

2014 IEEE-APS Topical Conference on Antennas and Propagation in Wireless Communications

(APWC 2014)

**Aruba
3-9 August 2014**

**IEEE Catalog Number: CFP1474N-POD
ISBN: 978-1-4673-5691-6**

TABLE OF CONTENTS

	SESSION 2:Wideband Antennas	Page
Slomian I., Wincza K., Gruszczynski S.	4 x 2 Broadband Microstrip Antenna Array Utilizing 4-Way Slot-Coupled Power Divider	1
Scorrano L., Manna A., Trotta F.	A Novel UHF Horizontally Polarized Omnidirectional Antenna	5
Bezousek P., Chyba M., Schejbal V., Karamazov S., Zalabsky T., Cernik L.	Combined Antenna Array for Primary and Secondary Surveillance Radars	8
Shi Y., Whites K.W.	Miniaturization of Helical Antennas Using Dielectric Loading	12
Rodriguez D.O., Saavedra M.A., Ramirez G.A., Araque J.L.	Realization of a Compact Reconfigurable Antenna for Mobile Communications	16
Matin M.A., Esa Al-Islam Pg Md.	UWB Monopole Antenna with WLAN/WIMAX Dual Band-Notched Characteristics	N/A
	SESSION 3:Antennas	
Karlsson C., Cavero P., Tekin T., Pouhè D.	A New Broadband Antenna for Satellite Communications	20
Ranga Y., Shaw R.D., Hay S.G.	Broadband High Frequency Low Noise Amplifiers for Connected Phased Array Feeds	24
Meador J.P., Lim S.	Development of a 2.4-GHz, Parasitic Array Antenna for Wireless Electrocardiograph (ECG) Application	28
Artner G., Langwieser R., Lasser G., Mecklenbräuker C.F.	Effect of Carbon-Fiber Composites as Ground Plane Material on Antenna Performance	31
Kufa M., Raida Z., Vsetula P., Wolansky D.	Filtering Antennas: Comparison of Different Concepts	35
Caporal Del Barrio S., Morris A., Pedersen G.F.	MEMS Tunable Antennas: Reaching for the 600 MHz-bands	39
Mazzinghi A., Albani M., Freni A.	Near Field Focusing for Security Applications: Design and Optimization of RLSA Antennas	43
Lasser G., Löschenbrand D., Mecklenbräuker C.F.	Near Field Scans of Tyre mounted Dipoles using a separate Phase Reference Antenna	47
Madanayake A., Wijenayake C., Bahrami H., Udayanga N., Acosta R.	Optically-Coupled Reflector Array Based Spatial Modulation Technique for Wireless Communications	N/A
	SESSION 17:Novel Antennas for Automotive and Vehicular Applications, organized by D.N. Aloï, M.S. Sharawi	
Schaffner J.H., Bekaryan A., Song H.J., Talty T., Carper D., Yasan E., Duzdar A.	A Drive Test Measurement Approach to Characterize on-Vehicle 2x2 LTE-MIMO Antennas	51
Ghafari E., Fuchs A., Eblenkamp D., Aloï D.	A Vehicular Rooftop, Shark-fin, Multiband Antenna for the GPS/LTE/Cellular/DSRC Systems	55

