

# **2013 13th International Conference on Environment and Electrical Engineering**

**(EEEIC 2013)**

**Wroclaw, Poland  
1-3 November 2013**

**IEEE Catalog Number: CFP1353W-POD  
ISBN: 978-1-4799-2804-0**

## Table of Contents:

Amir Hossein Boojar Arani, Reza Shojaee, Mirhamid Abbaszadeh, <i>Reliability Analysis: A Case Study in Designing Power Distribution System of Tehran Oil Refinery</i> .....	1
Abdul Mutalib Embong , Kian Seng Lee , Hezlina Hashim , Azelin Noor , Raja Ahmad Iskandar Raja Yaakob , Norasyikin Abdul Malik , <i>Assessing the Understanding and Practices of 3R's among the Secondary School Students</i> .....	6
Pierluigi Caramia, Guido Carpinelli, Pietro Varilone, <i>Voltage Stability Analysis in Unbalanced Three-phase Power Systems with Complementarity Constraints</i> .....	12
Nikolay Aleksandrov, Vadim Manusov, Boris Lukutin, <i>Impact of superconducting transformers on electric power system stability</i> .....	18
Hamed Ahmadi, Mojtaba Khanabadi, Hassan Ghasemi, <i>Transmission System Reconfiguration for Congestion Management Ensuring Transient and Voltage Stability</i> .....	22
Hamed Ahmadi, Jose Marti, <i>Power Flow Formulation Based on a Mixed-Linear and Nonlinear System of Equations</i> .....	27
Nikolay Djagarov, Milen Bonev, Zhivko Grozdev, <i>Induction Drive Starting by Part-Winding in Autonomous Power System</i> .....	33
Jacek Wasilewski, <i>Steady-state Modelling Issues of Smart Hybrid Energy Microsystems</i> .....	38
Jindrich Stuchly, Jakub Vramba, Stanislav Misak, <i>Monitoring of Hybrid System Using Labview</i> .....	42
Jindrich Stuchly, Jakub Vramba, <i>Analyses of Power Quality and Voltage Variation of Photovoltaic Power Plant connected into 22 kV Public Grid</i> .....	48
Yu Xiang, J.F.G. Cobben, <i>Probabilistic Analysis on Measurement Timescale in Medium Voltage Grid</i> .....	52
Vikas Singh, Vivek Vijay, M. Bhatt, D. K. Chaturvedi, <i>Generalized Neural Network Methodology For Short Term Solar Power Forecasting</i> .....	58
Nikita Tomin, Victor Kurbatsky, Christian Rehtanz, <i>An Intelligent Security Alert System for Power System Pre-Emergency Control</i> .....	63
Miroslav Prymek, Ales Horak, Lukas Prokop, Stanislav Misak, <i>Integrating Renewable Energy Sources Using a Smart Household System</i> .....	68

