

2014 International Conference on High Voltage Engineering and Application

(ICHVE 2014)

**Poznan, Poland
8-11 September 2014**

**IEEE Catalog Number: CFP1413F-POD
ISBN: 978-1-4799-6614-1**

TABELE OF CONTENT

Plenary Session A-0	Power-grid challenges	Paper
The high voltage bushing on-line monitoring in substation systems	1	A-02
M. Andrzejewski, W. Gil, P. Wronek		
Correlation of electrical and mechanical properties in accelerated aging of LV nuclear power plant cables	5	A-03
L. Verardi, D. Fabiani, G. C. Montanari		
Session A-1	Equipment for transmission lines	
Simulations of an improved operating mechanism for high voltage SF₆ GIS circuit breaker	9	A-1-1
M. Muratowic, M. Kapetanowic, S. Delic, S. Staszak, Z. Janiak,		
Analyses of vacuum circuit breaker switching transients in medium voltage networks with respect to LC filters of solar converters	13	A-1-2
T. Kuczek, M. Florkowski, W. Piasecki		
Fixed particles in coaxial SF₆ arrangements at various voltage stresses	17	A-1-4
P. Arnold, S. Tenbohlen, W. Köhler, U. Riechert, U. Straumann		
The research and design of parameters for 750 kV transmission line metal-oxide surge arresters with series gap	21	A-1-5
Jing Wang, Sen Wang, Jie Guo, Hao Cui, Feng Gao, Panfeng Hu		
Study on the electrical properties and defect structures of a high voltage gradient ZnO varistor	25	A-1-6
Xuetong Zhao, Ruijin Liao, Kanglin Liu, Feipeng Wang, Jianying Li		
Evaluation of surge arrester models for overvoltage studies	29	A-1-7
G. V. N. Bezerra, L. A. M. M. Nobrega, J. F. Silva Júnior, G. R. S. Lira, V. S. Brito, E. G. Costa, M. J. A. Maia		
Session B-1	Measurement techniques	
Accuracy of surface potential measurements of HVDC spacers	33	B-1-1
M. Schueller, R. Gremaud, C. M. Franck		
Electric field measurement under AC/DC hybrid transmission lines using an integrated optical sensor	37	B-1-3
Junjie Yu, Rong Zeng, Ben Niu, Chanxiao Li		
Designing a measurement arrangement in order to determine the ohmic coupling between adjacent conductors on an actual overhead line-section	41	B-1-6
J. Wulff, T. Vogt, F. Jenau		
Session A-2	Ageing	
Experience with accelerated aging and related diagnostic tests for stator coils and bars of rotating machines	45	A-2-1
W. McDermid		
Statistical analysis of non-homogeneous life-data of 50 kV tap changers for residual life assessment purposes	50	A-2-2
L. A. Chmura, P. H. F. Morshuis, J. J. Smit, A. L. J. Janssen		
Electrical aging characteristics of 15 kV EPR cable under the multi-stress conditions	54	A-2-3
L. Cao, S. Grzybowski		
Conductivity measurements and space charge inference in polymeric-insulated HVDC model cables	58	A-2-4
J. Y. Steven, T. T. N. Vu, G. Teyssedre, N. I. Sinisuka		
Effect of thermal aging on space charge characteristics of cross-linking polyethylene	62	A-2-5
Chenmeng Xiang, Quan Zhou, Wendou An, Nengcheng Wu		

Ageing of thermally and electrically stressed mineral oil impregnated presspaper insulation systems 66	A-2-6
T. Muth, F.Jenau, H. P. Gasser	
Space charge characteristics of oil gap and pressboard mixed insulation based on the pulsed electro-acoustic measurement 70	A-2-7
Jian Hao, Jin Fu, Chao Tang, Gaolin Wu, Qian Wang, Qiang Yao	

