

2014 IEEE International Workshop on Machine Learning for Signal Processing

(MLSP 2014)

**Reims, France
21-24 September 2014**

**IEEE Catalog Number: CFP14NNS-POD
ISBN: 978-1-4799-3695-3**

**2014 IEEE International Workshop on Machine Learning for Signal Processing
September 21-24, Reims, France**

Paper Index

Brain Source Localization Using A Physics-Driven Structured Cospase Representation Of EEG Signals

Laurent Albera, Srdjan Kitic, Nancy Bertin, Gilles Puy, Rémi Gribonval pg.1

Audio Source Separation With Time-Frequency Velocities

Guy Wolf, Stéphane Mallat, Shihab Shamma pg. 7

On-The-Fly Audio Source Separation

Dalia El Badawy, Ngoc Q. K. Duong, Alexey Ozerov pg. 13

Improving The Robustness Of Surface Enhanced Raman Spectroscopy Based Sensors By Bayesian Non-Negative Matrix Factorization

Tommy S. Alstrøm, Kasper B. Frøhling, Jan Larsen, Mikkel N. Schmidt, Michael Bache, Michael S. Schmidt, Mogens H. Jakobsen, Anja Boisen pg. 19

Data Mining By Nonnegative Tensor Approximation

Rodrigo Cabral-Farias, Pierre Comon, Roland Redon pg. 25

Non-Negative Tensor Factorization With Missing Data For The Modeling Of Gene Expressions In The Human Brain

Søren Føns Vind Nielsen, Morten Mørup pg. 31

Multiple Speaker Tracking With The Factorial Von Mises-Fisher Filter

Johannes Traa, Paris Smaragdis pg. 37

A Probabilistic Approach To Hearing Loss Compensation

Mojtaba Farmani, Bert De Vries pg. 43

Coherent Time Modeling Of Semi-Markov Models With Application To Real-Time Audio-To-Score Alignment

Philippe Cuvillier, Arshia Cont pg. 49

Ultra-Low-Power Voice-Activity-Detector Through Context And Resource-Cost-Aware Feature Selection In Decision Trees

Steven Lauwereins, Wannes Meert, Jort Gemmeke, Marian Verhelst pg. 55

A Probabilistic Approach For Phase Estimation In Single-Channel Speech Enhancement Using Von Mises Phase Priors

Josef Kulmer, Pejman Mowlae, Mario kaoru Watanabe pg. 61

Inferring Clinical Depression From Speech And Spoken Utterances

Meysam Asgari, Izhak Shafran, Lisa B. Sheeber pg. 67

A New Kernel-Based Approach To Identification Of Time-Varying Linear Systems

Gianluigi Pillonetto, Aleksandr Aravkin pg. 72

Gaussian Quadratures for State Space Approximation of Scale Mixtures of Squared Exponential Covariance Functions

Arno Solin, Simo Särkkä pg. 78

QR Code Localization Using Deep Neural Networks

Tamás Grósz, Péter Bodnár, László Tóth, László G Nyúl pg. 84

Sparse Topic Models By Parameter Sharing

Hossein Soleimani, David J. Miller pg. 90

Diffusion Estimation Of State-Space Models: Bayesian Formulation
Kamil Dedecius pg. 96

Kalman Smoothing With Persistent Nuisance Parameters
Aleksandr Y Aravkin, Karthikeyan Natesan Ramamurthy, Gianluigi Pillonetto pg. 102

Gaussian And Student-T Filtering Using Implicit Measurements Via Variational Bayes
Ernesto Tapia pg. 108

A Consensus-Based Decentralized EM For A Mixture Of Factor Analyzers
Gene T. Whipples, Emre Ertin, Randolph L. Moses pg. 114

Exact Bayesian Estimation In Constrained Triplet Markov Chains
Yohan Petetin, François Desbouvries pg. 120

Fast Sampling From A Hidden Markov Model Posterior For Large Data
Rasmus Bonnevie, Lars Kai Hansen pg. 126

