

2014 14th International Conference on Numerical Simulation of Optoelectronic Devices

(NUSOD 2014)

**Palma de Mallorca, Spain
1-4 September 2014**

**IEEE Catalog Number: CFP14817-POD
ISBN: 978-1-4799-3683-0**

Table of Contents

Monday, 1 September 2014

MA Nanostructures

- MA1 Many-Body Effects in CdSe/CdTe Colloidal Quantum Dots; Jacek M. Miloszewski and Stanko Tomic; University of Salford, UK 1
- MA2 Realistic models of quantum-dot heterostructures; Daniele Baretin (1), Matthias Aur der Maur (1), Alessandro Pecchia (2), and Aldo di Carlo (1); (1) University of Rome Tor Vergata, Italy; (2) CNR-ISMN, Monterotondo, Italy 3
- MA3 Model for a semiconductor quantum-dot nanolaser; Weng W. Chow (1), F. Jahnke (2), and C. Gies (2); (1) Sandia National Laboratories, USA; (2) University of Bremen, Germany 5
- MA4 Design and simulation of high-speed nanophotonic electro-optic modulators; Simeon N. Kaunga-Nyirenda (1), H.K. Dias (1), J.J. Lim (1), S. Bull (1), S. Malaguti (2), G. Bellanca (2) and E.C. Larkins (1); (1) The University of Nottingham, UK; (2) University of Ferrara, Italy 7

MB GaN-based Devices

- MB1 Auger transitions and their signatures in III-nitride LEDs: a full-band modeling; Francesco Bertazzi, Xiangyu Zhou, Michele Goano, Giovanni Ghione, Enrico Bellotti; Politecnico di Torino, Italy (invited) 9
- MB2 Effect of alloy fluctuations in InGaN/GaN quantum wells on optical emission strength; M. Auf der Maur (1), D. Baretin (1), A. Pecchia (2), F. Sacconi (3), A. Di Carlo (1); (1) Università degli Studi di Roma Tor Vergata, Italy; (2) CNR-ISMN, Italy; (3) Tiberlab Srl., Italy 11
- MB4 Trap-assisted tunneling in InGaN/GaN LEDs: experiments and physics-based simulation; Marco Mandurrino (1), G. Verzellesi (2), M. Goano (1,3), M. E. Vallone (1), F. Bertazzi (1,3), G. Ghione (1), M. Meneghini (4), G. Meneghesso (4), and E. Zanoni (4); (1) Politecnico di Torino, Italy; (2) Università di Modena e Reggio Emilia, Italy; (3) IEIIT-CNR, Politecnico di Torino, Italy; (4) Università di Padova, Italy 13
- MB5 Minimizing the influence of surface potentials in axial InGaN/GaN nanowire heterostructures by reducing their diameter; Oliver Marquardt, L. Geelhaar, O. Brandt; Paul-Drude-Institut, Germany 15

MC Light-Emitting Diodes

- MC1 ABC-Model for Interpretation of Internal Quantum Efficiency and Its Droop in III-Nitride LEDs; Sergey Karpov; STR Group - Soft-Impact, Ltd., St.Petersburg, Russia (invited) 17
- MC2 Highly Efficient GaN-based Bipolar Cascade LEDs; Joachim Piprek; NUSOD Institute, USA 19
- MC3 Monte Carlo simulation of hot electron transport in III-N LEDs; Pyy Kivisaari, Toufik Sadi, Jani Oksanen, and Jukka Tulkki; Aalto University, Finland 21
- MC4 Numerical Analysis of Planar Light-Emitting Diode with Designed p-Electrode; Irina Khmyrova(1), N.Watanabe(1), A. Kovalchuk(2), J. Kholopova(2), and S. Shapoval (2); (1) University of Aizu, Japan; (2) IMT RAS, Russia 23
- MC5 Double-sided Pattern Design on Patterned Sapphire Substrate of GaN-based LEDs; Xinyu Yu, Zhen Che, Jun Zhang, Mengyuan Xie, Jianhui Yu, Huihui Lu, Yunhan Luo, Zhe Chen; Jinan University, China 25

