

2014 International Conference on Interactive Collaborative Learning

(ICL 2014)

**Dubai, United Arab Emirates
3-6 December 2014**

**IEEE Catalog Number: CFP1423R-POD
ISBN: 978-1-4799-4436-1**

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Developing Entrepreneurs the Future Needs Through Systematic Application of Problem-Based Learning	1–6
Analysis of the Program for Continuing Education of Technical Teachers on the Basis of Graduates' Feedback Results	7–12
Utilization of Cloud Technologies in E-learning System During Campus-wide Failure Situation	13–16
Work-in-Progress: Institutional Policies on Teacher Training and Engineering Teachers Training	17–20
Factors Affecting Educational and Occupational Trajectories of Women in Engineering in Five Comparative National Settings: Jordan, Malaysia, Saudi Arabia,	21–28
A Direct Method for Teaching and Measuring Engineering Professional Skills for Global Workplace Competency: Adaptations in Progress at Two Universities in Learning by Research and Development	29–36
Findings about Students with Great Discrepancy at a Web-based English Remedial Program	37–46
Reviewing Engineering Curricula to Meet Industrial and Societal Needs	47–54
A contribution to the method of automatic identification of human emotions by using semantic structures	55–59
Ways of qualitative Bachelors' training in the field of technical education	60–70
The Dynamics of Impediments to the Flourishing of Engineering as a Career for Women	77–82
Training of University-Enterprise Cooperative Software Engineering Students: Teaching and Practice	83–86
Externally Funded Research, Development and Innovation Projects as Learning Environments. Case: The MOBI project	87–92
Global Virtual Teams: Pedagogical Innovation in MBA Education	93–102
The Characteristic Dilemmas of Managing Engineering Education	103–110
The Engineering Pavilion – an academic-industry partnership developing engineers for the global community	106–111
Managing Interaction Skills in the Engineering Pedagogy Programme	112–116
PDM supported Engineering Design Education	117–120
Introduction of OER at the Medical University of Graz	121–126
Moodle as an Innovative Alternative To Support The Teaching-Learning Process In School	127–130
Why girls with an interest in IT in high-school do not choose IT career	131–137
Relationships between behaviors by applicants and interviewer in interview	138–143
Optional STEM Courses for Secondary Schools Designed and Implemented for Enhancement of K-12 Technology Education in Order to Excite Students'	144–150
Development of Curriculum Structure for Basic Courses in Engineering Mathematics	151–155
Challenges in Global e-learning: What does the literature tell us	156–160
The Problem of International Unification of Systems of Study Programmes' Quality Assurance	161–165

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Educational Cooperation across Countries by Shared Course Materials: More than 10 Years of Experience	166–174
Computer Aided Teaching of Elliptic Curve Cryptography	175–180
Expert vs. Novice: Problem Decomposition/Recomposition in Engineering Design	181–190
Multi-Environment Integrated Circuit design flow: A new approach towards efficient lab sessions for electrical engineering students	191–196
Institute-Industry Collaboration in Higher Engineering Educational Institutions	197–202
Development and application of intelligent tutoring system for training of engineers	203–208
The concept of the integrated management system of the organization and control of knowledge in training engineers	209–214
Study and application of user interface evaluation techniques: assessing an educational software and redesigning a better interface design	215–220
A Platform Based on a LMS/ WfMS for Support the Assessment of Collaborative Activities in E-learning	220–229
Educational Proposals for Technological Careers in Developing Countries	230–236
Soft Skills in Engineering Education: A practical experience in an undergraduate course	237–242
Playing with Maths: GeoGebra Application for Meaningful Education	243–248
Evaluation of online assignments and quizzes using Bayesian Networks- Case of PC2i	249–254
Diversification of educational paradigm in professional pedagogy	253–256
Social Learning Environments	257–262
InterUniversity Study Project: Unsuccessful Students' Feedback	261–265
Students and Staff Perspectives on Academic-Industry Partnerships in Engineering	266–271
Female characteristics and requirements in software engineering in mechanical engineering	272–279
Investigation of Project based learning Environment in Engineering Education	280–285
Collaborative Knowledge Transfer via Wiki	283–288
Do Women Pursue Programs in Engineering? A Case Study from the United Arab Emirates	289–292
Education in IT as a Means of Implementing the Strategy for the Development of the Russian IT Industry up to 2025	293–298
Internationalizing Engineering Education: a Language Learning Approach	299–302
Training of Russian technical college students for international education activities	303–306
Pedagogical Facilitation of Students' Personal Development in the Course of Engineering Pedagogy	307–310
Applying the Top-down Approach to Beginners in Programming Language Education	311–318
Value system and realisation of personal potential of female engineering students in Russia. The case of the Kazan National Research Technological University	319–323

