

2014 IEEE 22nd International Conference on Network Protocols (ICNP 2014)

**Raleigh, North Carolina, USA
21-24 October 2014**

**IEEE Catalog Number: CFP14065-POD
ISBN: 978-1-4799-6205-1**

2014 IEEE 22nd International Conference on Network Protocols

ICNP 2014

Table of Contents

Message from ICNP General Chairs.....	xiv
Message from the ICNP 2014 Technical Program Chairs.....	xv
ICNP 2014 Conference Organizing Committee.....	xvii
ICNP 2014 Technical Program Committee Area Chairs.....	xix
ICNP 2014 Technical Program Committee: Regular Paper Track.....	xx
ICNP 2014 Technical Program Committee: Concise Paper Track.....	xxi
Message from the PhD Forum Technical Program Committee Co-Chairs.....	xxii
PhD Forum Technical Program Committee.....	xxiii
Message from the CNERT 2014 Workshop Co-Chairs.....	xxiv
CNERT 2014 Workshop Organizing Committee.....	xxv
CNERT 2014 Workshop Technical Program Committee.....	xxvi
Message from the CoolSDN 2014 Workshop Co-Chairs.....	xxvii
CoolSDN 2014 Workshop Technical Program Chairs and Committees.....	xxviii

Message from the CRAB 2014 Workshop	
Co-Chairs	xxix
CRAB 2014 Workshop Organizing Committee	xxx
Message from the NPSec Workshop	
Co-Chairs	xxxi
NPSec 2014 Workshop Organizing Committee	xxxii

Session 1: Cloud Computing and Data Center Networking

On Exploiting Dynamic Execution Patterns for Workload Offloading in Mobile Cloud Applications	1
<i>Wei Gao, Yong Li, Haoyang Lu, Ting Wang, and Cong Liu</i>	
Space Shuffle: A Scalable, Flexible, and High-Bandwidth Data Center Network.....	13
<i>Ye Yu and Chen Qian</i>	
Cross-VM Covert Channel Risk Assessment for Cloud Computing: An Automated Capacity Profiler	25
<i>Rui Zhang, Wen Qi, and Jianping Wang</i>	
On Design and Performance of Cloud-Based Distributed Interactive Applications	37
<i>Haiyang Wang, Ryan Shea, Xiaoqiang Ma, Feng Wang, and Jiangchuan Liu</i>	

Session 2: Cyber-Physical Systems

CBID: A Customer Behavior Identification System Using Passive Tags	47
<i>Jinsong Han, Han Ding, Chen Qian, Dan Ma, Wei Xi, Zhi Wang, Zhiping Jiang, and Longfei Shangguan</i>	
Fast Counting the Key Tags in Anonymous RFID Systems	59
<i>Xiulong Liu, Keqiu Li, Heng Qi, Bin Xiao, and Xin Xie</i>	
Scalable Data Access Control in RFID-Enabled Supply Chain	71
<i>Saiyu Qi, Yuanqing Zheng, Mo Li, Yunhao Liu, and Jinli Qiu</i>	
Cost-Minimizing Mobile Access Point Deployment in Workflow-Based Mobile Sensor Networks	83
<i>Haiming Jin, He Huang, Lu Su, and Klara Nahrstedt</i>	

Session 3: Internet Measurement

Every Packet Counts: Fine-Grained Delay and Loss Measurement with Reordering	95
<i>Jiliang Wang, Shuo Lian, Wei Dong, Yunhao Liu, and Xiang-Yang Li</i>	
Can Bandwidth Estimation Tackle Noise at Ultra-high Speeds?	107
<i>Qianwen Yin, Jasleen Kaur, and F. Donelson Smith</i>	
Network Path Capacity Comparison without Accurate Packet Time Information	119
<i>Ertong Zhang and Lisong Xu</i>	
Estimating the Persistent Spreads in High-Speed Networks	131
<i>Qingjun Xiao, Yan Qiao, Mo Zhen, and Shigang Chen</i>	

Session 4: Routing

Multipath Routing from a Traffic Engineering Perspective: How Beneficial Is It?	143
<i>Xuan Liu, Sudhir Mohanraj, Michal Pióro, and Deep Medhi</i>	
Routing to Multi-instantiated Destinations: Principles and Applications	155
<i>J.J. Garcia-Luna-Aceves</i>	
Preferential Link Tomography: Monitor Assignment for Inferring Interesting Link Metrics	167
<i>Yi Gao, Wenbin Wu, Wei Dong, Chun Chen, Xiang-Yang Li, and Jiajun Bu</i>	
Formal Modeling and Systematic Black-Box Testing of SDN Data Plane	179
<i>Jiangyuan Yao, Zhiliang Wang, Xia Yin, Xingang Shiyz, and Jianping Wu</i>	

