<b>Message from the WoSoCer 2014 Workshop Organizers</b> .....	xl
<b>WoSoCer 2014 Workshop Organizers</b> .....	xli

---

## Industry Sessions

### Session 1: Testing 1

Soft-LLFI: A Comprehensive Framework for Software Fault Injection .....	1
<i>Maryam Raiyat Aliabadi, Karthik Pattabiraman, and Nematollah Bidokhti</i>	
Fault Injection Experiments with the CLAMR Hydrodynamics Mini-App .....	6
<i>Brian Atkinson, Nathan Debardeleben, Qiang Guan, Robert Robey, and William M. Jones</i>	
Event Logging in an Industrial Development Process: Practices and Reengineering Challenges .....	10
<i>Fabio Baccanico, Gabriella Carrozza, Marcello Cinque, Domenico Cotroneo, Antonio Pecchia, and Agostino Savignano</i>	

### Session 2: Reliability Modeling 1

Event Based Robot Prognostics Using Principal Component Analysis .....	14
<i>V. Sathish, S.D. Sudarsan, and Srinu Ramaswamy</i>	
Proving Model Equivalence in Model Based Design .....	18
<i>Ashlie B. Hocking, John Knight, M. Anthony Aiello, and Shin'ichi Shiraishi</i>	
Developing Software Reliability Models in the Architecture Phase of the Software Lifecycle .....	22
<i>Alberto A. Avritzer and André B. Bondi</i>	

### Session 3: Testing 2

Architecture for a Hard-Real-Time System Enabling Non-intrusive Tests .....	24
<i>Joachim Froehlich and Reiner Schmid</i>	
Handling Soft Error in Embedded Software for Networking System .....	25
<i>Haihong Henry Zhu</i>	
Safety Critical Robot Programming and Testing for Operations in Industrial Co-Production .....	29
<i>Linn Gustavsson Christiernin, Svante Augustsson, and Stefan Christiernin</i>	

### Session 4: Industry Best Paper Nominees

NAPOLI FUTURA: Novel Approaches for Protecting Critical Infrastructures from Cyber Attacks .....	33
<i>Stefano Avallone, Gabriella Carrozza, Marcello Cinque, Raffaele Della Corte, Antonio Marotta, Antonio Pecchia, and Agostino Savignano</i>	
Network Function Virtualization: Challenges and Directions for Reliability Assurance .....	37
<i>D. Cotroneo, L. De Simone, A.K. Iannillo, A. Lanzaro, R. Natella, Jiang Fan, and Wang Ping</i>	

## **Session 5: Availability and Performance**

Towards an Evaluation Framework for Availability Solutions in the Cloud .....	43
<i>Majid Hormati, Ferhat Khendek, and Maria Toeroe</i>	
Verifying Response Times in Networked Automation Systems Using Jitter Bounds .....	47
<i>Seshadhri Srinivasan, Furio Buonopane, Srini Ramaswamy, and Jüri Vain</i>	
Performability Comparison of Lustre and HDFS for MR Applications .....	51
<i>Rekha Singhal, Manoj Nambiar, Harish Sukhwani, and Kishor Trivedi</i>	

## **Session 6: Reliability Modeling 2**

Reliability Models for the Internet of Things: A Paradigm Shift .....	52
<i>Mudasir Ahmad</i>	
Predicting Release Quality .....	60
<i>Pete Rotella and Sunita Chulani</i>	

## **Session 7: Model-Based Testing**

Automated Generation of Failure Modes and Effects Analysis from SysML Models .....	62
<i>Myron Hecht, Emily Dimpfl, and Julia Pinchak</i>	
MBT for Global Platform Compliance Testing: Experience Report and Lessons Learned .....	66
<i>Gil Bernabeu, Eddie Jaffuel, Bruno Legeard, and Fabien Peureux</i>	

## **Session 8: Security**

Assessing the Threat Landscape for Software Libraries .....	71
<i>Raghudeep Kannavara</i>	
Security Evaluation of a Linux System: Common Criteria EAL4+ Certification Experience .....	77
<i>Luca Recchia, Giuseppe Procopio, Andrea Onofrii, and Francesco Rogo</i>	

## **Session 9: Data Management and Analysis**

Balanced Measurement Sets: Criteria for Improving Project Management Practices .....	82
<i>Luigi Buglione, Daniele Gagliardi, Sergio Oltolina, Gabriele Ruffatti, Ernesto Damiani, and Fulvio Frati</i>	
CAMDIT: A Toolkit for Integrating Heterogeneous Data for Enhanced Service Provisioning .....	86
<i>Ipadeola Abayomi, Ipadeola Oladipupo, Ahmed Ameen, and Sadiku Joseph</i>	