MP Posters

- MP01 A spurious-solution-free envelope function model for quantum-confined wurtzite nanostructures; Xiangyu Zhou, Francesco Bertazzi, Michele Goano, Giovanni Ghione; Politecnico di Torino, Italy 27
- MP02 Electrical characteristics simulation of GaAs-based blocked-impurity-band detector for THz application; Xiaodong Wang (1), Bingbing Wang (1), Liwei Hou (1), Wei Xie (1), Xiaoyao Chen (2), and Ming Pan (1); (1) No. 50 Research Institute of China Electronics Technology Group Corporation, China; (2) Fudan University, China 29
- MP03 Photoresponse simulation for separate absorption and multiplication GaN/AlGaIn avalanche photodiode; Xiaodong Wang (1), Bingbing Wang (1), Liwei Hou (1), Wei Xie (1), Xiaoyao Chen (2), and Ming Pan (1); (1) No. 50 Research Institute of China Electronics Technology Group Corporation, China; (2) Fudan University, China 31
- MP04 Calculation of silicon antireflective microstructures for mid-infrared applications; Young Min Song (1), K. S. Chang (2); (1) Pusan National University, Korea; (2) Korea Basic Science Institute, Korea 33
- MP05 Determination of minority carrier lifetime in mercury-cadmium telluride photovoltaic detectors using parallel resistance method; Haoyang Cui, J. L. Wang, C. Q. Wang, C. Liu, and Z. Tang; Shanghai University of Electric Power, China 35

MP06	The Photoelectric Conversion Behavior of GaAs/InGaAs/InAs QuantumDots-in-well in Double Barrier; Wei-Wei Wang, Lin Ding, Fang-Min Guo; East China Normal University, China	37
MP07	Effect of Electron Blocking Layer on Inter-QW Transport in III-Nitride Multi-QW LEDs; Mikhail V. Kisin, Chih-Li Chuang and Hussein S. El-Ghoroury; Ostendo Technologies Inc., USA	39
MP08	Reflective Semiconductor Optical Amplifier Modulator Dynamic Model; Michael Connelly; University of Limerick, Ireland	41
MP10	A novel plasmonic nanosensor based on electro-magnetically induced transparency of waveguide; B.Ni, X.Y. Chen, Dayuan Xiong, H. Liu, G.H. Hua, J.H. Chang, J.H. Zhang, H.Zhou; (1) Nanjing University , China; (2) Fudan University, China; (3) East China Normal University, China	43
MP11	Gap Surface Plasmon Waveguide Analysis; Michael G. Nielsen and Sergey I. Bozhevolnyi; University of Southern Denmark, Denmark	45
MP12	Ultra-compact modulator based on Epsilon-Near-Zero metamaterial; Longzhi Yang, Ting Hu, Ao Shen, Chongyang Pei, Bing Yang, Tingge Dai, Hui Yu, Yubo Li, Xiaoqing Jiang, and Jianyi Yang; Zhejiang University, China	47
MP13	Twisted Split-ring Chiral Metamaterials for Broadband Circular Dichroism; Ruonan Ji, Shaowei Wang, Xiaoshuang Chen and Wei Lu; Shanghai Institute of Technical Physics, China	49
MP14	A Self-consistent Algorithm for InGaAs/GaAs strained multi-period Quantum Well Infrared Photodetectors; X.Q. Lu, Dayuan Xiong, C.L. Yu, J.Q. Wang; East China Normal University, China	51
MP15	Simulation of Kerr-nonlinear waveguide structures by an eigenmode expansion method; Jiri Petracek; Brno University of Technology, Czech Republic	53
MP16	Plasmon-enhanced Light Absorption of Silicon Solar Cells Using Al Nanoparticles; Debao Zhang, X. Yang, X. Hong, Y. Liu, J. Feng; Changshu Institute of Technology, China	55
MP17	Nanohole Design for High Performance Polymer Solar Cell; Doha M.A.Rahman (1), Mohamed Farahat O. Hameed (1,2) , S. S. A. Obayya(1); (1) Zewail City of Science and Technology, Egypt; (2) Mansoura University, Egypt	57
MP18	Influence of Gain on Transmission of Nanocavity Containing Metamaterials; Alireza Keshavarz, E.Tahmasebi; Shiraz University of Technology, Iran	59

