

# **2014 Iran Workshop on Communication and Information Theory**

**(IWCIT 2014)**

**Tehran, Iran  
7 – 8 May 2014**

**IEEE Catalog Number: CFP14WCI-POD  
ISBN: 978-1-4799-4876-5**

## Table of Content

Gerhard Kramer (Keynote Speaker)

Title: **Network Coding and Edge-Cut Bounds for Line Networks** "P IC

Robert Schober (Keynote speaker)

Title: **How much can we gain by exploiting buffers in wireless relay N/A networks?**

Young-Han Kim (Invited Talk)

Title: **Index Coding Via Random Coding** "3

Deniz Gunduz (Invited Talk)

Title: **Zero-Delay Joint Source-Channel Coding** ":

Tara Javidi (Invited Talk)

Title: **Information Acquisition, Controlled Sensing, and Active Hypothesis Testing** "36

Salman Beigi (Invited Talk)

Title: **Maximal Entanglement - A New Measure of Entanglement** "38

### S1. Shannon Theory (I)

### S2. Communication Theory

David Tse (Keynote speaker)

Title: **Information Theory for High Throughput Sequencing** "P IC

Behnaam Aazhang (Keynote speaker)

Title: **Real-Time Network Modulation for Intractable Epilepsy** "P IC

Masoumeh Nasiri-Kenari (Invited Talk)

Title: **Diffusion Based Molecular Communication: Efficient Modulator and Simple near Optimal Receiver** "44

Melda Yuksel (Invited Talk)

Title: **Maximum-Weight Scheduling with Hierarchical Modulation** "48

### S3. Shannon Theory (II)

### S4. Coding and Communication Theory

### S5. Shannon Theory (III)

## S6. Applications of Information Theory

### Sessions

#### S1. Shannon Theory (I)

**Colluding Eavesdroppers in Large Cooperative Wireless Networks** 31  
Mahtab Mirmohseni and Panagiotis (Panos) Papadimitratos

**An Application of a Wringing Lemma to the Multiple Access Channel with Cooperative Encoders** 37  
Shirin Saeedi Bidokhti and Gerhard Kramer

**Convexity of Fisher Information with Respect to Gaussian Perturbation** 41  
Fan Cheng and Yanlin Geng

**From Source Model to Quantum Key Distillation: An Improved Upper Bound** 46  
Kamran Keykhosravi, Majid Mahzoon, Amin Gohari and Mohammad Reza Aref

**Wiretap Channel with Strictly Causal Side Information At Encoder** 52  
Amir Sonee and Ghosheh Abed Hodtani

#### S2. Communication Theory

**Resource Allocation Using Fragmented-Spectrum Synchronous OFDM-CDMA** 58  
**in Cognitive Radio Networks**  
Farhad Akhoundi, Jawad Salehi and Omid Poursaeed

**On the Implementation Aspects of Adaptive Power Control Algorithms in Free-Space Optical Communications** 62  
Navid Bani Hassan and Mehdi Matinfar

**Outage Analysis of Uplink Open Access Two-tier Networks** 67  
Zolfa Zeinalpour and Shirin Jalali

**Optimizing Sensing Duration for Multiple Secondary Users in Cognitive Radio Networks** 73  
Ashkan Esmaeili and Saeed Mashhadi

**Spectrum Leasing with Disjoint Secondary User Selection in Cognitive Radio Networks** 79

Ali R. Haqiqatnejad, Kamal Shahtalebi and Amir R. Forouzan

**S3. Shannon Theory (II)**

**Stabilization of Noisy Plants Over a Gaussian Interference Channel** 85

Ali A. Zaidi, Tobias J. Oechtering and Mikael Skoglund

**A Game-Theoretic Approach Based on Pricing Scheme on the Two-User Gaussian Interference Channel** 91

Atena Ebrahim Khani and Babak Seyfe

**Two-way Writing on Dirty Paper in the Presence of Noise-dependent Interference** 97

Narges Monemizadeh, Mostafa Monemizadeh and Ghosheh Abed Hodtani

**Nested Lattice Codes for the State-Dependent Gaussian Interference Channel with A Common Message** 101

Shahab Ghasemi-Goojani and Hamid Behroozi

**S4. Coding and Communication Theory**

**Phase Retrieval of Sparse L-ary Signals From Magnitudes of Their Fourier Transform** 107

Mohsen Shabani Borujeni; Farzad Parvaresh

**Compute-and-Forward for the Interference Channel: Diversity Precoding** 112

Ehsan Ebrahimi Khaleghi and Jean-Claude Belfiore

**Reduction of Encoding Delay in Compression of Binary Sources Using Turbo Codes: A Two-Stage Algorithm** 118

Javad Haghighat; Fabrice Labeau; David Plant

**A Note on the Redundancy of Reversible Variable Length Codes** 124

Sayed Jalal Zahabi and Mohammadali Khosravifard

**S5. Shannon Theory (III)**

**The Generalized MAC with Partial State and Message Cooperation** 130

Mohammad Javad Emadi, Majid Nasiri Khormuji, Mikael Skoglund and Mohammad Reza Aref

**Random Coding Bound for E-capacity Region of the Relay Channel with Confidential Messages** 135

Nasrin Afshar, Bahareh Akhbari and Mohammad Reza Aref

**Maximizing the Minimum Achievable Secrecy Rate in a Two-User Gaussian Interference Channel** 141

Meysam Mirzaee; Soroush Akhlaghi

**An Achievable Scheme for the One-Receiver, Two-Eavesdropper Broadcast Channel** 146

Sadaf Salehkalaibar; Mohammad Reza Aref

## **S6. Applications of Information Theory**

**Improving the Capacity of Cooperative SC-FDMA Systems with Frequency Domain Equalization** 152

Ali Karimi and Maryam Sabbaghian

**Bounds on Compressed Voice Channel Capacity** 158

Mehdi Boloursaz, Reza Kazemi, Babak Barazandeh and Ferydon Behnia

**Finite-SNR Diversity-Multiplexing Tradeoff of Linear Dispersion Coded MISO Systems** 164

Ali Kuhestani and Abbas Mohammadi
