} with Maple Birsen Ozgur, Aysun Yurttas, and Ismail Naci Cangul | 368 |

| | |
|--|-----|
| Calculation of the minimal polynomial of $2\cos(\pi/n)$ over \mathbb{Q} with Maple Aysun Yurttas, Birsen Ozgur, and Ismail Naci Cangul | 371 |
| On Dedekind modules Mustafa Alkan | 375 |
| A property of convolution sum for divisor functions Daeyeoul Kim and Aeran Kim | 379 |
| A method for obtaining expressions for polynomials based on a composition of generating functions D. V. Kruchinin and V. V. Kruchinin | 383 |
| Algebraic structures of sequences of numbers I-Chiau Huang | 387 |
| Analyzing special parameters over zero-divisor graphs Nihat Akgüneş | 390 |
| Neighborhoods of a class of analytic functions defined by using a differential equation Osman Altintas and Öznur Özkan | 393 |
| Some important physical properties of laminated veneer lumber (Lvl) made from oriental beech and Lombardy poplar Murat Kılıç | 397 |
| A study on Marangoni convection by the variational iteration method Onur Karaoğlu and Galip Oturanç | 402 |
| Relations between Eulerian polynomials and array polynomials Yilmaz Simsek | 407 |
| Preface for the "Symposium on statistics and modeling III" Milan Stehlik | 412 |
| Model selection for logistic regression models Christine Duller | 414 |
| Multivariate "pseudodistributions" as natural extensions of the multivariate normal density pattern - theory Jerzy K. Filus and Lidia Z. Filus | 417 |
| Multivariate "pseudodistributions" pattern - applications Jerzy K. Filus and Lidia Z. Filus | 421 |

| | |
|---|-----|
| Quantitative assessment of scientific quality Harald Heinzl and Philipp Bloching | 424 |
| Möbius transformational high dimensional model representation on multi-way arrays Evrin Korkmaz Özay | 427 |
| A new and easy to use method to evaluate interaction in block designs Karl Moder | 431 |
| Consistency of the empirical quantization error Klaus Pötzelberger | 435 |
| A note on asymptotic uniform confidence bands in a multivariate statistical deconvolution problem Katharina Proksch, Nicolai Bissantz, and Holger Dette | 438 |
| Exact distributions under non-standard model assumptions Wolf-Dieter Richter | 442 |
| Issues on machine learning for prediction of classes among molecular sequences of plants and animals Milan Stehlik, Bhasker Pant, Kumud Pant, and K. R. Pardasani | 446 |
| On simulation of exact tests in Rayleigh and normal families Luboš Střelec and Milan Stehlik | 449 |
| Preface of the “2nd symposium on computer languages, implementations and tools” -SCLIT 2012- Zoran Budimac | 453 |
| Testing framework for embedded languages Dániel Leskó and Máté Tejfel | 454 |
| A g++ extension for supporting nontrivial designated initializers Hemang Mehta, S. J. Balaji, and Dharanipragada Janakiram | 458 |
| Language abstractions for low level optimization techniques Gergely Dévai, Zoltán Gera, and Zoltán Kelemen | 462 |
| Object-file-format description language and its usage in retargetable decompilation Jakub Křoustek and Dušan Kolář | 466 |
| The impact of structural source code changes on software quality Črt Gerlec and Marjan Heričko | 470 |

