

Third International Conference on Agro-Geoinformatics

(Agro-Geoinformatics 2014)

Beijing, China
11-14 August 2014

IEEE Catalog Number: CFP1448T-POD
ISBN: 978-1-4799-4156-8

Table of Contents

Estimating Leaf Chlorophyll Concentration in Soybean Using Random Forests and Field Imaging Spectroscopy.....	<i>J. Lv, and Z. Yan</i>	1
Estimation of Pb Concentration in the Mining Tailing Areas Base on Field Spectrometry and Support Vector Machine	<i>J. Lv, and Z. Yan</i>	5
Forecasting of Powdery Mildew disease with multi-sources of remote sensing information	<i>J. Zhang, L. Yuan, C. Nie, L. Wei, and G. Yang</i>	10
Assessing the impact of urbanization on vegetation change and arable land resources change in Shandong Province	<i>Z. Chao, and P. Zhang</i>	15
Modeling crop spatial patterns and their phenological calendars using geographical factors - a case study in Northwest China.....	<i>Z. Pan, J. Huang, F. Mao, X. Wang, and Z. Zhao</i>	20
Crop identification by means of seasonal statistics of RapidEye time series.....	<i>E. Zillmann, and H. Weichert</i>	26
Assessment of Agricultural Drought Indicators Impact on Soybean Crop Yield: A Case Study in Iowa, USA	<i>Y. Huang, X. Liu, Y. Shen, and J. Jin</i>	32
Optimal design on samples layout of spatial sampling schemes for estimating winter wheat planting acreage	<i>D. Wang, Z. Chen, Q. Zhou, and Y. An</i>	38
Particle Swarm Optimization based Spatial Location Allocation of Urban Parks - A Case Study in Baoshan District, Shanghai, China	<i>J. Yu, Y. Chen, J. Wu, R. Liu, H. Xu, D. Yao, and J. Fu</i>	44
Provincial Spatial Sampling Method for Crop Sown Acreage Estimation	<i>Z. Dong, D. Wang, Y. An, and Q. Zhou</i>	50
Evaluation on Extrapolation Efficiency of Multiple Estimators for Winter Wheat Planting Acreage Estimation	<i>Z. Dong, D. Wang, Y. An, and Z. Chen</i>	56
Evaluation of farmland quality with the integration of GIS and RS technology at village scale	<i>X. Gu, Y. Wang, X. Yang, and Y. Chen</i>	62
Prediction of SPAD value and Distribution of Rape Leaf Based on Hyperspectral Imaging Technology	<i>Y. Li, L. Li, J. Wang, M. Liu, X. Lu, Z. Guo, and J. Zhang</i>	66
Integration of remotely sensed inundation extent and high-precision topographic data for mapping inundation depth	<i>C. Huang, Y. Chen, J. Wu, Z. Chen, L. Li, R. Liu, and J. Yu</i>	71
Study on Spatial Distribution of Total Suspended Matter of Poyang lake and Its Effect on the Water Quality	<i>L. Zhang, X. Chen, and Y. Zhang</i>	75

