

2014 11th International Conference on Remote Engineering and Virtual Instrumentation

(REV 2014)

**Porto, Portugal
26 – 28 February 2014**

**IEEE Catalog Number: CFP1449T-POD
ISBN: 978-1-4799-2026-6**

2014 11th International Conference on Remote Engineering and Virtual Instrumentation (REV)

Table of Contents

Title	Page range
MOOLs: Massive Open Online Laboratories: An Analysis of Scale and Feasibility	1–6
Concept design for a RFID enabled student workbook	7–10
Laboratory as a Service (LaaS): a Model for Developing and Implementing Remote Laboratories as Modular Components	11–20
The Usage of Telecommunicational Technologies in the Integration of Universities and Business	21–23
Amazon RFID Tester – An automatic test equipment to rfid inlays based in virtual instrumentation to Brazilian market	N/A
A Design of the Tele-operation Control System for Liquid Container Transfer by an Overhead Traveling Crane	29–30
Integrating an Online Programming Lab into ILIAS	31–34
Web system for managing a remote access laboratory: a tool for a computer networks disciplines.	35–40
Virtual Instrument for Recognition of Radiators with Machine Vision	41–46
"GAME QUIZ" - Implementing a serious game platform based in quiz games for the teaching of Information Technology	47–50
E-lab's elastic collision distributed remote laboratory	51–53
A Concept of Mobile Technology for Remotely Supporting Mathematical Education of the Blind	54–60
Using Interactive Hybrid Online Labs for Rapid Prototyping of Digital Systems	61–66
StudentEDEA and myDAQ in Education & Research Laboratory	67–69
Integrating remote laboratory environment for m-learning for use in Secondary Education	70–74
Unbalance and Field Balancing Virtual Labs	75–76
Importance of a network of online labs in magrebian countries	77–78
Didactic Experiment with the use of ICT's in Remote Monitoring of Thermal Properties in Grain Silos Containment.	79–82
UMA PROPOSTA METODOLÓGICA PARA O EXPERIMENTO REMOTO DE THOMSON COM BASE EM UM ENSINO INVESTIGATIVO	83–87
Controlling the operating conditions in an Operating Room	88–89
Virtual Tools and Collaborative Working Environment in Embedded System Design	90–93
Architectural Characteristics and Educational Possibilities of the Remote Laboratory in Materials Properties	94–97
Using Remote Laboratory eLab3D for a Broader Practical Skills Training in Electronics	98–99
Laboratorio Remoto eLab3D: un Mundo Virtual Inmersivo para el Aprendizaje de la Electrónica	100–105
Low-Cost Remote Laboratories for Renewable Energy in Distance Education	106–111
Making EJS Applications at the OSP Digital Library Available From Moodle	112–116
Programación de robots para niños de la primera infancia con edades comprendidas entre 4-6 años	117–123
EXPERIMENTO REMOTO PARA DETERMINAR A RAZÃO CARGA-MASSA DO ELÉTRON	124–128
LabVIEW Based Remote Laboratory for Advanced Motion Control	129–136
A demo prototype of a reconfigurable IEEE1451.0-compliant and FPGA-based weblab	137–138
Distance Education in Energy Efficient Drive Technologies by Using Remote Workplace	139–143
Customizing Household Mobile Robot for Remote Laboratories	144–150
Archimedes' Principle Remote Experiment	151–158
General Physics Remote Laboratory based on the NI ELVIS Platform and Moodle	159–162
Graphic Technologies for Virtual, Remote and Hybrid laboratories: WebLab-FPGA hybrid lab	163–166
Using FPGA to Control a Virtual Sorting System	167–171
Real-Time Animation of Equipment in a Remote Laboratory	172–176
Usando VISIR en el Aula: Experiencia con Pre y Post Tests	177–179
Using Network Enabled Microcontrollers in Experiments for a Distributed Remote Laboratory	180–186
The International Cooperation on Remote Laboratories Conducted with Engineering Didactics	187–190
Virtual Laboratory for Educational Environments	191–194
A low cost implementation of an existing hands-on laboratory experiment in electronic engineering	195–197
A demonstration of an augmented virtuality based solar energy power calculator in electrical engineering	198–199
Evaluation Plan of a network of remote labs in the Maghreb countries	200–203
Flipped classrooms: From concept to reality using Google Apps	204–208
Remote Physiological Signals Acquisition: Didactic experiments	209–210
The EOLES Project Remote Labs across the Mediterranean	211–216
Adding Sensorial Capabilities to the Augmented Chemical Reactions Application	217–218
Real Time Building Zone Occupancy Detection and Activity Visualization Utilizing a Visitor Counting Sensor Network	219–224
Distance robotics learning using Hybrid Simulating Testbed	225–226
Integrating Design and Manufacturing Tools into Ilmenau Interactive Hybrid Online Lab	227–230
Aplicação da Realidade Aumentada para Simulação de Experimentos Físicos em Dispositivos Móveis	231–235
Rise and Fall of Remote Labs: Or perhaps not?	236–239
Reshaping Higher Education Systems in the MENA Region: The Contribution of Remote and Virtual Labs	240–245

