

2014 20th International Conference on Automation and Computing

(ICAC 2014)

**Cranfield, United Kingdom
12-13 September 2014**

**IEEE Catalog Number: CFP1460R-POD
ISBN: 978-1-4799-6274-7**

Table of Contents

Keynote

- Next-Generation Smart Grids: Completely Autonomous Power Systems (CAPS)1
Prof. Qing-Chang Zhong of University of Sheffield
- Manufacturing Machine Automation and Precision Capability2
Mr. Paul Morantz, Cranfield University

Session A – 1 Control Applications 1

Chair: Wenhua Chen & Qingdi Li

- Dynamic Modelling and Simulation Study of a University Campus CHP Power Plant.....3
Yue Wang, Akmaral Bermukhambetova , Jihong Wang, University of Warwick
Junfu Lv, Qirui Gao, Tsinghua University
- Non-Fragile H^∞ Control with Randomly Occurring Gain Variations 9
Zhenna Li, Huisheng Shu, Donghua University
Zidong Wang, Liang Hu, Brunel Univrsity
- Decentralised PID Control Tuning for a Multivariable Glass Furnace14
by Genetic Algorithm
Kumaran Rajarathinam, Barry Gomm, Dingli Yu,
Ahmed Saad Abdelhadi, Liverpool John Moores University
- Optimal Feedback Control for Reservoir Waterflooding20
Alhaji Grema, Yi Cao, Cranfield University
- Modelling and control of an elastically joint-actuated26
car-pole underactuated system
Pengcheng Liu, Hongnian Yu, Shuang Cang, Bournemouth University

Session A – 2 System Diagnosis

Chair: Sheng-feng Qin & Zidong Wang

- Modelling and Validation of a Regenerative Shock Absorber System32
Zhi Chen, Taiyuan University of Technology
Haijun Xu, National University of Defense Technology
Karsten Schmidt, Frankfurt University of Applied Sciences
- Robust fault detection for wind turbine systems38
Yusheng Liu, Dingli Yu, Liverpool John Moores University

Experimental Study of Stable Surfaces for Anti-Slug Control in Multi-phase Flow43
*Simon Pedersen, Kasper Stampe, Sandra Lindberg Pedersen,
Petar Durdevic, Zhenyu Yang, Aalborg University*

Design and Implementation of OCV Prediction Mechanism for49
PV-Lithium ion Battery System
*Thomas Stockley, kary Thanapalan, Mark Bowkett,
Jonathan Williams, University of South Wales*

Modeling Large Scale Complex Cyber Physical Control Systems.....55
Based On System of Systems Engineering Approach
Lichen Zhang, Guangdong University of Technology, East China Normal University

Session A – 3 Network Applications

Chair: Jinsheng Kang & Shuang-hua Yang

Optimizing Airport Gate Assignment with Operational Safety Constraints61
Shuo Liu, Wenhua Chen, Jiyin Liu, Loughborough University

Using Abstraction in MDA-Based Reverse Engineering for Creative Evolution67
*Delin Jing, Hongji Yang, Bath Spa University
Hossam Hakeem, King Abdulaziz University*

A Novel Critical Node In Generalized Networking73
Xin Zhou, Kyushu University

The application of Han Dynasty cultural elements to modern product design79
*Liling Chen, Northwestern Polytechnical University, Brunel Univrsity
Jinsheng Kang, Ding Wang, Brunel Univrsity
Leilei Zhang, Mengcheng Wang, Northwestern Polytechnical University*

The Significance of Information Visualisation83
Based On the Symbolic Semantics of Peking Opera Painted Faces (POPF)
Ding Wang, Jinsheng Kang, Shengfeng Qin, Brunel Univrsity

Session A – 4 Manufacture Systems 1

Chair: Yanmeng Xu & Xun Chen

Design & Implementation of the an innovate PMDC motor for Electric Vehicles88
Xiao Guo, Guoping Liu, Jonathan Williams, University of South Wales

Research on load characteristics of aerostatic journal92
bearing with pocketed orifice-type restrictor
*Dongxu Wu, Bo Wang, Harbin Institute of Technology
Xichun Luo, University of Strathclyde*

An integrated dynamic design system for aerostatic spindle development96
Wanqun Chen, Wenkun Xie, Harbin Institute of Technology, University of Strathclyde
Yingchun Liang, Harbin Institute of Technology
Xichun Luo, University of Strathclyde