Madaci Mansour, Kerdoun Djallel, A. Boumassata, N. Cherfia, <i>Power active filter system implementation for photovoltaic generation system (PVGS) used in standing alone zones</i> .....	74
Marián Uher, Stanislav Misak, <i>Analysis of feedback effects of the distribution grid with renewable resources</i> .....	80
Silence Sithole, Nhlanhla Mbuli, Jan Harm Pretorius, <i>Voltage Regulation in the Douglas Area Using Shunt Capacitor Banks and Controllable Shunt Reactors</i> .....	85
Jack Mathebula, Nhlanhla Mbuli, Njoroje Gitau, <i>Simplified Negative Load Based Approach versus Full HVDC Modeling in Assessing the HVDC Options for the Cape Network</i> .....	91
Tamer Fetouh, Tamer A. Kawady, H. Shaaban, Abdallah Elsherif, <i>Impact of the New Gabl El-Zite Wind Farm Addition on the Egyptian Power System Stability</i> .....	96
Amir Ameli, Mohammadreza Maddipo, Amir Ahmadifar, Alireza Shahsavari, Heidar Ali Shayanfar, <i>Multi-Objective DG Planning Considering Operational and Economic Viewpoints</i> .....	104
Petr Rozehnal, Petr Krejčí, <i>Justified and unjustified complaints on the quality of electricity in the Czech Republic</i> .....	110
Alireza Shahsavari, Alireza Fereidunian, Amir Ameli, Seyed Mahdi Mazhari, Hamid Lesani, <i>A Healer Reinforcement Approach to Smart Distribution Grids by Improving Fault Location Function in FLISR</i> .....	114
Emilio Rebollo, Carlos Platero, Francisco Blazquez, Francisco R. Blázquez, <i>AVR adjustment of Synchronous Generators in Weak Grids under Faulty Conditions</i> .....	120
Andras Futo, Istvan Varjasi, <i>Compensation of discontinuous conduction in single phase grid connected PWM inverters</i> .....	126
Mahmood Sadeghi, Mohsen Kalantar, <i>Allocation of Solar Units to Reduce Annual Costs of the Distribution System</i> .....	132
Amilcar Rodrigues Baptista, Sílvio JPS Mariano, Rosario Calado, <i>Sustainable Energy Systems: Mini-Production with Solar Photovoltaic Energy in Portugal</i> .....	138
Ali Parizad, <i>Dynamic Stability Analysis for Damavand Power Plant Considering PMS Functions by DIGSILENT Software</i> .....	145
Antonio Bracale, Guido Carpinelli, Pierluigi Caramia, Luisa Alfieri, <i>Advanced Methods for the Assessment of Time Varying Waveform Distortions Caused by Wind Turbine Systems. Part II: Numerical Applications</i> .....	156
Xiaobo Zhang, Zhang Baohui, <i>Experimental Study on Storage Device with Relay Protection in Microgrid Mode Switching Process</i> .....	162
Pavel Hering, Jiří Mošna, Eduard Janeček, David Hrycej, <i>Optimal Scheduling of a Pumped-Storage Hydro Power Plant Operation</i> .....	166
Dejan Tanikic, Vladimir Despotovic, Dalibor Djenadic, Dragan Milivojevic, Miodrag Manic, <i>The artificial neural network based system for validation of thermocouples used in biomedicine</i> .....	172

Antonio Bracale, Pierluigi Caramia, Guido Carpinelli, Luisa Alfieri, <i>Advanced Methods for the Assessment of Time Varying Waveform Distortions Caused by Wind Turbine Systems. Part I: Theoretical Aspects</i> .....	176
Masoud Etezadi Nezhad, Behzad Asaei, Shahrokh Farhangi, <i>Modified Analytical Solution for Tracking Photovoltaic Module Maximum Power Point Under Partial Shading Condition</i> .....	182
Javier Serrano Gonzalez, Manuel Burgos Payan, Jesus Riquelme Santos, <i>Optimum Wind Turbines Operation for Minimizing Wake Effect Losses in Offshore Wind Farms</i> .....	188
Sergey Yuferev, Andrey Pazderin, <i>The Second Derivatives of the Hessian Matrix Influence on the Convergence of the Power Flow Calculations</i> .....	193
Himanshu Joshi, Prashant Rajpal, Subodh Kale, Bansidhar Kushare, Sharad Dhamal, <i>Effect of Clipping Pressure For Low Current Duties In Arc Assist Circuit Breakers</i> .....	196
Seyed Mohammad Sadat Kiaee, Hossein Askarian Abianeh, Seyed Hossein Hossei, Mehrdad Abedi, <i>Energy Cost Management of Domestic Customers in Real-Time Electricity Pricing Environments</i> .....	201
Hamed Jafari Kaleybar, Siamak Farshad, Mehdi Asadi, Alireza Jalilian, <i>Multifunctional Control Strategy of Half-Bridge based Railway Power Quality Conditioner for Traction System</i> .....	207
Alexander Tavlintsev, Andrey Pazderin, Olga Malozemova, Pavel Chusovitin, <i>Identification of Static Polynomial Load Model Based on Remote Metering Systems Information</i> .....	213
Wanderson Araujo, Márcio Reis, Wesley Pacheco Calixto, Cleber Ganzaroli, Ghunter Viajante, Aylton Alves, Augusto Silveira, <i>Firing Angles Optimization for Switched Reluctance Generator using Genetic Algorithms</i> .....	217
Cleber Ganzaroli, Wesley Pacheco Calixto, Márcio Reis, Wanderson Araujo, Bernardo Alvarenga, Wander Silva, Elder Domingues, <i>Heuristic and Deterministic Strategies applied on a PID Controller Tuning for Speed Control of a DC Motor</i> .....	223
Francisco R. Blázquez, Emilio Rebollo, Carlos A. Platero, <i>Evaluation of the Grounding Circuit Measurements for Stator Ground-Fault Location of Synchronous Generators</i> .....	229
Mahdi Pourakbari Kasmaei, Marcos Delgado, Marcos Julio Rider Flores, <i>A Modified Branch and Bound Algorithm to Solve the Transmission Expansion Planning Problem</i> .....	234
Helena Raclavska, Jana Kucharova, Konstantin Raclavsky, <i>The character of refractory organic matter in domestic furnaces</i> .....	239
Francisco R. Blázquez, Emilio Rebollo, Carlos A. Platero, María Aranda, <i>Influence of Rotor Capacitance in On-Line Rotor Ground Fault Location Method for Synchronous Machines with Static Excitation</i> .....	244
Francisco R. Blázquez, Emilio Rebollo, Carlos A. Platero, Rubén Caballero, <i>Improvements to Generator Differential Protection based on the Criterion of Signs of the DC-Component</i> .....	250
Tobias Klueter, Jonathan Wulff, Frank Jenau, Daniel Wienold, <i>Evaluation of Surface- and Corona Discharges at DC Voltage</i> .....	255

