

2014 11th International Workshop on Low Temperature Electronics

(WOLTE 2014)

**Grenoble, France
7-9 July 2014**

**IEEE Catalog Number: CFP14771-POD
ISBN: 978-1-4799-4841-3**

2014 11th International Workshop on Low Temperature Electronics (WOLTE).

Table of contents

SESSION 1 Semiconductor detectors

Chair: R. Kirschman (Extreme Temperature Electronics)

- Invited paper** by J. Rothmann, CEA-LETI (France), HgCdTe Avalanche photodiode: application for Infra-Red detection **P1**
- J. Berthoz, L. Rubaldo, R. Grille, O. Gravrand, SOFRADIR and CEA-LETI (France), Modeling and characterization of MTF at small pitch on Mercury Cadmium Telluride **P5**
- A. Brunner, L. Rubaldo, J. Berthoz, D. Bauza, G. Reimbold, SOFRADIR, IMEP-LAHC, CEA-LETI (France), Defects study in IR SWIR HgCdTe photodetectors using DLTS **P9**
- S. Mathimalar , V. Singh, N. Dokania, V. Nanal, R.G. Pillay, S. Pal, S. Ramakrishnany, A. Shrivastava, Priya Maheshwar, P.K. Pujar, S. Ojha, D. Kanjilal, K.C. Jagadeesan, and S.V. Thakare, India based Neutrino Observatory, Tata Institute of Fundamental Research, yHomi Bhabha National Institute, Department of Nuclear and Atomic Physics, Tata Institute of Fundamental Research, Department of Condensed Matter Physics, Tata Institute of Fundamental Research, Nuclear Physics Division, Bhabha Atomic Research Centre, Radiochemistry Division, Bhabha Atomic Research Centre, kInter University Accelerator Centre, Isotope Applications & Radiopharmaceuticals Division, Bhabha Atomic Research Centre (India), Development of NTD Ge sensors for low temperature thermometry **P13**

SESSION 2 Semiconductor devices and circuits (1)

Chair: L. Rubaldo (SOFRADIR)

- H. Mani, P. Mauskopf , School of Earth and Space Exploration, Arizona State University (USA), A single-stage cryogenic LNA with low power consumption using a commercial SiGe HBT **P17**
- Q Dong, YX Liang, A Cavanna, U Gennser, L Couraud, C Ulysse, Y Jin, CNRS/LPN (France), Ultra-low noise HEMTS for high-impedance and low frequency preamplifiers: Realization and characterization from 4.2K to 77K **P21**
- Y. Hibi, J. Sun, H. Qin, H. Matsuo, L. Kang, J. Chen, and P. Wu, Research Institute of Superconductor Electronics, Nanjing University and Suzhou Institute of Nano-Tech and Nano-Binics, Chinese Academy of Science (China), National Astronomical Observatory of Japan (Japan), Cryogenic GaN/AlGaN HEMT ICs and Fabrication Probability of Monolithic Sensor of Super- and Semiconductor Device **P25**

M. Shin, M. Shi, M. Mouis, A. Cros, E. Josse, G.T. Kim and G. Ghibaudo, IMEP-LAHC, Grenoble INP, and STMicroelectronics, (France), School of Electrical Engineering, Korea University (South Korea), Low temperature characterization of 14nm FDSOI CMOS devices

P29

SESSION 3 Superconductor circuits and devices **Chair: P. Febvre**
IMEP-LAHC, Université de Savoie)

Invited paper by M. Hofherr, K. Ilin, J. Toussaint, T. Ortlepp, O. Wetzstein, S. Engert, H.-G. Meyer, H.s Töpfer, M. Siegel, Institute of Micro- und Nanoelectronic Systems, Karlsruhe Institute of Technology, Department of Quantum Detection, Institute of Photonic Technology, Jena, CiS Forschungsinstitut für Mikrosensorik und Photovoltaik, Department of Advanced Electromagnetics, Ilmenau University of Technology (Germany), Real-time multi-pixel readout of superconducting nanowire single-photon detectors

P33

O. Brandel, J. Kunert, T. May, T. Ortlepp, H. Toepfer and H.-G. Meyer, Leibniz Institute of Photonic Technology, CiS Research Institute for Microsensor Systems and Photovoltaics, Ilmenau University of Technology (Germany), Digital Controlling of Superconducting Current Steering Switches