Training Restricted Boltzmann Machines With Auxiliary Function Approach
Hirokazu Kameoka, Norihiro Takamune pg. 132

Maximum Reconstruction Probability Training Of Restricted Boltzmann Machines With Auxiliary Function Approach
Norihiro Takamune, Hirokazu Kameoka pg. 138

Convex Combinations Of Kernel Adaptive Filters
Wei Gao, Cédric Richard, Jose-Carlos M. Bermudez, Jianguo Huang pg. 144

A dictionary learning algorithm for sparse coding by the normalized bilateral projections
Taro Tezuka pg. 149

Sparse Sensor Selection For Nonparametric Decentralized Detection Via L₁ Regularization
Weiguang Wang, Yingbin Liang, Eric P. Xing, Lixin Shen pg. 155

A Kernel-Based Nonparametric Test For Anomaly Detection Over Line Networks
Shaofeng Zou, Yingbin Liang, Harold Vincent Poor pg. 161

Mean Shift Spectral Clustering Using Kernel Entropy Component Analysis
Jørgen Andreas Agersborg, Robert Jenssen pg. 167

Outlier-Aware Dictionary Learning For Sparse Representation
Sajjad Amini, Mostafa Sadeghi, Mohsen Joneidi, Massoud Babaie-Zadeh, Christian Jutten pg. 173

Kernel Learning As Minimization Of The Single Validation Estimate
Maxime Sangnier, Jérôme Gauthier, Alain Rakotomamonjy pg. 179

On lp-Norm Sparse Blind Deconvolution
Kenji Nose Filho, João Marcos Travassos Romano pg. 185

Reduction Of Memory Footprint And Computation Time For Embedded Support Vector Machine (SVM) By Kernel Expansion And Consolidation
Nikhil Bajaj, George T.-C. Chiu, Jan P. Allebach pg. 191

Kernel-Based Instance Annotation In Multi-Instance Multi-Label Learning With Sparsity
Anh The Pham, Raviv Raich pg. 197

Online Joint Classification And Anomaly Detection Via Sparse Coding
Alfredo Kalaitzis, James D. B. Nelson pg. 203

Robust Extreme Learning Machine For Regression Problems With Its Application To Wifi Based Indoor Positioning System

Xiaoxuan Lu, Yushen Long, Han Zou, Chengpu Yu, Lihua Xie pg. 209

Vocal Separation Using Extended Robust Principal Component Analysis With Schatten P/LP-Norm And Scale Compression

Il-Young Jeong, Kyogu Lee pg. 215

Spectral Modeling Based On Hidden Markov Random Field For Statistical Parametric Speech Synthesis

Soheil Khorram, Hossein Sameti, Fahimeh Bahmaninezhad pg. N/A

Learning And Storing The Parts Of Objects: IMF

Ruairi De Frein pg. 221

Joint Audio Source Separation And Dereverberation Based On Multichannel Factorial Hidden Markov Model

Takuya Higuchi, Hirokazu Kameoka pg. 227

Birdsong Analysis Using Beta Process Hidden Markov Model

Ryunosuke Hamada, Takatomi Kubo, Kentaro Katahira, Kenta Suzuki, Kazuo Okanoya, Kazushi Ikeda pg. 233

Bound Constrained Weighted NMF For Industrial Source Apportionment

Abdelhakim Limem, Matthieu Puigt, Gilles Delmaire, Gilles Roussel, Dominique Courcot pg. 238

Inferring Social Contexts From Audio Recordings Using Deep Neural Networks

Meysam Asgari, Izhak Shafran, Alireza Bayestehtashk pg. 244

Filtering Perturbed In-Vehicle Pointing Gesture Trajectories: Improving The Reliability Of Intent Inference

Bashar Ibrahim Ahmad, James Kevin Murphy, Patrick Langdon, Simon Godsill pg. 250

Regularized NMF-Based Speech Enhancement With Spectral Components Modeled By Gaussian Mixtures

