

2013 IEEE Bipolar/BiCMOS Circuits and Technology Meeting (BCTM 2013)

**Bordeaux, France
30 September – 3 October 2013**

**IEEE Catalog Number: CFP13BIP-POD
ISBN: 978-1-4799-0128-9**

TABLE of CONTENTS

Investigation of Electronic Noise in THz SiGe HBTs by Microscopic Simulation (Invited)	1
Christoph Jungemann and Sung-Min Hong	
Investigation of power and linearity performance for low- and high-voltage SiGe HBTs	9
T. V. Dinh, T. Vanhoucke, E. Gridelet, R. Pijper, and D. B. M. Klaassen	
Optimization of Horizontal Current Bipolar Transistor (HCBT) Technology Parameters for Linearity in RF Mixer	13
T. Suligoj, M. Koričić, J. Žilak, H. Mochizuki, S. Morita, K. Shinomura, and H. Imai	
Study of mutual and self-thermal resistance in 90nm SiGe HBTs	17
Vibhor Jain, Bjorn Zetterlund, Peng Cheng, Renata A. Camillo-Castillo, John J. Pekarik, James W. Adkisson, Qizhi Liu, Peter B. Gray, Vikas Kaushal, Thomas Kessler, and David Hareme	
Local Extraction of Base and Thermal Resistance of Bipolar Transistors (Student)	21
Robert Setekera, Ramses van der Toorn, and Willy Kloosterman	
Automated Transit Time and Transfer Current Extraction for Single Transistor Geometries (Student)	25
T. Rosenbaum, M. Schrötter, and A. Pawlak	
A Scalable Model for Temperature Dependent Thermal Resistance of SiGe HBTs (Student)	29
Amit Kumar Sahoo, Sébastien Fregonese, Mario Weiß, Cristell Maneux and Thomas Zimmer	
Advanced Extraction Procedure for Parasitic Collector Series Resistance Contributions in High-Speed BiCMOS Technologies (Student)	33
F. Stein, N. Derrier, C. Maueux, and D. Celi	
An X-Band Radar Receiver with Bandwidth Reduction Implemented in 0.13μm SiGe Technology	37
Jianjun Yu, Desheng Ma, Xueyang Geng, Feng Zhao, Joseph Cali, Fa Foster Dai, Yuan Yao, Yuehai Jin, J. David Irwin, Richard C. Jaeger, and Andre Aklian	
A Direct Digital Synthesis Based Chirp Radar Transmitter in 0.13μm SiGe Technology	41
Jianjun Yu, Joseph Cali, Feng Zhao, Fa Foster Dai, Xin Jin, Michael Pukish, Yuehai Jin, Zachary Hubbard, J. David Irwin, Richard C. Jaeger, and Andre Aklian	
A 57 GHz Programmable Frequency Divider for Fractional Frequency Synthesizers (Student)	45
G. Hasenaecker, M. van Delden, N. Pohl, K. Aufinger, and T. Musch	
Microwave/mm-Wave Imaging Systems (Invited)	49
Sherif Sayed Ahmed	
10 Bit and 12 Bit Data Conversion Achievements at Microwave Frequencies on 200GHz SiGeC (Bipolar) and 120 GHz 0.18μm BiCMOS Technologies (Invited)	53
Marc Wingender, Francois Bore, Nicolas Chantier, Andrew Glascott-Jones, Etienne Bouin, and Jean-Philippe Amblard	
A 12 bit 1.6 GS/s BiCMOS 2x2 Hierarchical Time- Interleaved Pipeline ADC	61