- MP19 Efficient Modelling of Quantum Nanostructures; M. Ayad and Mohamed A Swillam; The American University in Cairo, Egypt 61
- MP20 Absorption Enhancement in Hexagonal Plasmonic Solar Cell; Muhammad.H.Muhammad (1) , Mohamed Farhat O. Hameed (1, 2) , and S. S. A. Obayya (1); (1) Zewail City of Science and Technology, Egypt; (2) Mansoura University, Egypt 63
- MP21 Shape-induced Effect on c-Si Thin Film Solar Cell Efficiency; Chuanhong Liu; Peking University Shenzhen Graduate School, China 65
- MP22 Study of the optical properties of a micro pillar array solar cell for different configurations; Francisco Jose Cabrera-España, B. M. A. Rahman and A. Agrawal; City University London, United Kingdom 67
- MP23 Simulation of SOA-MRR-Based Equalization Technique for FSO Signals; Zoi V. Rizou (1), K. E. Zoiros (1), and A. Hatziefremidis (2); (1) Democritus University of Thrace, Greece; (2) Technological Educational Institute of Chalkis, Greece 69
- MP24 Design of Integrated Refractive Index Sensor Based on Bend Waveguide with a Trench Structure; Jin Hwa Ryu, H. S. Yang, C. M. Kang, L. M. Do, K. B. Lee, N. K. Um, and K. H. Baek; Electronics and Telecommunications Research Institute, Korea 71
- MP25 Simulation of a Ridge-type Semiconductor Laser with Selective Double-Sided Anti-guiding and Partially Undoped Cladding Layers; Daiya Katsuragawa and Takahiro Numai; Ritsumeikan University, Japan 73
- MP26 Mode deflection in lithium niobate waveguide via electro-optic effect and its application for beam smoothing; Yuan Wang, Huihui Lu, Jianhui Yu, Yingxin Zeng, Xiaoli He, Yunhan Luo, Jun Zhang, Jieyuan Tang, Zhe Chen; Jinan University, China 75
- MP27 Analysis of Gain Saturation Characteristics in SOAs for Different Input Pulse Shapes; Suchi Barua (1), Narottam Das (1, 2), Sven Nordholm (1), Mohammad Razaghi (3); (1) Curtin University, Australia; (2) Curtin University Sarawak, Malaysia; (3) University of Kurdistan, Iran 77
- MP28 Optical Gain in Double Semi-Parabolic Quantum Well Laser typical of AlGaAs/GaAs; Alireza Keshavarz and N. Zamani (1), and H. Nadgaran (2); (1) Shiraz University of Technology, (2) Shiraz University, Iran 79
- MP30 Enhanced Light Absorption in Plasmonics-based MSM-PD with Special Design of Subwavelength Slit; F. F. Masouleh (1), Narottam Das (2), and S. M. Rozati (1); (1) University of Guilan, Iran; (2) Curtin University, Australia 81

- MP31 Hybrid FDTD modeling of a two-level atomic system; Bartłomiej Salski; Warsaw University of Technology, Poland 83
- MP32 Numerical Analysis of Optical Coupling Characteristics of Side-polished Photonics Crystal Fiber and Micro Optical Fiber with Bending; Xiaoli He, Jianhui Yu, Yingxin Zeng, Yunhan Luo, Jun Zhang, Jieyuan Tang, Zhe Chen, Huihui Lu; Jinan University, China 85
- MP33 Multiple-level Grating Used for Nanostructured Thin Film Solar Cells; Chuanhong Liu; Peking University Shenzhen Graduate School, China 87
- MP34 Hybrid Core Semiconductor Nanowires for Solar Cell Applications; Mohamed Hussein (1, 2) , Nihal F. F. Areed (1, 3), Mohamed Farhat O. Hameed (1, 3), S. S. A. Obayya (1); (1) Zewail City of Science and Technology, Egypt; (2) Ain Sham University, Egypt; (3) Mansoura University, Egypt 89
- MP35 Circuit Model of UTC-PD with High Power and Enhanced Bandwidth Technique; S. Khanra and Abhirup Das Barman; University of Calcutta, India 91
- MP36 Angular orientation of micro-structured fiber by side imaging analysis; Junxie Xie, Zhe Chen, Yunhan Luo, Huacai Huang, Jieyuan Tang, Junbin Fang, Jianhui Yu, Huihui Lu, Jun Zhang; Jinan University, China 93
- MP37 Optimal Design of the fluorescence sensors based on step-index multimode optical fibers; Yingxin Zeng (2,3), Zhe Chen (1,2), Rongsheng Chen (3), Yanbiao Liao (3), Jianhui Yu (1,2), Huihui Lu (1,2), Xindan Chen (1,2); (1) Guangdong Higher Education Institutes, China; (2) Jinan University, China; (3) South China Agricultural University, China 95
- MP38 Optimization of The Residual Radius of The Side-Polished Photonic Crystal Fiber Coupler; Yue Ma, Zhe Chen, Qingsong Wei, Yunhan Luo, Xiaoli He, Zhen Che, Huihui Lu, Jianhui Yu, Jieyuan Tang, Jun Zhang; Jinan University, China 97
- MP40 Quantum model for carrier capture time through phonon emission in InGaN/GaN LEDs; Marco E. Vallone, Francesco Bertazzi, Michele Goano, Giovanni Ghione; Politecnico di Torino, Italy 99