The Observation Capability Reason of Optical Satellite Sensor for soil moisture monitoring	<i>X. Wang, N. Chen, X. Yang, and Z. Chen</i>	79
Simulation and Prediction of Soil Organic Carbon Spatial Change in Arable Lands Based on DNDC Model	<i>D. Wang, Y. Yao, H. Si, W. Zhang, and H. Tang</i>	85
Estimating Rice Nitrogen Status Using Active Canopy Sensor Crop Circle 430 in Northeast China	<i>J. Shen, Y. Miao, Q. Cao, H. Wang, W. Yu, S. Hu, H. Wu, J. Lu, X. Hu, W. Yang, and F. Liu</i>	90
Extending WSDL for Describing Complex Geodata in GIS Service	<i>S. Gao, L. You, Z. Gui, and H. Wu</i>	97
Ecological suitability evaluation for torreyia Crop in Hangzhou city based on a GIS-based fuzzy model	<i>W. Huang, and J. Huang</i>	103
High-Fidelity 3D Plants Model Reconstructed based on Color Structured Light	<i>K. Si, J. Zhang, Z. Li, Z. Guo, X. Lu, and J. Xie</i>	109
Spatial evaluation of crop maps by spatial production allocation model in China	<i>J. Tan, Z. Li, P. Yang, Q. Yu, L. Zhang, W. Wu, P. Tang, Z. Liu, and L. You</i>	113
Improved Classification of Conservation Tillage Practices Using Hyperspectral Imagery with Spatial-Spectral Features	<i>W. Li, Q. Ran, Q. Du, and C. Yang</i>	119
Spatial dynamics modelling of crops pattern with remote sensing classification data	<i>T. Xia, W. Wu, Q. Zhou, P. Yang, and Y. Liu</i>	123
Study On the Ecological Flow in the Middle Reaches of Irtys Rivers	<i>G. Ye, and Y. Bai</i>	128
GIScript: Towards an Interoperable Geospatial Scripting Language for GIS Programming ...	<i>M. Zhang, P. Yue, and X. Guo</i>	132
Satellite Remote Sensing Experiment on Rotational Effect of Bean in Rotation of Rice and Bean	<i>L. Sun, and Z. Zhu</i>	137
A Fast Multi-scale Polygon Features Update Approach Based on Features Matching	<i>Q. Meng, and Y. Lu</i>	141
Using Rough Set Theory to Support OWSs Semantic Reasoning	<i>L. Miao, D. Jiao, J. Xu, Y. Zhou, and W. Cheng</i>	146
The Correction Ground Spectral Model for Estimating Above-Ground Net Primary Productivity at the Peak of Growing Season on Meadow Steppe, Hulunbeier, Inner Mongolia, China	<i>Z. Diao, S. Lv, D. Su, Z. Feng, L. Sun, and X. Tian</i>	150
Discovering Spread Mode of Public Opinions in Incidents and Mapping it with GIS: a Case on Big Geospatial Data Analytics	<i>C. Zhang, P. Yue, and X. Zhai</i>	154

Impact of climate warming on drought characteristics of summer maize in North China Plain for 1961-2010	<i>Y. Hu, Y. Liu, and Z. Li</i>	158
A review of data assimilation of crop growth simulation based on remote sensing information	<i>Z. Jiang, Z. Chen, and J. Liu, L. Sun</i>	163
Evaluating a New Leaf Fluorescence Sensor for Estimating Rice Nitrogen Status	<i>W. Yu, Y. Miao, S. Hu, J. Shen, and H. Wang</i>	169
GCDViewer: an Online Data Query, Visualization and Analysis System for Global Climatic Data	<i>H. Xu, and Y. Bai</i>	174
Remote Sensing Assisted Multi-Level Crop Acreage Estimation - an Application in Heilongjiang Province	<i>W. Zhou, R. Zhu, J. Zhang, and Y. Pan</i>	178
Impacts of Crop Rotation on Vegetation Condition Index for Species-level Drought Monitoring	<i>Y. Shen, X. Liu, and Y. Huang</i>	184
Analysis of the effects of salt content on soil spectral characteristics	<i>C. Ma, G. Shen, Y. Zhi, Z. Wang, and Z. Wang</i>	189
Leaf recognition and segmentation by using depth image	<i>X. Shao, Y. Shi, W. Wu, P. Yang, Z. Chen, and R. Shibasaki</i>	195
Development of a web temporal-spatial information application for main crops based on integration of remote sensing and crop model	<i>X. Yang, F. Yang, X. Xu, X. Gu, H. Yang, and H. Yu</i>	199
Deriving Time-dependent Area Model of Eichhornia Crassipes Growth Using Alos and GPS Data	<i>L. Sun, and Z. Zhu</i>	203
Vegetation Measurement Using Image Processing Methods	<i>M. Kırıcı, E. Güneş, Y. Çakır, and S. Şentürk</i>	207
Yield prediction of wheat in south-east region of Turkey by using artificial neural networks	<i>Y. Çakır, M. Kırıcı, and E. Güneş</i>	212
Determination of the Varieties and Characteristics of Wheat Seeds Grown in Turkey Using Image Processing Techniques	<i>E. Güneş, S. Aygün, M. Kırıcı, A. Kalateh, and Y. Çakır</i>	216
Sensitivity Analysis of the Row Model's Input Parameters	<i>P. Zhang, F. Zhao, Y. Guo, Y. Zhao, L. Dong, and H. Zhao</i>	220
Discussion on possibility of the identification of karst vegetation communities based on OLI data	<i>R. Zhang, H. Luo, Y. Zou, and G. Liu</i>	225
A design of spatial decision support system to enhance decision progress in agricultural actions	<i>M. Li, T. Chang, C. Sun, and M. Lien</i>	232

