## **SACAM'06 Contents**

**Foreword** D. Reddy i

### Computational Solid Mechanics

<b>KL1</b>	DRJ Owen, YT Feng, M Labao, K Han and J Yu	Coupled fluid/structure modelling of multi- fracturing solids and particulate media	<b>1</b>
<b>59</b>	N Mnisi, DP Roberts and JS Kuijpers	Numerical modelling of induced tensile stresses in rock in response to impact loading	<b>11</b>
<b>79</b>	E Sellers and J Napier	Boundary element modelling of blast induced fracture growth	<b>18</b>
<b>39</b>	TB Tengen and R Iwankiewicz	Modelling of the microstructural features such as the number of faces of grains in an aggregate using compound (marked) point fields.	<b>26</b>
<b>49</b>	RB Tait and V Balden	The application of fracture mechanics and FEM stress analysis to resolve a failure analysis of a rotary drier	<b>36</b>

### Micromechanics and Smart Materials

<b>40</b>	AN Mtawa, B Sun and J Gryzagoridis	Static and dynamic analysis of an actuating device comprising lightweight C-block piezoelectric elements	<b>49</b>
<b>32</b>	D Wood and PW Loveday	Ultrasonic detection of cracks in uniaxial glass fibre rods	<b>58</b>

### Structures and Vibrations

<b>70</b>	S Adali and IU Cagdas	Optimization of columns under non-uniform axial loads	<b>69</b>
<b>68</b>	EV Morozov	Numerical Simulation of crash and impact behaviour of thin-walled composite structures reinforced with randomly oriented short fibres	<b>78</b>
<b>36</b>	R Iwankiewicz	Equations for probability density of the response of a non-linear oscillator to a class of non-Erlang impulse process excitations	<b>87</b>
<b>44</b>	M Shatalov , I Fedotov and Y Gai	Analysis of longitudinal vibrations of n-stepped structures based on Rayleigh theory	<b>94</b>
<b>23</b>	M L Gordon and MAE Kaunda	A Novel measurement system and analysis of overhead conductor vibrations	<b>101</b>
<b>24</b>	MAE Kaunda and S Khoza	Application of the finite element method to mode wind induced vibration of single and quad-bundle conductors	<b>110</b>
<b>45</b>	M Shatalov, I.Fedotov, J.Wallis and K.Nicolaides	Radial vibrations of thick transversely isotropic piezoelectric sphere	<b>121</b>
<b>46</b>	M Shatalov , I Fedotov, J Wallis and	Analysis of a new unidimensional model and	<b>128</b>

## Computational Fluid Dynamics (CFD)

<b>15</b>	C Law, A Andreis, N Menon and BW Skews	A technique for measuring low mass flow rates of compressible fluids	<b>135</b>
<b>25</b>	N Menon and BW Skews	Flow patterns within non-axisymmetric supersonic impinging cold gas jets	<b>143</b>
<b>82</b>	AG Malan, J Pattinson and JP Meyer	An edge-based methodology for modelling incompressible flow on cut-cell non-collocated cartesian meshes	<b>152</b>
<b>30</b>	J-H Kruger and CG Du Toit	Arbitrees – adaptive refinement on unstructured Grids	<b>161</b>
<b>50</b>	G Milandri, JL van Niekerk and G Migeotte	Verification of a two degree-of-freedom model of heave and pitch of a HYSUCAT using state-space system identification	<b>170</b>
<b>28</b>	NA Cencelli, TW von Backstrom and TSA Denton	Aerodynamic optimisation of small-scale wind turbine blade for low windspeed conditions	<b>177</b>
<b>53</b>	KJ Craig	Optimal design of venturi system using CFD and mathematical optimization	<b>186</b>
<b>27</b>	P Kistan	CFD Modelling of asymmetric vortices on a missile at high angle of attack	<b>194</b>
<b>31</b>	J-H Kruger and CG Du Toit	Integrated system CFD analysis: a practical overview	<b>202</b>
<b>73</b>	OS Motsamai, JA Visser, M Morris and DJ de Kock	Combustor optimization with CFD and mathematical optimization	<b>211</b>
<b>51</b>	GR Smith, TM Harms and RT Dobson	Introductory computational fluid dynamics model for inertance pulse tube cryocooler	<b>223</b>
<b>KL4</b>	BW Skews	A gallery of shock wave interactions	<b>232</b>
<b>6</b>	BW Skews	Impulsively started flow at the exit from a duct	<b>242</b>
<b>9</b>	JJ Janse van Rensburg, MP van Staden and GG Jacobs	Advanced modelling of screens in aerodynamic diffusers using variable resistance factors	<b>250</b>
<b>18</b>	H Roohani and BW Skews	Investigation of the effects of acceleration on aerofoil aerodynamics	<b>267</b>
<b>7</b>	IMA Gledhill, J Baloyi, M Maserumule, K Forsberg, P Eliasson and J Nordström	Accelerating systems: some remarks on pitch damping	<b>275</b>
<b>8</b>	J Baloyi and BW Skews	Steady three-dimensional shockwave reflection transition phenomena	<b>285</b>
<b>2</b>	K Naidoo and BW Skews	Characterisation of unsteady shock wave reflection phenomena	<b>292</b>

