

# **2014 IEEE Symposium on Computational Intelligence for Communication Systems and Networks**

**(CICOMMS 2014)**

**Orlando, Florida, USA  
9-12 December 2014**

IEEE Catalog Number: CFP14ZAE-POD  
ISBN: 978-1-4799-4523-8

## TABLE OF CONTENTS

|                                                                                                                                 |      |
|---------------------------------------------------------------------------------------------------------------------------------|------|
| IEEE SSCI 2014 General Committee .....                                                                                          | v    |
| IEEE CIComms 2014 Committee.....                                                                                                | vi   |
| Keynote Talk: CIComms'14.....                                                                                                   | viii |
| Wednesday, December 10                                                                                                          |      |
| 9:20AM-10:00PM                                                                                                                  |      |
| CIComms'14 Keynote Talk                                                                                                         |      |
| Dealing with Complexity in Optimization Design                                                                                  |      |
| Andrea Massa                                                                                                                    |      |
| 10:20AM-12:00PM                                                                                                                 |      |
| CIComms'14 Session 1: CI for Communications                                                                                     |      |
| Chair: Maode Ma and Paolo Rocca                                                                                                 |      |
| 10:20AM <i>Multiplexing Communication Routes with Proxy-Network to Avoid Intentional Barriers in Large Scale Network</i> .....  | 1    |
| Hiroshi Fujikawa, Hirofumi Yamaki, Yukiko Yamamoto and Setsuo Tsuruta                                                           |      |
| 10:40AM <i>Modeling and Reasoning in Context-Aware Systems based on Relational Concept Analysis and Description Logic</i> ..... | 8    |
| Anne Marie Amja, Abdel Obaid and Petko Valtchev                                                                                 |      |
| 11:00AM <i>Call Drop Minimization using Fuzzy Associated Memory</i> .....                                                       | 16   |
| Moses Ekenyong, Inemesit Ekarika and Imeh Umoren                                                                                |      |
| 11:20AM <i>ANN Based Optimization of Resonating Frequency of Split Ring Resonator</i> .....                                     | 24   |
| Kumaresh Sarmah, Kandarpa Kumar Sarma and Sunandan Baruah                                                                       |      |
| 11:40AM <i>Using Evolutionary Algorithms for Channel Assignment in 802.11 Networks</i> .....                                    | 30   |
| Marlon Lima, Thales Rodrigues, Rafael Alexandre, Ricardo Takahashi and Eduardo Carrano                                          |      |
| 1:30PM-3:10PM                                                                                                                   |      |
| Special Session: CIComms'14 Session 2: Advanced Nature-Inspired Optimization for New Generation Antenna Devices                 |      |
| Chair: Paolo Rocca and Andrea Massa                                                                                             |      |
| 1:30PM <i>An Overview of Several Recent Antenna Designs Utilizing Nature-Inspired Optimization Algorithms</i> .....             | 38   |
| Douglas Werner, Micah Gregory, Zhi Hao Jiang, Donovan Brocker, Clinton Scarborough and Pingjuan Werner                          |      |
| 1:50PM <i>A technique for the aperture partitioning</i> .....                                                                   | 45   |
| Amedeo Capozzoli, Claudio Curcio, Giuseppe D'Elia, Angelo Liseno and Francesco Marano                                           |      |
| 2:10PM <i>Evolution of Nature-Inspired Optimization for New Generation Antenna Design</i> .....                                 | 51   |
| Giacomo Oliveri, Paolo Rocca, Marco Salucci and Andrea Massa                                                                    |      |
| 2:30PM <i>Antenna Design by Using MOEA/D-Based Optimization Techniques</i> .....                                                | 57   |
| Dawei Ding, Gang Wang, Chenwei Yang and Lu Wang                                                                                 |      |

**3:30PM-5:10PM**

**Special Session: CIComms'14 Session 3: Intelligent Applications in Communication and Computation**

Chair: Paolo Rocca and Maode Ma

|        |                                                                                                                                                                                                 |           |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| 3:30PM | <i>Interference Suppression using CPP Adaptive Notch Filters for UWB Synchronization in Stochastic Non-Linear Channels .....</i>                                                                | 61        |
|        | Farhana Begum, Manash Pratim Sarma, Kandarpa Kumar Sarma, Nikos Mastorakis and Aida Bulucea                                                                                                     |           |
| 3:50PM | <i>A Novel Method of Computation of transfer function of unknown networks for indoor power line communication: Transfer function estimation of power line using transmission matrices .....</i> | 69        |
|        | Banty Tiru                                                                                                                                                                                      |           |
| 4:10PM | <i>Efficient Synthesis of Complex Antenna Devices Through System-by-Design.....</i>                                                                                                             | 76        |
|        | Giacomo Oliveri, Marco Salucci, Paolo Rocca and Andrea Massa                                                                                                                                    |           |
| 4:30PM | <i>Optimal Observations Transmission for Distributed Estimation under Energy Constraint.....</i>                                                                                                | 82        |
|        | Marwan Alkhweldi                                                                                                                                                                                |           |
|        | <b>AUTHOR INDEX.....</b>                                                                                                                                                                        | <b>88</b> |