Capability of multi-temporal Radarsat-2 data in monitoring canola crop and its plant height	<i>H. Yang, E. Chen, Z. Li, G. Yang, X. Xu, L. Yuan, Q. Feng, and L. Zhao</i>	237
Comparison and Analysis NDVI and RVI Changes Before and After Typhoon in Hainan Based on HJ-1CCD Satellite Images ...	<i>H. Luo, L. Wang, J. Fang, S. Dai, H. Li, and S. Chen</i>	242
Cotton Area Estimation Using Muli-sensor RS Data and Big Plot Survey in Xinjiang	<i>L. Wang, C. Wang, P. Hao, K. Shi, and A. Aablikim</i>	246
Potential of using April-June multi-temporal images to classify crops before harvest: Case study of Kashgar	<i>P. Hao, Z. Niu, L. Wang, and C. Wang</i>	251
An application for the efficient use of potable water	<i>F. Bağcı, M. Kırcı, and E. Güneş</i>	256
Spatiotemporal variation of drought frequency of winter wheat in Hebei Province	<i>X. Liu, X. Zhu, Y. Pan, A. Zhao, M. Li, and L. Li</i>	260
Trend analysis for blue and green water resources in Weihe River Basin of Northwest China during the past thirty years and in the near future	<i>A. Zhao, X. Zhu, S. Chen, M. Li, X. Liu, and Y. Pan</i>	266
Upscaling In-Situ Leaf Area Index Measurements to Obtain the Representative Ground- Truth of the Heterogeneous Land Surface	<i>Y. Shi, J. Wang, Y. Qu, and H. Zhou</i>	271
Ecological Security Evaluation in Farming-pastoral Ecotone Using TM Data	<i>H. Ma, X. Li, D. Hu, and H. Zhao</i>	276
Application of MODIS time series data to estimate effects of rice planthopper in Yangtze River Delta region	<i>J. Shi, and J. Huang</i>	281
Simulation of the methane emission in rice fields in China during the past 40 years by DNDC model and GIS technical	<i>Z. Tian, Y. Niu, X. Tu, Z. Liang, C. Li, and D. Fan</i>	287
Using hyperspectral measurements to estimate ratio of leaf carbon to nitrogen in winter wheat	<i>X. Xu, X. Yang, H. Yang, H. Feng, G. Yang, and X. Song</i>	292
Design, Development and Application of a Satellite-based Field Monitoring System to Support Precision Farming	<i>J. Meng, Z. Li, B. Wu, and J. Xu</i>	296
Soybean Yield Estimation Using HJ-1 CCD Data in Northeast China	<i>X. Du, F. Song, H. Wang, H. J. Meng, Q. Li, J. Liu, L. Ding, and Y. Lu</i>	305
Grassland aboveground biomass retrieval from remote sensing data by using artificial neural network in temperate grassland, northern China	<i>Y. Jin, Q. Wu, B. Xu, X. Yang, Z. Qin, J. Li, F. Zhao, S. Chen, and H. Ma</i>	309
GPU Based Parallel Image Processing for Plant Growth Analysis	<i>A. Özdemir, and T. Altular</i>	315