Session B-2 Outdoor insulation

AC flashover voltage and assessment of surface degradations of various polymeric materials in clean and salt fogs 74	B-2-1
M.A. Douar, A. Beroual, X. Souche	
The motion of water droplets on insulators with superhydrophobic coating and its influences on icing 78	B-2-3
Jianlin Hu, Binhuan Lan, Yao Wu, Xingliang Jiang, Zhijin Zhang, Qin Hu, Ke Xu	
Contribution of gas neutralization to the potential decay on silicon rubber surfaces at different ambient pressures 82	B-2-4
Shahid Alam, Yuriy V. Serdyuk, Stanislaw M. Gubanski	
AC-voltage performance of field aged glass insulator strings 86	B-2-5
P. Hyvönen, J. V. Klüss, P. Taklaja	
Development of new methodology for insulators inspections on aerial distribution lines based on partial discharge detection tools 90	B-2-6
R. Salustiano, R. M. Capelini, S. R. De Abreu, M. L. B. Martinez, I. C. Tavares, G. M. F. Ferraz, M. A. A. Romano	
Flashover behaviour of insulators with inhomogeneous temperature distribution in gas insulated systems under DC voltage stress 94	B-2-7
M. Hering, R. Gremaud, J. Speck, S. Grossmann, U. Riechert	

Session A-3 Modeling and design

Numerical modeling of the electric field in a 24 kV switchgear 98	A-3-1
W. Krajewski, H. Sibilski, R. Wojciechowski	
Electrical discharge modeling with vertical rod protection: randomness discharge effect 102	A-3-2
D. Khelil, S. Bouazabia, MM. Munzunzi, Z. Omari	
Matlab Gui based data acquisition and processing of lightning impulse voltages 106	A-3-3
Emrah Dokur, Aydogan Ozdemir, Suat Ilhan	
Transient rating of buried cables: a comparative study 110	A-3-4
B.J Le Roux, J. J. Walker	
Computer aided design of the substation grounding system 114	A-3-5
Mario Kokoruš, Adnan Mujezinović	
Thermal behavior analysis of ZnO polymeric surge arrester using the finite elements method 118	A-3-6
Edson G. Costa, Rafael M. R. Barros, Helem M. M. Alves, Marcelo A. Bastos	
Implementation and analysis of multi-factor aging tests on the winding insulation of original sized generator stator bars used in large rotating machines 122	A-3-7
C.Folting, F.Jenau	

Session B-3 Design of transformers

Transformer oil specifications and important properties for optimal in-service life 126	B-3-1
Johan Weesmaa, Per Wiklund, Bruce Pahlavanpour, Linnea Bergeld, Jayme Nunes	
Partial discharge localization on dry-type transformers 130	B-3-2
Janusz Szczechowski, Krzysztof Siodla	
Electric field distribution to analyze possible manufacturing defects of a preventive autotransformer 133	B-3-3
Salvador Magdaleno-Adame, Juan C. Olivares-Galvan, Issouf Fofana	

Propagation of high frequency overvoltages in transformers 137	B-3-4
M. Florkowski, P. Klys, J. Furgal, M. Kuniewski	
Methods of shielding primary windings on high voltage instrument transformers 141	B-3-5
David Wallace, Stanislaw Grzybowski	
Phase shifting transformers, specific issues with regard to design and testing 145	B-3-6
Günter Linortner	
Possibilities to protect pole-mounted distribution transformers by means of externally gapped MO arresters 149	B-3-7
K. K. Lahti, D. A. Da Silva	

Session A-4 Ageing and breakdown of insulation systems

Comparison analysis to thermal aging properties of vegetable and mineral insulating oils 153	A-4-1
Shuhan Yao, Jian Li, Lily Li, Ruijin Liao, Jinhui Zhou	
Characteristics of acid value in vegetable insulating oil during thermal aging 157	A-4-2
Zhengjiang Wang, Jian Li, Lijun Yang, Ruijin Liao	
Charge decay on enamel wire surface 161	A-4-3
A. T. Hoang, Y. V. Serdyuk, S. M. Gubanski	
Electrical breakdown properties of low density polyethylene under DC voltage 165	A-4-4
Jing Zhang, Jian Li, Yan Wang, Lianwei Bao, Xiaomeng Zhang	
The compatibility tests between vegetable insulating oil and mineral insulating oil 169	A-4-5
Qingdan Huang, Baimei Wang, Jian Li, Lijun Yang, Ruijin Liao	
Localization and diagnosis of stay rod of V guyed towers corrosion 173	A-4-6
José M. B. Bezerra, Luiz H. A. de Medeiros, Ronaldo R. B. Aquino, Otoni N. Neto, Lauro R. G. S. L. Novo, Marcos T. de Melo, Daniel S. dos Santos, Marcio A.B. Fontan, Paulo R.R. Britto	