Simulation analysis for a movable bucking machine100
clamping mechanism based on Pro E and ADAMS
Xuechun Yang, Hefei University, Northeast Forestry University
Ruiwei Liu, Jian Zhang, Anhua Ge, Northeast Forestry University
Xichun Luo, Hefei University

An Experimental Investigation on the Surface Morphology104
in Micro-End-Milling of Glass
Yan Zhao, Yan Zhang, Yanshan University
Dehong Huo, Xiangyu Teng, Yilun Shi, Newcastle University

Session P1 – 1 Control Applications 2

Chair: Jihong Wang & Yi Cao

Stability Analysis of Parallel-Inverters in Microgrid110
Ashraf Khalil, Khalid Ateea Alfaitori, Ahmed Elbarsha, University of Benghazi

Event-Based Filtering for Distrete Time-Varying Systems116
Hongli Dong, University of Duisburg-Essen
Zidong Wang, Brunel Univrsity
Derui Ding, Donghua University

Piecewise identification of manual control dynamics during control law changes122
Yingchun Shen, COMAC Commercial Aircraft CO. LTD
Mudassir Lone, Cranfield University

A Study on a Multi-controller Design of the Drawtube for Aerial Boom Refueling128
Dongli Yuan, Y.J.Xun, Northwestern Polytechnical University
J.F.Whidborne, Cranfield University

ITAE-Optimal PI Controller Based on Genetic Algorithm134
for Low-order Process with Large Time Delays
Fengping Pan, Hongkai Liao, Jia Luo, Electric Power Research Institute of Guangdong
Power Group Co.
Yali Xue. Tsinghua University

Fuzzy Model Predictive Reconfigurable Control for Nonlinear140
Systems Subject to Actuators Faults
for Low-order Process with Large Time Delays
Lamia Ben Hamouda, LA.R.A/IRSEEM
Ouadie Bennouna, Nicolas Langlois, IRSEEM/ESIGELEC
Mounir Ayadi, LA.R.A/ENIT

Session P1 – 2 Condition Monitoring

Chair: Hongji Yang & Guoping Liu

- Fault Detection in a Multivariate Process Based on146
Kernel PCA and Kernel Density Estimation
Raphael Tari Samuel, Yi Cao, Cranfield University
- A study of the Suspension System for the Diagnosis of Dynamic Characteristics152
Moamar Hamed, Belachew Tesfa, Fengshou Gu, Andrew Ball, University of Huddersfield
- A Two-layer Energy Efficient Framework using158
SAW Sensor Network for Leakage Detection in Monitoring Water Distribution System
Zhaozhao Tang, Wenyan Wu, Staffordshire University
- Fault Diagnosis of Reciprocating Compressors164
Using Relevance Vector Machines with A Genetic Algorithm Based on Vibration Data
Mahmud Ahmed, Ann Smith, Fengshou Gu, Andrew Ball, University of Huddersfield
- Improved Condition Monitoring using Fast-Oscillating Measurements170
Cristobal Ruiz-Carcel, David Mba, Yi Cao, Cranfield University
Victor Hugo Jaramillo Velasquez, James Ottewill, ABB Corporate Research Center Poland
- Vehicular Ad Hoc Networks (VANETs): Current State, Challenges176
and Potentials
Elias Eze, Sijing Zhang, Enjie Liu, University of Bedfordshire

Session P1 – 3 Computer Vision

Chair: Wei Huang & Jing Wang

- Texture-based Homogeneity Analysis for182
Crowd Scene Modelling and Abnormality Detection
Jing Wang, Zhijie Xu, University of Huddersfield
- Non-intrusive drowsiness detection by employing Support Vector Machine188
Ashardi Abas, Xun Chen, Liverpool John Moores University
John Mellor, University of Bradford
- A Framework for Security Driven Software Evolution194
Hui Guan, Shenyang University of Chemical
Xuan Wang, Hongji Yang, Bath Spa University
- Implicit Vascular Reconstruction using the200
Shape-presenting Blending Operation
Quan Qi, University of Hull, Shihezi University
Qingde Li, University of Hull
Qingqi Hong, Xiamen University

