

2014 9th International Conference on the Quality of Information and Communications Technology

(QUATIC 2014)

**Guimaraes, Portugal
23-26 September 2014**

**IEEE Catalog Number: CFP1471C-POD
ISBN: 978-1-4799-6134-4**

2014 9th International Conference on the Quality of Information and Communications Technology

QUATIC 2014

Table of Contents

Message from Conference Chairs.....	xi
Organizing Committee.....	xiv
Program Committee.....	xv

Invited Papers (Keynote Speakers)

Software Defects: Stay Away from Them. Do Inspections!	1
<i>Guilherme Horta Travassos</i>	

Main Session

Overcoming Structural Resistance in SPI with Change Management	8
<i>Henrique Narciso and I. Allison</i>	
Higher Education Business Process Improvement: Achieving BPMM Level 3	18
<i>Duarte Duarte and Paula Ventura Martins</i>	
Results of 10 Years of Software Process Improvement in Brazil Based on the MPS-SW Model	28
<i>Marcos Kalinowski, Kival Weber, Nelson Franco, Elidiane Barroso, Virginia Duarte, David Zanetti, and Gleison Santos</i>	
Systems and Software Engineering Standards for Very Small Entities: Implementation and Initial Results	38
<i>Claude Y. Laporte and Rory V. O'Connor</i>	
Estrangement between Classes: Test Coverage-Based Assessment of Coupling Strength between Pairs of Classes	48
<i>George Kakarontzas, Vassilis C. Gerogiannis, Stamatia Bibi, and Ioannis Stamelos</i>	

Incident Management Optimization through the Reuse of Experiences and Natural Language Processing	58
<i>Glauber Bezerra, Vladia Pinheiro, and Adriano Bessa</i>	
Pattern Based GUI Testing for Mobile Applications	66
<i>Pedro Costa, Ana C.R. Paiva, and Miguel Nabuco</i>	
An Automated Testing Framework of Model-Driven Tools for XACML Policy Specification	75
<i>Antonia Bertolino, Said Daoudagh, Francesca Lonetti, and Eda Marchetti</i>	
A Bottom-Up Quality Model for QVTo	85
<i>Christine M. Gerpheide, Ramon R.H. Schiffelers, and Alexander Serebrenik</i>	
Comparing Three Notations for Defining Scenario-Based Model Tests: A Controlled Experiment	95
<i>Bernhard Hoisl, Stefan Sobernig, and Mark Strembeck</i>	
Web Application Model Generation through Reverse Engineering and UI Pattern Inferring	105
<i>Clara Sacramento and Ana C.R. Paiva</i>	

Thematic Track: Quality in ICT Requirements Engineering

Foreword of the Thematic Track: Quality in ICT Requirements Engineering	116
<i>Maria Lencastre</i>	
An Experiment of Software Quality Evaluation in the Audio-Visual Media Preservation Context	118
<i>Isabella Biscoglio and Eda Marchetti</i>	
Towards a System Requirements Specification Template that Minimizes Combinatorial Effects	124
<i>Alberto Rodrigues da Silva, Jan Verelst, Herwig Mannaert, David Almeida Ferreira, and Philip Huysmans</i>	
A Study on the Viability of Formalizing Use Cases	130
<i>Rui Couto, António Nestor Ribeiro, and José Creissac Campos</i>	
Preliminary Experience Using JetBrains MPS to Implement a Requirements Specification Language	134
<i>Alberto Rodrigues da Silva, Siniša Vlajić, Saša Lazarević, Ilija Antović, Vojislav Stanojević, and Miloš Milić</i>	

Thematic Track: Quality in Agile Methods

Foreword of the Thematic Track: Quality in Agile Methods	138
<i>Panagiotis Sfetsos</i>	

A Reference Model for Agile Quality Assurance: Combining Agile Methodologies and Maturity Models	139
<i>Fernando Selleri Silva, Felipe Santana Furtado Soares, Angela Lima Peres, Ivanildo Monteiro de Azevedo, Pietro Pereira Pinto, and Silvio Romero de Lemos Meira</i>	
A Comparative Study on the Effectiveness of Patterns in Software Libraries and Standalone Applications	145
<i>Panagiotis Sfetsos, Apostolos Ampatzoglou, Alexander Chatzigeorgiou, Ignatios Deligiannis, and Ioannis Stamelos</i>	

Thematic Track: ICT Process Improvement and Assessment

Foreword of the Thematic Track: ICT Process Improvement and Assessment	151
<i>Karol Frühauf</i>	
Improving the Software Factory Contracting Process in the Public Area: The Rio de Janeiro City Hall's Experience	152
<i>Marcia Fontes, Wesley Nascimento, Katia Carvalho, Edison Moreira, Monica Cardoso, and Mariano Montoni</i>	
Test Process Improvement with Documentation Driven Integration Testing	156
<i>Florian Häser, Michael Felderer, and Ruth Brey</i>	
QuASE: A Tool Supported Approach to Facilitating Quality-Related Communication in Software Development	162
<i>Vladimir A. Shekhovtsov, Heinrich C. Mayr, and Vladyslav Lubenskyi</i>	
A Cynefin Based Approach to Process Model Tailoring and Goal Alignment	166
<i>Marion Lepmets, Rory V. O'Connor, Aileen Cater-Steel, Antoni Lluís Mesquida, and Tom McBride</i>	
The Most Often Seen Misconceptions in Process Improvement	170
<i>Karol Frühauf</i>	
CERTICS Assessment Methodology for Software Technological Development and Innovation	174
<i>Angela M. Alves, Clenio F. Salviano, Giancarlo N. Stefanuto, Sônia T. Maintinguer, Carolina V. Mattos, Camila Zeitoum, Marcia Martinez, and Giancarlo Reuss</i>	