Session B-4 Characterization of transformer insulation

Effect of acidic substances on thermal life of vegetable oil-paper insulation 178	B-4-1
Nuodong Li, Jian Li, Lijun Yang, Ruijin Liao	
Measurements and simulations of switching events on a three phase three winding transformer 182	B-4-3
J. Plesch, S. Pack, G. Achleitner	
Studying the electrostatic charging tendency of some environmentally friendly fluids in a spinning disk system 186	B-4-4
J. S. N'cho, I. Fofana, A. Beroual	
Modified Epstein frame for measuring electrical steel under transformer like conditions 190	B-4-7
C. Freitag, C. Joost, T. Leibfried	

Session A-5 Characterization of insulation using partial discharges

Influence of high voltage harmonics on partial discharge patterns modulation 194	A-5-1
M. Florkowski, B. Florkowska, P. Zydron	
Advanced techniques for on-line PD measurements in high voltage systems 198	A-5-2
F. Álvarez, J. Ortego, F. Garnacho, M.A. Sánchez-Urán	
Ultra-high-frequency partial discharge detection with scanning and comparing method 202	A-5-3
Jinping Yan, Lin Du, Jian Li, Youyuan Wang	
Simulation of partial discharge in closely coupled cavities embedded in solid dielectrics by finite element method 206	A-5-4
V. Sarfi, V. Hemmati	
Partial discharge pattern characterization of different defects using 3D phase resolved technique 210	A-5-5
I.K. Kyere, J.J. Walker	
The effect of DC superimposed AC voltage on partial discharges in dielectric bounded cavities 214	A-5-6
P.K. Olsen, F. Mauseth, E. Ildstad	
Mathematical model of high voltage sandwich bus duct 218	A-5-7
Vishal Ramnani, Mrunal Parekh, Vihang Dholakiya, Gaurang Buch	

Session B-5 Breakdown mechanisms

- Evidence of the interphase in epoxy nanocomposites 222** B-5-1
J. Seiler, J. Kindersberger
- Experimental investigations on surface discharge characteristics over oil/pressboard interface based on a rod-to-plane electrode 226** B-5-3
Jiyu Wang, Ruijin Liao, Ke Wang, Lei Yuan, Lijun Yan
- Recurrent plot for leakage current investigation and performance monitoring of HV insulator model under discontinuous pollution 230** B-5-5
A.K. Chaou, A. Mekhaldi, M. Tegar
- AC breakdown voltage of liquid nitrogen depending on gas bubbles and pressure 234** B-5-6
S. Fink, H.-R. Kim, R. Mueller, M. Noe, V. Zweeker
- Partial discharge experiences in HV grids applying wideband measurements 238** B-5-7
F. Álvarez, J. Ortego, F. Garnacho, M.A. Sánchez-Urán, D. Prieto

Session A-6 Diagnostic testing

- Polarization behaviour of multi-layer insulation systems in cable accessories when subjected to voltages at different frequencies 243** A-6-1
T. Joubert, J.J. Walker
- On-site testing and diagnosis of distribution and transmission power cables using damped AC voltages 247** A-6-2
E.Gulski, A.Rakowska, K.Siodla, R.Jongen, J.Parciak
- Reliability functions used for maintenance procedures 251** A-6-3
Romuald Wlodek
- Practical E-field sensors for EMP testing 255** A-6-4
J. V. Klüss, P. Hyvönen
- Dry-band and discharge activity characterization using visual and IR data analysis 259** A-6-6
M. Albano, A. Haddad, H. Griffiths, R.T. Waters, Y.A. Hicks, R.Sarathi

Session B-6 Properties of dielectric materials

- A priori metrics to select best training dataset of top-oil temperature models of power transformers 263** B-6-1
M. Djamali, S. Tenbohlen
- Repression properties of lightning impulse discharge in short composite gap consisting of air and concrete material invaded by salt water at high air pressures 267** B-6-2
D. Okano
- Effect of water absorption on the dielectric properties of neat and nanosilica filled impregnating resins 271** B-6-4
J. Niedernhuber, J. Kindersberger
- Electrical driven rolling behavior of water droplet on a super hydrophobic surface 275** B-6-5
Yuan Wei, Jian Li, Zhengyong Huang, Xinzhu Yan
- Performances of hydrophobic cycloaliphatic epoxies exposed to acidic fog under DC stress 279** B-6-6
Hongjie Sun, Yibo Zhang, Hoan D. Le, Fumei Wu, Jiansheng Chen, Jens Rocks
- Visualisation of electric discharge in porous materials 283** B-6-7
A.E. Elzowawi, A. Haddad, H. Griffiths