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Integrating Social Web and e-Learning to Enhance Cooperation in the Building Sector	324–329
Beyond the Engineer of 2020	330–335
Implementation of Practical Exercises in Software Engineering Education to Improve the Acquirement of Functional and Non-Functional Competences	338–345
Quality assurance of Engineering Education worldwide. The QUEECA TEMPUS Project for Central Asia	346–351
Variant of Realization of Bachelor's Degree Program at the University of Chemical Technologies	352–354
Teacher's learning analytics tools in social media enhanced learning environment	355–360
Content analysis and visualizations, Tools for social enhanced learning environment	361–367
Learning support of students with eLearning materials	368–373
Teaching Wireless Communication using Modern Tools	374–380
Research collaboration and knowledge transfer between university and industry	381–386
Active initiatives to attract more women to engineering: a case study	387–390
Continuing Education: Benchmarking Collaborative Process in Civil Construction Engineering	391–396
Using Web 2.0-Based Groupware to facilitate Collaborative Design in Engineering Education Scheme Projects	397–402
Gaining hands-on experience via collaborative learning: interactive Computer Science courses	403–409
The value-added in engineer programs in Colombia	410–412
A Comparative Study on Different Pedagogy Strategies in Engineering Interdisciplinary	413–419
Presidential Program for the Training of Engineers. Experience of a Research University	420–423
Contribution of Shell Eco-Marathon Engineering Design Experience to Soft Skills Development: A Qualitative Analysis in the Asian Context	424–431
Engineering Education in the 21st Century	432–435
Model of Implementation of Joint International Continuing Professional Development (CPD) Module for Industrial Enterprise Specialists	436–438
Using sensors and data-loggers in an integrated mobile school-lab setting to teach Light and Optics	439–445
Using Handheld Mobile System for Teaching Illiterates	446–449
LAYING THE FOUNDATION WITH INNOVATIONS IN ENGINEERING EDUCATION	450–458
Improvement of Learning Outcome and its Measurement Using Social Learning Intelligence	459–463
Teachers' attitudes towards the use of Web 2.0 tools in educational practice - A critical approach	464–472
Suitably adapted LMS used to teach Science to Primary School students using blended learning	473–478
Pedagogical Training of University Lecturers – the Attribute of Quality Assurance of University	479–480

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Must we be concerned with the Massive Drop-outs in MOOC? - An Attrition Analysis of Open Courses	493-498
Creative game design in engineering and computer science education	499-506
Creating new technical universities in emerging countries	507-510
Context-centered model for the implementation of social integration and regionalization as axes of the Minerva Academic Model of the BUAP	511-516
An Innovative Digital Tool for Materials Related Engineering Education	517-524
Online Peer evaluation supported by an expert system	525-528
A novel Educational Platform, based on the Raspberry-Pi	529-534
NEW STEGANOGRAPHY SCHEME USING GRAPHS PRODUCT	535-540
A Pictorial Mobile-based Communication Application for Non-Verbal People with Autism	541-544
Algorithmic Thinking Observation: How Students of Applied Informatics Break the Mystery of Black Box Applications	541-544
Project Based Learning: Real World Experiential Projects Creating the 21 Century Engineer	541-544
The impact of Web 2.0 Edmodo tool in Junior High School classes: A comparative study	553-560
Research Laboratories and Training Undergraduate Students from the Freshman Level to Produce International Conference-level Publications	553-560
THE USE OF FIELD TRIPS IN THE CONTEXT OF ENGINEERING COLLABORATIVE TEACHING	565-570
Technology in Learning and Teaching: Getting the Right Blend for First Year Engineering	565-570
A Boundary Spanner Intervention for Increasing Community Engagement – Framing Steps Forward	571-578
Project-based teaching of Geomatics: experiences from Colombia	571-578
An AGEP Program Analysis: Minority Graduate Student Diversity in STEM Disciplines at Three Universities	583-590
On Quantified Performance Analysis of Highly Specialized Neurons' in Order to Develop Reading Brain Function Using Neural Networks Modeling	601-604
On the Role of Public Policy in Engineering Education: Russian Tendencies	601-604
Mobile Learning Applications for Technical Vocational and Engineering Education	605-608
Integrating General Education Outcomes into a Senior Design Capstone Experience	609-615
Network Cooperation in the Training of Engineering Elite for Regional Economies	616-618
Students' Data Privacy: How Far it is Protected? Ethical Perspective	619-622
Program Educational Objectives: A Graphical Representation	623-626
Learning Alone or in a Group - an Empirical Case Study of the Collaborative Learning Patterns and Their Impact on Student Grades	627-632
Affordances of CSCL Platforms: A Systematic Review	633-651