Session 5: Networking and Security Algorithms

Senscrypt: A Secure Protocol for Managing Low Power Fitness Trackers	191
<i>Mahmudur Rahman, Bogdan Carbunar, and Umut Topkara</i>	
Polylogarithmic Competitive Algorithm for Energy Minimization in Optical WDM Networks	197
<i>Yangguang Shi, Fa Zhang, and Zhiyong Liu</i>	
On Measuring One-Way Path Metrics from a Web Server	203
<i>Xiapu Luo, Lei Xue, Cong Shi, Yuru Shao, Chenxiong Qian, and Edmond W.W. Chan</i>	
Semi-synchronous Channel Access for Full-Duplex Wireless Networks	209
<i>Xiufeng Xie and Xinyu Zhang</i>	
Secgras: Security Group Analysis as a Cloud Service	215
<i>Cheng Jin, Abhinav Srivastava, Yu Jin, and Zhi-Li Zhang</i>	

Session 6: Security and Pricing

You Are How You Touch: User Verification on Smartphones via Tapping Behaviors	221
<i>Nan Zheng, Kun Bai, Hai Huang, and Haining Wang</i>	
Orthcredential: A New Network Capability Design for High-Performance Access Control	233
<i>Hao Cai, Xinming Chen, and Tilman Wolf</i>	
Fair Pricing in the Sky: Truthful Frequency Allocation with Dynamic Spectrum Supply	245
<i>Qihang Sun, Qian Wang, Kui Ren, and Xiaohua Jia</i>	
Pay-as-You-Go Pricing and Competition in Congested Network Service Markets	257
<i>Richard T.B. Ma</i>	

Session 7: Transport

Deconstructing MPTCP Performance	269
<i>Behnaz Arzani, Alexander Gurney, Sitian Cheng, Roch Guerin, and Boon Thau Loo</i>	
Multi-path TCP: Boosting Fairness in Cellular Networks	275
<i>Ashwin Sridharan, Rakesh K. Sinha, Rittwik Jana, Bo Han, K.K. Ramakrishnan, N.K. Shankaranarayanan, and Ioannis Broustis</i>	
TCP Performance over Mobile Networks in High-Speed Mobility Scenarios	281
<i>Qingyang Xiao, Ke Xu, Dan Wang, Li Li, and Yifeng Zhong</i>	
Composing Heterogeneous SDN Controllers with Flowbricks	287
<i>Advait Dixit, Kirill Kogan, and Patrick Eugster</i>	
Optimizing Mobile Prefetching by Leveraging Usage Patterns and Social Information	293
<i>Christian Koch and David Hausheer</i>	

Session 8: Network Algorithms

Rethinking Packet Classification for Global Network View of Software-Defined Networking	296
<i>Takeru Inoue, Toru Mano, Kimihiro Mizutani, Shin-Ichi Minato, and Osamu Akashi</i>	
Meta-algorithms for Software-Based Packet Classification	308
<i>Peng He, Gaogang Xie, Kavé Salamatian, and Laurent Mathy</i>	
Collaborative Verification of Forward and Reverse Reachability in the Internet Data Plane	320
<i>Hongkun Yang and Simon S. Lam</i>	

Compressing IP Forwarding Tables: Realizing Information-Theoretical Space Bounds and Fast Lookups Simultaneously	332
<i>Attila Korösi, János Tapolcai, Bence Mihálka, Gábor Mészáros, and Gábor Rétvári</i>	

Session 9: Routing

Stochastic Planning for Content Delivery: Unveiling the Benefits of Network Functions Virtualization	344
<i>Michele Mangili, Fabio Martignon, and Antonio Capone</i>	
LAAR: Long-Range Radio Assisted Ad-Hoc Routing in MANETs	350
<i>Ying Mao, Jiayin Wang, Bo Sheng, and Mooi Choo Chuah</i>	
In-Band Update for Network Routing Policy Migration	356
<i>Shuyuan Zhang, Sharad Malik, Sanjai Narain, and Laurent Vanbever</i>	
Freeway: Adaptively Isolating the Elephant and Mice Flows on Different Transmission Paths	362
<i>Wei Wang, Yi Sun, Kai Zheng, Mohamed Ali Kaafar, Dan Li, and Zhongcheng Li</i>	
Analysis of Topology Algorithms for Commercial Airborne Networks	368
<i>Ben Newton, Jay Aikat, and Kevin Jeffay</i>	