| | |
|---|-----|
| Classical computation with negation Dragiša Žunić and Pierre Lescanne | 474 |
| Towards an agent-oriented programming language based on Scala Dejan Mitrović, Mirjana Ivanović, and Zoran Budimac | 478 |
| Generalizing the extensibility of a dynamic geometry software Đorđe Herceg, Davorka Radaković, and Dejana Herceg | 482 |
| Extractor of software networks from enriched concrete syntax trees Miloš Savić, Gordana Rakić, Zoran Budimac, and Mirjana Ivanović | 486 |
| Task-specific style verification Norbert Pataki, Tamás Cséri, and Zsolt Szügyi | 490 |
| Preface of the "Symposium on dynamical systems: A framework for robot locomotion" Carla M. A. Pinto and Cristina P. Santos | 494 |
| Sensitivity analysis of multi-objective optimization of CPG parameters for quadruped robot locomotion Miguel Oliveira, Cristina P. Santos, and Lino Costa | 495 |
| Reinforcement learning: Solving two case studies Ana Filipa Duarte, Pedro Silva, and Cristina Peixoto dos Santos | 499 |
| Velocity control of a two DOF walking system José Pontes and Cristina P. Santos | 503 |
| Design and modelling of a 3D compliant leg for Bioloid Mafalda Couto, Cristina Santos, and José Machado | 507 |
| Quadruped robots' modular trajectories: Stability issues Carla M. A. Pinto | 511 |
| Preface of the "Symposium on quantum field theory II" Ralf Hofmann | 516 |
| <i>PT</i> quantum mechanics - Recent results Carl M. Bender | 517 |
| Non-perturbative aspects of hadron structure in QCD Anthony W. Thomas | 522 |
| Non-Abelian strings in supersymmetric Yang-Mills M. Shifman | 525 |

| | |
|---|-----|
| Non-perturbative QCD seen from the property of effective locality T. Grandou | 530 |
| A new, analytic, non-perturbative, gauge-invariant formulation of realistic QCD H. M. Fried, T. Grandou, Y. Gabellini, and Y.-M. Sheu | 535 |
| Classically spinning and isospinning solitons Richard A. Battye and Mareike Haberichter | 536 |
| Pressure of the $O(N)$ model in 1 + 1 dimensions Francesco Giacosa, Stefano Lottini, Elina Seel, and Dominik Smith | 541 |
| Applications of Yang-Mills thermodynamics Markus Schwarz | 545 |
| Fundamental and effective Yang-Mills vertices Ralf Hofmann | 549 |
| Preface of the "Symposium on numerical functional analysis" Allaberen Ashyralyev | 554 |
| Approximate solutions of delay parabolic equations with the Neumann condition Allaberen Ashyralyev and Deniz Ağırseven | 555 |
| Navier-Stokes problems with small parameters in all plane Veli B. Shakhmurov | 559 |
| Separable convolution equations occurring in atmospheric dispersion of pollutants Aida Sahmurova and Veli B. Shakhmurov | 562 |
| Positive solutions for second-order multi-point discrete boundary value problems Johnny Henderson and Rodica Luca | 565 |
| Weighted Markov inequality on several intervals Mehmet Ali Aktürk and Alexey Lukashov | 568 |
| Reidemeister torsion of Hitchin representations of $P\text{Sp}_{2n}(\mathbb{R})$ Yasar Sozen | 570 |
| Stable difference schemes for the fractional Schrödinger differential equation Betül Hıcdurmaz | 574 |
| The positivity of differential operator with nonlocal boundary conditions Nese Nalbant and Yasar Sozen | 578 |

| | |
|--|-----|
| A first order of accuracy stable difference scheme for hyperbolic-elliptic equations Allaberen Ashyralyev, Zeynep Ödemiş Özger, and Faruk Özger | 582 |
| The positivity of the differential operator with periodic conditions Allaberen Ashyralyev and Fatih Sabahattin Tetikoğlu | 586 |
| A second order of accuracy stable implicit difference scheme for a two-phase fluid flow model Abdullah Said Erdogan and Ali Ugur Sazaklioglu | 590 |
| A fourth-order of accuracy difference scheme for the Bitsadze-Samarskii type nonlocal boundary value problem Fatma Songul Ozesenli Tetikoglu | 594 |
| An approximation of stochastic telegraph equations Allaberen Ashyralyev and Muzaffer Akat | 598 |
| Stable difference scheme for nonlocal boundary value hyperbolic problems involving multi-point and integral conditions Necmettin Aggez | 602 |
| On the numerical solution of a two dimensional elliptic-parabolic equation Okan Gercek and Emel Zusi | 606 |
| The structure of fractional spaces generated by the difference operator on the half plane Sema Akturk and Yasar Sozen | 611 |
| Preface of the 2012 interdisciplinary "Symposium on complex systems" Ali Sanayei | 615 |
| From natural philosophy to computation, and back again S. Barry Cooper | 616 |
| Rugged landscapes and timescale distributions in complex systems D. L. Stein and C. M. Newman | 620 |
| Virtual stability: A general complex systems principle? Burton Voorhees | 623 |
| Influence of chaotic dynamics on the performance of evolutionary algorithms - An initial study Roman Senkerik, Donald Davendra, Ivan Zelinka, and Zuzana Oplatkova | 627 |
| The cause of complexity in nature: An analytical and computational approach Klaus Mainzer | 631 |
| Human systems dynamics: Toward a computational model Glenda H. Eoyang | 634 |