Song H.J., Bekaryan A., Schaffner J.H., Talty T., Carper D., Yasan E., Duzdar A.	Evaluation of Vehicle-Level MIMO Antennas: Capacity, Total Embedded Efficiency, and Envelope Correlation	59
Nayeri P., Elsherbeni A.Z., Kajfez D.	Segmented Half-Loop Antennas for Vehicular GPS Applications	63
Kashanianfard M., Sarabandi K.	Transparent Ground Planes for Automotive Applications	65
▲	SESSION 18:Emerging Antenna Technologies, Multiband Antennas, and Wideband Antennas: part 1, organized by H. Nakano	
Guan N., Chiba H., Yamaguchi Y., Niihara Y., Tayama H.	A Flat Roof Automobile Antenna Module for LTE, GPS and SDARS Applications	69
Stoeckle A., Lutz S., Talai A., Fischer G.	A New Approach For A Dual-Polarized Low Cost Patch Antenna With Low Cross- Polarization, High Bandwidth And High Isolation	73
Makino S., Hayashi H., Moroya T., Itoh K., Noguchi K., Hirota T.	Dual Band Characteristics of a Linear Antenna over a Capacitance Grid Type AMC Substrate	77
Maruyama T., Horikoshi T., Chen Q.	Dual-band Reflectarray Using Combination of Mushroom-like structure and Dipole Array	81
Kawano T., Yoshida K., Nakano H.	Dual-Beam Radiation from a Grid Array Antenna	83
Nakano H., Miura M., Yoshida K., Yamauchi J.	Metaloop for Linearly Polarized Radiation	87
Koga Y., Ban Y., Andrenko A., Yamagajo T., Shimizu M.	Mobile Handset Antenna Solution with Optimized Matching Circuits for Carrier Aggregation Operation	90
Ong L.C., Karim M.F., Nasimuddin N.	Overview of Antennas for RF Energy Harvesting	94
Ong L.T.	Performance of Vector-Sensor Antennas Arrays for Source Localization in Multipath Environments	98
Mano T., Iwasaki H.	Plaster Type Dual Band Antenna Made of Fabric Cloth for BAN Use	102
Tanabe M., Oish Y., Masuda Y.	Radiation Characteristics of a Wide-Band Dipole Antenna over an Electromagnetic Band-Gap Reflector	106
Kirino H., Ogawa K.	Various Applications of Low-Cost Phased Array Antennas with Mechanical Phase Shifters	110
▲	SESSION 20:Traveling-Wave Structures and Leaky-Wave Antennas, organized by C. Caloz, S. Gupta and D.R. Jackson, In memory of Arthur A. Oliner	
Li Y.B., Cai B.G., Cui T.J.	Design of Multi-Beam Holographic Leaky-wave Antenna with One/Two-Dimension Frequency Sweep	114
Peng S.T.	Leakage Effect due to Polarization Coupling in Dielectric Waveguides	117
Zamora G., Zuffanelli S., Paredes F., Herraiz-Martinez F.J., Martin F., Bonache J.	Leaky-Wave Antenna (LWA) based on Slot Line and Non-Bianisotropic Split Ring Resonators (NB-SRRs) and Comparison with CPW Approach	121

Karmokar D.K., Esselle K.P., Hay S.G.	Shifting the Fixed-Frequency Beam Scanning Range of a Leaky-Wave Antenna by Slot Loading	125
Jackson D.R., Burghignoli P., Lovat G., Capolino F.	The Role of Leaky Waves in Fabry-Pérot Resonant Cavity Antennas	129
Gupta S., Caloz C., Jiang L.J.	Traveling-wave Antennas with Exotic Radiation Patterns	133
▲	SESSION 21:Channel Modeling and MIMO Systems	
Caporal Del Barrio S., Franek O., Krenz G., Pedersen G.F.	Evaluation of Reflections in a MIMO OTA Test Setup	137
Cotton S.L.	Shadowed fading in body-to-body communications channels in an outdoor environment at 2.45 GHz	141
Hasenaecker G., Storch R., Musch T., Pohl N.	Ultra Low Noise Signal Synthesis for the Use in a FMCW MIMO Radar System	145
▲	SESSION 23:Emerging Antenna Technologies, Multiband Antennas, and Wideband Antennas: part 2, organized by H. Nakano	
Suganuma A., Kagoshima K., Takeda S., Umehira M.	A Multiband Antenna Composed of Helical Elements for Sensor Networks	149
Shibayama J., Sasaki N., Yamauchi J., Nakano H.	Analysis of an Optical Nanodipole Antenna with a Stub	153
Nishioka Y., Hitomi K., Okegawa H., Mizuno T., Fukasawa T., Miyashita H., Iida Y.	Design and Evaluation of HF/UHF Dual-band RFID Tag Utilizing HF-coil as UHF Antenna Conductor	155
Huang C.-F., Tien Y.-W., Chen C.-Y., Lin X.-Z.	Design Techniques for Antenna Needles Used in Microwave Hyperthermia Therapy for Tumor Treatment	159
Taguchi M., Rohadi E.	Dual Band MIMO Antenna Composed of Unbalanced Fed Low Profile Inverted L Antennas on Finite Conducting Plane	N/A
Vinci G., Linz S., Koelpin A.	Estimation Error Analysis and Compensation of Dual Six-Port based DOA Detection	162
Linz S., Vinci G., Lindner S., Mann S., Lurz F., Barbon F., Weigel R., Koelpin A.	Evaluation of the Impact of Antenna Parameters on the Performance of Six-Port Radar	166
Borda Fortuny C., Tong K.F., Chetty K., Brittan P.	High-gain Triple-Band Reconfigurable Vivaldi Antenna	170
Onodera S., Saitou A., Ishikawa R., Honjo K.	Novel Design of Dual-band Reconfigurable Antennas Using Lumped-Elements and Varactors Located Inside Antenna's Conductor	173
Phongcharoenpanich C., Boonying K.	Polarization Switchable Flat Antenna for WLAN Applications	177

