2013 IEEE Conference on Clean Energy and Technology

(CEAT 2013)

Langkawi, Malaysia
18-20 November 2013

IEEE Catalog Number: CFP1383P-POD
ISBN: 978-1-4799-3239-9

	PAPER TITLE	PAGE
1	A Role of Ultrasonic Waves on Oil Viscosity Changes in Porous Media	1
2	Optimization of a Reliable Combined Heat and Power Microgrid Considered Uncertainty	7
3	Butterworth, Malaysia Wind Energy Potential Assessment	13
4	Synthesis and characterization of carbon-based catalyst derived from seaweed	19
5	Ocean Thermal Energy Conversion: The Promise of a Clean Future	23
6	Enhancing Landfill Gas Production by Methanogenic Sand Layer	27
7	A Harmonic Suppression Circularly Polarized Patch Antenna for an RF Ambient Energy Harvesting System	33
8	Distributed Photovoltaic Generator Performing Reactive Power Compensation	38
9	Progress on Development of a Lab-scale Flapping-Type Tidal Energy Harvesting System in KIOST	42
10	Assessment of Impregnated Paper and Epoxy Resin Materials through Simulated PD Detection	48
11	Active Islanding Detection for Synchronous Generators Using Speed Disturbance Injection Technique	54
12	Optimization of Wind Turbine Operation in an Islanded Microgrid	60
13	SVC Damping Controller Design Based on Firefly Optimization Algorithm in Multi Machine Power System	66
14	Sensorless Speed Estimation of Induction Motor Based on Feed-Forward Neural Network Algorithm	71
15	Multi-Agent System Framework for Rural Indian Microgrids	76
16	Economic Dispatch in a Microgrid through an Iterated-Based Algorithm	82
17	An Iterated-Based Optimization Method for Economic Dispatch in Power System	88
18	Techno-Economic Analysis of On-Grid Smart House in Southern Norway	93
19	DC-DC Interleaved Boost Converter using FPGA	98
20	Performance Comparison of Dual-Axis Solar Tracker vs Static Solar System in Malaysia	102
21	Improvement of Hill-Climbing Method by Constraining Voltage Operating Point	108
22	Fully Electronic Tap Changer Control	114
23	Comparative Study Of Super-Capcitor And Battery As Storage Energy In Three Phase System	118
24	Pulse-width Control Scheme for Fixed-Frequency ZVS DC-DC Converter with Active Auxiliary Circuit	124
25	Comparison between open- and closed-loop trackers of a solar photovoltaic system	128
26	Global MPPT of Solar PV Modules using a Dynamic PSO Algorithm under Partial Shading Conditions	134
27	A Neighbor-Chain Updating Approach for Multi-Objective Reconfiguration of Electrical System	140
28	Overview of Grid connected doubly fed induction generator power quality	146
29	Assessment of Wind and Solar Energy Potentials in Malaysia	152

30	Thermal Performance improvement of solar thermal power generation	158
31	Mathematical Modelling of a finned bi-fluid type photovoltaic/thermal (PV/T) solar collector	163
32	A low-cost Photovoltaic (PV) array Monitoring System	169
33	Design of Data Logger with Multiple SD Cards	175
34	Year round performance evaluation and parametric study of thin film solar photovoltaic module	181
35	Development of Dye-Sensitized Solar Cell (DSSC) Using Patterned Indium Tin Oxide (ITO) Glass	187
36	Outdoor performance of solar PV/T air system	192
37	Digital based Piecewise Linear Controller for a Single-phase PWM Inverter	198
38	Performance Comparison of Single Winding and Double Winding Self-excited Induction Generators	202
39	Technical review on biomass conversion processes into required energy form	208
40	Kuala Terengganu, Malaysia Wind Energy Assessment	214
41	Design Investigation of Three Phase HEFSM with Outer-Rotor Configuration	220
42	Design Study of Single and Three-Phase Synchronous Generator Using J-MAG Designer	226
43	Fossil Fuel Energy Scenario in Malaysia-Prospect of Indigenous Renewable Biomass and Coal Resources	232
44	Preliminary Architectonic Design for a Smart Solar-Powered UAV	238
45	Hybrid Vibration Energy Harvester Based On Piezoelectric and Electromagnetic Transduction Mechanism	243
46	A Smart Charging Station for EVs with Evaluation of Different Energy Storage Technologies	248
47	Changes in Fault Current Levels due to Renewable Embedded Generation in a Distribution Network	254
48	Integration of Dual Intelligent Algorithms in Shunt Active Power Filter	259
49	Design and Analysis for High Performance Synchronized Inverter with PWM Power Control	265
50	DC-link Free Grid Integration of Bi-Directional Inductive Power Transfer Systems	271
51	Three phase transformerless grid-connected photovoltaic inverter to reduce leakage currents	277
52	Performance Studies of Three-Phase Cascaded H-Bridge and Diode-Clamped Multilevel inverters	281
53	Comparison of ANN and P&O MPPT Methods for PV Applications under Changing Solar Irradiation	287
54	Impact of Integration of Solar and Wind Power on Small Signal Stability using Wavelet Transform	293
55	Characterization of Micro-cyclone Combustion for Micropower Generator	299
56	Applying the CHP Method on Small-Scale On-site Power Generation	303
57	Effect On Insulation of Photovoltaic Thermal Water Collector (PVTw)	307
58	A CFD study of turbulent heat transfer and fluid flow through the channel with semicircle rib	312
59	Investigation of Field Excitation Flux Switching Motor with Segmental Rotor	317
60	Voltage Balancing in DC Link Capacitor for Seven Level Cascaded Multilevel Inverter	323