## Theoretical Mechanics

<b>63</b>	BD Reddy and A Mc Bride	Primal plasticity within a discontinuous Galerkin framework: Part I. Basic formulation	<b>300</b>
<b>64</b>	A Mc Bride and BD Reddy	Primal plasticity within a discontinuous Galerkin framework: Part 2. Numerics and comparison with standard formulations	<b>311</b>
<b>71</b>	A Papastavrou	On low order finite element enhancements for coupled problems in porous media	<b>321</b>
<b>1</b>	CG Du Toit	The continuous Galerkin finite element method as applied to the 1D beam equation: a systems approach	<b>331</b>
<b>62</b>	J Djoko and BD Reddy	Generalised Hu-Washizu formulation for elasticity	<b>339</b>

## Heat Transfer

<b>16</b>	DP Ganga and S Govender	An analysis of thermal radiation in a steel making plant	<b>348</b>
<b>72</b>	MP van Staden, C Janse van Rensburg and C Viljoen	CFD Modelling of high temperature gas cooled reactors	<b>355</b>
<b>52</b>	JM Van Zyl, P Wipplinger, TM Harms and AB Taylor	CFD Investigation of an experimentally detected heat transfer phenomenon	<b>365</b>
<b>83</b>	G Scheepers, RM Morris, JA Visser TH Roos and GC Snedden	Experimental and numerical study of near bleed hole heat transfer enhancement in internal turbine blade cooling channels	<b>373</b>
<b>77</b>	AG Malan and JP Meyer	Modeling non-linear heat conduction via a fast edge-based matrix-free implicit unstructured-hybrid algorithm	<b>380</b>
<b>80</b>	C Van Der Merwe and AG Malan	The efficient transient pore-scale modelling of the solid conduction facet of an ordered packed-bed of spheres: a one-dimensional study	<b>388</b>

## Structural Dynamics

<b>33</b>	PW Loveday	Excitation of waves in elastic waveguides by piezoelectric patch actuators	<b>396</b>
-----------	------------	--	------------

## Fluid Mechanics

<b>54</b>	JAD Dymond and AH Basson	A computational model for mold filling in lomolding and injection molding	<b>404</b>
<b>57</b>	JFA Kessels and AS Jonker	Fully 2½D flow modelling of resin infusion under flexible tooling using unstructured meshes	<b>413</b>

## Materials

<b>26</b>	PFJ Henning L Pretorius and RF Laubscher	An investigation of geometric and material discontinuities of aluminium tubes	<b>423</b>
<b>19</b>	S John and JO Pedro	Review of tyre/road friction coefficient estimation for ABS controller design	<b>432</b>

<b>12</b>	S Kruger and RF Laubscher	A numerical investigation into the effect of material non-linearities and geometric imperfections on the resistance of hot-rolled 3CR12 columns	<b>441</b>
-----------	---------------------------	--	------------