Tuesday, 2 September 2014

TuA Circuits and Systems

TuA1 Smart Techniques for Modelling Nanophotonic Circuits; Mohamed A. Swillam; The American University in Cairo, Egypt (invited) 101

TuA2 Simulation of nonlinear optical resonator circuits; Thomas Van Vaerenbergh, M. Fiers, J. Dambre and P. Bienstman; Ghent University, Belgium 103

TuA3 Mixed mode oscillations in a forced optoelectronic circuit for pattern and random bit generation; B. Romeira (1), J. M. L. Figueiredo (1), J. Javaloyes (2), O. Piro (2), Salvador Balle (3); (1) Universidade do Algarve, Portugal; (2) Universitat de les Illes Balears, Spain; (3) Institut Mediterrani d'Estudis Avançats, Spain 105

TuA4 Simulation Result for Dynamic Range Extension in Coherent Optical Frequency Domain Reflectometry; Myoung Jin Kim, Young Ho Kim, Eun Joo Jung, Woo-Jin Lee, Sung Hwan Hwang, and Byung Sup Rho; Korea Photonics Technology Institute, Korea 107

TuA5 Improved Performance of Colour Shift Keying using Voronoi Segmentation for Indoor Communication; A. Halder and Abhirup Das Barman; University of Calcutta, India 109

TuB Novel Devices

TuB1 Modelling and Design of MIR Chalcogenide Glass Fibre Lasers; Slawek Sujecki (1), A. Oladeji (1), L. Sojka (1), A. Phillips (1), A.B. Seddon (1), T.M. Benson (1), H. Sakr (1), Z. Tang (1), D. Furniss (1), K. Scholle (2), S. Lamrini (2) and P. Furberg (2); (1) University of Nottingham, UK; (2) LISA laser products OHG Fuhrberg & Teichmann, Germany (invited) 111

TuB2 Full-scale simulations of dielectric laser-driven accelerators; Benjamin M. Cowan (1), G. I. Bell (1), R. J. England (2), R. J. Noble (2), E. A. Peralta (2), and K. Soong (2); (1) Tech-X Corporation, USA; (2) SLAC National Accelerator Laboratory, USA 113

TuB3 A Numerical Investigation of Continuous Wave Parametric Gain in Silicon Nano Waveguides at Wavelengths around 1550 nm; Giannino Dziallas (1), M. Jazayerifar (1), A.j Gajda (2), L. Zimmermann (2), K. Petermann (1); (1) Technische Universität Berlin, Germany; (2) IHP, Germany 115

TuB4 Sensitive Surface Plasmon Resonance Biosensor Based on a Photonic Crystal and Bimetallic Configuration; Fang Wang, Chaoying Chen, Peiling Mao, Yunhan Luo, Xiaolong Chen, Junbin Fang, Shuihua Peng,