SESSION A-7 Transient overvoltages

- Modeling of surge currents in lightning protection system using ATP-EMTP 287** A-7-1
R. Ziemba, G. Maslowski, K. Baran
- Analysis of online capacitor switching transient voltages on experimental MV cables 291** A-7-2
B. Pushpanathan, S. Grzybowski

Experimental investigation of lightning initiated flashover faults in MV lines	295	A-7-3
Farhan Mahmood, Matti Lehtonen		
A method for the interpretation of soil structure in the vicinity of grounding system	299	A-7-4
Wenxia Sima, Peng Wu, Tao Yuan, Qing Yang, Bin Zhu, Linfeng Ai		
Wavelet neural network for ground resistance estimation	303	A-7-5
Vasilios P. Androvitsaneas, Ioannis F. Gonos, Ioannis A. Stathopoulos, Antonios K. Alexandridis, George Dounias		
Factors influencing the switching impulse testing in laboratory conditions	308	A-7-6
J. Lachman, P. Jányš, J. Bolech, M. Novotný		
Optimizing the properties of the optical current transformer with special reference to faster transient response	312	A-7-7
N.J. Oosthuysen, J.J. Walker		

Session B-7 Oil/paper insulation

Nonlinear dielectric behavior of insulating oil under HVDC stress as a result of ion drift	316	B-7-1
K. Backhaus, S. Speck, M. Hering, S. Grossmann, R. Fritsche		
Characteristic information extraction and developing process recognizing method of surface discharge in oil immersed paper insulation	320	B-7-2
Lu Cui, Weigen Chen, Bo Xie, Jie Du, Zhenze Long, Yongsen Li		
Influences of temperature on partial discharge behaviors in oil-paper bounded gas cavity under pulsating DC voltage	324	B-7-3
Lianwei Bao, Jian Li, Lin Du, Youyuan Wang, Dali Huang		
Effect of temperature change mode on condition assessment of oil-paper insulation using frequency domain spectroscopy	328	B-7-4
Jun Gao, Youyuan Wang, Ruijin Liao, Chaoliang Qi, Jiefeng Liu		
Thermal aging results between oil-paper insulation impregnated by mineral and vegetable insulating oil	332	B-7-5
Baimei Wang, Jian Li		
Dielectric properties of vegetable oil modified by monodisperse Fe₃O₄ nanoparticles	336	B-7-6
Bin Du, Jian Li, Lijun Yang, Wei Yao, Shuhan Yao		
A DC cable failure model by using two parameters Weibull distribution	340	B-7-7
Wang Can, Youyuan Wang, Lianwei Bao, Jun Gao		

Poster Session P-1

Research and implement of map effect of remote transformer monitor system	344	P-1-2
Qin Zhou, Zhengcai Fu, Xiaoming Ren		
Gas sensing properties of ZnO-SnO₂ nanostructures towards CO in transformer oil	348	P-1-3
Q. Z. Li, W. G. Chen, T. Y. Gao, H. L. Gan		
Accuracy of inductive voltage transformer in the presence of voltage high harmonics	352	P-1-4
M. Kaczmarek, S. Jama		
Application of the noise protection transformer in the measuring system for laboratory studies of the electrical discharge development in liquid dielectrics	356	P-1-5
M. Kaczmarek, P. Rozga, D. Brodecki		
Transformer diagnostics with combined measurement methods based on different physical phenomena	360	P-1-6
S. Banaszak, J. Subocz, E. Kornatowski		
Location of partial discharges sources using sensor arrays	364	P-1-7
F. Polak, W. Sikorski, K. Siodla		
The study of thermal properties of mineral oil and synthetic ester modified by nanoparticles TiO₂ and C₆₀	368	P-1-8
G. Dombek, Z. Nadolny, P. Przybyłek		
Dependence of creeping partial discharges activity in a synthetic esters-paper insulating system on the temperature	372	P-1-9
G. Malinowski, H. Moranda, K. Siodla		

