2014 IEEE Asia Pacific Conference on Wireless and Mobile

(APWiMob 2014)

Bali, Indonesia
28-30 August 2014

IEEE Catalog Number: CFP1475X-POD
ISBN: 978-1-4799-3712-7

TABLE OF CONTENTS

No	Title	Page
1.	Split Ring EM Field Response Towards Modified Triangular and Tapered Edge Tip Within a WR159 Waveguide	1
2.	Performance of LCX-MIMO Antenna System	6
3.	Transmission Performance of OFDM with 1024-QAM in the Presence of EVM Degradation	12
4.	Compatibility Analysis of Wireless Avionics Intra Communications (WAIC) to Radio Altimeter At 4200- 4400 MHz	17
5.	Further Results on the Asymptotic Analysis of Digital Communications in Generalized Fading Channels	23
6.	Compact Double Meandered Line Inverted-F Antenna for Outdoor Parking Wireless Car Detector	30
7.	Handover Threshold Analysis Using Velocity for Proxy Mobile IPv6	36
8.	A Distributed Clustering Algorithm for Target Coverage in Directional Sensor Networks	42
9.	Extending ZigBee Tree Routing Protocol for Resource-Constrained Devices	48
10.	Project Management Inspired Framework for Action Selection in Wireless Sensor Networks	54
11.	WiFi-Assisted Human Activity Recognition	60
12.	StreetlightSim: A Simulation Environment to Evaluate Networked and Adaptive Street Lighting	66
13.	Interference Alignment with Efficient Dynamic Information Selection for LTE-A Uplink Coordinated Multipoint Systems	72
14.	Path Loss Prediction Model for a Sloped Area in Microcell Based on Scale Model and Real Environment Measurements	78
15.	High Efficient Impedance Matching Circuit of Power Amplifier Combined with Antenna	84
16.	Variable Step-Size L0-norm NLMS Algorithm for Sparse Channel Estimation	88
17.	Design for Multiband Monopole Antenna with Parasitic Elements for In-building	92

Mobile Communication

18. A Generalized Approach of Performance Analyses for Cooperative Multi-Relaying System 96

19. Novel Time Offset Pre-Processing and Interference Cancellation for Downlink OFDMA CoMP System 102

20. Time Dispersion Analysis for UWB Channel in an Outdoor Environment 109

21. Cooperative Analog and Digital (CANDI) Time Synchronization for Large Two-Dimension Multihop Networks 113

22. A Survey of Rural Wireless Mesh Network (WMN) Deployments 119

23. Improved DV-Hop Algorithm Through Anchor Position Re-estimation 126

24. Traffic Offloading and Its Application in CRRM 132

25. A Database Access Scheme for Elastic-Core Architecture 138

26. Performance Measurement of Secure TFTP Protocol for Smart Embedded Devices 144

27. Partial Area Under the Receiver Operating Characteristics of Energy Detectors in Fading Channels 150

28. Design of Patch Antenna Using Metamaterial At GSM 1800 for RF Energy Scavenging 157

29. Implementation of Experimental Equipment with Wideband Non-Contiguous OFDM 162

30. Measurement and Analysis of an Outdoor MIMO-UWB Communication Channel 168

31. Chaotic Interleaving Scheme for PAPR Reduction in Cognitive Radio Systems 172

32. Iterative Receiver Design with CFO, SFO, Channel Estimation and Equalization for OFDM Systems 177

33. Neighbor List Optimization for Real LTE Radio Networks 183

34. Identification of Spectrum Holes Using ANN Model in TV Bands with AWGN 188

35. Critical Security Review and Study of DDoS Attacks on LTE Mobile Network 194

36. Message Scheduling for Tandem Multi-hop Wireless Networks 201

37. Adaptive Advisory Speed Limit Dissemination Using Vehicular Communication 208

38. Novel Visual Sensor Deployment Algorithm in PTZ Wireless Visual Sensor Networks 214

39. A ZigBee Controlled Lighting System with Improved Resistance to Wireless Interference 219

40. Design and Performance of a 24 GHz Band FM-CW Radar System and Its Application 226

41. 3D Gestures on 2D Screens for Mobile Games 232

42. A Regulatory Framework for Implementation of Machine to Machine Services 238

43. A Web-based Criminal Record System Using Mobile Device: A Case Study of Hat Yai Municipality 243

44. An Approach to Real-Time Fault Detection in Health Monitoring of Offshore Wind-Farms 247

45. Study of Relay Position in Two-Path Successive Relaying with Interference Cancellation 254

46. Effects of Size Mismatch in Dual-function Near-Field Antennas 260

47. Outage-Optimal Threshold-Based Opportunistic Cooperation in AF Relaying Systems with Staying Link Information 264

48. Evaluation of Influence by Simultaneous Reception of Other Radio Systems in Wideband NC-OFDM 269

49. Performance Analysis of a Tunable Cost Function Based WLAN Energy Efficient Packet Transmission Technique 275

50. Intelligent Traffic Signal Control for Urban Central Using Vehicular Ad-hoc Network 281

51. Performance Capacity of MIMO Heterogeneous LTE-Advanced Network 287

52. Neural Network Based Switch Beam Smart Antenna 292

53. An Improved Fast MIPv6 Using Dynamic Threshold Buffer Management 297

54. A Driver-Centric Green Light Optimal Speed Advisory for Improving Road Traffic Congestion At Urban Intersections 304

55. A Novel Event Transmission Protocol for Vehicular Ad Hoc Networks 310

56. An Adaptive Overtaking Maneuver Assistant System Using VANET 316

57. Segregating User Data by Tabs in Web Browsers 322

58. Non Cooperative Cournot Economic Game Model for Heterogeneous Coexistence in TVWS 328

59. Optimal Time Slicing for Mobile TV Services with Limited Channel Switching Delay 335

60. Aging Method on Packet Scheduling Algorithm in WIMAX Network 340

61. Ns-3 Based WiMAX Emulation System 346
