

# **2013 15th International Symposium on Symbolic and Numeric Algorithms for Scientific Computing**

**(SYNASC 2013)**

**Timisoara, Romania  
23-26 September 2013**

**IEEE Catalog Number: CFP13387-POD  
ISBN: 978-1-4799-3037-1**

# 2013 15th International Symposium on Symbolic and Numeric Algorithms for Scientific Computing

## SYNASC 2013

### Table of Contents

Preface.....	xi
SYNASC 2013 Chairs and Committees.....	xiii
Reviewers.....	xv

---

#### Invited Papers

Reducing Energy Consumption by Using Clouds .....	3
<i>Ivona Brandić</i>	
TiMo: Timed Mobility in Distributed Systems .....	P IC
<i>Gabriel Ciobanu</i>	
Model-Driven Decision Procedures for Arithmetic .....	11
<i>Leonardo de Moura and Dejan Jovanović</i>	
Knot Fold of Regular Polygons: Computer-Assisted Construction and Verification .....	12
<i>Tetsuo Ida, Fadoua Ghourabi, and Kazuko Takahashi</i>	
Survey of Covering Arrays .....	20
<i>Jose Torres-Jimenez and Idelfonso Izquierdo-Marquez</i>	
Specifying Languages and Verifying Programs with K .....	28
<i>Grigore Roşu</i>	
Minability through Compression .....	32
<i>Dan A. Simovici</i>	
Stepping Up .....	37
<i>Adrian Jackson</i>	
Computing Origami Universal Molecules with Cyclic Tournament Forests .....	42
<i>John C. Bowers and Ileana Streinu</i>	

## Symbolic Computation

A “Piano Movers” Problem Reformulated .....	53
<i>David Wilson, James H. Davenport, Matthew England, and Russell Bradford</i>	
Identifying Features via Homotopy on Handwritten Mathematical Symbols .....	61
<i>Rui Hu and Stephen M. Watt</i>	
On Computing Non-negative Loop-Free Edge-Bipartite Graphs .....	68
<i>Grzegorz Marczak, Daniel Simson, and Katarzyna Zajac</i>	
Common Factors in Fraction-Free Matrix Reduction .....	76
<i>Johannes Middeke, Ahmed Almohaimeed, and David J. Jeffrey</i>	
On Algebraic Preprocessing of Floating-Point DAEs for Numerical Model Simulation .....	81
<i>Tateaki Sasaki and Tetsu Yamaguchi</i>	
Deciding Conjugacy in Thompson’s Group F in Linear Time .....	89
<i>Nabil Hossain, Robert W. McGrail, James Belk, and Francesco Matucci</i>	
On Ladder Operators for Little q-Jacobi Polynomials and Their Generalizations .....	97
<i>Galina Filipuk and Maciej Haneczok</i>	
Efficient Computation of the Isotropy Group of a Finite Graph: A Combinatorial Approach .....	104
<i>Marcin Gąsiorek</i>	

## Numerical Computing

On Coxeter Type Classification of Loop-Free Edge-Bipartite Graphs and Matrix Morsifications .....	115
<i>Rafał Bocian, Mariusz Felisiak, and Daniel Simson</i>	
Dependence of the Oscillatory Movements of an Unmanned Aerial Vehicle on the Forward Velocity .....	119
<i>Alexandra Emilia Fortiș, Ștefan Balint, and Teodor-Florin Fortiș</i>	
Planar Stretching Flows with Partial Slip .....	126
<i>Remus D. Ene, Vasile Marinca, and Romeo Negrea</i>	
Software Implementation of Numerical Algorithms in Arbitrary Precision .....	131
<i>Zinovi L. Krougly, David J. Jeffrey, and Dina Tsarapkina</i>	
An Efficient Computational Framework for Studying Dynamical Systems .....	138
<i>Islam ElShaarawy and Walid Gomaa</i>	
Fast Computing of Non-uniform Sampling Positions for Real Signals .....	146
<i>Péter Kovács and Viktor Vad</i>	