Lifetime estimation of vegetable oil for transformers	375	P-1-10
A. Ciuriuc, P. V. Notingher, R. Setnescu, L. M. Dumitran, T. Setnescu		
Diagnosis of degradation effects of on-load tap changer in power transformers	379	P-1-11
Rogier Jongen, Edward Gulski, Krzysztof Siodla, Jaroslaw Parciak, Jur Erbrink		
Influences of moisture content on insulation properties of vegetable insulating oil	383	P-1-12
Guojun Lu, Qingdan Huang, Haoyong Song, Dezhi Zhang		
Impregnation model and experimental investigation of vegetable insulating oil-paper insulation	387	P-1-13
Guojun Lu, Qingdan Huang, Haoyong Song, Peiwei Wu		
Flashover of HVDC polluted insulators: a complementary criterion	391	P-1-14
Mohammed El Amine Slama, Abderrahmane Beroual, Hocine Hadi		
Power transformer fault diagnosis based on DGA combined with cloud model	395	P-1-15
Quan Zhou, Shizheng Wang, Wendou An, Chao Sun, Huili Xie, Jun-xing Rao		
The impact of corrosive sulfur concentration in transformer oil on the electrical properties of insulated windings	399	P-1-17
Jijia Huang, Lijun Yang, Jiquan Xu, Ende Hu, Ruijin Liao		
Detection of internal winding faults in power transformers based on graphical characteristics of voltage and current	403	P-1-18
Chenguo Yao, Zhongyong Zhao, Yu Chen, Xiaozhen Zhao, Chengxiang Li, Wei Li, Jian Wang		
A numerical method to calculate winding temperature distribution for oil immersed transformers	409	P-1-19
Xiaoping Su, Li Chen, Yu Liu, Chong Pan, Weigen Chen		
New challenges in aging modelling – pulse stress	411	P-1-20
P. Trnka, M. Svoboda, M. Sirucek		
Determination of criteria values for insulation systems based on natural esters	415	P-1-21
P. Trnka, M. Svoboda, M. Sirucek		
Possibility of using acoustic emission method for testing load tap changers during normal operation of the transformer	419	P-1-22
A. Cichon, P. Berger		
Summary of research on corrosive sulfur in oil-paper insulation system	423	P-1-23
Quan Zhou, Jun-xing Rao, Hui-li Xie, Shi-zheng Wang		
Ferrofluid effect in mineral oil: PDIV, streamer and breakdown voltage	427	P-1-24
W.Irwanto, C. G. Azcarraga, Suwarno, A. Cavallini, F. Negri		
Probability distributions of gases dissolved in oil of failed power transformers	431	P-1-25
T.Piotrowski		
Off-line partial discharge measurements as a new data source about the technical condition of MV cables	435	P-1-28
Slawomir Noske, Aleksandra Rakowska		
Cable elbow connector calibration for switching transients voltage measurements	439	P-1-29
B. Pushpanathan, S. Grzybowski		
The sensitive characteristics study of SF₆ decomposed gases using a graphene sensor	443	P-1-34
Lei Yu, Xiaoxing Zhang, Ju Tang		
Single end travelling wave fault location on transmission systems using wavelet analysis	447	P-1-35
Ozkan Altay, Ekrem GURSOY, Ozcan Kalenderli,		

Poster Session P-2

Effect of test voltage frequency on PD inception in service aged cable joints	451	P-2-1
F. Mauseth, H. Tollefsen, S. Hvidsten		
Influence of lightning impulse voltages on power output characteristics of photovoltaic modules	455	P-2-2
Taosha Jiang, Stanislaw Grzybowski		
Classification of leakage current waveforms using wavelet packet transform on high voltage insulator	459	P-2-3
A.K. Chaou, A. Mekhaldi, B. Moula, M. Teguair		
Preparation of steel fiber/graphite conductive concrete for grounding in substation	463	P-2-4
De Zhang, Huan Le, Xinzhu Yan, Tao Yuan, Jian Li		