Aloi D.N., Possa M., Barghouti A., Tlusty J., Sharawi M.S.	Printed DSRC Antennas for Enhanced Gain Coverage Towards Front and Rear of Vehicle for Automotive Applications	181
	SESSION 24:RFID Technologies	
Rorato O., Greco G., Bertoldo S., Lucianaz C., Allegretti M., Curtaz M., Roasio A., Barone S., Perona G.	An ad-hoc RFID Tag for Glaciers Monitoring	N/A
Nakajima H., Takahashi M.	Monitoring System for Removing IV Needles using RFID Technology	185
Cremoux C., Boyer A., Ben Dhia K.	Reliability of Active RFID Tag Immersed in Water for “Preventing Infant Abduction” Application	187
	SESSION 26:Detection, Direction-Finding, and Beam Steering Arrays, organized by M. Hein	
Ender J., Knott P., Brenner A., Klare J., Vaupel T., Worms J., Wilden H.	Advanced Antenna Concepts and Experimental Setups for DOA and Tracking at Fraunhofer FHR	191
Popugaev A.E., Weisgerber L.	An Efficient Design Technique for Direction-Finding Antenna Arrays	195
Pralon M.G., Schulz D., Thomä R.S.	An Eigen-Analysis of a Compact L-Quad Antenna Array for Direction Finding	199
Weisgerber L., Popugaev A.E.	Antenna Concepts for DoA Estimation in Traffic Scenarios	203
Oispuu M., Nickel U.	Array-based Direction Finding and Localization for Small Aerial Platforms	207
Hubert S., Craeye C.	Compact Circular Boxed Slot Antenna Array Devoted to Polarimetric Direction Finding	211
Baer C., Musch T.	Conceptual Design of a High Gain Antenna System with Wide Range Beam Steering Capability for Broadband Radar Applications	215
Bayer H., Krauss A., Stephan R., Hein M.A.	Land-Mobile Ka-Band Satcom Tracking Antenna Employing a Printed Circuit Board Based Multimode Monopulse Feed	219
Razavi A., Maaskant R., Yang J., Viberg M.	Optimal Aperture Distribution for Near-field Detection of Foreign Objects in Lossy Media	223
	SESSION 28:Propagation Modeling for Communications and Directional Aware Networking, organized by D. Erricolo, M. Iskander	
Abdallah M., Dyab W., Sarkar T., Prasad M.V.S.N., Misra C.S., Lamparez A., Salazar-Palma M.	Further Validation of an Electromagnetic Macro Model for Analysis of Propagation Path Loss in Cellular Networks Using Measured Drive Test Data	227
Sheikhsofla M., Sarabandi K.	Indoor Wave Propagation Modeling at low-VHF Band	N/A

Pham-Xuan V., Kavanagh I., Condon M., Brennan C.	On Comparison of Integral Equation Approaches for Indoor Wave Propagation	232
Lim S.Y., Awelemdy A.K., Yun Z., Iskander M.F.	Utilizing an Interactive Full 3D Ray Tracing Software Package for Radio Propagation in Drain	236
	SESSION 33: Compact Antenna Arrays – Design, Technologies, Applications, organized by M. Hein	
Titz D., Bisognin A., Chen J., Ferrero F., Pilard R., Gianesello F., Cathelin A., Niknejad A.M., Luxey C.	Antenna-array Topologies for mm-Wave Beamforming Transmitter with Quadrature Spatial Combining	238
Kagoshima K., Takeda S., Itou K.	Array Excitation Coefficients of a Compact Multi-Beam Antenna for MIMO Applications	242
Irteza S., Schäfer E., Ibraheam M., Bieske B., Stephan R., Hein M.A.	Beamforming in Compact Antenna Arrays for Robust Satellite Navigation	246
Lacik J., Mikulasek T., Puskely J., Raida Z., Wolansky D.	Compact Arrays Fed by Substrate Integrated Waveguides	250
Skrivervik A.K., Cara D.D., Trajkovikj J., Zürcher J.F.	Compact UWB Antennas for Wireless Body Area Networks (W-BANs)	254
Schroeder W.L., Bouezzeddine M., Krewski A.	Design Approaches for Electrically Small MIMO Antenna Systems on Mobile Devices	258
Franek O., Pedersen G.F.	Spherical Arrays for Wireless Channel Characterization and Emulation	262