## Logic and Programming

Fresh-Variable Automata: Application to Service Composition .....	153
<i>Walid Belkhir, Yannick Chevalier, and Michael Rusinowitch</i>	
A Collaborative Framework for Non-Linear Integer Arithmetic Reasoning in Alt-Ergo .....	161
<i>Sylvain Conchon, Mohamed Iguernelala, and Alain Mebsout</i>	
Bound Propagation for Arithmetic Reasoning in Vampire .....	169
<i>Ioan Dragan, Konstantin Korovin, Laura Kovács, and Andrei Voronkov</i>	
Engineering Hoare Logic-Based Program Verification in K Framework .....	177
<i>Andrei Arusoaie</i>	
An Extension of the Interpreter Pattern to Define Domain-Parametric Rewriting Systems .....	185
<i>Lorenzo Capra and Vincenzo Stile</i>	
Certified, Efficient and Sharp Univariate Taylor Models in COQ .....	193
<i>Érik Martin-Dorel, Laurence Rideau, Laurent Théry, Micaela Mayero, and Ioana Paşca</i>	
Compiler Design for Hyper-metaprogramming .....	201
<i>Lucian Teodorescu and Rodica Potolea</i>	
Verifying (In-)Stability in Floating-Point Programs by Increasing Precision, Using SMT Solving .....	209
<i>Gabriele Paganelli and Wolfgang Ahrendt</i>	

## Artificial Intelligence

Local Rank Distance .....	219
<i>Radu Tudor Ionescu</i>	
From Plagiarism to Malware Detection .....	227
<i>Ciprian Oprea, George Cabău, and Adrian Coleşa</i>	
An Effective Ensemble-Based Method for Creating On-the-Fly Surrogate Fitness Functions for Multi-objective Evolutionary Algorithms .....	235
<i>Alexandru-Ciprian Zăvoianu, Edwin Lughofer, Gerd Bramerdorfer, Wolfgang Amrhein, and Erich Peter Klement</i>	
Reducing the Number of Useless Revisions Performed by Constraint Solvers Based on AC-3 .....	243
<i>Cristian Frăsinaru and Florentin Olariu</i>	
Should We Beware the Exceptions? An Empirical Study on the Eclipse Project .....	250
<i>Cristina Marinescu</i>	
Common Due-Date Problem: Exact Polynomial Algorithms for a Given Job Sequence .....	258
<i>Abhishek Awasthi, Jörg Lässig, and Oliver Kramer</i>	
Context Matching for Ambient Intelligence Applications .....	265
<i>Andrei Olaru</i>	

Traders' Behavior Effect on Stock Price Evolution .....	273
<i>Monica Tirea</i>	
Using Self-Organizing Maps for Fraud Prediction at Online Auction Sites .....	281
<i>Vinicius da Silva Almendra and Denis Enăchescu</i>	
Clustering Data Streams Using Mass Estimation .....	289
<i>Andrei Sorin Sabau</i>	
Evolutionary Approach to Negotiation in Game AI .....	296
<i>Gabriel Iuhasz, Victor I. Munteanu, and Viorel Negru</i>	
An Automatic Updating Perceptron-Based System for Malware Detection .....	303
<i>Marius Barat, Dumitru Bogdan Prelipcean, and Dragoş Teodor Gavriluţ</i>	
 <b>Distributed Computing</b>	
Cph CT Toolbox: CT Reconstruction for Education, Research and Industrial Applications .....	311
<i>Jonas Bardino, Martin Rehr, and Brian Vinter</i>	
The Study of Impact of Matrix-Processor Mapping on the Parallel Sparse Matrix-Vector Multiplication .....	321
<i>Ivan Šimeček, Daniel Langr, and Erik Srnec</i>	
Securing Communication in a Peer-to-Peer Messaging Middleware .....	329
<i>Péter Szilágyi</i>	
Parallel Data Acquisition for Visualization of Very Large Sparse Matrices .....	336
<i>Daniel Langr, Ivan Šimeček, Pavel Tvrđík, and Tomáš Dytrych</i>	
Space Efficient Formats for Structure of Sparse Matrices Based on Tree Structures .....	344
<i>Ivan Šimeček, Daniel Langr, and Pavel Tvrđík</i>	
Algorithm for Cooperative CPU-GPU Computing .....	352
<i>Razvan-Mihai Aciu and Horia Ciocarlie</i>	
 <b>Advances in the Theory of Computing</b>	
Online-Scheduling on Identical Machines with Bounded Migration .....	361
<i>Thorsten Ehlers and Klaus Jansen</i>	
Algebraic Properties of Generalized Multisets .....	367
<i>Andrei Alexandru and Gabriel Ciobanu</i>	
Algorithmic Experiences in Coxeter Spectral Study of P-critical Edge-Bipartite Graphs and Posets .....	375
<i>Agnieszka Polak and Daniel Simson</i>	
Bounded Bi-ideals and Linear Recurrence .....	383
<i>Inese Bērziņa, Jānis Buls, and Raivis Bēts</i>	
Token Free Bounded Delay Codes and Hash Iteration .....	391
<i>Sebastian Codrin Ditu</i>	

