2014 International Conference on Computer, Communications, and Control Technology

(I4CT 2014)

Langkawi, Malaysia
2-4 September 2014

IEEE

IEEE Catalog Number: CFP1452X-POD
ISBN: 978-1-4799-4554-2

TABLE OF CONTENTS

ABOUT THE CONFERENCE **xi**

FOREWORD
Chairman of I4CT 2014 **xii**

PROGRAM SCHEDULE **xiii**

KEYNOTE SPEAKERS **xxxi**

FULL PAPERS **xxxiii**

Title	Page
Pulse Amplitude and Delay Modulation for Indoor Optical Wireless Communications	1
Ultra-Low Phase Noise Compact Down-converter with Frequency Coverage of 18-40 GHz	5
Markov-modulated Bernoulli-based Performance Analysis for BLUE Algorithm Under Bursty and Correlated Traffics	9
Evaluation of Prosody-Related Features and Word Frequency for Malay Speeches	15
Performance of PTS Techniques with Varied Partition Size in PAPR Reduction of OFDM System	21
An Efficient Structure of Variable Fractional-Delay Filter for Digital Time-Delay Beamformer	26
Deployment of Wireless Sensor Network At Titi Serong Paddy Field Crop, Malaysia	30
M3DITRACK3R:A Design of an Automated Patient Tracking and Medicine Dispensing Mobile Robot for Senior Citizens	36
Mobile Sensor Node Traversal Schemes Using Coverage Based Pattern Movement with Uniform Energy Depletion	42
Indoor Positioning Method Based on Inertial Data, RSSI and Compass From Handheld Smart-Device	48
Symmetry Based Perceptually Lossless Compression of 3D Medical Images in Spatial Domain	53
The Cross Platform Application Development Adapted Spring Framework to Support Front-End Tendering Services	58

Advantage and Drawback of Support Vector Machine Functionality 63

The Role of Mobile Advertising Technology Towards Millennial Social Behavior 66

Form Design Development Study on Autistic Counting Skill Learning Application 70

A Process Warehouse Based Resource Suitability Evaluation Method for Business Process Improvement 75

Determinants Status of Patient After Receiving Treatment At Intensive Care Unit: A Case Study in Johor Bahru 80

PD Controller for Three-Axis Satellite Attitude Control Using Discrete Kalman Filter 83

Simple Model Following Control Design Methods for a Stable and an Unstable Plant 86

Integrated Remote Insulation Condition Monitoring of Generators and Motors Using Traditional and Wireless Sensor Technologies 91

Efficient Low Voltage Amplification Using Self Starting Voltage Regulator for Storage System 97

H Infinity Filtering for Networked Control Systems 101

Enhancing Group Activities with Multidimensional Communication in Collaborative Workspace 105

The Design and Implementation of IEEE 802.15.7 Module with Ns2 Simulator 111

Efficient Acoustic Echo Cancellation Joint with Noise Reduction Framework 116

A Weight-based Greedy Algorithm for Target Coverage Problem in Wireless Sensor Networks 120

Inter-rater Reliability of Accessing the Intelligibility of Band-limited Transformed Speech Using Nonlinear Frequency Compression 126

Desynchronization-based Weighted Scheduling Adaptive to Traffic Load for Wireless Networks 130

An Energy-Efficient Game Theoretic Approach Towards Resource Block and Power Allocation in Femtocell Networks 135

Physical Layer Secrecy Performance with Transmitter Antenna Selection Over Dissimilar Fading Channels 140

Analysis of Soil Moisture Detection Using Ground Penetrating Radar 145

A Novel Baseband UWB Narrow Pulse Generator for Microwave and Through-wall Imaging 151

A Reconfigurable Multiband Antenna for WLAN and WiMAX Applications 156

Energy-limited Ant Colony Optimization with Cooperative Transmission 161

Architecture of Software Tools for Domain-Specific Mathematical Modelling 166

Medical Image Compression Using Block-based PCA Algorithm 171

Data Warehouse for Human Resource by Ministry of Higher Education and Scientific Research 176

Follow Up System for Directorate of Scholarship and Cultural Relations in Iraq 182

A Review of Reversible Medical Image Watermarking Scheme with Tamper Localization and Recovery Capability 188

Using Molecular Algorithm in Keystroke Dynamics 193

Authentication System for Medical Images Using Hilbert Numbering 198

Interactive Augmented Reality Art Book to Promote Malaysia Traditional Game 203

Knowledge Management Health Status Assessment: A South African Government Department Case Study 209

Performance Study and Evaluation of a Solar PV Testbed System in Brunei Darussalam 214