2014 11th International Conference on Remote Engineering and Virtual Instrumentation (REV)

Table of Contents

Title	Page range
Concept of cloud educational resource datacenters for remote access to software	246–247
Remote experiment on characterization of energy transducers	248–253
Developing the control system of a syringe infusion pump	254–255
Automation Services from the Cloud	256–261
A game for robot operation training in Search and Rescue missions	262–267
REMLABNET - open remote laboratory management system for e-experiments	268–273
Overlay Network Architectures for Peer-to-Peer Remote Access Laboratories	274–280
Remote Measurements of the Gastric Electrical Signals - Between Theory and Practice	281–284
Enhancement of Remotely Controlled Laboratory for Active Noise Control and Acoustic Experiments	285–290
The Construction of Statistical Model of a Virtual Object in the Environment LabVIEW	291–293
Web Services for Virtual Simulation	294–296
Using Game Analytics to Measure Student Engagement/Retention for Engineering Education	297–302
Online Experimentation: Experiment@Portugal 2012	303–308
Remote Triggered FPGA based Automated System	309–314
An interactive video for e-learning on the pendulum motion	315–316
TIC@ULA: Diseño de tecnologías no tradicionales para aulas de educación especial en Costa Rica	317–323
Impacts and Barriers of the Mobile Remote Experimentation introduced in Basic Education	324–325
"Feeling force"	326–327
A Simple LabVIEW based Framework to Facilitate the deployment of iLab Batch Lab Servers	328–331
Sustainable energy education: hybrid electric vehicles	332–338
Instrumentation of a Surfboard to Evaluate Surfing Performance	339–343
A demonstration circuit to support e-learning on IEEE 1149.1/4 infrastructures	344–345
Experiências da Aplicação de VISIR na Universidade de Al-Quds	346–352
Online Maintenance Assistance (OMA) - A Remote system for complex service tasks	353–356
Hybrid low bandwidth transport for video, screen and sensor signals	357–360
Java Stand-Alone Application for Linear Control Systems Simulation	361–369
Remote Networking Laboratory Development	370–374
Towards a microRLMS approach for shared development of remote laboratories	375–381
Development and Implementation of an Advanced Remotely Controlled Vibration Laboratory	382–385
Introduction to the NeReLa project	386–388
Remote control of electromagnetic load emulator for electric motors	389–390
The remote DSP experiment integrated with Moodle online learning environment	391–392
eLab as Tool for Remote Laboratory in Process Control	393–394
Virtual experiment for teaching robot programming	395–396
Dynamical Systems Simulator based on a Java Application	397–398
Augmented Reality in Groundwater Flow	399–400
Black body radiation for students and secondary schools	401–402
A proposal to support IEEE 1149.1/4 infrastructures experimentation	403–408
Demonstration of an application for remote outlier detection and accommodation	409–410
Numerical Procedures as a Complement to an Experimental Remote System	411–415
New Technologies Applied to Education: a New Concept of Education	416–419
Experimentação Remota aplicada na Educação: Uma Abordagem Inclusiva para o Ensino Fundamental e Médio	420–423
Telemetria e Telecontrole de um Sistema Embarcado Aplicado na Macro e Micro Navegação de Deficientes Visuais	424–433
IMPROVEMENT OF CORRELATIONS BETWEEN EXTERNAL AND LEARNING ENVIRONMENTS USING THE REMOTE EXPERIMENT	434–437
Monitoring and control of a reptile terrarium	438–439
Signal time deterministic for process control applications from the cloud	440–443
Design of sensor and actuator network for maturity estimation in civil engineering structures	444–449
Using HTML5 for developing Collaborative Online labs	450–456
Low cost and reconfigurable Analog Electronics Laboratory	457–460