Navid Yektay, Ali Darudi, Mohammad Hossein Javidi, <i>An Optimal Power Flow Control Method for Grid-Connected Inverters</i> .....	260
Federica Mangiatordi, Emiliano Pallotti, Paolo Del Vecchio, Flavio Carnevale, <i>A Non Cooperative Game Theoretic Approach for Energy Management in MV Grid</i> .....	266
José Pombo, Sílvio JPS Mariano, Rosario Calado, <i>Power System Stabilizer Design Based on Output Optimal Control Techniques</i> .....	272
Mohammad Ebrahim Zarei, Behzad Asaei, <i>A Simple Predictive Direct Current Control for Grid Side Converter of DFIG Under Ideal and Non-ideal Supply Voltage</i> .....	278
Luigi Martirano, Maria Carmen Falvo, Danilo Sbordon, Ilaria Bertini, Biagio Di Pietra, Pablo Arboleya, Cristina Gonzalez-Moran, Manuel Coto, <i>Zero Network-Impact Buildings and Smart Storage Systems in Micro-Grids</i> .....	284
Rui Mendes, Rosario Calado, Sílvio JPS Mariano, <i>Performance Analysis of Linear Switched Reluctance Generator for Different Teeth Shapes. The Generation Quality Factor</i> . ....	290
Amir Sayahan, Behzad Asaei, <i>An Intelligent Alternator Control Approach for Fuel Consumption Reduction</i> .....	296
Mohammad Ebrahim Zarei, Behzad Asaei, Masoud Etezadi Nezhad, <i>Integration of DFIG based wind Turbine and PV plant in order to reduce the number of Power Converters</i> .....	301
Hadis Pourasghar Khomami, Mohammad Hossein Javidi, <i>An Efficient Home Energy Management System for Automated Residential Demand Response</i> .....	307
Shideh Rezaeifar, Ali Darudi, Mohammad Hossein Javidi, <i>Partial mutual information based algorithm for input variable selection for time series forecasting</i> .....	313
Ali Darudi, Navid Yektay, Mohammad Hossein Javidi, <i>Bidding Behavior Analysis of Generating Companies in Iran's Electricity Market</i> .....	319
Jaya-Bharata Reddy, Deepak Gollu, Dusmanta Mohanta, <i>Hardware Implementation of Grid Connected PV System With Energy Management Scheme</i> .....	324
Adjeroud Faiza, Djahli Farid, Mayouf Abdelhalim, Thierry Devers, <i>New Genetic-Fuzzy Controller for Improving Stability of Superconducting Generator with High Response Excitation in a SMIB Power System</i> .....	330
Adjeroud Faiza, Djahli Farid, Mayouf Abdelhalim, Thierry Devers, <i>Multi-machine Fuzzy Logic Excitation and Governor Stabilizers Design Using Genetic Algorithms</i> .....	336
Maryam Mohiti, Zahra Mahmoodzadeh, Mehdi Vakilian, <i>A Hybrid Micro Grid Islanding Detection Method</i> .....	342
Radomir Gono, Martin Novák, Miroslava Gono, <i>Utilization of Small Hydropower</i> .....	348
Nedim Tutkun, Ender Sinan San, <i>Optimal power scheduling of an off-grid renewable hybrid system used for heating and lighting in a typical residential house</i> .....	352