Design of a RFID-based Speed Monitoring System for Road Vehicles in Brunei Darussalam 219

Situational Requirement Engineering Framework for Global Software Development 224

Using a Biometric System to Control Access and Exit of Vehicles At Tshwane University of Technology 230

Workstations Uptime Analysis Framework to Identify Opportunity for Forming Ad-Hoc Computer Clusters 234

SQL Injection Vulnerability General Patch Using Header Sanitization 239

Analysis of Retrieval Result on Ontology-Based Query Reformulation 244

Effect of Chronic Obstructive Pulmonary Disease on Airflow Motion Using Computational Fluid Dynamics Analysis 249

A Conceptual Framework for Securing Connected or Federated Clouds 255

Impact of Personality and Gender Diversity on Software Development Teams' Performance 261

Quality of Service (QoS) Model for Web Service Selection 266

Reliable Wireless Obstacle Detection System for Elderly and Visually Impaired People with Multiple Alarm Units 271

Pronunciation Errors of Non-Arab Learners of Arabic Language 277

Determination of Optimal Service Level in Cloud E-Marketplaces Based on Service Offering Delay 283

Design and Synthesis of Reversible Arithmetic and Logic Unit (ALU) 289

0 dB Coupler Employing Slot Technique on Planar Microstrip 294

Quad Ring Patch Antenna Design for VHF/UHF Application 300

DSP Techniques for Reducing Chromatic Dispersion in Optical Communication Systems 305

CAWIS: Context Aware Wireless Irrigation System 310

Impact of Test Area in Antenna Gain Measurement Using Image Theory 316

A Neural Network Based Model for Radiated Emissions Prediction From High Speed PCB Traces 320

Recent Open Source Wireless Sensor Network Supporting Simulators: A Performance Comparison 324

Selective Update Euclidean Direction Search Algorithm for Adaptive Filtering in Indoor Wireless Rake-Receiver 329

Sentiment Analysis Using Support Vector Machine 333

SQL Injections Attack and Session Hijacking on E-Learning Systems 338

Forensic Challenges in Mobile Cloud Computing 343

i-Wirid: Construction of Digital Wirid Via Mobile Platform 348

Region of Adaptive Threshold Segmentation Between Mean, Median and OTSU Threshold for Dental Age Assessment 353

The Cost of Virtualization Implementation in Volunteer Computing 357

Study of S-box Properties in Block Cipher 362

A Study in Data Security in Cloud Computing 367

Development of Android Based On-Line Monitoring and Control System for Renewable Energy Sources 372

Contactless Energy Transfer Using Acoustic Approach - A Review 376

Altitude Controller Design for Multi-Copter UAV 382

Design of Robust Controller for Networked Control System 388

Time Series Method for Machine Performance Prediction Using Condition Monitoring Data 394

Dual Braille Code Translator: Basic Education Tool for Visually Impaired Children 399

Comparison the Performance of OFDM System Based on Multi-Wavelet Transform with Different Modulation Schemes 403

Behavior of LSSVM and SVM Channel Equalizers in Presence of Non-Gaussian Noise 407

3GHz Hairpin Filter with Defected Ground Structure (DGS) for Microwave Imaging Application 411

Classification Model for Multi-Sensor Data Fusion Apply for Human Activity Recognition 415

iWire - A Broken Wire Detector for Electrical Appliances 420

Development of CAPTCHA System Based on Puzzle 426

Developing an Architectural Visualization Using 3D for Photo Tourism 429

Sound Analyser for Bioacoustic Monitoring System Using LabVIEW 434

User Satisfaction Based Quantification of Direct Trust in T-Grid Computational Model 438

Driver's Health Management System Using Nanosecond Pulse Near-field Sensing Technology 443

Model of Competency for Personalized Training in B2B for Sports Industry 447

A Case Study for the Cloud Computing Security Threats in a Governmental Organization 452

Artificial Neural Network Based Arousal Detection From Sleep Electroencephalogram Data 458

Reversible Watermarking Based on Sorting Prediction Scheme 463

A New Orthogonal - Diamond Search Algorithm for Motion Estimation 467

Secured Web Application Using Combination of Query Tokenization and Adaptive Method in Preventing SQL Injection Attacks 472

Digital Image Compression Using Block Truncation Coding and Walsh Hadamard Transform Hybrid Technique 477

COMMITTEE
Organizing Committee **xxxiv**

AUTHORS INDEX **xxxv**
LIST OF REVIEWERS **xlii**

ACKNOWLEDGEMENT
Organizer and Supporters **xlvii**
