

2014 Canadian Conference on Computer and Robot Vision

(CRV 2014)

**Montreal, Quebec, Canada
6-9 May 2014**

IEEE Catalog Number: CFP14347-POD
ISBN: 978-1-4799-3898/6

2014 Conference on Computer and Robot Vision

CRV 2014

Table of Contents

Welcome.....	ix
Program Committee.....	xi

Oral Presentations

Optimizing Camera Perspective for Stereo Visual Odometry	1
<i>Valentin Peretroukhin, Jonathan Kelly, and Timothy D. Barfoot</i>	
Towards Estimating Bias in Stereo Visual Odometry	8
<i>Sara Farboud-Sheshdeh, Timothy D. Barfoot, and Raymond H. Kwong</i>	
Stix-Fusion: A Probabilistic Stixel Integration Technique	16
<i>Maximilian Muffert, Nicolai Schneider, and Uwe Franke</i>	
Towards Full Omnidirectional Depth Sensing Using Active Vision for Small Unmanned Aerial Vehicles	24
<i>Adam Harmat and Inna Sharf</i>	
Autonomous Maritime Landings for Low-Cost VTOL Aerial Vehicles	32
<i>Kevin Ling, Derek Chow, Arun Das, and Steven L. Waslander</i>	
Self-Localization at Street Intersections	40
<i>Giovanni Fusco, Huiying Shen, and James M. Coughlan</i>	
Adaptive Robotic Contour Following from Low Accuracy RGB-D Surface Profiling and Visual Servoing	48
<i>Danial Nakhaeinia, Pierre Payeur, and Robert Laganière</i>	
Speed Daemon: Experience-Based Mobile Robot Speed Scheduling	56
<i>Chris J. Ostafew, Angela P. Schoellig, Timothy D. Barfoot, and Jack Collier</i>	
Image Retrieval Using Landmark Indexing for Indoor Navigation	63
<i>Dwaipayan Sinha, Mirza Tahir Ahmed, and Michael Greenspan</i>	
Generalized Exposure Fusion Weights Estimation	71
<i>Mohammed Elamine Moumene, Rachid Nourine, and Djemel Ziou</i>	
3D Scan Registration Using Curvelet Features	77
<i>Siddhant Ahuja and Steven L. Waslander</i>	

Building Better Formlet Codes for Planar Shape	84
<i>Alex Yakubovich and James H. Elder</i>	
Sign Language Fingerspelling Classification from Depth and Color Images Using a Deep Belief Network	92
<i>Lucas Rioux-Maldague and Philippe Giguère</i>	
Multi-task Learning of Facial Landmarks and Expression	98
<i>Terrance Devries, Kumar Biswaranjan, and Graham W. Taylor</i>	
Exploring Underwater Environments with Curiosity	104
<i>Yogesh Girdhar and Gregory Dudek</i>	
Visual Saliency Improves Autonomous Visual Search	111
<i>Amir Rasouli and John K. Tsotsos</i>	
Segmenting Objects in Weakly Labeled Videos	119
<i>Mrigank Rochan, Shafin Rahman, Neil D.B. Bruce, and Yang Wang</i>	
Grid Seams: A Fast Superpixel Algorithm for Real-Time Applications	127
<i>Parthipan Siva and Alexander Wong</i>	
Direct Matrix Factorization and Alignment Refinement: Application to Defect Detection	135
<i>Zhen Qin, Peter Van Beek, and Xu Chen</i>	
Identification of Morphologically Similar Seeds Using Multi-kernel Learning	143
<i>Xin Yi, Mark Eramian, Ruoqing Wang, and Eric Neufeld</i>	
The Range Beacon Placement Problem for Robot Navigation	151
<i>River Allen, Neil MacMillan, Dimitri Marinakis, Rahnuma Islam Nishat, Rayhan Rahman, and Sue Whitesides</i>	
Trajectory Inference Using a Motion Sensing Network	159
<i>Doug Cox, Darren Fairall, Neil MacMillan, Dimitri Marinakis, David Meger, Saamaan Pourtavakoli, and Kyle Weston</i>	
Decentralized Cooperative Localization for Heterogeneous Multi-robot System Using Split Covariance Intersection Filter	167
<i>Thumeera R. Wanasinghe, George K.I. Mann, and Raymond G. Gosine</i>	
Asymmetric Rendezvous Search at Sea	175
<i>Malika Meghjani, Florian Shkurti, Juan Camilo Gamboa Higuera, Arnold Kalmbach, David Whitney, and Gregory Dudek</i>	

Posters

A More Robust Feature Correspondence for more Accurate Image Recognition	181
<i>Shady Y. El-Mashad and Amin Shoukry</i>	