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
THE POSITION OF THE REMOTE EXPERIMENT IN THE EXPERIENTIAL LEARNING AND S.E.C.I.	652–655
Decentralised authentication method for accessing pedagogical resources in a cloud computing based virtual organization	656–662
Big Learning Data Support For Engineering Career Readiness	663–668
A Case Study of the Effects of a Resident Scientist on Teaching Experimental Design to High School Chemistry Students	669–673
Determinants of Education at Technical Higher Education Institutions	674–680
Using flexible e-learning in the European retail	681–684
TEMPUS iCo-op, New trends in LabVIEW – MOODLE integration	685–688
Improving Motivation and Learning Outcome in a Flipped Classroom Environment	689–690
Samples of Externally Funded Research and Development Projects in Higher Education: Case Integration Readiness Levels	691–700
Utilization of the Integration Readiness Level in the Context of Industrial System Projects	701–710
Opportunities and Challenges for Collaboration Industry-Academia Via Sponsored Design Competitions	711–714
Pre-College Activities to Promote Positive Perception of Engineering and Engineering Technology Careers	715–719
Diversification in Engineering Education through 'Indian Student Forum': An Experimentation Project in India	720–725
Utilization of the Integration Readiness Level in Operative Systems	726–735
IGIP History: A Glance from the 21st Century	736–743
Cross-institutional engineering projects between secondary technical colleges, universities and economy	744–744
On Learning Objectives and Learning Activities to Foster Creativity in the Engineering Lab	745–750
Finding Adequate Assessment Types as Function of Learning Outcomes	751–756
THE ESSENCE OF EFFECTIVE PRESENTATION SKILLS IN ENGINEERING EDUCATION	757–766
A tool for assessing ethical awareness and reasoning development of engineering students	767–770
Global Innovation Network for Entrepreneurship and Technology (GINET)	771–778
Increasing Importance of Industry-Institute Interaction in Engineering Education in India	779–784
PETOE : Establishing A New Joint Talent Training Mechanism For Universities And Industrial Enterprises	785–790
Creating Bridges between Education, Research and Practice	791–796
Demonstrative Deliverables Of Enhanced Holistic Learning Through A Blend Of Variety In Pedagogical Methods	797–801
Self-Regulated Learning Strategies between the Performing and Non-Performing Students in Statics	802–805
Engineering Teaching and Learning: A Contemporary Globalization Style	806–811

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Factors Related to the Early Career Settlement of Male and Female Engineering Graduates in Korea	812–817
Evaluating Adaptive Learning Model	818–822
Academius: a Web tool for building collaborative pedagogical patterns applied to engineering education	823–829
A Comparative Study of Engineering Education Practices between Beijing Institute of Technology and Marquette University	830–835
Stepping into a new Learning Environment: from Virtual to Personal. Power Electronics case study	836–840
Project based learning – Theoretical Foundation of Computation course	841–844
A Virtual Community of Practice to Support Faculty Efforts to Adopt Research-based Instructional Approaches	845–848
Higher Education Internationalization: The Erasmus-Mundus Network added value	849–854
Cooperative Education Development: Towards ICT Reference Models	855–861
Integration of KNRTU into the World Community as an Example of Cooperation with France	862–863
A User Modeling System for Adaptive Learning	864–866
A Multinational Research Project as a Platform for Multi-Discipline Learning Environment. Three cases as a part of the MACICO project	867–876
Learning within research, development and innovation projects. Case: MACICO project	877–883
Let's work with AR in DC circuits	884–885
Database Design of Information System for Students' Project Activity Management	886–890
Emergency management module UArctic network online course	891–896
Work-in-Progress: Engineering and Project-Based learning as the focus of technology education in Colombian high schools	897–900
Making the Case for Alternative Assessment: A Writing-Based Rubric for Self-Reflection and Improved Learning	901–907
Designing game methods of educational systems for maritime specialists advanced training	908–915
PEDAGOGICAL INTEGRATION AS A MEANS OF FORMING PROFESSIONAL COMPETENCE OF THE INTENDING ENGINEER	916–918
Elite Engineering Education Programme Development Based On CDIO Standarts	919–923
The globally competent engineer - What different stakeholders say about educating engineers for a globalized world	924–930
Hungarian Online University	931–932
Computer-Aided Translation Course for Engineering Students	933–933
The Impact of Globalization on Changing Roles of University Professors	934–935
Modelling Competences - Developing a holistic competence model for engineering education	936–944
Emerging Technologies for Personnel Training for IT Industry in Ukraine	945–949