| | |
|---|-----|
| Complexity, universality and intermediate degrees | 638 |
| Joost J. Joosten | |
| Cryodynamics can solve the energy problem by stabilizing ITER: A prediction | 642 |
| Otto E. Rössler, Frank Kuske, and Ali Sanayei | |
| Tackling fluid tangles complexity by knot polynomials | 646 |
| Renzo L. Ricca | |
| Mapping unstable manifolds using drifters/floats in a Southern Ocean field campaign | 650 |
| Emily F. Shuckburgh | |
| Controlling complexity | 654 |
| Ivan Zelinka, Lenka Skanderova, Donald D. Davendra, Roman Senkerik, and Zuzana Oplatkova | |
| Self-organization in the movement activity of social insects (Hymenoptera: Formicidae) | 658 |
| Felipe Marcel Neves, Marcio Roberto Pie, and Ricardo Luiz Viana | |
| Stochastic oscillatory dynamics of generalized repressilators | 662 |
| Natalja Strelkova and Mauricio Barahona | |
| Hidden quantum Markov models with one qubit | 667 |
| Ben O'Neill, Tom M. Barlow, Dominik Šafránek, and Almut Beige | |
| 3-dimensional (orthogonal) structural complexity of time-series data using low-order moment analysis | 670 |
| Victor J. Law, Feidhlim T. O'Neill, and Denis P. Dowling | |
| Emulating fire propagation by using cellular nonlinear networks | 674 |
| A. Buscarino, L. Fortuna, M. Frasca, and M. G. Xibilia | |
| Graph algorithm for the simulation of the interaction between particles | 678 |
| Stéphane Despréaux, Roland Hildebrand, and Aude Maignan | |
| Structural algorithm to reservoir reconstruction using passive seismic data (synthetic example) | 682 |
| Tatyana A. Smaglichenko, Igor A. Volodin, Andrei A. Lukyanitsa, Alexander V. Smaglichenko, and Maria K. Sayankina | |
| Engineering applications of a dynamical state feedback chaotification method | 686 |
| Savaş Şahin and Cüneyt Güzeliş | |
| Chaos control in a chaotic system with only one stable equilibrium point | 691 |
| Arturo Buscarino, Luigi Fortuna, Mattia Frasca, Lucia Valentina Gambuzza, and Thanh Viet Pham | |

| | |
|--|-----|
| Preface of the "Symposium on boundary value problems and integral equations with applications" | 695 |
| Pavel Krutitskii | |
| The Dirichlet problem for the diffusion equation in the exterior of non-closed Lipschitz surfaces | 696 |
| P. A. Krutitskii | |
| Singular perturbation of simple Steklov eigenvalues | 700 |
| Serhii Gryshchuk and Massimo Lanza de Cristoforis | |
| What is the complexity of weakly singular integral equations? | 704 |
| Arvet Pedas and Gennadi Vainikko | |
| Smoothing transformation and cubic spline collocation for weakly singular Fredholm integral equations with boundary singularities | 708 |
| Arvet Pedas and Mikk Vikerpuur | |
| Integral representation of voltage in half-plane conductor with crack from surface by D.C. potential difference method | 712 |
| Sasamoto Akira and P. A. Krutitskii | |
| On the convergence of some numerical method for a hypersingular integral equation | 716 |
| Gleb V. Ryzhakov | |
| The singular integral equation method in 3-D boundary value problems and its applications | 720 |
| A. V. Setukha | |
| Efficient vortex method for numerical solution of boundary value problems in aerodynamics | 724 |
| Andrey Aparinov | |
| Wave wall type solution for liquid surface waves | 728 |
| Anton I. Popov | |
| Preface of the "Symposium on recent advances and current research on the difference equations and its applications" | 732 |
| Seifedine Kadry | |
| Solutions behavior of the system of rational difference equations $x_{n+1} = a/x_n + y_n$, $y_{n+1} = by_n/x_n$ | 733 |
| Seifedine Kadry and Chibli Joumaa | |
| A simple condition for uniqueness of the absolutely continuous ergodic measure and its application to economic models | 737 |
| Kenji Sato and Makoto Yano | |
| A BiCGStab2 variant of the IDR(s) method for solving linear equations | 741 |
| Kuniyoshi Abe and Gerard L. G. Sleijpen | |

