

**2013 IEEE MTT-S International
Microwave Workshop Series on RF
and Wireless Technologies for
Biomedical and Healthcare
Applications**

(IMWS-BIO 2013)

**Singapore
9-11 December 2013**

**IEEE Catalog Number: CFP1315U-POD
ISBN: 978-1-4673-6094-4**

Table of content

An Improved Wireless Power Transfer System with Adaptive Technique for Implantable Biomedical Devices.....	1
Design of an Integrated Resonant Structure for Wireless Power Transfer and Data Telemetry.....	4
Improvement of Power Output for Efficient Wireless Power Transfer by Using a Stacked Coil Array.....	7
CMOS Rectifier for Wireless Power Transmission Using Multiplier Configuration.....	10
Electric Near-Field Coupling for Wireless Power Transfer in Biomedical applications.....	13
Efficient Low-Frequency Integral Equation Solver for Wireless Power Transfer Modeling.....	16
Energy and Thermal Distribution under the Skin during Ultrasound Power Transfer.....	19
RF Technology for Human MRI at 10.5T.....	22
Simulation-driven design and optimization of RF coil arrays for MRI.....	25
Multi-Channel Transmit/Receive RF Coil Arrays for Cardiac MRI at Ultrahigh Fields: Design, Validation and Clinical Application.....	28
Theory and Simulation of an Orthogonal-Coil Directional Beam Antenna for Biomedical Applications.....	31
Manipulation the near field with wire metamaterials.....	34
A Highly Sensitive Glucose Biosensor Based on a Microstrip Ring Resonator.....	37
Supervision and Control of Medical Sterilization Processes Utilizing the Multipole Resonance Probe...62	
A Millimeter-Wave based Measuring Method for the Differentiation of Atherosclerotic Plaques.....	43
CMUT Ultrasonic Power Link Front-end for Wireless Power Transfer Deep in Body.....	47
Analysis of Inductive Coupling Coils for Extending Distances of Efficient Wireless Power Transmission.....	50
A hybrid sodium/proton double-resonant transceiver array for 9.4T MRI.....	53
In-home Monitoring Sensor Using Stepped-FM UWB-IR.....	56
Miniaturized Slot PIFA Antenna for Tripleband Implantable Biomedical Applications.....	59

Wirelessly Powered and Controlled, Implantable, Multi-channel, Multi-wavelength Optogenetic Stimulator.....	62
Detection and Localization of Brain Strokes in Realistic 3-D Human Head Phantom.....	67
Preliminary Experimental Investigations on Near Field Breast Cancer Thermotherapy.....	68
Stepped-FM UWB Sensor System for Health-care Support.....	71
A low Power, 900MHz fractional-N synthesizer with Quadrature outputs in 0.13um CMOS.....	74
Implementation of a Dual Band Body Sensor Node.....	77
Efficient Simulation of Graphene Antennas for Biomedical Applications.....	80
A 5.15-5.825 GHz high-gain and low-noise CMOS down-conversion mixer with low-power for WLAN 802.11a.....	83
A 0.5V 16nW 8.08-ENOB SAR ADC for Ultra-Low Power Sensor Applications.....	86
RFDAC for Medical Body Area Network Applications.....	89
Characterizations of Silicon Nanowires (SiNWs) Embedded NEMS Sensors and for Potential Biomedical Applications.....	94
Implantable Stimulator for Biomedical Applications.....	95
A Novel Rectifier Circuit Operating at Dual-Frequencies of 1.8 GHz and 2.4 GHz.....	98
Study of Wireless Power Transfer Link with Metallic Plates.....	101
Ultra Wideband Antenna for Portable Brain Stroke Diagnostic System.....	103
Single-Fed Dual-Band Dual-Polarized U-Slot Patch Antenna.....	106
Numerical Analysis of the Communication Channel Path Loss at the THz Band inside the Fat Tissue.....	109
Why Headache Using GSM Cellular Phones?.....	112
Magnetically mediated thermoacoustic imaging and technical considerations on its coil design.....	116
Effects of Dielectric Values of Human Eye Models on Specific Absorption Rate Following RF Exposure.....	119
An Overview of Cancer Treatment by Terahertz Radiation.....	122
Continuous Wave Simulations on the Propagation of Electromagnetic Fields through the Human Head.....	125
An Investigation of Microwave Ablation for Bone Thermal Drilling.....	128