Thematic Track: Quality in Model Driven Engineering

Foreword of the Thematic Track: Quality in Model Driven Engineering	178
<i>Marjan Mernik</i>	
Comparing Three Notations for Defining Scenario-based Model Tests: A Controlled Experiment	180
<i>Bernhard Hoisl, Stefan Sobernig, and Mark Strembeck</i>	

On the Appropriateness of Domain-Specific Languages Derived from Different Metamodels	190
<i>Igor Rožanc and Boštjan Slivnik</i>	
Refactoring Meets Model-Driven Spreadsheet Evolution	196
<i>Jácome Cunha, João Paulo Fernandes, Pedro Martins, Rui Pereira, and João Saraiva</i>	
On the Impact of Automation and Trace-Enabling over the Quality of Model Transformations	202
<i>Verónica A. Bollati, Juan M. Vara, Álvaro Jiménez, and Esperanza Marcos</i>	

Thematic Track: ICT Verification and Validation

Foreword of the Thematic Track: ICT Verification and Validation	208
<i>Eda Marchetti</i>	
Combinatorial Testing in an Industrial Environment—Analyzing the Applicability of a Tool	210
<i>Nelly Condori-Fernández, Peter M. Kruse, Tanja E. J. Vos, Etienne Brosse, and Alessandra Bagnato</i>	
Automatic Test Set Generation for Function Block Based Systems Using Model Checking	216
<i>Jussi Lahtinen</i>	
Validation of Interlocking Systems by Testing their Models	226
<i>Andrea Bonacchi and Alessandro Fantechi</i>	
On Testing against Partial Non-observable Specifications	230
<i>Natalia Kushik, Nina Yevtushenko, and Ana Cavalli</i>	

Thematic Track: Evidence-Based Software Quality Engineering

Foreword of the Thematic Track: Evidence-Based Software Quality Engineering	234
<i>Guilherme Horta Travassos and Fernando Brito e Abreu</i>	
Project Management Suported by Business Process Management	236
<i>Welkey Costa do Carmo and Adriano Bessa Albuquerque</i>	
Improvement Methods for Software Requirement Specifications: A Mapping Study	242
<i>Viktor Pekar, Michael Felderer, and Ruth Breu</i>	

Thematic Track: Quality in IT Service Management

Foreword of the Thematic Track: Quality in IT Service Management	246
<i>Marion Lepmets</i>	
Incident Management Optimization through the Reuse of Experiences and Natural Language Processing	247
<i>Gláuber de Tarso Vieira Bezerra, Vládía Célia Monteiro Pinheiro, and Adriano Bessa Albuquerque</i>	
Toward a Gamification Model to Improve IT Service Management Quality on Service Desk	255
<i>Fabio Silva da Conceição, Alan Pedro da Silva, Ananias Queiroga de Oliveira Filho, and Reinaldo Cabral Silva Filho</i>	

Thematic Track: Quality in Web Engineering

Foreword of the Thematic Track: Quality in Web Engineering	261
<i>Maristella Matera</i>	
Fuzzy Mashup Quality Requirements Specification for Web Users	262
<i>Andreas Rüempel, Carsten Radeck, Juri Tichomirow, and Klaus Meißner</i>	
A Novel Framework for Creating User Interface Level Tests Resistant to Refactoring of Web Applications	268
<i>Heidar Pirzadeh, Sara Shanian, and Farzin Davari</i>	

Thematic Track: SEDES'2014 Workshop

Foreword of the 5th Portuguese Software Engineering Doctoral Symposium (SEDES'2014)	274
<i>Rui Abreu and João Pascoal Faria</i>	
Derivation of Data-Driven Software Models from Business Process Representations	276
<i>Estrela Ferreira Cruz, Ricardo J. Machado, and Maribel Y. Santos</i>	
Availability Evaluation of Software Architectures through Formal Methods	282
<i>João Miguel Franco, Raul Barbosa, and Mário Zenha-Rela</i>	
An OMG-based Meta-Framework for Alignment of IS/IT Architecture with Business Models	288
<i>Carlos E. Salgado, Ricardo J. Machado, and Rita Suzana Pitangueira Maciel</i>	
Automated Pattern-Based Testing of Mobile Applications	294
<i>Inês Coimbra Morgado, Ana C.R. Paiva, and João Pascoal Faria</i>	
On the Evaluation of Software Maintainability Using Automatic Test Case Generation	300
<i>Ana Filipa Nogueira, José Carlos Bregieiro Ribeiro, and Mário Zenha-Rela</i>	

Streamlining Code Smells: Using Collective Intelligence and Visualization	306
<i>Carlos Fábio Ramos Conceição, Glauco de Figueiredo Carneiro, and Fernando Brito e Abreu</i>	
A MDE Generative Approach for Mobile Business Apps	312
<i>Luís Miguel Pires Teixeira da Silva and Fernando Brito e Abreu</i>	
Author Index	318