Applying Metrics to Identify and Monitor Technical Debt Items during Software Evolution .....	92
<i>Clairton A. Siebra, Antonio Cavalcanti, Fabio Q.B. Silva, Andre L.M. Santos, and Tatiana B. Gouveia</i>	

## **Session 10: Static Analysis**

Quantitative Evaluation of Static Analysis Tools .....	96
<i>Shin'ichi Shiraishi, Veena Mohan, and Hemalatha Marimuthu</i>	
Code Analysis as an Enabler for SW Quality Improvement: The SELEX ES SW Engineering Experience .....	100
<i>Salvatore Scervo, Stefano Rosati, and Gabriella Carrozza</i>	
Supporting Reviewing of Warnings in Presence of Shared Variables: Need and Effectiveness .....	104
<i>Tukaram Muske</i>	

## **Session 11: Design and Planning**

A Formal Method Applied to the Automated Software Engineering with Quality Guarantees .....	108
<i>Marcelo Teixeira, Richardson Ribeiro, Marco Barbosa, and Luciene Marin</i>	
Planning of Prioritized Test Procedures in Large Integrated Systems: Best Strategy of Defect Discovery and Early Stop of Testing Session, The Selex-ES Experience .....	112
<i>Gianfrancesco Ranieri</i>	

## **Session 12: Avionics**

Understanding DO-178C Software Certification: Benefits Versus Costs .....	114
<i>Vance Hilderman</i>	
Challenges in Future Avionic Systems on Multi-Core Platforms .....	115
<i>Andreas Löfwenmark and Simin Nadjm-Tehrani</i>	
Model-Checking Real-Time Properties of an Auto Flight Control System Function .....	120
<i>Pierre-Alain Bourdil, Bernard Berthomieu, and Eric Jenn</i>	

## **Fast Abstracts**

### **Fast Abstracts 1**

Practical Behavioral Inconsistency Detection between Source Code and Specification Using Model Checking .....	124
<i>Saeko Matsuura, Yoshitaka Aoki, and Shinpei Ogata</i>	
Early Conflict Detection with Mined Models .....	126
<i>Leonardo Mariani, Daniela Micucci, and Fabrizio Pastore</i>	

Analysis of Functional Software Dependencies through Supervised Execution .....	128
<i>Jasmin Jahić and Thomas Kuhn</i>	
Applying Parameter Value Weighting to a Practical Application .....	130
<i>Satoshi Fujimoto, Hideharu Kojima, Hiroyuki Nakagawa, and Tatsuhiro Tsuchiya</i>	
Regression Testing Approach for Large-Scale Systems .....	132
<i>Passant Kandil, Sherin Moussa, and Nagwa Badr</i>	
Automatic Testing Framework for Virtualization Environment .....	134
<i>Chia Hung Kao, Ping-Hsien Chi, and Yi-Hsuan Lee</i>	

## Fast Abstracts 2

Mapping the Software Errors and Effects Analysis Method to ISO26262 Requirements for Software Architecture Analysis .....	136
<i>Paulo Victor Carvalho</i>	
Is Cut Sequence Necessary in Dynamic Fault Trees? .....	138
<i>Jianwen Xiang, Fumio Machida, Kumiko Tadano, and Shigeru Hosono</i>	
Exploiting Behavior Models for Availability Analysis of Interactive Systems .....	140
<i>Maximilian Junker</i>	
Evaluating Embedded-Software Specifications—Quantitative and Structured Assessment of Declarative Interface Descriptions .....	142
<i>Marc Förster</i>	
Are the Classical Disaster Recovery Tiers Still Applicable Today? .....	144
<i>Omar H. Alhami and Yashwant K. Malaiya</i>	

## Student Papers

Describing Software Specification by Combining SysML with the B Method .....	146
<i>Satoko Kinoshita, Hidekazu Nishimura, Hiroki Takamura, and Daichi Mizuguchi</i>	
A Runtime Verification Based Trace-Oriented Monitoring Framework for Cloud Systems .....	152
<i>Jingwen Zhou, Zhenbang Chen, Ji Wang, Zibin Zheng, and Wei Dong</i>	
Towards Fault Propagation Analysis in Cloud Computing Ecosystems .....	156
<i>Luigi De Simone</i>	
Towards Making Safety-Critical Systems Safer: Learning from Mistakes .....	162
<i>Nuno Silva and Marco Vieira</i>	
A Research Agenda for Benchmarking the Resilience of Software Defined Networks .....	168
<i>Luis Eduardo Santos, Marília Curado, and Marco Vieira</i>	
Do Injected Faults Cause Real Failures? A Case Study of Linux .....	174
<i>Nobuo Kikuchi, Takeshi Yoshimura, Ryo Sakuma, and Kenji Kono</i>	