| | |
|---|-----|
| Differential inclusions and optimization problem on time scales | 745 |
| Francisco Miranda | |
| Preface of the "Third symposium on semigroups of linear operators and applications" | 749 |
| Ludovic Dan Lemle | |
| On the existence of evolution semigroups on L^∞ | 751 |
| Ludovic Dan Lemle and Diana Monica Stoica | |
| Concepts of dichotomy for stochastic skew-evolution semiflows in Hilbert spaces | 755 |
| Diana Stoica and Mihail Megan | |
| Mathematical model for preventive maintenance cycles. Study of case | 759 |
| Adina Budiul-Berghian, Teodor VasIU, and Diana Stoica | |
| Determining the cooling affected volume by adding microcoolers in the steel | 763 |
| Liviu Pascu, Diana Monica Stoica, and Ana Socalici | |
| Analysis on the similarity between steel ladles and hot-water models regarding natural convection phenomena | 767 |
| Pascu Liviu, Putan Adriana, Putan Vasile, and Lascutoni Alina | |
| Preface of the "Symposium on recent developments in modeling and simulation for partial differential equations (PDEs)" | 771 |
| Mohammad Siddique | |
| A solution to neural field equations by a recurrent neural network method | 772 |
| Abir Alharbi | |
| Travelling wave solution of the Kuramoto-Sivashinsky equation: A computational study | 777 |
| A. A. Aderogba, M. Chapwanya, and J. K. Djoko | |
| Preface of the "Symposium on numerical optimization and applications" | 781 |
| Ana I. Pereira and M. Fernanda Costa | |
| Comparing clustering and partitioning strategies | 782 |
| Carlos Afonso, Fábio Ferreira, José Exposto, and Ana I. Pereira | |
| Cell-free layer (CFL) analysis in a glass capillary: Comparison between a manual and automatic method | 786 |
| David Bento, Diana Pinho, Ana I. Pereira, and Rui Lima | |
| Generalized fractional Maxwell model: Parameter estimation of a viscoelastic material | 790 |
| M. Fernanda P. Costa and C. Ribeiro | |

| Decomposition method for simulating the size effect on distribution of stress resultants in beam-type NEMS considering Casimir attraction Rahman Soroush, Masoud Jandaghian, Ahmad Khani, and Fakhrodin Alimoradi | 2415 |
| Comparison between two analytical techniques for simulating the pull-in behavior of nano-structures Fakhrodin Alimoradi, Masoud Jandaghian, Ahmad Khani, and Mohammadamin Moghimi Zand | 2419 |
| Construction and analysis of biochemical networks Michael Binns and Constantinos Theodoropoulos | 2423 |
| Determining biochemical reaction network structures for kinetic polynomial models with uncertain coefficients Gábor Szederkényi, Z. A. Tuza, and Katalin M. Hangos | 2427 |
| Validation of a solid oxide fuel cell model Christina Charalampidou and Ioannis K. Kookos | 2431 |
| Wave equations and reaction-diffusion equations with several nonlinear source terms with critical energy Yu Tao, Tang Liqiang, Liu Bowei, and Xu Runzhang | 2435 |
| On existence and uniqueness of the solution of stationary flow in a profile cascade with natural boundary condition involving Bernoulli's pressure on the outflow Tomáš Neustupa | 2439 |