Hanwook Chung, Eric Plourde, Benoit Champagne pg. 256

Audio-Visual Speaker Localization Via Weighted Clustering

Israel dejene Gebru, Xavier Alameda-Pineda, Radu Horaud, Florence Forbes pg. 262

On Convergence And Accuracy Of State-Space Approximations Of Squared Exponential Covariance Functions

Simo Sarkka, Robert Piche pg. 268

Nonparametric Statistical Structuring Of Knowledge Systems Using Binary Feature Matches

Morten Mørup, Fumiko Kano Glückstad, Tue Herlau, Mikkel N. Schmidt pg. 274

Expectation Propagation For Nonstationary Heteroscedastic Gaussian Process Regression

Ville Tolvanen, Pasi Jylänki, Aki Vehtari pg. 280

Unsupervised Trajectory Pattern Classification Using Hierarchical Dirichlet Process Mixture Hidden Markov Model

Vahid Bastani, Lucio Marcenaro, Carlo Regazzoni pg. 26

Parametric Speech Synthesis Using Local And Global Sparse Gaussian Processes

Tomoki Koriyama, Takashi Nose, Takao Kobayashi pg. 292

Signal Stochastic Decomposition Over Continuous Dictionaries

Zacharie Naulet, Éric Barat pg. 298

Tradeoffs For Task Parallelization In Distributed Optimization

Konstantinos I. Tsianos, Anand D. Sarwate, Michael G. Rabbat pg. 304

Fast Distributed Coordinate Descent For Non-Strongly Convex Losses

Olivier Fercoq, Zheng Qu, Peter Richtarik, Martin Takac pg. 310

- A Stochastic Coordinate Descent Primal-Dual Algorithm And Applications*
Pascal Bianchi, Walid Hachem, Franck Iutzeler pg. 316
- Dictionary Learning over Large Distributed Models via Dual-ADMM Strategies*
Zaid J. Towfic, Jianshu Chen, Ali H. Sayed pg. 322
- A Delayed Proximal Gradient Method With Linear Convergence Rate*
Hamid reza Feyzmahdavian, Arda Aytekin, Mikael Johansson pg. 328
- The Tenth Annual MLSP Competition: Schizophrenia Classification Challenge*
Rogers F Silva, Eduardo Castro, Cota Navin Gupta, Mustafa Cetin, Mohammad Reza Arbabshirani, Vamsi K Potluru, Sergey M Plis, Vince D Calhoun pg. 334
- Efficient Modeling By Selecting Learning Samples In Human Pose Estimation*
Norimichi Ukita, Yoichi Matsuyama, Norihiro Hagita pg. 340
- Dictionary Of Gray-Level 3D Patches For Action Recognition*
Stefen Chan Wai Tim, Michele Rombaut, Denis Pellerin pg. 346
- A Unified Approach For Respiratory Motion Prediction And Correlation With Multi-Task Gaussian Processes*
Robert Dürichen, Tobias Wissel, Floris Ernst, Marco A.f. Pimentel, David A. Clifton, Achim Schweikard pg. 352
- Study Of Different Strategies For The Canonical Polyadic Decomposition Of Nonnegative Third Order Tensors With Application To The Separation Of Spectra In 3D Fluorescence Spectroscopy*
Xuan Thanh Vu, Caroline Chau, Sylvain Maire, Nadège Dorothée Thirion-Moreau pg. 358
- Predicting Subject Performance Level From EEG Signal Complexity When Engaged In BCI Paradigm*
Yelena Tonoyan, David Looney, Danilo P Mandic, Marc Van Hulle pg. 364
- A Non-Negative Multilinear Block Tensor Decomposition Approach To Flow Cytometry Data Analysis*
David Brie, Sebastian Miron, Philippe Becuwe, Stéphanie Grandemange pg. 369
- Joint SVD-Hyperalignment For Multi-Subject FMRI Data Alignment*
Po-Hsuan Chen, J. swaroop Guntupalli, James V. Haxby, Peter J. Ramadge pg. 375
- Inferring Targets From Gaze*
Anthony Hon Pan Lo, Richard So, Betram Emil Shi pg. 381
- Stereoscopic Video Shot Classification Based On Weighted Linear Discriminant Analysis*
Konstantinos Petros Papachristou, Anastasios Tefas, Nikolaos Nikolaidis, Ioannis Pitas pg. 387
- Detection Of Epileptic Convulsions From Accelerometry Signals Through Machine Learning Approach*
Milica Milosevic pg. 393
- Discrimination Of Task-Related EEG Signals Using Diffusion Adaptation And S-Transform Coherency*
Konstantinos Eftaxias, Saeid Sanei pg. 399
- Two-Step Supervised Confidence Measure For Automatic Face Recognition*
Ladislav Lenc, Pavel Král pg. 405
- A New Fast Jacobi-Like Algorithm For Non-Orthogonal Joint Diagonalization Of Real-Valued Matrices Based On A QR Parameterization*
Victor Maurandi, Eric Moreau pg. 411
- Kernel Non-Negative Matrix Factorization Without The Pre-Image Problem*
Fei Zhu, Paul Honeine, Maya Kallas pg. 417
- Exact SVM Training By Wolfe's Minimum Norm Point Algorithm*
Masashi Kitamura, Akiko Takeda, Satoru Iwata pg. 423