# **ASSURE 2014 — Second International Workshop on Assurance Cases for Software-Intensive Systems**

## **Session 1: Principles and Techniques**

The Definition and Assessment of a Safety Argument .....	180
<i>V. Cassano and T.S.E. Maibaum</i>	
Building Blocks for Assurance Cases .....	186
<i>Robin Bloomfield and Kateryna Netkachova</i>	
Linking Traceability with GSN .....	192
<i>Kenji Taguchi, Souma Daisuke, Hideaki Nishihara, and Toshinori Takai</i>	
Retrieving Information from a Document Repository for Constructing Assurance Cases .....	198
<i>Khana Chindamaikul, Toshinori Takai, and Hajimu Iida</i>	

## **Session 2: Processes and Tools**

A Model-Driven Safety Certification Method for Process Compliance .....	204
<i>Barbara Gallina</i>	
A Technique for Demonstrating Safety and Correctness of Program Translators: Strategy and Case Study .....	210
<i>Junbeom Yoo, Jong-Gyun Choi, Young Jun Lee, and Jang-Soo Lee</i>	
SCT: A Safety Case Toolkit .....	216
<i>M. Anthony Aiello, Ashlie B. Hocking, John Knight, and Jonathan Rowanhill</i>	

## **Session 3: Applications**

A Security Argument Pattern for Medical Device Assurance Cases .....	220
<i>Anita Finnegan and Fergal McCaffery</i>	
Arguing Software Compliance with ISO 26262 .....	226
<i>Ashlie B. Hocking, John Knight, M. Anthony Aiello, and Shin'ichi Shiraishi</i>	

# **IWPD 2014 — The Fifth IEEE International Workshop on Program Debugging**

## **Session 1: Event Set and Trace Reduction**

Pinpointing Failure Inducing Event Orderings .....	232
<i>Hanefi Mercan and Cemal Yilmaz</i>	
Trace Reduction and Pattern Analysis to Assist Debugging in Model-Based Testing .....	238
<i>Teemu Kanstrén and Marsha Chechik</i>	

## **Session 2: Panel Discussion**

Program Debugging: Research and Practice .....	244
<i>W. Eric Wong</i>	

## **Session 3: Debugging with Support for Reliability, Static Analysis, and Temporal Assertions**

Defect Analysis and Reliability Assessment for Transactional Web Applications .....	245
<i>Wafa Jaffal and Jeff Tian</i>	
A Memory Model Based on Three-Valued Matrix for Static Defect Detection .....	251
<i>Qian Wang, Dahai Jin, and Yunzhan Gong</i>	
Debugging with Dynamic Temporal Assertions .....	257
<i>Ziad A. Al-Sharif, Clinton L. Jeffery, and Mahmoud H. Said</i>	

## **Session 4: Quality and Applicability of Debugging and Fault Localization**

Spectrum-Based Fault Localization for Spreadsheets: Influence of Correct Output Cells on the Fault Localization Quality .....	263
<i>Birgit Hofer</i>	
Studying the Advancement in Debugging Practice of Professional Software Developers .....	269
<i>Benjamin Siegmund, Michael Perscheid, Marcel Taeumel, and Robert Hirschfeld</i>	

## **RISK 2014 — Second International Workshop on Risk Assessment and Risk-Driven Testing**

### **Session 1: Risk Analysis and Assessment**

Evaluation of Risk for Complex Systems Using Attack Surface .....	275
<i>Leanid Krautsevich, Fabio Martinelli, and Artsiom Yautsiukhin</i>	
Structuring Compliance Risk Identification Using the CORAS Approach: Compliance as an Asset .....	281
<i>Samson Yoseph Esayas</i>	
Towards Safety Risk Assessment of Socio-Technical Systems via Failure Logic Analysis .....	287
<i>Barbara Gallina, Edin Sefer, and Atle Refsdal</i>	

## **Session 2: Risk Management**

Risk Management for Outsourcing to the Cloud: Security Risks and Safeguards as Selection Criteria for Extern Cloud Services .....	293
<i>Johannes Viehmann</i>	
CRSTIP—An Assessment Scheme for Security Assessment Processes .....	296
<i>Arthur-Jozsef Molnar and Jürgen Großmann</i>	