Engineering drawing man-hour forecastin206
based on BP-GA in design of chemical equipment
Hua Ji, Fu Xia, Sichuan University
Kai Cheng, Brunel University

A Scalability Hierarchical Fault Tolerance Strategy: Community Fault Tolerance212
Jianping Chen, Neuchatel University
Yao Lu, Ioan Comsa, Pierre Kuonen, University of Applied Sciences of Western Switzerland

Session P1– 4 Manufacture Systems 2

Chair: Shan Lou & Xichun Luo

The Development of Large-scale Wind Turbine Blade Redesign System218
Wenlei Sun, Xinjiang University
Qing Tao, Xinjiang University, Brunel University
Jinsheng Kang, Brunel Univrsity
XiaoQiu Zhuang, Xinjiang Uygur autonomous region

The Optimisation Method for the Design of Low-noise Gearbox222
Qing Tao, Xinjiang University, Brunel University
Jianxing Zhou, Wenlei Sun, Xinjiang University
Jinsheng Kang, Brunel Univrsity

Fabrication and Characterisation of Energy Storage Fibres228
Ruirong Zhang, Yanmeng Xu, David Harrison,
John fyson, Anan Tanwilaisiri, Brunel University
Darren Sourhee, Loughborough University

Computer aided color design based on image retrieval of the layered HSV model231
Wenke Kang, Dengkai Chen, Northwestern Polytechnical University
Shengfeng Qin, Northumbria University

An Fast and Efficient Algorithm for Spline Filters237
Wenhan Zeng, Xiangqian Jiang, Shan Lou, P. J. Scott, University of Huddersfield

Inertial force control and balance error analysis243
of fast tool servo based on the voice coil motor
Haitao Liu, Harbin Institute of Technology, University of Strathclyde
Yazhou Sun, Bangying Zhu, Yuan Hu, Wenkun Xie, Harbin Institute of Technology

Session P2 – 1 Control Applications 3

Chair: Mudassir Lone & Dongli Yuan

A Data-driven Approach for Self-optimizing Control with Equality Constraints248
Adamu Salihu, Yi Cao, Cranfield University
Antonis Kokossis, National Technical University of Athens

Nonlinear System Identification and Control of a pH process using Local Linear Model Networks Strategy <i>Ahmed Abdelhadi, Barry Gomm, Dingli Yu, Kumaran Rajarathinam, Liverpool John Moores University</i>	254
Scheduling crude oil blending and tanks inventory control under CDU demand uncertainty: A receding horizon approach <i>Aminu Hamisu, Yi Cao, Cranfield University Antonis Kokossis, National Technical University of Athens</i>	260
Behaviour interventions for water end use: An integrated model <i>Yang Fu, Wenyan Wu, Staffordshire University</i>	266
Earth Pressure Multipoint Forecasts and Optimal Control for EPB Shield <i>Kairu Li, Dalian University of Technology, University of Warwick Yan Zhang, Cheng Shao, Dalian University of Technology</i>	272
An Approach For The Restoration Of Atomic Force Microscope Images Enabling A Combination of Cantilever And Feedback Signals At Different Scanning speeds <i>A. Ahtaiba, M. A. Gdeisat, D. R. Burton, F. Lilley, Liverpool John Moores University</i>	277
 Session P2 – 2 Information Systems <i>Chair: Lei Zou & Xuechun Yang</i>	
A Framework to Model Big Data Driven Complex Cyber Physical Control Systems <i>Lichen Zhang, Guangdong University of Technology, East China Normal University</i>	283
State Estimation for a Class of Complex Networks with Event-Triggered Transmission Scheme <i>Lei Zou, Harbin Institute of Technology Zidong Wang, Lampros Stergioulas, Brunel University</i>	289
Stability of the Consensus in the Network of Multiple Autonomous Intesections Management <i>Chairit Wuthishuwong, Ansgar Traechtler, University Paderborn</i>	295
Enhanced Micro-TCB Approach for Smartphone Security <i>Munam Ali Shah, Irfan Azam, Muhammad Qasim Khan, COMSATS Institute of Information Technology Sijing Zhang, University of Bedfordshire</i>	301
Element-Based Knowledge Representation in Intelligent Design and its Prototype for Knowledge Processing <i>Yan Zhang, Jun Wang, Yan Zhao, Yanshan University; Dehong Huo, Newcastle University</i>	306
Author Index	312