Manar El-Chammas, Xiaopeng Li, Shigenobu Kimura, Kenneth Maclean, Jake Hu, Mark Weaver, Matthew Gindlesperger, Scott Kaylor, Robert Payne, Charles Sestok, and William Bright	
A SiGe Bipolar 6 bit 20 GS/s Nyquist-Rate Flash ADC without Time Interleaving (Student)	65
Philipp Ritter, Stéphane Le Tual, Bruno Allard and Michael Möller	
A 4GS/s 8bit ADC fabricated in 0.35μm SiGe BiCMOS technology	69
Danyu Wu, Fan Jiang, Lei Zhou, Jin Wu, Yinkun Huang, Zhi Jin and Xinyu Liu	
Schottky Barrier Diodes in 90nm SiGe BiCMOS process operating near 2.0 THz cutoff frequency	73
Vibhor Jain, Peng Cheng, B. J. Gross, R. Camillo-Castillo, J. J. Pekarik, J. W. Adkisson, Qizhi Liu, P. B. Gray, V. Kaushal, D. Hareme, and Adam W. Divergilio	
AlN Thin-film Deposition for suppressing Surface Current Losses in RF Circuits on High-Resistivity Silicon	77
S.B. Evseev, L.K. Nanver, and S. Milosavljević	
High-Quality Varactors and Schottky Diodes in SiGe:C Technology for mm-Wave and THz Applications	81
Olivier Tesson, Sidina Wane, Serge Bardy, Laure Rolland du Roscoat, Manohiaina Ranaivoniarivo, Olivier Doussin, Damienne Bajon, Laurent Leyssenne and Philippe Descamps	
Integrated Low-Loss Passive SiGe Power Splitter and Combiner Operating Across 78-86 GHz Band	85
Mury Thian, Vincent Fusco, Neil Buchanan, and Franz Dielacher	
A Transient Triggered Bipolar Clamp for Electrostatic Discharge protection in SiGeBiCMOS technologies	89
Srivatsan Parthasarathy, Javier A. Salcedo and Jean-Jacques Hajjar	
A Versatile Low-cost Smart Power Technology Platform for Applications over Broad Current and Voltage Ranges (Student)	93
Zhi Lin, Hao Hu, Junji Cheng, and Xingbi Chen	
Highly-reliable and reproducible InGaAs/InP Double Heterojunction Bipolar transistor Utilizing All-wet Etching Process for Triple Mesa Formation	9+
Masaki Yanagisawa, Masataka Watanabe, Takeshi Kawasaki, Hirohiko Kobayashi, Kenji Kotani, Ryuji Yamabi, Yasuhiro Tosaka, and Daiji Fukushima	
GaN RF Device Technology and Applications, Present and Future (Invited)	101
Bruce Green, Karen Moore, Darrell Hill, Monica CdeBaca and Joe Schultz	
A 92 mW, 20 dB gain, broadband lumped SiGe amplifier with bandwidth exceeding 67 GHz (Student)	107
Zhe Xuan, Ran Ding, Tom Baehr-Jones, and Michael Hochberg	
A Compact, Transformer-Based 60 GHz SPDT RF Switch Utilizing Diode-Connected SiGe HBTs (Student)	111
Robert L. Schmid, Peter Song, and John D. Cressler	
A Broadband 24 GHz Bandwidth 54 dB Gain 180-mW Amplifier Employing Common-Collector Combined with Capacitive Controlled Cross-Coupled Feedback in 0.35 μm SiGe	115

Technology (Student)	
Ahmed Gharib, Georg Fischer, Robert Weigel, and Dietmar Kissinger	
A 220-245 GHz Switched Beam Butler Matrix in 0.13 μm SiGe BiCMOS Technology (Student)	119
Mohamed Elkhoully, Mao Yanfei, Chafik Meliani, Frank Ellinger, and J. Christoph Scheytt	
InP HBT Technology and Modeling (Invited)	123
Donald A. Hitko	
Geometry Scalable Model Parameter Extraction for mm-Wave SiGe-Heterojunction Transistors (Student)	127
Andreas Pawlak, Michael Schroter, and Alexander Fox	
Comparative Analysis of Compact Noise Model Formulations for SiGe-HBTs (Student)	131
Francesco Vitale and Ramses van der Toorn	
Towards the Industrial Deployment of the Silicon Photonics Technology (Invited)	135
Guido Chiaretti	
GaN for Automotive Applications (Invited)	143
Koichi Nishikawa	
Resistance Switching in Metal-Oxide-Metal Devices: Fundamental Understanding in Relation to Materials Processing (Invited)	151
Christophe Vallée	
Light Matters: Integrated Opto-electronics from Consumer to Communications (Invited)	159
Shrenik Deliwala	
Impact of Reverse EB Stress and Mixed-Mode stress on Low-frequency Noise for SiGe HBTs in Forward and Inverse Modes	163
Jin Tang, Jonggook Kim, Jeff A. Babcock, Alexei Sadovnikov, and Tracey L. Krakowski	
Comparative Study of HBT Ageing in a Complementary SiGe:C BiCMOS Technology	167
G. G. Fischer, J. Molina and B. Tillack	
On the Safe Operating Area of Bipolar Cascode Amplifiers	171
Vincenzo d'Alessandro, Niccolò Rinaldi, Andre G. Metzger, and Hal M. Banbrook	
Stacked Contact Electromigration in Advanced SiGe hetero-junction Bipolar Transistors	175
Jonggook Kim, Alexei Sadovnikov, Jin Tang, Young-Joon Park, Wibo van Noort and Jeff Babcock	
TCAD Modeling of Accumulated Damage During Time-Dependent Mixed-Mode Stress (Student)	179
Uppili S. Raghunathan, Partha S. Chakraborty, Brian Wier, John D. Cressler, Hiroshi Yasuda, and Philipp Menz	
A double balanced 81-86GHz EBAND active down conversion mixer in SiGe Technology	183
B. Sheinman, R. Carmon, R. Ben-Yishay, O. Katz N. Mazor, R. Levinger, D. Elad, A. Golberg, and A. Bruetbart	
A 4.8-6.8GHz Phase-Locked Loop with Power Optimized Design Methodology for Dividers	187