Optimization of geometry for a dual-row MRI array at 400 MHz.....	130
Non-contact Detection of Doppler Bio-signals Based on Gradient Decent and Extended DACM Algorithms.....	133
Design of High-Efficiency Inductive Power Transfer Coils for Biomedical Implants.....	136
Thermoacoustic Imaging and Spectroscopy for Breast Cancer Detection Applications.....	139
Microwave Systems for Head Imaging: Challenges and Recent Developments.....	142
A 100 Mb/s 0.36 mW Injection Locked Clock and Data Recovery Circuit for WBAN Transceivers.....	145
Remote Powered Medical Implants.....	148
An Ultra low-Power Capacitor-Less LDO with high PSR.....	151
Radar-Based Health Monitoring.....	154
Wireless Intelligent Sensor System for Fetal Heart Rate Tracing through Body Sound Monitoring on a Pregnant Woman.....	157
Noncontact Heart Rate Measurement using a 24 GHz Doppler Radar.....	160
Noise and Sensitivity Analysis of Harmonic Radar System for Vital Sign Detection.....	163
BAN Over-The-Air Testing Using an Arm-Swinging Dynamic Phantom.....	166
Antennas For Medical Implant Applications Operating In The MICS Band.....	169
Latex based Near-Endfire Wearable Antenna backed by AMC Surface.....	172
Electromagnetic Modelling and Measurement of Antennas for Wireless Brain-Machine Interface Systems.....	175
Matching Network to Improve the Transmission Level of Capacitive Intra-Body Communication (IBC) Channels.....	178
An Inductive Biomedical Communication Processing Chain.....	181
Feasibility Study on Ambient RF Energy Harvesting for Wireless Sensor Network.....	184
A Millimeter Tapered Slot Antenna Fed by SIW with Broadband and High Gain.....	187
Dual band low profile antenna for body centric communications with a split ring resonator.....	190
Wearable Finger Ring Type Antenna Made of Fabric Cloth for BAN Use at UHF and ISM Bands.....	193
Path-Loss Modeling for On-body UWB and Off-body WiMax Combined-Channel.....	196
A compacted dual linearly polarization wideband feed for parabolic reflector antenna.....	199

Propagation Characteristics of MHz-Band RF Signals for Intra-body Communication.....	202
Doppler Bio-signal detection Based Time-Domain Hand Gesture Recognition.....	206
Design of the directional horn-shaped planar antenna used for wireless mouse online test.....	209
Simple Octa-band Monopole Antenna with Rectangular-loop-loaded Meandered Line for LTE/WWAN Smartphone Applications.....	212
Pattern-reconfigurable antenna for on-body communication.....	216
UWB Circularly Polarized Planar Antenna on Flexible Substrate.....	219
Chipless RFID Tag Based on Space Angle Information.....	222
Electrically Small RF Coil Arrays for Medical & Wireless Power Applications.....	225
Cross Slot Antenna with Very Low Back Radiation for Various Wireless Communications at 5.8GHz ISM Band.....	228
Antenna Polarization Mismatch in BAN Communications.....	231
Novel Miniaturized Bandpass Filter with Wide Stopband Using Spiral Resonator.....	234
Dual-Band Frequency Selective Structure With Large Frequency Band Ratio.....	237
A Miniaturized Implantable Loop Antenna at MICS and ISM Bands for Biomedical Applications.....	240
RF-Activated Surface Standing Acoustic Wave For On-Chip Controllably Aligning of Bio-microparticles.....	243
FR4 PCB Grid Array Antenna for Millimeter-Wave 5G Mobile Communications.....	246
A W Band High Order Frequency Mixer Based on Avalanche Diode.....	249
Development of a 94GHz Passive Millimeter Wave Imaging System for Target Detection in Haze and Smoke.....	252
Low-profile Capacitive Fed Air-supported Microstrip Antenna at UHF Band for Biomedical Application.....	255
A Wideband 150GHz Antenna by 3D-TSV based Composite Right/Left Handed Transmission Line for Sub-THz Biomedical Imaging.....	258
Linearized Asymmetrical GaN Doherty Power Amplifier with 100MHz instantaneous bandwidth at 3.5GHz.....	261
A Broad Beam-width Microstrip Cross Antenna Design for Wide Scan Angle Phased Array.....	264
A Compact Dual-Band Meander-line Antenna for Biomedical Applications.....	267