A Systematic Approach to Computations on Decomposable Graphs .....	398
<i>Elena V. Ravve and Zeev Volkovich</i>	

## **Workshop on the Management of Resources and Services in Cloud and Sky Computing**

Assessing SLA Compliance from Palladio Component Models .....	409
<i>Juan F. Pérez and Giuliano Casale</i>	
Supporting the Development and Operation of Multi-cloud Applications: The MODAClouds Approach .....	417
<i>Elisabetta Di Nitto, Marcos Aurélio Almeida da Silva, Danilo Ardagna, Giuliano Casale, Ciprian Dorin Craciun, Nicolas Ferry, Victor Munteş, and Arnor Solberg</i>	
ARTIST Methodology and Framework: A Novel Approach for the Migration of Legacy Software on the Cloud .....	424
<i>Andreas Menychtas, Christina Santzaridou, George Kousiouris, Theodora Varvarigou, Leire Orue-Echevarria, Juncal Alonso, Jesus Gorronogoitia, Hugo Bruneliere, Oliver Strauss, Tatiana Senkova, Bram Pellens, and Peter Stuer</i>	
Developing Secure Cloud Applications: A Case Study .....	432
<i>Ermanno Battista, Valentina Casola, Nicola Mazzocca, Massimo Ficco, and Massimiliano Rak</i>	
Non-interleaving Operational Semantics for Geographically Replicated Databases .....	440
<i>Gabriel Ciobanu and Ross Horne</i>	
Distributed Resource Identification Service for Cloud Environments .....	448
<i>Silviu Panica and Dana Petcu</i>	
Quality Assurance for Open Source Software Configuration Management .....	454
<i>Stefan Meyer, Philip Healy, Theo Lynn, and John Morrison</i>	
From the Desktop to the Multi-clouds: The Case of ModelioSaaS .....	462
<i>Marcos Aurélio Almeida da Silva, Antonin Abhervé, and Andrey Sadovykh</i>	

## **Workshop on HPC for Scientific Problems**

A New Digital Repository for Remotely Sensed Hyperspectral Imagery on GPUs .....	473
<i>Jorge Sevilla Cedillo and Antonio Plaza Miguel</i>	
MPI-Based Asynchronous Simulation of Spiking Neural Networks on the Grid .....	481
<i>Marius Joldos, Octavian Vințeler, Ioan Radu Peter, and Ioan Lucian Muntean</i>	
Optimised Hybrid Parallelisation of a CFD Code on Many Core Architectures .....	488
<i>Adrian Jackson and M. Sergio Campobasso</i>	
MDMP: Managed Data Message Passing .....	496
<i>Adrian Jackson and Pär Strand</i>	
Optimization and Parallelization of Emedge3D on Shared Memory Architecture .....	503
<i>Matthieu Kuhn, Guillaume Latu, Stéphane Genaud, and Nicolas Crouseilles</i>	

Adaptive Distributed Data Structure Management for Parallel CFD Applications .....	511
<i>Jérôme Frisch, Ralf-Peter Mundani, and Ernst Rank</i>	
Evaluating Moldability of LHCb Jobs for Multicore Job Submission .....	519
<i>Nathalie Rauschmayr and Achim Streit</i>	
N-Body Simulations with GADGET-2 .....	526
<i>Victor-Lucian Spiridon and Emil-Ioan Slusanschi</i>	
 <b>Workshop on Agents for Complex Systems</b>	
Ontology-Based Recommender for Distributed Machine Learning Environment .....	537
<i>Daniel Pop and Caius Bogdănescu</i>	
Managing Risk Behavior on an Evolutionary Market—A Risk Limits and Value-at-Risk Measures Approach .....	543
<i>Monica Tirea and Viorel Negru</i>	
 <b>Workshop on Natural Computing and Applications</b>	
Resolution of the Probabilistic Vector Machine Problem via Single Linear Program .....	553
<i>Mihai Cimpoeșu, Andrei Sucilă, and Henri Luchian</i>	
Detecting Loss of Diversity for an Efficient Termination of EAs .....	561
<i>David Roche, Debora Gil, and Jesús Giraldo</i>	
 <b>Author Index</b> .....	 567