61	An Intelligent Speed Controller for Indirect Field-Oriented Controlled Induction Motor Drives	327
62	Characterization of Wet Impregnation Method for Catalytic Microcombustor using Palladium	332
63	Toward the automation of model transformation for optimized Building Energy Management	336
64	Flexible Power Consumption Management using Q learning techniques in a Smart Home	342
65	A Modified ANN Algorithm to Control SAPF for Current Harmonics Reduction	348
66	Simulation of Single-phase Shunt APF with Fuzzy Logic Controller	353
67	Functional Design of a Parallel Pneumatic Drive Train for Regenerative Braking	358
68	Performance Analysis of Crystalline and Thin-Film Technology under Various Installation Conditions	362
69	Numerical Optimization of SiNx antireflection coatings for crystalline silicon on glass solar cells	368
70	The effect of the SiN optical constants on the performances of a new antireflection coating concept	373
71	Photovoltaic Remote Monitoring System Based on GSM	379
72	Critical factors affecting retrofitted roof-mounted photovoltaic arrays: Malaysian case study	384
73	A Review of Single Phase Power Factor Correction AC-DC Converters	389
74	A Loosely Winding Contactless Transformer With Series Resonant Converter	395
75	Modeling of Electric Vehicle Fast Charging Station and Impact on Network Voltage	399
76	Dynamic Performance Improvement of Wind Power Integrated Grid using TCP/IP Communication Network	405
77	Performance Evaluation of a New Hybrid Islanding Detection Method for a Wind Based DG	411
78	A Novel Coordinated Control Strategy of PV/BES System Considering Power Smoothing	416
79	Development of On-Off Duty Cycle Control with Zero Computational Algorithm Li Ion Battery Charger	422
80	Comparison of Capacity Design of Lead Acid Battery Bank and Hybrid Energy Storage Bank	427
81	formation of carbonates and PH variations in conditions representative of deep saline aquifers	432
82	Microcontroller Based Solar Battery Charging System with MPPT Features at Low Irradiance Condition	437
83	PEM fuel cell model parameters optimization using modified particle swarm optimization algorithm	442
84	Different Materials Coating Effect on Responsivity of Si UV Photo Detector	446
85	Potential Buffer Layers For Cu2ZnSnS4 (CZTS) Solar Cells from Numerical Analysis	450
86	Modelling of operating temperature for thin film modules for free-standing systems in Malaysia	455
87	Solar cell parameters extraction using particle swarm optimization algorithm	461

88	Effect of Substrate Temperature on the Growth of CZTS Thin Films by RF Magnetron Sputtering	466
89	High Performance InxGa1-xN Tandem Solar Cells Designed from Numerical Analysis	469
90	Potable water production by using triangular solar distillation systems in Malaysia	473
91	The Effect of Input Current Ripple on the Photovoltaic Panel Efficiency	478
92	Control of Power Generated from Linear Generator	482
93	Analysis and Modeling of Indirect Field-Oriented Control for PWM-driven Induction Motor Drives	488
94	ABASH - Android Based Smart Home Monitoring using Wireless Sensors	494
95	Energy and Environmental Audit for Bangunan Menara Seri Wilayah and Bangunan Kastam, Putrajaya	500
96	Development of a New Modeling Circuit for the Remote Terminal Unit (RTU) with GSM Communication	506