	Jun Zhang, Jieyuan Tang, Huihui Lu, Zhe Chen, Jianhui Yu; Jinan University, China	117
TuB5	Design and Optimization of Multimode Fiber Sensor Based on Surface Plasmon Resonance; Peiling Mao , Yunhan Luo , Xiaolong Chen, Junbin Fang, Hankai Huang, Chaoying Chen, Shuihua Peng, Jun Zhang, Jieyuan Tang, Huihui Lu, Zhe Chen, Jianhui Yu; Jinan University, China	119
TuC	<u>Optical Amplifiers</u>	
TuC1	Ground and Excited-State Performance of an Quantum-Dot Semiconductor Amplifier; Benjamin Lingnau, Eckehard Schöll, and Kathy Lüdge; Technische Universität Berlin, Berlin	121
TuC2	Wideband Steady-State Model of a Strained MQW-SOA; Michael J. Connelly (1), S. Mazzucato (2), H. Carrere (2), X. Marie (2), T. Amand (2), M. Achouche (3), C. Caillaud (3) and R. Brenot (3); (1) University of Limerick, Ireland; (2) Université de Toulouse, France; (3) Alcatel Thales III-V Lab, France	123
TuC3	Simulation of Polarization Effects in Solid State Lasers and Amplifiers; Christoph Pflaum, Rainer Hartmann and Thomas Graupeter; Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany	125
TuC4	Analysis of the performance of tapered semiconductor optical amplifiers: role of the taper angle; José-Manuel Tijero, L. Borrueal, M. Vilerá and I. Esquivias; Universidad Politécnica de Madrid, Spain	127
TuC5	Rules of Filamentation in Tapered Diode Amplifiers; Benjamin Dalin (1), E. Pniel (1), S. Golod (2), Sh. Y. Goldin (1,2), E. Shekel (2); (1) Jerusalem College of Technology, Israel; (2) Civan Advanced Technologies Ltd., Israel	129
TuD	<u>Photonics</u>	
TuD1	Recent progress in theory of nonlinear pulse propagation in optical fibers; Shalva Amiranashvili (1), U. Bandelow (1), N. Akhmediev (2); (1) WIAS Berlin, Germany; (2) The Australian National University, Australia (invited)	131
TuD2	Longitudinal mode analysis of multisection ring and edge-emitting semiconductor lasers; Mindaugas Radziunas; Weierstrass Institute, Germany	133
TuD3	Numerical Results for Wavelength Conversion of Superchannels in a Periodically Poled Lithium Niobate Waveguide; Matteo Giacalone (1), F. Fresi (1), G. Meloni (2) and L. Poti (2); (1) TeCip Institute Scuola Superiore Sant'Anna, Italy; (2) CNIT Institute, Italy	135

- TuD4 3D-Simulation and Characterization of Subwavelength Grating Waveguides in SOI; Thomas Föhn (1), N. Hoppe (1), W. Vogel(1), M. Schmidt (1), M. Félix Rosa (1), M. Berroth (1), J. Butschke (2), F. Letzkus (2); (1) University of Stuttgart, Germany; (2) Institute for Microelectronics Stuttgart, Germany 137
- TuD5 Quantum Waveguides Discontinuities Analysis; Afaf M. A. Saeed, and S. S. A. Obayya; Zewail City of Science and Technology, Egypt 139

Wednesday, 3 September 2014

WA Novel Materials

- WA1 Optical Metasurfaces Based on Gap Plasmon Resonators; Sergey I. Bozhevolnyi; University of Southern Denmark, Denmark (invited) 141
- WA3 Strong and Broadband Circular Dichroism based on Helix-like Chiral Metamaterials; Ruonan Ji, Shaowei Wang, Xiaoshuang Chen and Wei Lu; Shanghai Institute of Technical Physics, China 143

WB Laser Diodes

- WB1 Time-localized Structures in Vertical-Cavity Surface-Emitting Lasers; M. Marconi (1), J. Javaloyes (2), S. Balle (2), Massimo Giudici (1); (1)Institut Non Linéaire de Nice, France; (2) Universitat de les Illes Balears, Spain (invited) 145
- WB2 Passively mode-locked lasers subject to optical feedback: the role of amplitude-phase coupling; Lina Jaurigue, E. Schöll and K Lüdge; Technische Universität Berlin, Germany 147
- WB3 Investigations of External Cavity Diode Lasers: Simulations, Analysis and Experiments; M.Radziunas (1), Vasile Tronciu (2), E. Luvsandamdin (3), C. Kürbis (3), A.Wicht (3), H.Wenzel (3); (1)Weierstrass Institute, Germany; (2)Technical University of Moldova, Moldova; (3) Ferdinand Braun Institute, Germany 149
- WB4 Theoretical analysis of passively mode-locked inhomogeneously broadened lasers; Alexander Pimenov, A. G. Vladimirov; WIAS Berlin, Germany 151

