Foreword

Theoretical and Computational Fluid Dynamics

SACAM 009 (Du Toit): Re-evaluation of the separation parameters based on the Berman-Olander long bowl gas centrifuge solution	1
SACAM 010 (Mbehou): Uzawa's algorithm for Navier-Stokes equations driven by threshold slip boundary conditions	9
SACAM 019 (Borman): Hydraulic free surface flow with a novel validation approach	19
SACAM 020 (Bhamjee): An investigation into the applicability of the lattice Boltzman method to modelling multiphase flow in a hydrocyclone	29
SACAM 021 (Bhamjee): The effect of surface tension on air-core formation in a hydrocyclone	39
SACAM 024 (Madyira) Effect of HHO on four stroke petrol engine performance	48
SACAM 026 (Reynolds): Application of multiphase computational fluid dynamics to the plasma arc impingement problem in DC furnaces	58
SACAM 027 (Van der Westhuizen): Liquid extraction on air cooled condenser steam ducts	73
SACAM 034 (Dawson): Modelling morphology of crystalline deposits evolving from impinging droplets of salt solution	83
SACAM 038 (Adali): Variational formulation for carbon nanotubes	93
SACAM 042 (Van der Merwe): Local rise of total pressure in viscous flow through cylindrical packed beds with spherical particles	101
SACAM 049 (Joubert): One way FSI around a vertical cantilever beam	110
SACAM 051 (Louw): Modelling of the flow field in the vicinity of an axial flow fan, focussing on low flow rates	118
SACAM 052 (Humbert): Improving broiler lifestyle: a CFD approach	128
SACAM 053 (Cieslakiewicz): Preliminary evaluation of the air flow in a hybrid photovoltaic and thermal system	135
SACAM 054 (Potgieter): A computational and experimental analysis of a hybrid parallel/counter flow double pass solar air heater	146
SACAM 061 (Van Zyl): Application of NVIDIA Cuda technology to computational fluid dynamics in South African research	157
SACAM 062 (Heyns): Modelling compressible flow in OpenFOAM using a density based approach	165
SACAM 067 (Mew): Transient thermal comparison of solid and ventilated disk brakes rotors	175
SACAM 070 (Adebayo): Robust numerical approach to the solution of oscillatory 1D Schrodinger equation with boundary layer	181
SACAM 076 (Muller) A water flow meter for smart metering applications	191
SACAM 077 (Augustyn): Performance investigation of a reverse engineered axial flow fan by numerical simulation	201
SACAM 081 (Diener): CFD using open source software	211

Computational and Theoretical Dynamics

SACAM 006 (Swart) The subjective evaluation of interior noise produced by electric vehicles	220
SACAM 007 (Strydom) Vibration isolation of a stabilized platform mounted on a small off-road vehicle	228
SACAM 016 (Pandelani) The design of a lower limb impactor to assess lower limb injury at typical blast rates	237
SACAM 018 (Muller) Application of an in vivo validated lower body musculoskeletal model as a test platform for different knee prosthesis	244
SACAM 030 (Moutlana) Use of piezo actuators to maximize the fundamental frequency and frequency gap between first and second frequency	254
SACAM 059 (Aye) Health diagnostics of slow rotating bearings based on Gaussian progress regression	265
SACAM 060 (Inglis) How do students pass dynamics without understanding it	275

SACAM 065 (Eksteen) Advances in iterative learning control with application to response reconstruction in structural fatigue testing	282
SACAM 071 (Loveday) Feasibility of detecting cracks in rail track at long range using guided wave ultrasound	291
SACAM 072 (Long) Numerical evaluation of pulse echo damage detection in train rail	300

Computational and Theoretical Solid Mechanics

SACAM 002 (Styger) Numerical and experimental comparison of machining induced residual stress in Ti6LA4V	309
SACAM 003 (Roberts) Development of an experimental technique to characterize the material behaviour of modelling dough	316
SACAM 004 (Kangaj) Numerical modelling of the pull-out of hooked end fibre from epoxy matrix	323
SACAM 014 (Kok) Understanding linear and non-linear multi point constraints in finite element analysis	334
SACAM 031 (Asaadi) An inverse approach to characterize stress strain behaviour of materials	344
SACAM 039 (Conradie) Evaluating damage in structural materials using digital images and peridynamics	350
SACAM 043 (Laubscher) Residual stress depth profiling by layer removal	358
SACAM 044 (Charikinya) Bonded particle modelling of microwave induced crack patterns in sulphide ore particles	366
SACAM 046 (Baonhe Sob) Stochastic effect of grain-elongation on noncrystalline material yield stress produced by accumulative roll-bonding	376
SACAM 055 (McDougall) A comparison of topology optimization using continua and ground structures	385
SACAM 056 (Kok) Numerical strategies to compare the roots of the secular function Rayleigh waves	398
SACAM 064 (Botha) Boiler tube failure modelling methodology	406
SACAM 066 (Ferreira) Designing power line towers with circular hollow sections as members	N/A
SACAM 074 (Tengen) Stochastic models of mechanical properties of nanocrystalline materials produced by accumulative roll bonding	414
SACAM 078 (Smith) Development of a carbon fibre swingarm	423