Feng Zhao, Jianjun Yu, Joseph Cali, and Fa Foster Dai, J. David Irwin, and Andre Aklian	
Compact V band frequency doubler with true balanced differential output (Student)	191
Shuai Yuan and Hermann Schumacher	
A Low-Phase-Noise Monolithically Integrated 60 GHz Push-Push VCO for 122 GHz Applications in a SiGe Bipolar Technology (Student)	195
Abhiram Chakraborty, Saverio Trotta, and Robert Weigel	
100Gbit/s SiGe Clock and Data Recovery (Student)	199
Q. Béraud-Sudreau, J-B. Begueret, O. Mazouffre, M. Pignol, L. Baguena, C. Neveu, Y. Deval, and T. Taris	
An On-chip SiGe HBT Characterization Circuit for Use in Self-Healing RF Systems (Student)	203
Duane C. Howard, Troy D. England, Nelson E. Lourenco, Adilson S. Cardoso, and John D. Cressler	
Predicting Large-Signal CML Gate Delay Using Y-Parameters for Fast Process Optimization (Student)	207
Subramaniam Shankar, Wibo Van Noort, and John D. Cressler	
A Low Power, Low Noise 3nV/$\sqrt{\text{Hz}}$ 200fA/$\sqrt{\text{Hz}}$, Rapid Settling Instrumentation Amplifier with Sub-ppm Nonlinearity, 0.2$\mu\text{V}/^\circ\text{C}$ Max Offset Drift ,150dB CMRR in 5-to-36V supply	211
Moshe Gerstenhaber and Oljeta Bida Qirko	
A High-Speed Cryogenic SiGe Channel Combiner IC For Large Photon-Starved SNSPD Arrays	215
Joseph C. Bardin, Prasana Ravindran, Su-Wei Chang, Raghavan Kumar, Jeffrey A. Stern, Matthew D. Shaw, Damon S. Russell, and William H. Farr	
A 2GSps 12bit DAC with SFDR >57.5dBc up to Nyquist Bandwidth (Student)	219
Lei Zhou, Danyu Wu, Fan Jiang, Jin Wu, Zhi Jin, and Xinyu Liu	
Impact of BEOL Stress on BiCMOS 9MW HBTs (Student)	223
E. Canderle, P. Chevalier, G. Avenier, N. Derrier, D. Céli and C. Gaquière	
SiGe HBTs in 90nm BiCMOS Technology demonstrating f_T/f_{MAX} 300GHz/420GHz through reduced R_b and C_{cb} parasitics	227
R.A. Camillo-Castillo, Q.Z. Liu, J. W. Adkisson, M. H. Khater, P. B. Gray, Vibhor Jain, Robert K. Leidy, J. J. Pekarik, J. P. Gambino, B. Zetterlund, C. Willets, C. Parrish, S.U. Engelmann, A. M. Pyzyna, P. Cheng and D. L. Haramé	
A High-Resistivity SiGe BiCMOS Technology for WiFi RF Front-End-IC Solutions	231
Alvin Joseph, Jeff Gambino, Robert M. Rassel, Eric Johnson, Hanyi Ding, Shyam Parthasarthy, Venkata Vanakuru, Santosh Sharma, Mark Jaffe, Derrick Liu, Michael Zierak, Renata Camillo-Castillo, Anthony Stamper, and Jim Dunn	
A Study of Ultra-High Performance SiGe HBT Devices on SOI	235
Todd Thibeault, Edward Preisler, Jie Zheng, Li Dong, Samir Chaudhry, Scott Jordan, and Marco Racanelli