Session 10: Forwarding Plane

Regulating Monopolistic ISPS without Neutrality	374
<i>Jing Tang and Richard T.B. Ma</i>	
PAC: Taming TCP Incast Congestion Using Proactive ACK Control	385
<i>Wei Bai, Kai Chen, Haitao Wu, Wuwei Lan, and Yangming Zhao</i>	
Constrained Maximum Flow in Stochastic Networks	397
<i>Fernando A. Kuipers, Song Yang, Stojan Trajanovski, and Ariel Orda</i>	
Wireless Rate Adaptation via Smart Pilot	409
<i>Lu Wang, Xiaoke Qi, Jiang Xiao, Kaishun Wu, Mounir Hamdi, and Qian Zhang</i>	

Session 11: Wireless Networks

Circular Pipelining: Minimizing Round-Trip Delay in Low-Duty-Cycle Wireless Networks	421
<i>Jia Li, Song Min Kim, and Tian He</i>	
Correlated Coding: Efficient Network Coding under Correlated Unreliable Wireless Links	433
<i>Shuai Wang, Song Min Kim, Zhimeng Yin, and Tian He</i>	
Exploiting Sender-Based Link Correlation in Wireless Sensor Networks	445
<i>Junghyun Jun, Long Cheng, Liang He, Yu Gu, and Ting Zhu</i>	

On the MAC for Power-Line Communications: Modeling Assumptions and Performance Tradeoffs	456
<i>Christina Vlachou, Albert Banchs, Julien Herzen, and Patrick Thiran</i>	

PhD Forum

Software Switch Performance Factors in Network Virtualization Environment	468
<i>Yimeng Zhao, Luigi Iannone, and Michel Riguidel</i>	
Optimization Models for Congestion Mitigation in Virtual Networks	471
<i>Jocelyne Elias, Fabio Martignon, Stefano Paris, and Jianping Wang</i>	
Multi-path Solutions to Improve Network Performance	477
<i>Behnaz Arzani</i>	
Obstacle Shadowing Influences in VANET Safety	480
<i>Scott E. Carpenter</i>	
Towards Resource-Efficient Application-Controlled Software Defined Networks	483
<i>Jeremias Blendin and David Hausheer</i>	
Brokerage Service in Cloud Federation	486
<i>Mohammad Aazam</i>	
A Decentralized System for Privacy-Preserving Context Exchange: Facilitating a Better Work-Life Balance	489
<i>Rahul Chini Dwarakanath and Ralf Steinmetz</i>	
IP45: Architecture, Design, and Implementation	492
<i>Tomáš Podermanski and Miroslav Švéda</i>	
On the Variation in Web Page Download Traffic across Different Client Types	495
<i>Sean Sanders and Jasleen Kaur</i>	
A Study on a Routing-Based Mobility Management Architecture for IoT Devices	498
<i>Masanori Ishino, Yuki Koizumi, and Toru Hasegawa</i>	
Challenges with Transition and User Accounting in Next Generation Networks	501
<i>Matej Grégr and Miroslav Švéda</i>	

Computer and Networking Experimental Research Using Testbeds Workshop – CNERT 2014

Session 1

Programming Routing Policies for Video Traffic	504
<i>Yuefeng Wang, Nabeel Akhtar, and Ibrahim Matta</i>	

In-Network Compute Extensions for Rate-Adaptive Content Delivery in Mobile Networks	511
<i>Francesco Bronzino, Chao Han, Yang Chen, Kiran Nagaraja, Xiaowei Yang, Ivan Seskar, and Dipankar Raychaudhuri</i>	
Experimentation of Geometric Information Routing on Content Locators	518
<i>Sahel Sahhaf, Dimitri Papadimitriou, Wouter Tavernier, Didier Colle, and Mario Pickavet</i>	
An OpenFlow-Based Prototype of SDN-Oriented Stateful Hardware Firewalls	525
<i>Jake Collings and Jun Liu</i>	
GENI Cinema: An SDN-Assisted Scalable Live Video Streaming Service	529
<i>Qing Wang, Ke Xu, Ryan IZard, Benton Kribbs, Joseph Porter, Kuang-Ching Wang, Aditya Prakash, and Parmesh Ramanathan</i>	