Joint Estimation Of Multiple Undirected Graphical Models
Alexandros Georgogiannis, Vassilios Digalakis pg. 429

Vector Quantization Using Survival Cauchy-Schwartz Divergence
Lei Guo, Hua Qu, Jihong Zhao, Badong Chen pg. 435

Mahalanobis-Based One-Class Classification
Patric Nader, Paul Honeine, Pierre Beuseroy pg. 440

Diffusion Strategies For In-Network Principal Component Analysis
Nisrine Ghadban, Paul Honeine, Farah Mourad-Chehade, Clovis Francis, Joumana Farah pg. 446

Spatial Stochastic Process Clustering Using A Local A Posteriori Probability
Edith Grall-Maes pg. 452

Alternating Direction Method For Approximating Smooth Feature Vectors In Nonnegative Matrix Factorization
Rafal Zdunek pg. 458

Performance Analysis of Surrogate Supervision Multi-View Learning Linear Classifiers in Gaussian Data
Xin Li, Raviv Raich pg. 464

Invertible Nonlinear Cluster Unwrapping
Matineh Shaker, Jonas Nordhaug Myhre, Devrim Kaba, Deniz Erdogmus pg. 470

Efficient Data Classification By GPU-Accelerated Linear Mean Squared Slack Minimization
George A Papakostas, Konstantinos I Diamantaras pg. 476

The 10th Annual MLSP Competition: First Place
Arno Solin, Simo Särkkä pg. 482

The 10th Annual MLSP Competition: Second Place
Alexander V. Lebedev pg. 485

The 10th Annual MLSP Competition: Third Place
Karolis Koncevičius pg. 489

Diffusion LMS For Multitask Problems With Overlapping Hypothesis Subspaces
Jie Chen, Cédric Richard, Alfred O. Hero, Ali H. Sayed pg. 491

Large Scale Sparse Optimization For Object Detection In High Resolution Images
Aurelie Boisbunon, Remi Flamary, Alain Rakotomamonjy, Alain Giros, Josiane Zerubia N/A

Towards Big Data In QSAR/QSPR
Gerard Dreyfus, Arthur Duprat, Fabienne Dioury, Jean-Luc Ploix pg. 497

Map Estimation For Bayesian Mixture Models With Submodular Priors
Marwa El Halabi, Luca Baldassarre, Volkan Cevher pg. 503

Compact Web Browsing Profiles For Click-Through Rate Prediction
Bjarne Ørum Fruergaard, Lars Kai Hansen pg. 509

Robust Covariance Estimation And Linear Shrinkage In The Large Dimensional Regime
Romain Couillet, Matthew Mckay pg. 515