Application of Remote Sensing Techniques in Locating Dry and Irrigated Farmland Parcels	<i>S. Şentürk, S. Bagis, and B. Üstündağ</i>	321
Extracting multiple cropping index based on NDVI time series: A method integrating temporal and spatial information	<i>S. Liang, C. Yang, D. Yu, and W. Ma</i>	325
Estimation of Soil Moisture Profile Using Wavelet Neural Networks	<i>A. Kulagic, and B. Üstündağ</i>	330
A New Approach for Measuring 3D Digitalized Rape Leaf Parameters based on Images	<i>Y. Fang, C. Lin, R. Zhai, Y. Tang, and X. Wang</i>	336
Automatic Recognition of Rape Seeding emergence Stage based on Computer Vision Technology	<i>Y. Fang, T. Chang, R. Zhai, and X. Wang</i>	341
Object-Oriented Classification of Rubber Plantations from Landsat Satellite Imagery	<i>S. Dai, H. Li, H. Luo, M. Li, J. Fang, L. Wang, J. Cao, and W. Luo</i>	346
Multi-parameter Spatial Interpolation of Solar Radiation in Heterogeneous Structured Agricultural Areas	<i>M. Yazar, E. Ozelkan, and B. Üstündağ</i>	350
Single Late Rice Information Extraction based on Change Detection method using Neighborhood Correlation Images	<i>M. Li, X. Zhu, A. Zhao, X. Liu, S. Chen, T. Zhou, and Y. Pan</i>	356
Automated Keys of Soil Diagnostic Horizons Based on Case-Based Reasoning	<i>L. Qiu, and A. Li</i>	360
Agromapas, Geospatial Platform for rural affairs in Colombia	<i>D. Pajarito</i>	364
Multiple Kernels Learning for Classification of Agricultural Time Series Data	<i>S. Niazmardi, S. Homayouni, H. McNairn, J. Shang, and A. Safari</i>	369
Study on integrated discovery system of sensors for agriculture observation application	<i>C. Hu, X. Zhong, and J. Xu</i>	373
Public Preferences and values for cultivated land in mining area in China	<i>Y. Shi, L. Han, J. Yuan, and M. Min</i>	378
Remote-Sensing Based Winter Wheat Growth Dynamic Changes and the Spatial-Temporal Relationship with Meteorological Factor	<i>Q. Huang, W. Wu, Q. Zhou, and D. Li</i>	384
Land Use Change on Sloping Areas in Phuket Province, Thailand	<i>W. Pantanahiran</i>	390
Real Time Integrated Agricultural Information Services in Turkey	<i>H. Erden, G. Kusek, G. Öztürk, and C. Özcanlı</i>	396

Research on sensor data visualization method based on real-time dynamic symbol	<i>D. Jiao, L. Miao, and J. Jiang</i>	400
Urban Green Vegetation Stress Conditions Diagnosis Based on Hyperspectral Database-A Case Study of Xuzhou	<i>X. Qian, Q. Shen, L. Liang, L. Zhang, L. Wang, and S. Wang</i>	404
DEM Based Analysis of Biomass Carbon Stock in Xilingol Grassland	<i>Hasituya, Z. Chen, and Y. Bao</i>	408
BigGIS: How Big Data Can Shape Next-Generation GIS	<i>P. Yue, and L. Jiang</i>	413
Hyperspectral Characteristics Analysis of <i>Aconitum leucostomum</i> Worosch in the Grassland Taking Ily as an example	<i>A. Wen, J. Zheng, X. Wu, J. Xuan, C. Mu, and W. Wang</i>	419
Effects of Drought on Grain Yield of Spring Maize in Northern China	<i>C. Dong, X. Yang, Z. Liu, K. Li, and S. Sun</i>	425
Analysis of Impacts of Drought on GPP in Yunnan province Based on MODIS Products	<i>X. Guan, H. Shen, W. Gan, and L. Zhang</i>	430
WebGIS Based Agricultural Products Trade Platform Using the Bilateral Matching Model	<i>W. Niu, and J. Zheng</i>	434
Spatial Heterogeneity of Surface Soil Nutrients in Small Scale in the Black Soil Region of Northeast China	<i>A. Zhang, L. Jiang, Q. Qi, X. Li, and L. Pi</i>	440
Landside Susceptibility Assessment Based on Weighted Information Value Model Case Study of Wenchuan Earthquake 10 Degree Region	<i>L. Jiang, D. Liu, Y. Jiang, and H. Fang</i>	444
Estimating Wheat Leaves Chlorophyll Content Using Hyperspectral Technology and Integrated Inversion Approach	<i>L. Liang, L. Zhang, S. Su, X. Liu, X. Qian, Q. Shen, S. Zhao, and Z. Qin</i>	448
US Geospatial Crop Frequency Data Layers	<i>C. Boryan, Z. Yang, and P. Willis</i>	454
Scheduling Algorithm Research For Spatial Information Service Under Cloud Environment	<i>C. Peng, X. Tan, Z. Sha, Q. Liu, M. Gao, and Y. Yao</i>	459
GB-Tree: An Efficient LBS Location Data Indexing Method	<i>Q. Liu, X. Tan, F. Huang, C. Peng, Y. Yao, and M. Gao</i>	465
Cause Analysis and Accuracy Improvement of Confusing Land Cover Types in China Geography Census	<i>Z. Gao, and X. Zhou</i>	470
Support Vector Machine and Object-oriented Classification for Urban Impervious Surface Extraction from Satellite Imagery	<i>Z. Gao, and X. Liu</i>	475