WC Numerical Methods

- WC1 Modeling of multimode laser dynamics by means of delay differential equations; Andrei G. Vladimirov, A. Pimenov, U. Bandelow; WIAS Berlin, Germany (invited) 153

- WC2 On modifications of the Scharfetter-Gummel scheme for drift-diffusion equations with Fermi-like statistical distribution functions; Thomas Koprucki, M. Kantner, J. Fuhrmann, K. Gärtner; Weierstrass-Institute (WIAS Berlin), Germany 155

Thursday, 4 September 2014

ThA Solar Cells I

- ThA1 Design of Light Trapping Nanopatterned Solar Cells Based on Three-Dimensional Optical and Electrical Modeling; Hui-Hsin Hsiao, Hung-Chun Chang, and Yuh-Renn Wu; National Taiwan University, Taiwan 157
- ThA2 Prediction and prevention of defective regions within thin-film silicon solar cells; Martin Sever, J. Krc, M. Topic; University of Ljubljana, Slovenia 159
- ThA3 Optimization of interdigitated back contact geometry in silicon heterojunction solar cell; Miha Filipic, F. Smole, M. Topic; University of Ljubljana, Slovenia 161
- ThA5 Study of the Electrical Performance of n-GaAs sub-cells in InGaP/GaAs/Ge 3J Solar Cells under 1 MeV Electron Irradiation using Computer Simulation; M. A. Cappelletti (1,2), Guillermo A. Casas (1,3), A. P. Cédola (1), and E. L. Peltzer y Blancá (1); (1) Universidad Nacional de La Plata, Argentina; (2) Universidad Nacional Arturo Jauretche, Argentina; (3) Universidad Nacional de Quilmes, Argentina 163

ThB Solar Cells II

- ThB1 Simulation of semi-transparent organic tandem solar cells for solar shading; Jan Mescher, S.-W. Kettlitz, N. Christ, M.-F.-G. Klein, A. Pütz, A. Mertens, A. Colsmann, and U. Lemmer; Karlsruhe Institute of Technology, Germany 165
- ThB2 Combining structures on different length scales in ray tracing: Analysis of optical losses in solar cell modules; Matthias Winter (1), Malte R. Vogt (1), Hendrik Holst (2), Pietro P. Altermatt (1); (1) Leibniz University Hannover, Germany; (2) Institute for Solar Energy Research Hamelin (ISFH), Germany 167
- ThB3 Studying the Effect of Scattering Layers on the Efficiency of Thin Film Solar Cells; Zhabiz Rahimi, Christoph Pflaum; Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany 169

ThB4	Photocurrent Enhancement in GaPNAs-based Solar Cells With Si Nanowire Array Substrate; Dmitrii A. Kudryashov (1,2), A.S. Gudovskikh (1,2); (1) Saint-Petersburg Academic University, Russia; (2) Saint Petersburg Electrotechnical University, Russia	171
ThC	<u>Photodetectors</u>	
ThC1	HOT HgCdTe infrared detectors; Piotr Martyniuk; Military University of Technology, Poland (invited)	173
ThC2	Quantum Theory of 1/f Noise in Quantum Well Photodetectors; Peter H. Handel (1) and A.M. Truong (2); (1) Univ. of Missouri, USA; (2) Southern Illinois Univ. Edwardsville, USA	175
ThC3	Compensation for RC-effects in organic photodiodes with large sheet resistances; Siegfried Kettlitz, J. Mescher, and U. Lemmer; Karlsruhe Institute of Technology, Germany	177
ThC4	Modeling of HgCdTe photoconductive infrared detector with metallic nanostructures; Jian Liang, Weida Hu, X. S. Chen, Z. F. Li, and W. Lu; Shanghai Institute of Technical Physics, China	179
ThC5	PDL optimization of MQW pin PD; Gan Zhou, P. Runge; Fraunhofer Heinrich-Hertz-Institut, Germany	181
Author Index		183

Postdeadline paper summaries are distributed separately at the conference.