Analysis and Design of a 250-MHz Gm-C Filter with Discrete Tuning Scheme in 0.18- μ m CMOS for UWB Receiver.....	292
Design of UWB Bandpass Filter with Dual Notched Bands Based on E-shaped Resonator.....	273
Fast Fill-in of Impedance Matrix in the Accurate Subentire Domain Basis Function Method for Large-Scale Planar Periodic Structures.....	276
Stub-Loaded Printed Antenna with a Ground Plane and Electromagnetically Coupled Feed for 2.45GHz Body Area Networks.....	279
Microwave based diagnostics and treatment in practice.....	284
Millimeter Wave Imaging Using SAR Modeling.....	285
Microwave Near-Field Effects and Characterizations for Noninvasive Breast Cancer Treatment.....	28:
Neural Signal Regeneration and Motor Function Rebuilding of Paralyzed Limbs Based on Principles of Communication Incorporated with Microwave Transmission System.....	291
A Fully-Integrated Low-Power High-Coexistence 2.4-GHz ZigBee Transceiver for Biomedical Applications.....	294
Wireless sensor capsule for bioreactors.....	297
A Fully Integrated 3 – 5 GHz UWB RF Transceiver for WBAN Applications.....	300
Digital System Design for Wireless Bionic neural link.....	303
Fully-Additive Printed RFID on a Plastic Film.....	306
An LSK Demodulator for Sub-Scalp EEG Recording.....	309
Noncontact Measurement of Cardiopulmonary Movements: A Review of System Architectures and the Path to Micro-Radars.....	314
A Miniature Device Aiming for Long-term Surveillance of Nasopharynx Cancer.....	315
A Non-Invasive Lung Monitoring Sensor with Integrated Body-Area Network.....	318
Physical Human Phantoms for Evaluation of Implantable Antennas.....	321
Balun's Effect on the Measurement of Transmission Characteristics for Intrabody Communication Channel.....	325
Making a Telemetry System Implantable: Challenges and Opportunities in Antenna Design.....	328
A Helical Folded Dipole Antenna for Medical Implant Communication Applications.....	331

Fibrous and Flexible Supercapacitors with a hierarchical nanostructure comprised of carbon spheres and grapheme.....	336
Fast, Compact and Label-Free Electrical Detection of Live and Dead Single Cells.....	338
Commercial Development of RF Medical Implantable Devices.....	341
Implantable Intraocular Pressure Monitoring Systems: Design Considerations.....	344
Temperature Pattern Control Within A Monopole Array Used for Interstitial Microwave Hyperthermia.....	347
Recent Wireless Body Sensors: Design and Implementation.....	350
Data Rate Enhancement Method for Body Channel Frequency Selective Digital Transmission Scheme.....	353
Microwave-acoustic correlated imaging and circuit modelling of biological tissues.....	358
Tradeoff Study of Microwave Imaging for Biomedical Application.....	359
Combining Microwave Imaging and Diffusion Optical Tomography for breast tumor detection.....	362
Enhancement Factor for Electrical Near-Field on Perturbation Slit Nano Structure with Peak Resonance at 30 THz.....	365
MEMS/NEMS Based Enabling Technologies for Self-Sustained Wireless Sensor Nodes.....	368
Effective Material Parameter Calculation for Layered Metamaterial Structures and its Application in Antenna Design.....	371
Numerical Assessment Method for Implantable Cardiac Pacemaker EMI Triggered by 10MHz-band Wireless Power Transfer Coils.....	376