Session 2

Experience in Implementing & Deploying a Non-IP Routing Protocol VIRO in GENI	533
<i>Braulio Dumba, Guobao Sun, Hesham Mekky, and Zhi-Li Zhang</i>	
Domain Science Applications on GENI: Presentation and Demo	540
<i>Paul Ruth and Anirban Mandal</i>	
Experiments on Networking of Hadoop	544
<i>Abdul Navaz, Gandhimathi Velusam, and Deniz Gurkan</i>	
Designing a GENI Experimenter Tool to Support the Choice Net Internet Architecture	548
<i>D. Brown, O. Ascigil, H. Nasir, C. Carpenter, J. Griffioen, and K. Calvert</i>	

Control, Operation, and application in SDN Protocols Workshop – CoolSDN 2014

Session 1: SDN Control Plane

SDN Management Layer: Design Requirements and Future Direction	555
<i>Yuefeng Wang and Ibrahim Matta</i>	
Traffic Engineering in SDN/OSPF Hybrid Network	563
<i>Yingya Guo, Zhiliang Wang, Xia Yin, Xingang Shi, and Jianping Wu</i>	
Orion: A Hybrid Hierarchical Control Plane of Software-Defined Networking for Large-Scale Networks	569
<i>Yonghong Fu, Jun Bi, Kai Gao, Ze Chen, Jianping Wu, and Bin Hao</i>	

Session 2-1: SDN Data Plane

Forwarding Programming in Protocol-Oblivious Instruction Set	577
<i>Jingzhou Yu, Xiaozhong Wang, Jian Song, Yuanming Zheng, and Haoyu Song</i>	
Data Plane Programmability in SDN	583
<i>Hamid Farhad, Hyunyong Lee, and Akihiro Nakao</i>	
Extending Openflow for Service Insertion and Payload Inspection	589
<i>Robinson Udechukwu and Rudra Dutta</i>	

Session 2-2: SDN Data Plane

Stochastic Pre-classification for SDN Data Plane Matching	596
<i>Luke Mchale, Jasson Case, Paul V. Gratz, and Alex Sprintson</i>	

Cognitive Radio Architectures for Broadband Workshop - CRAB 2014

Session 1: Cognitive Network Perspectives

Virtual Duplex: Scaling Dense WLANS and Eliminating Contention Asymmetry	603
<i>Adriana B. Flores and Edward W. Knightly</i>	

Session 2: Cognitive Network Protocols

Performance Evaluation of Cognitive-Based Admission Control for Integrated Femtocell-WiFi Wireless Networks	612
<i>Salman A. Alqahtani</i>	

Secure Network Protocols Workshop - NPSec 2014

Session 1: Security for Software-Defined Networking and The Internet

OperationCheckpoint: SDN Application Control	618
<i>Sandra Scott-Hayward, Christopher Kane, and Sakir Sezer</i>	
DDoS Attack Protection in the Era of Cloud Computing and Software-Defined Networking	624
<i>Bing Wang, Yao Zheng, Wenjing Lou, and Y. Thomas Hou</i>	
Disincentivizing/Incentivizing Malicious/Honest Behavior on the Internet via Privacy-Preserving Appcoins	630
<i>Karim El Defraw and Joshua Lampkins</i>	

Session 2: Security Protocol Analysis

The Shape and Size of Threats: Defining a Networked System's Attack Surface	636
<i>Eric Osterweil, Danny McPherson, and Lixia Zhang</i>	
Reflections on Security Options for the Real-Time Transport Protocol Framework	642
<i>Colin Perkins</i>	
Vulnerabilities of RFID Security Protocol Based on Chaotic Maps	648
<i>Mete Akgün, Tübitak Uekae, and M. Ufuk Caglayan</i>	

Session 3: New Security Protocols and Mechanisms

Delegated Authenticated Authorization for Constrained Environments	654
<i>Stefanie Gerdes, Olaf Bergmann, and Carsten Bormann</i>	
Heisenberg Groups as Platform for the AAG Key-Exchange Protocol	660
<i>Delaram Kahrobaei and Ha T. Lam</i>	
MetaCAPTCHA: A Metamorphic Throttling Service for the Web	665
<i>Akshay Dua, Thai Bui, Tien Le, Nhan Huynh, and Wu-Chang Feng</i>	
Author Index	671