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Social Presence in Collaborative Learning: Analysis of Interactions in Knowledge Building Community	950–955
Mobile Devices in the Classroom: Emirati Students' Perceptions of Usage and Policies	956–962
A Study on Satisfaction of New Employee Training Program In Regional Campus Network Applying CIPP Evaluation Model Focusing on A Corporation	963–966
Work-in-Progress: Pedagogical development in engineering A collaborative project between Saudi Arabia and Sweden	967–968
AccAB – Processes and Roles for Accreditation of Computing Degrees at Al Baha University in Saudi Arabia	969–970
Virtual Reality: A Useful Tool in Electrical Engineering Education	971–972
Development of a Tele-Operative Testing Cell as a Remote Lab for Material Characterization	977–982
Inclusion of Young Universities into the Global Academic Community. Example of Innopolis University, Russia	983–985
The impact of the 1st Argentinean Engineering Students Forum in the training of Engineering Students and its influence on Education	986–990
Integrated Role-Play Training System for Project Mngement Education On-Line Group Work Training Environment in cooperaetion with an Agent System	991–992
Demonstration of Online Experimentation using Wireless Sensor and Actuator Networks	993–994
On the use of a 3D printer in mechatronics projects	995–999
Pedagogical Tools for Teaching Modern Physics to Engineering Students in a Developing Country	1000–1002
From Traditional to Blended Learning A Signals and Systems Course – First Results	1003–1011
Online Materials' Testing Tutorial - Contribution for Knowledge Integration	1012–1013
MEDIA USAGE SURVEY: OVERALL COMPARISON OF FACULTY AND STUDENTS	1014–1015
Exponentially Disruptive Innovation Driven By Service Science and the Internet of Things as a Grand Challenge Enabler in Education	1021–1025
Creativity Development as Indisputable Component of Long-life Education	1026–1032
An Analysis of Flipped Classroom Model in a Calculus III	1033–1034
Engineering Programs for Engineers-A global Higher Education Perspective	1035–1036
Work-in-Progress: Collaborative Platform for Systems Engineering	1043–1048
Labicom.net - the on-line laboratories platform demonstration 2014	1049–1050
Online Learning, Web Mining and Quality Assurance	1051–1057
Innovation and Entrepreneurship Courses for Engineering Students in the MENA Region for Enhancement of Sustainability Literacy	1058–1061
An Experience in the Use of the Jigsaw Technique to Teach Object-Oriented Design	1062–1067
Educational Programs for Freshmen Based on Forefront Scientific Researches on the Environmental Purification Project with Intense Magnetic Fields	1068–1072
Bridging the Gap between Teaching and Practicing Engineering: How far our Graduates are from Professionalism?	1073–1074

2014 International Conference on Interactive Collaborative Learning (ICL)

IEEE catalog: CFP1423R-ART ISBN: 978-1-4799-4437-8

Table of Contents

Title	Page range
Online Engineering Courses: Benchmarking Quality	1079–1086
Investigating the extent to which non-technological aspects of knowledge management are integrated into a financial service knowledge management system	1087–1094
Virtual and Remote Laboratory Implementation in Engineering Education and Research: Sharing, Use and Evaluation of Online Experiment Resources	1095–1099
.....	1100–1105
