

2014 7th International Workshop on Communication Technologies for Vehicles

(Nets4Cars-Fall 2014)

**St. Petersburg, Russia
6-8 October 2014**

**IEEE Catalog Number: CFP1475Y-POD
ISBN: 978-1-4799-5271-7**

Program

2014 7th International Workshop on Communication Technologies for Vehicles (Nets4Cars-Fall)

V2X I

<i>Towards Inter-Vehicle Communication Strategies for Platooning Support</i> Michele Segata (University of Trento & University of Innsbruck, Italy), Bastian Bloessl (University of Paderborn, Germany), Stefan Joerer (University of Innsbruck & University of Sydney, Austria), Christoph Sommer (University of Paderborn, Germany), Mario Gerla (University of California at Los Angeles, USA), Renato Lo Cigno (University of Trento, Italy), Falko Dressler (University of Paderborn, Germany)	1
<i>Reliability of Vehicle-to-Vehicle Communication at Urban Intersections</i> Tetiana Zinchenko (Volkswagen AG, Germany), Hugues Tchouankem (Leibniz Universität Hannover & Institute of Communications Technology (IKT), Germany), Lars C Wolf (Technische Universität Braunschweig, Germany)	7
<i>RSUs Placement Using Overlap Based Greedy Method for Urban and Rural Roads</i> Robil W. Daher (German University in Cairo & Faculty of Information Engineering and Technology, Egypt), Ramy Rizk (German University in Cairo & ITS-WG, Egypt), Ahmed Makkawi (German University in Cairo & ITS-WG, Egypt)	12
<i>Cooperative speed harmonization for efficient road utilization</i> Cristofer Englund (Viktoria Swedish ICT, Sweden), Lei Chen (Viktoria Swedish ICT, Sweden), Alexey Voronov (Viktoria Swedish ICT, Sweden)	19

V2X II

<i>FcVcA: A Fuzzy Clustering-based Vehicular Cloud Architecture</i> Hamid Reza Arkian (University of Guilan, Iran), Reza Ebrahimi Atani (University of Guilan, Iran), Saman Kamali (University of Guilan, Iran)	24
<i>Feasibility Study of Utilising SCM - MIMO Channel Model in V2V Communication</i> Ahmad Baheej Al-Khalil (The University of Northampton, United Kingdom), Scott Turner (University of Northampton, United Kingdom), Ali Al-Sherbaz (The University of Northampton & School of Science and Technology, United Kingdom)	29
<i>On Site-Specific Propagation Models for the Evaluation of V2X Applications</i> Robert Protzmann (Fraunhofer FOKUS, Germany), Björn Schünemann (Daimler Center for Automotive IT Innovations, Technische Universität Berlin, Germany), Ilja Radusch (Technische Universität Berlin & Fraunhofer FOKUS, Germany)	35

Miscellaneous

<i>SAFDX: Deterministic High-Availability Ring for Industrial Low-Cost Networks</i> Peter Heise (Airbus Group Innovations, Germany), Nils Tobeck (Airbus Group, Germany), Oliver Hanka (Airbus Group, Germany), Stefan Schneelee (Airbus Group Innovations, Germany)	40
<i>Architecture of Application Platform for RFID-Enabled Traffic Law Enforcement System</i> Vladimir Vishnevsky (Russian Academy of Sciences, Russia), Andrey Larionov (Institute of Control Sciences of Russian Academy of Sciences & R&D INCET, Russia), Roman Ivanov (Institute of Control Sciences of Russian Academy of Sciences, Russia)	45
<i>CAT - Cars as Tags</i> Dmitry Namiot (Moscow State University, Russia), Manfred Sneps-Sneppe (Ventspils UniversityCollege & VIRAC, Latvia)	50

Capacity gain with an alternative LTE railway communication network

Aleksander Sniady (Technical University of Denmark, Denmark), Jose Soler (Technical University of Denmark, Denmark)