Super-fast algorithms for solving fields around grounding electrode using Markov Chains-Monte-Carlo method 467	P-2-6
M. Kokoruš, R. Gačanović, K. Sokolija, M. Batalović, H. Zildžo	
Research on arrangement of ultra high frequency sensors based on GIS partial discharge 471	P-2-7
Ye Xia, Yanpeng Gong, Tao Hu, Liyuan Wu, Shusheng Zheng, Shan Huang, Yangchun Cheng	
Parameter identification techniques applied to dynamic MOSA models 475	P-2-8
T. S. Xavier, G. R. S. Lira, E. G. Costa, M. J. A. Maia	
Propagation of electrical discharges in small electrode gap of natural and synthetic ester under negative lightning impulse 479	P-2-9
P. Rozga	
Measurements of current in bus bar using fiber optic sensors 483	P-2-10
T. Błażejczyk, H. Sibilski, K. Krasuski	
Investigation of the magnetic field distribution in vacuum chamber contacts 487	P-2-11
K. Krasuski, H. Sibilski, T. Błażejczyk	
Design principles and performance analysis of a wimshurst generator 492	P-2-13
M. Bekir Ege, Aytug Font, Suna Bolat, Ozcan Kalenderli	
Analysing and denoising of impulse voltage waveforms using multi-resolution wavelet analysis (MRA) 497	P-2-14
Aytug Font, A. Kubilay Atalay, Ozcan Kalenderli	
Parameter variations for enhanced over-voltage triggering of a switching spark gap 501	P-2-15
M. Sack, G. Mueller	
Analysis of acoustic emission signals accompanying the process of electrical treeing of epoxy resins 505	P-2-16
Arkadiusz Dobrzycki, Stanisław Mikulski, Władysław Opydo	
Design and control philosophy of a 19 kV, 500 Hz accelerated cable ageing system 509	P-2-17
J.J. Walker	
Comparative study of AC breakdown voltage of various polymers: influence of electrodes shape, thermal and hydrothermal ageing 512	P-2-18
M.A. Douar, A. Beroual, X. Souche	
Simulation of PTC devices as fault current limiters in power systems by finite element method 516	P-2-19
V. Sarfi, V. Hemmati, M.M. Arabshahi	
Wind turbine anomaly detection using normal behavior models based on SCADA data 520	P-2-20
Peng Sun, Jian Li, Yonglong Yan, Xiao Lei, Xiaomeng Zhang	
Effect of graphene oxide-based nano-coatings on electrical ageing 524	P-2-21
F. Negri, A. Cavallini, D. Fabiani, A. Sacconi, M. Toselli	
A multi-layer power transformer life span evaluating decision model based on information fusion 529	P-2-22
Wei Chao, Lu Yun-Cai, Chen Bi-jun, Wang You-yuan	
Study on enhanced H₂ gas sensing characteristics of CuO-SnO₂ nanostructures 533	P-2-23
W.G. Chen, T.Y. Gao, Q.Z. Li, H.L. Gan	
Time delay of water contact with acrylic polyurethane super-hydrophobic surfaces 537	P-2-24
Zhengyong Huang, Huanhuan Xia, Maochang Li, Jian Li	
Design of grounding system for wind-photovoltaic-energy storage hybrid power station 541	P-2-25
Cheng Lin, Wang Sen, Li Zhizhong, Wang Jing, Zhang Bo, Shi Weidong	
Development of monitoring system for lightning current waveforms of transmission lines based on flexible Rogowski coil 545	P-2-27
Bo Niu, Lin Yao, Juan-Rong Li, Sen Wang, Jin Wang	
Reliability assessment of monitoring device for mechanical failure of high voltage circuit breaker based on FTA 549	P-2-28
Yanan Cai, Youyuan Wang, Weigen Chen, Jun Gao	
An assessment method for electrical life of vacuum circuit breaker based on cloud model 553	P-2-29
Chengbo Hu, Fengbo Tao, Jingtang Yang, Yun Liang, Youyuan Wang	
Optical fiber sensor system for monitoring leakage current of post insulators based on RBF neural network 557	P-2-30
Yan Mi, Shaoqin Rui, Shoulong Dong, Chenguo Yao, Chengxiang Li, Zhongyoung Zhao	
The influence of booster sheds on AC flashover performance of ice-covered 750 kV class tension insulator strings 561	P-2-31
Jianlin Hu, Ke Xu, Xingliang Jiang, Yao Wu, Zhijin Zhang, Lichun Shun, Binhuan Lan	

Numerical simulation model of grounding resistance reducing device in substation 566

P-2-32

Sen Wang, Zhi-Zhong Li, Jian Zhang, Bo Niu, Yi-Chang Li, Lin Cheng, Bo Zhang, Jin Wang

Measurement and calculation of power frequency electric fields generated by high voltage overhead power lines 570

P-2-33

I. N. Ztoupis, I. F. Gonos, I. A. Stathopoulos
