

# **2014 International Conference on Interactive Mobile Communication Technologies and Learning**

**(IMCL 2014)**

**Thessaloniki, Greece  
13-14 November 2014**

**IEEE Catalog Number: CFP14IMH-POD  
ISBN: 978-1-4799-4741-6**

# 2014 International Conference on Interactive Mobile Communication Technologies and Learning (IMCL)

## Table of Contents

Title	Page range
Piloting the 'Talking Tools' Smartphone App: Validating Blog Content Analysis with Students' Reflections	1–4
Designing eBook Interaction for Mobile and Contextual Learning	5–13
Adaptive eBook	14–19
Remote lab experiments for take away	20–23
Determining the benefits of Social Media support in Lecturing	24–29
Influences on the Adoption of Mobile Learning in Saudi Women Teachers in Higher Education	30–34
Development of Professional Competencies in the Teaching of Engineering	35–42
A Classification of Mobile Learning Applications from a Usability Perspective: Study of Higher Education Students in India	43–46
Learning out of the class: Creating e-Courses for mobile devices	47–50
Complementing Formal Learning with Mobile Technology Outside the Classroom	51–56
Teaching Geography with the use of ICT	57–63
Young Language Learners' Collaborative learning and Social Interaction as a Motivational Aspect of the iPad	64–69
variPiano™: a Parametric Design variable Piano - Visualizing a Differential Tuning Mobile Interface	70–74
Online Temperature Control System	75–78
Development and implementation of an e-course and a remote laboratory for analogical electronic study	79–81
UC1 Oscillator remotelab for distant electronics education	82–85
A model for Mobile-based Assessment adoption based on Self-Determination Theory of Motivation	86–90
Remote Laboratory in Electronic Field in eScience Project	91–96
Remote Laboratory for Control Process Practical Course in eScience Project	97–101
The Readiness of applying m-learning among Saudi Arabian Students at Higher Education	102–106
From Local Teaching To Distant Teaching Through IoT Interoperability	107–110
Developing a remote laboratory for heat transfer studies	111–114
Implementation of online optoelectronic devices course and remote experiments in UC1 iLab	115–119
Online laboratory in Digital Electronics using NI ELVIS II+	120–124
Success Factors of Online Learning Videos	125–132
Determination of resonance frequency and estimation of damping ratio for forced vibrations modules using remote lab	133–138
Clarifying the digital content output formats for mobile learning in higher education	139–146

# 2014 International Conference on Interactive Mobile Communication Technologies and Learning (IMCL)

## Table of Contents

Title	Page range
A Pilot Study of QuizIt: the New Android Classroom Response System	147–151
Motivating K-12 students learning fundamental Computer Science concepts with App Inventor	152–159
Location-based Mobile Application Creator: Creating Educational Mobile Scavenger Hunts	160–164
Mobile Learning Security Concerns from University Students' Perspectives	165–172
Dialectic & Reconstructive Musicality: Stressing the Brain-Computer Interface	173–177
Investigating Attack Vectors in M-learning Systems in Nigerian Universities	178–184
Encouraging Students Participation in the Classroom by Taking Advance of Mobile Devices and Ad Hoc Networks	185–188
Designing a mobile bio-feedback device to support learning activities	189–194
Design of exchangeable experimentation data format and protocol for Online Labs with emphasis on Mobile Learning	195–197
Mobile Technologies Supporting Research Approach in Teaching and Learning, weSPOT inquiry-based study	198–202
Greek teachers' perceptions of Mobile Learning.	203–208
Pedagogy of mobile augmented reality in health education	209–212
"Gamification" and Legal Education A Game Based Application for Teaching University Law Students	213–216
Raising Awareness on Sustainability Issues through a Mobile Game	217–221
Do you remember that building? Exploring old Zakynthos through an locationaugmented reality mobile based game	222–225
Apps versus Demonstrations Experiments - Improvement of Quality of Physics Teaching in Secondary Education by the Use of Tablets	226–231
A dynamic role-playing platform for simulations in legal and political education	232–236
iServe: A Serious Game for Servitization	237–241
Teaching Entrepreneurship Using Serious Games in a Web 2.0 environment	242–246
Serendipitous Learning & Serious Games: A Pilot Study	247–251
COLearn and Open Discovery Space Portal alignment - A case of enriching open learning infrastrures with collaborative learning capabilities	252–256
The ALICE experience - A learning framework to promote gaming literacy for educators and its refinement	257–261
Data sources composition to support learning activities at Cultural Heritage sites	262–264
SoundscapesLandscapes: Sound and Video Art in an Urban Installation	265–268
Game-based Lifestyle Interventions for Adolescents: An Evidence-based Approach	269–273
Digital Forgetting in the Age of On-line Media: The Forensics for Establishing a Comprehensive Right to Cyber-Oblivion	274–279
TaggingCreaditor: A tool to create and share content for location-based games for learning	280–284

# 2014 International Conference on Interactive Mobile Communication Technologies and Learning (IMCL)

## Table of Contents

Title	Page range
Understanding Young Cypriots Smartphone Apps Utilization: Extend and Frequency	285–289
On establishing contact with cultural objects: The role of a location based game in supporting visitors to engage with contemporary art	290–295
Plagiarism in Higher Education: The Academics' Perceptions	296–300
Using mobile applications in continuing medical education	301–304
WHAAM: A mobile application for ubiquitous monitoring of ADHD behaviors	305–309
Human Computer Interaction using Gestures for Mobile Devices and Serious Games: A Review	310–314
The Use of Smartphones among students in relation to their Education and Social Life	315–319
Designing Learning Experiences that Tap into What Students Value: An Ubiquitous, Cloud-based, Student-Centered Learning environment	320–325
Exploring Secondary Education Teachers' views on Plagiarism and Cheating	326–330
Peer-based Webinars to Scaffold Inquiry Based Narratives: The Inspiring Science Education Approach	331–337
Online Teaching – A Comparison of On-Ground, Online, & Facebook-linked Teaching	338–341
Computer Games and Ethical Issues	342–343
A quiz-based game for addressing growing population issues: Linking learning mechanics to THE GROWTH serious game	344–349
Ethical issues concerning Self Regulated Learning and Nearest Neighbor Learning	350–352
Enhancing citizens' environmental awareness through the use of a mobile and pervasive urban computing system supporting smart transportation	353–358
Supporting School ICT Uptake: The ASK School ICT Competence Management System	359–363
Identification of plagiarism by Greek higher education students. Do I cheat?	364–367
Investigating Smartphone and Smartphone-Apps Utilization: A survey among Cypriot University Students	368–372
Remote laboratory via Interactive Mobile Technology	373–375