Projected Barzilai-Borwein Method with Infeasible Iterates for Nonnegative Least-Squares Image Deblurring	189
<i>Kathleen Fraser, Dirk V. Arnold, and Graham Dellaire</i>	
Camera Matrix Calibration Using Circular Control Points and Separate Correction of the Geometric Distortion Field	195
<i>Victoria Rudakova and Pascal Monasse</i>	
Computer Vision-Based Identification of Individual Turtles Using Characteristic Patterns of Their Plastrons	203
<i>Trevor Beugeling and Alexandra Branzan-Albu</i>	
Drums: A Middleware-Aware Distributed Robot Monitoring System	211
<i>Valiallah (Mani) Monajjemi, Jens Wawerla, and Richard Vaughan</i>	
Scale-Space Decomposition and Nearest Linear Combination Based Approach for Face Recognition	219
<i>Farhana Afrin Hoque and Liang Chen</i>	
Using Gradient Orientation to Improve Least Squares Line Fitting	226
<i>Tomislav Petković and Sven Lončarić</i>	
Trajectory Estimation Using Relative Distances Extracted from Inter-image Homographies	232
<i>Mårten Wadenbäck and Anders Heyden</i>	
A Proof-of-Concept Demonstration of Visual Teach and Repeat on a Quadrocopter Using an Altitude Sensor and a Monocular Camera	238
<i>Andreas Pfrunder, Angela P. Schoellig, and Timothy D. Barfoot</i>	
Outdoor Ice Accretion Estimation of Wind Turbine Blades Using Computer Vision	246
<i>Moulay Akhloufi and Nassim Benmesbah</i>	
A Meta-Technique for Increasing Density of Local Stereo Methods through Iterative Interpolation and Warping	254
<i>Aniket Murarka and Nils Einecke</i>	
MDS-based Multi-axial Dimensionality Reduction Model for Human Action Recognition	262
<i>Redha Touati and Max Mignotte</i>	
Indoor Scene Recognition with a Visual Attention-Driven Spatial Pooling Strategy	268
<i>Tarek Elguebaly and Nizar Bouguila</i>	
Automated Door Detection with a 3D-Sensor	276
<i>Sebastian Meyer Zu Borgsen, Matthias Schöpfer, Leon Ziegler, and Sven Wachsmuth</i>	
Photon Detection and Color Perception at Low Light Levels	283
<i>Mehdi Rezagholizadeh and James J. Clark</i>	

Toward a Unified Framework for EMG Signals Processing and Controlling an Exoskeleton	291
<i>Guillaume Durandau and Wael Suleiman</i>	
Metadata-Weighted Score Fusion for Multimedia Event Detection	299
<i>Scott McCloskey and Jingchen Liu</i>	
Robust Detection of Paint Defects in Moulded Plastic Parts	306
<i>Cole Tarry, Micheal Stachowsky, and Medhat Moussa</i>	
Multiple Feature Fusion in the Dempster-Shafer Framework for Multi-object Tracking	313
<i>Dorra Riahi and Guillaume-Alexandre Bilodeau</i>	
Vision-Based Qualitative Path-Following Control of Quadrotor Aerial Vehicle with Speeded-Up Robust Features	321
<i>Trung Nguyen, George K.I. Mann, and Raymond G. Gosine</i>	
Construction of a Mean Surface for the Variability Study of the Cornea	328
<i>Arnaud Polette, Edouard Auvinet, Jean-Luc Mari, Isabelle Brunette, and Jean Meunier</i>	
A New Fitness Based Adaptive Parameter Particle Swarm Optimizer	336
<i>Sohail Akhtar, M. Abdel-Rahman Eihab, and Abdul-Rahim Ahmad</i>	
An Integrated Bud Detection and Localization System for Application in Greenhouse Automation	344
<i>Cole Tarry, Patrick Wspanialy, Matthew Veres, and Medhat Moussa</i>	
N-Gram Based Image Representation and Classification Using Perceptual Shape Features	349
<i>Albina Mukanova, Qigang Gao, and Gang Hu</i>	
Interactive Teleoperation Interface for Semi-autonomous Control of Robot Arms	357
<i>Camilo Perez Quintero, Romeo Tatsambon Fomena, Azad Shademan, Oscar Ramirez, and Martin Jagersand</i>	
Trinocular Spherical Stereo Vision for Indoor Surveillance	364
<i>Michel Findeisen and Gangolf Hirtz</i>	
Autonomous Lecture Recording with a PTZ Camera While Complying with Cinematographic Rules	371
<i>Dries Hulens, Toon Goedemé, and Tom Rumes</i>	
3D Reconstruction by Fusioning Shadow and Silhouette Information	378
<i>Rafik Gouiaa and Jean Meunier</i>	
Author Index	385