Database Management of Forest Resource Information Based on 3S Technology	<i>J. Wu, K. Zhang, and J. Lei</i>	480
.....		
Changing Grain Production in China: Perspective on Changing Grain Acreage	<i>T. Jin, and Z. Fang</i>	484
.....		
Phenology Detection of Winter Wheat in the Yellow River Delta Using MODIS NDVI Timeseries data	<i>L. Chu, G. Liu, C. Huang, and Q. Liu</i>	489
.....		
Research on Image Mosaic Method of UAV Image of Earthquake Emergency	<i>J. Bi, W. Mao, and Y. Gong</i>	494
.....		
The application of FY-3A/MERSI in drought and vegetation monitoring in Gansu	<i>L. Han, Q. Zhang, X. Wan, and N. Guo</i>	500
.....		
The change of winter wheat planting structure under the background of climate change in Gansu Province	<i>L. Han, X. Wan, Q. Zhang, and J. Jia</i>	504
.....		
Retrieval Of canopy Chlorophyll Content For Spring Corn Using Multispectral Remote Sensing Data	<i>J. Xu, and J. Meng</i>	508
.....		
Grain Consumption Forecasting in China for 2030 and 2050: Volume and Varieties	<i>M. Gao, Q. Luo, Y. Liu, and J. Mi</i>	513
.....		
Entropy Based Noise Clustering Soft Classification Method for Identification of Wheat Crop Using Time Series MODIS Data	<i>P. Upadhyay, S. Ghosh, and A. Kumar</i>	519
.....		
Object oriented extraction of reserve resources area for cultivated land using RapidEye image data	<i>Y. Yao, H. Si, and D. Wang</i>	525
.....		
A Web-based Semi-automated Method for Semantic Annotation of High Schools in Remote Sensing Images	<i>M. You, Z. Sun, L. Di, and Z. Guo</i>	529
.....		
Vegetation supply water index based on MODIS data Analysis of the in Yunnan in spring of 2012	<i>J. Wang, J. Bai, L. Li, and Y. Yu</i>	533
.....		
Estimating Carbon Dioxide Concentrations in Urban Areas from Satellite Imagery Using Bayesian Network	<i>J. Tao, Y. Zhou, W. Wu, and L. Yu</i>	540
.....		
Mapping Rice Crop fields using C Band Polarimetric SAR Data	<i>J. Chen, Y. Han, and J. Zhang</i>	547
.....		
Effects of Soil Moisture in Spring on Growth of Winter Wheat in North China Plain	<i>H. Wang, Q. Li, X. Du, Y. Lu, and J. Liu</i>	551
.....		
Long-term Trend and Variability of China's Arid Climate and Drought Area based on the Standardized Precipitation Index	<i>Y. Liu, W. Jiang, B. Xiao, M. Gao, and B. Lei</i>	555

Detection of the Onset of Crop Stress Induced by Glyphosate Using Chlorophyll Fluorescence Measurements ...	<i>Y. Guo, F. Zhao, Y. Huang, K. Reddy, Y. Zhao, and L. Dong</i>	560
Assessing the crop acreage at county level on the North China Plain using an adapted regression estimator method	<i>J. Liu, Q. Dong, Z. Chen, L. Wang, X. Wang, and J. Gallego</i>	565
Estimation of regional evapotranspiration over the Southern Great Plains based on Penman-Monteith theory and the soil moisture estimates	<i>L. Sun, Z. Chen, and Z. Jiang</i>	570