## **Session 3: Risk Modeling and Risk-Based Testing**

Expressing Best Practices in (Risk) Analysis and Testing of Safety-Critical Systems Using Patterns .....	299
<i>Wolfgang Herzner, Sven Sieverding, Omar Kacimi, Eckard Böde, Thomas Bauer, and Brian Nielsen</i>	
Schematic Generation of English-Prose Semantics for a Risk Analysis Language Based on UML Interactions .....	305
<i>Gencer Erdogan, Atle Refsdal, and Ketil Stølen</i>	
How Does the UML Testing Profile Support Risk-Based Testing .....	311
<i>Shaukat Ali, Tao Yue, Andreas Hoffmann, Marc-Florian Wendland, Alessandra Bagnato, Etienne Brosse, Markus Schacher, and Zhen Ru Dai</i>	

## **RSDA 2014 — Second IEEE International Workshop on Reliability and Security Data Analysis**

### **Session 1: Vulnerability Analysis**

Predicting Buffer Overflow Vulnerabilities through Mining Light-Weight Static Code Attributes .....	317
<i>Bindu Madhavi Padmanabhuni and Hee Beng Kuan Tan</i>	
Mining Security Vulnerabilities from Linux Distribution Metadata .....	323
<i>Jeffrey Stuckman and James Purtilo</i>	

### **Session 2: Security Data Mining**

Detection of Compromised Email Accounts Used by a Spam Botnet with Country Counting and Theoretical Geographical Travelling Speed Extracted from Metadata .....	329
<i>Carlo Schäfer</i>	
An Experiment with Conceptual Clustering for the Analysis of Security Alerts .....	335
<i>Andrea Paudice, Santonu Sarkar, and Domenico Cotroneo</i>	

### **Session 3: Data-Driven Analysis**

Failure Prediction of Jobs in Compute Clouds: A Google Cluster Case Study .....	341
<i>Xin Chen, Charng-Da Lu, and Karthik Pattabiraman</i>	
Supporting Decision-Making for Biometric System Deployment through Visual Analysis .....	347
<i>Cagatay Turkay, Stephen Mason, Ilir Gashi, and Bojan Cukic</i>	
Record and Replay GUI-Based Applications with Less Overhead .....	353
<i>João Matos, Nuno Coração, and João Garcia</i>	

### **Session 4: Secure and Reliable Design**

Combining Black Box Testing with White Box Code Analysis: A Heterogeneous Approach for Testing Enterprise SaaS Applications .....	359
<i>Stefano Rosiello, Amish Choudhary, Arpan Roy, and Rajeshwari Ganesan</i>	
Avoiding Hardware Aliasing: Verifying RISC Machine and Assembly Code for Encrypted Computing .....	365
<i>Peter T. Breuer and Jonathan P. Bowen</i>	
Integrating the Security Aspect into Design Space Exploration of Embedded Systems .....	371
<i>Ingo Stierand, Sunil Malipatlolla, Sibylle Fröschle, Alexander Stühling, and Stefan Henkler</i>	
On the Equivalence of SOA Rollback-Recovery Consistency Models .....	377
<i>Anna Kobusińska and Jerzy Brzeziński</i>	

### **Session 5: Anomaly Detection**

Using Invariants for Anomaly Detection: The Case Study of a SaaS Application .....	383
<i>Flavio Frattini, Santonu Sarkar, Jyotiska Nath Khasnabish, and Stefano Russo</i>	

### **Session 6: Internet Threats and Countermeasures**

Bypassing Censorship: A Proven Tool against the Recent Internet Censorship in Turkey .....	389
<i>Andrea Di Florio, Nino Vincenzo Verde, Antonio Villani, Domenico Vitali, and Luigi Vincenzo Mancini</i>	
Finding Domain-Generation Algorithms by Looking at Length Distribution .....	395
<i>Miranda Mowbray and Josiah Hagen</i>	
Multi-agent System for APT Detection .....	401
<i>Wim Mees and Thibault Debatty</i>	
Power Grid Outlier Treatment through Kalman Filter .....	407
<i>Cesario Di Sarno, Alessia Garofalo, Gianfranco Cerullo, Nadir Murru, Felicita Di Giandomenico, and Silvano Chiaradonna</i>	