P37

J. Kunert, O. Brandel, S. Linzen,T. May, R. Stolz, and H.-G. Meyer, Department of Quantum Detection, Leibniz Institute of Photonic Technology (Germany), Superconductor digital electronics technology for sensor interfacing at the FLUXONICS Foundry

P41

Y. Goryunov, Laboratory of Advances Materials Physics, E.K. Zavoisky Physical Technical Institute, KPTI FASO (Russia), On the Possibility of Creating Superconducting Spin Valve of a New Type

P45

SESSION 4 Semiconductor devices and circuits (2) **Chair: J.Rothmann**
(CEA-LETI)

Invited paper by D. Maude, B. A. Piot and W. Desrat, LNCMI, CNRS (France), The contact hyperfine interaction and the integer and fractional quantum Hall effects

P49

R. Trevisoli, M. de Souza, R. T. Doria, V.a Kilchytska, D. Flandre, and M. A. Pavanello, Centro Universitário da FEI: Electrical Enigeering Department (Brazil), Université Catholique de Louvain: ICTEAM Institute (Belgium), Analog Operation of Junctionless Nanowire Transistors down to Liquid Helium Temperature

P53

L. Martins d'Oliveira, R. Trevisoli Doria, M. A. Pavanello, M. de Souza,V. Kilchytska and D. Flandre, Electrical Engineering Department, Centro Universitário da FEI (Brazil), ICTEAM Institute, UCL (Belgium), Asymmetric Self-Cascode FD SOI nMOSFETs Harmonic Distortion at Cryogenic Temperatures

P57

SESSION 5 Semiconductor devices**Chair: D.Maude (CNRS)**

- K. Valalaki and A.G. Nassiopoulou, NCSR “Demokritos”/INN (Greece), Porous silicon for efficient on-chip thermal isolation in the temperature range 5-300K **P61**
- Y. Omura and Y. Kondo, ORDIST, Kansai University, Dept. Electrical, Electronics and Informatics, Kansai University, Grad. School of Sci. and Eng., Kansai University (Japan), Spectroscopic Analysis of Leakage Current of Pre- and Post-Stressed Sol-Gel-Based TiO₂ and SiO₂/TiO₂ Stack Films **P65**
- R. Yamaguchi, S. Sato, Y. Omura and K. Nakamura, Grad. School Sci. and Eng., Kansai University (Japan), Characterization and Modeling of Resistive-Transition Phenomena and Electronic Structure of Sputter-Deposition SiO₂ Films **P69**
- P. Clapera, S. Ray, X. Jehl, M. Sanquer, A. Valentian, S. Barraud, INAC, LETI, CEA (France), A quantum nanoelectronic device driven by an on-chip CMOS circuit **P73**

SESSION 6 Detectors**Chair: M. Hofherr (Institute of Micro- und Nanoelectronic Systems, Karlsruhe Institute of Technology)**

- A. S. Mukhin, A. E. Abashin, O. S. Bolshakov, I. V. Lesnov, A.y A. Shishov, Nizhny Novgorod State Technical University, Nizhny Novgorod(Russia), Experimental estimation of optical NEP of 350GHz CEB bolometer **P77**
- A. Adane, G. Coiffard, M. Calvo, J. Goupy, C. Hoarau, S. Leclercq, A. Monfardini, K.F. Schuster, Institute de Radioastronomie millimétrique, IRAM and Institut Néel-CNRS (France), Study of the behavior of Cross-talk in Hilbert KID array using Sonnet software **P81**

SESSION 7 Poster Session

- Low-temperature characterization of Hall and effective mobility in junctionless transistors, M.-K. Joo, M. Mouis, B. Piot, S. Barraud, M. Shin, G.-t. Kim, and G. Ghibaudo, IMEP-LAHC, Grenoble INP, CNRS-LNCMI and CEA-LETI (France), School of Electrical Engineering, Korea University (South Korea) **P85**
- Low temperature characterizations of suspended CVD graphene devices fabricated with a scalable process route, O. I. Aydin, T. Hallam, M. Mouis, B. Piot, J.L. Thomassin and G. Duesberg, IMEP-LAHC, Grenoble INP, LNCMI, CNRS-UJF-INSA-UPS And SPSMS, CEA-INAC (France), CRANN Trinity College (Ireland) **P89**
