2013 16th International Conference on Computer and Information Technology

(ICCIT 2013)

Khulna, Bangladesh
8-10 March 2014

List of ICCIT 2013 Papers

Sl No.	Title	Pai e'%
01	Optimizing Software Design Migration from Structured Programming to Object Oriented Paradigm	
02	A Formal Approach to Verify Software Scalability Requirements using Set Theory and Hoare Triple	
03	University Course Advising: Overcoming the Challenges Using DSS	
04	Information Piracy and Data incongruity prevention in WCMS to WCMS conversion procedure using precise information hiding and data integrity manager	
05	Radius Particle Swarm Optimization for Resource Constrained Project Scheduling Problem	
06	The Beneficial Effect of Filtering in Current Controlled Inverter	
07	A compact W-shaped 2.45 GHz RFID Tag Antenna Design for UHF RFID Applications	
08	Design of a Novel Dual-Band Microstrip Patch Antenna Operating at 2.45 GHz and 2.84 GHz with Practical Implementation	
09	Design and Performance Analysis of a 4-element Planar Inverted-F Antenna (PIFA) Array including Human Interaction	
10	Bangla Phonetic Feature Table Construction for Automatic Speech Recognition	
11	Experimental Framework for Mel-Scaled LP based Bangla Speech Recognition	
12	A Framework for Bangla Text to Speech Synthesis	

13	Designing A Press and Swipe Type Single Layered Bangla Soft Keyboard for Android Devices		
14	Neural net based complete character recognition scheme for Bangla printed text books		
15	Structural Similarity Based Disparity Estimation for Stereoscopic Images		
16	A Robust RGB Channel Based Image Steganography Technique using a Secret Key		
17	Restoration of Non-uniformly warped noisy images based on coarse-to-fine optical flow estimation technique		
18	Breast Cancer Classification from Ultrasonic Images Based on Sparse Representation by Exploiting Redundancy		
19	Automated detection of Optic Disc and Blood Vessel in Retinal Image using morphological, edge detection and feature extraction techniques		
20	Heart Function Determination by Analyzing Sympathetic and Vagal Activity of ECG Signal after Having Energy Drinks		
21	Analyzing QRS Complex, ST Segment and QT Interval of ECG Signal to Determine the Effect of Having Energy Drinks on Hypercalcaemia		
22	Performance Comparison of Constant Coefficient and Variable Coefficient Tracking Filters in Radar Detection		
23	Monitoring the Performance of Computer User by Analyzing Physiological Signals		
24	EEG Signal Classification using Frequency Band Analysis towards Epileptic Seizure Prediction		
25	Bangladeshi style: a Way of Facial Artistic Stylization in Visual Effects		

26	Evaluating Q-Learning Based Stateful Round Trip Time Estimation over High-Data-Rate Wireless Sensor Networks	
27	An Enhanced Compression-Based Energy Efficient Data Communication Scheme for Wireless Sensor Networks	
28	Joint Routing, Scheduling, and Physical Network Coding in Fixed Wireless Multihop Networks	
29	Two Stage Fuzzy Logic based Clustering Approach Wireless Sensor Network LEACH Protocol	
30	Unfairness Problem in WLANs due to Asymmetric Co-channel Interference and Its Mitigation	
31	Performance Analysis of DS-CDMA Wireless Communication System with and without Diversity	
32	Design and Implementation of a FPGA-based Real-time Face Recognition System based on Spatial Correlation function	
33	Face Recognition using Eyes, Nostrils and Mouth Features	
34	A New Effective Part Selection Approach for Part-Based Gait Recognition	
35	Low complexity Offline Character Recognition of License Plate Using Perspective View	
36	Proactive Approach of Making Eye Contact with the Target Human in Multi-Party Settings	
37	Color feature based video content extraction and its application for poster generation with relevance feedback	

52	Numerical Study of a Loaded U-Antenna for 3.5 GHz Mobile WiMAX and 7.5 GHz Military Satellite Communication Applications	
53	An Improved MaxProp Based on Neighborhood Contact History for Delay Tolerant Networks	
54	DBF-MLT: NP-Completeness of Specialized Voice Service in Networked Virtual Environment a Peer-to-Peer Approach	
55	Categorization of Copies to Improve the Performance of- Routing Schemes in Delay Tolerant Networks	
56	A Helper Initiated Distributed Cooperative Medium Access Control (MAC) Protocol for Wireless Network	
57	Power Pre-emphasised OFDM for RSOA Modulation in High Speed WDM-PONs	
58	A New Hierarchical Interconnection Network for Future Generation Parallel Computer	
59	Towards Ubiquitous Learning Tools For Computer Aided Classroom In Developing Regions	
60	PIssGA: An ultra fast meta-heuristic approach to solve protein inference problem.	
61	The effects of non-inhibitory serpin maspin on cell migration using an artificial neural network	
62	Automatic Slice Growing Method Based 3D Reconstruction of Liver with its Vessels	
63	A Gaming Approach in Physical Therapy for Facial Nerve Paralysis Patient	
64	A Fast Recognition Scheme for Off-line Bangla Numerals	

65	Developing an Automated Bangla Parts Of Speech Tagged Dictionary	
66	Handwritten Bangla Digit Recognition Employing Hybrid Neural Network Approach	
67	Bangla News Classification using Naive Bayes classifier	
68	Selection of Proper Frequency Band and Compatible Features for Left and Right Hand Movement from EEG Signal Analysis	
69	A New Background Updating Model for Motion Detection Considering Future Frame	
70	An Approach for Enhancing Message Security in Audio Steganography	
71	Effect of Neural Network based Phonetic Feature Segmentation in ASR	
72	Performance of Some Parametric Test Statistics for Testing The Difference of Means of Two Skewed Populations	
73	Budget Allocation Model for the Academic Library Acquisition Using Data Mining Technique	
74	A novel automatic property weight generator for semantic data integration	
75	Study of Different Forecasting Models on Google Cluster Trace	
76	Security Risk Modeling Using Secure UML	
77	Structured Web Search in Small Domain	
78	A Belief Rule Based (BRB) System to Asses Asthma Suspicion	
79	Design and Implementation of a RF Controlled Robotic Environmental Survey Assistant System	

80	Primitive Quantum Gate Realizations of Multiple-Controlled Toffoli Gates	
81	A Faster Approach to Periodic Data Flipping of SRAM Array for NBTI Recovery	
82	Performance of Turbo coded Vertical Bell Laboratories Layered Space Time Multiple Input Multiple Output System	
83	A Wideband 6.9-17.7 GHz CMOS Low-Noise Amplifier with a Gain Flattening Technique	
84	Performance Analysis of MC-DS-CDMA in the presence of Carrier Frequency Offset and Timing Jitter over Rayleigh Fading Channels	
85	Modified CMA Based Blind Equalization and Carrier-Phase Recovery in PDM-QPSK Coherent Optical Receivers	
86	A Novel Audio Watermarking Algorithm Based On Neighboring Samples	
87	Maze solving Algorithm for line following robot and derivation of linear path distance from non-linear path	
88	Diagnostics based Principal Component Analysis for Robust Plane Fitting in Laser Data	
89	Intrusion Detection Learning Algorithm through Network Mining	
90	iDMI: A Novel Technique for Missing Value Imputation using a Decision Tree and Expectation-Maximization Algorithm	
91	Irregular total labellings of Ladder