# WoSAR 2014 — The Sixth International Workshop on Software Aging and Rejuvenation

## Keynote 1

Software Rejuvenation in Cloud Systems .....	413
<i>Antonio Puliafita</i>	

## Session 1: Rejuvenation Planning

Rejuvenation and the Spread of Epidemics in General Topologies .....	414
<i>Eitan Altman, Alberto Avritzer, Rachid El-Azouzi, Daniel S. Menasche, and Leandro Pflieger de Aguiar</i>	
Detection and Analysis of Performance Deterioration in Mobile Offloading System .....	420
<i>Qiushi Wang and Katinka Wolter</i>	
Software Maintenance Optimization Based on Stackelberg Game Methods .....	426
<i>Jing Zhao, Yan-Bin Wang, Gao-Rong Ning, Cheng-Hong Wang, Kishor S. Trivedi, K-Y Cai, and Zhen-Yu Zhang</i>	

## Keynote 2

The Dual Nature of Software Aging: Twenty Years of Software Aging Research .....	431
<i>Stefano Russo</i>	

## Session 2: Aging Analysis and Mitigation

Towards Patching Memory Leak Bugs in Off-The-Shelf Software .....	433
<i>Domenico Cotroneo and Roberto Natella</i>	
A Novel Hybridization of Artificial Neural Networks and ARIMA Models for Forecasting Resource Consumption in an IIS Web Server .....	437
<i>Yongquan Yan, Ping Guo, and Lifeng Liu</i>	
A Practice of Forecasting Software Aging in an IIS Web Server Using SVM .....	443
<i>Yongquan Yan, Ping Guo, and Lifeng Liu</i>	
Reducing Web Test Cases Aging by Means of Robust XPath Locators .....	449
<i>Maurizio Leotta, Andrea Stocco, Filippo Ricca, and Paolo Tonella</i>	

# WOSD 2014 — The Fourth Workshop on Open Systems Dependability

## Session 1: Evolution of Assurance

An Evaluation of Assuring Test Case Sufficiency Using a D-Case Pattern .....	455
<i>Shuichiro Yamamoto and Shuji Morisaki</i>	

A Supplemental Notation of GSN Aiming for Dealing with Changes of Assurance Cases .....	461
<i>Toshinori Takai and Hiroyuki Kido</i>	

## **Session 2: Management of Open Systems Dependability**

Run-Time Adaptive Error and State Management for Open Automotive Systems .....	467
<i>Jelena Frtunikj, Michael Armbruster, and Alois Knoll</i>	
Toward SIL Evaluation for a Resilience Strategy .....	473
<i>Ling Fang, Guoqiang Li, Yingjie You, Chaobin Chen, and Liqin Hu</i>	
Prediction of the Complexity of Code Changes Based on Number of Open bugs, New Feature and Feature Improvement .....	478
<i>V.B. Singh and Meera Sharma</i>	

## **WoSoCer 2014 — Fourth IEEE International Workshop on Software Certification**

### **Invited Talk**

Assessment Techniques, Certification and [What Else We Need for] Confidence in Software .....	484
<i>Lorenzo Strigini</i>	

### **Session 1: Certification Arguments**

Argument Evaluation in the Context of Assurance Case Confidence Modeling .....	485
<i>S. Grigorova and T.S.E. Maibaum</i>	

### **Session 2: Automotive Certification**

Towards Certification of Automotive Software .....	491
<i>Cristiana Areias, João Carlos Cunha, Davide Iacono, and Francesco Rossi</i>	
Automotive SPICE Assessments in Safety-Critical Contexts: An Experience Report .....	497
<i>Giuseppe Lami and Fabio Falcini</i>	
Process Model Tailoring and Assessment for Automotive Certification Objectives .....	503
<i>Morayo Adedjouma and Hao Hu</i>	

### **Session 3: Certification Processes**

Cost Optimisation in Certification of Software Product Lines .....	509
<i>Ricardo J. Rodríguez and Sasikumar Punnekkat</i>	
Reducing Certification Costs through Assured Dynamic Software Configuration .....	515
<i>Nermin Kajtazovic, Andrea Höller, Tobias Rauter, and Christian Kreiner</i>	
Adding Security Concerns to Safety Critical Certification .....	521
<i>Nicola Nostro, Andrea Bondavalli, and Nuno Silva</i>	

## **Session 4: Tools for Dependability and Certifiability Assessment**

Safety ADD: A Tool for Safety-Contract Based Design .....	527
<i>Fredrik Warg, Benjamin Vedder, Martin Skoglund, and Andreas Söderberg</i>	
Improving Usability of Fault Injection .....	530
<i>D. Cotroneo, L. De Simone, A.K. Iannillo, A. Lanzaro, and R. Natella</i>	
<b>Author Index</b> .....	533
