

2015 IEEE 22nd International Conference on Software Analysis, Evolution and Reengineering

(SANER 2015)

**Montreal, Quebec, Canada
2-6 March 2015**

**IEEE Catalog Number: CFP15102-POD
ISBN: 978-1-4799-8470-1**

Contents

Frontmatter

Message from the Chairs	iii
Committees	viii

Keynotes

On Whose Shoulders? (Keynote)	
Jane Cleland-Huang — <i>DePaul University, USA</i>	1
Checkpoint Alpha (Keynote)	
Boris Debić — <i>Google, USA</i>	2

Main Research

Information Retrieval

Modeling the Evolution of Development Topics using Dynamic Topic Models	
Jiajun Hu, Xiaobing Sun, David Lo, and Bin Li — <i>Yangzhou University, China; Nanjing University, China; Singapore Management University, Singapore</i>	3
Understanding Developers' Natural Language Queries with Interactive Clarification	
Shihai Jiang, Liwei Shen, Xin Peng, Zhaojin Lv, and Wenyun Zhao — <i>Fudan University, China</i>	13

APIs and Patterns

Mining Multi-level API Usage Patterns	
Mohamed Aymen Saied, Omar Benomar, Hani Abdeen, and Houari Sahraoui — <i>Université de Montréal, Canada</i>	23
An Observational Study on API Usage Constraints and Their Documentation	
Mohamed Aymen Saied, Houari Sahraoui, and Bruno Dufour — <i>Université de Montréal, Canada</i>	33
Improving Pattern Tracking with a Language-Aware Tree Differencing Algorithm	
Nicolas Palix, Jean-Rémy Falleri, and Julia Lawall — <i>University of Grenoble, France; LaBRI, France; University of Bordeaux, France; INRIA, France</i>	43
Measuring the Quality of Design Pattern Detection Results	
Shouzheng Yang, Ayesha Manzer, and Vassilios Tzerpos — <i>York University, Canada</i>	53

Analysis of Programming Languages

Are PHP Applications Ready for Hack?	
Laleh Eshkevari, Fabien Dos Santos, James R. Cordy, and Giuliano Antoniol — <i>Polytechnique Montréal, Canada; Polytech Montpellier, France; Queen's University, Canada</i>	63
Does JavaScript Software Embrace Classes?	
Leonardo Humberto Silva, Miguel Ramos, Marco Tulio Valente, Alexandre Bergel, and Nicolas Anquetil — <i>Federal Institute of Northern Minas Gerais, Brazil; Federal University of Minas Gerais, Brazil; University of Chile, Chile; INRIA, France</i>	73
Evolution Analysis for Accessibility Excessiveness in Java	
Kazuo Kobori, Makoto Matsushita, and Katsuro Inoue — <i>NTT DATA, Japan; Osaka University, Japan</i>	83

A Software Quality Model for RPG Gergely Ladányi, Zoltán Tóth, Rudolf Ferenc, and Tibor Keresztesi — <i>University of Szeged, Hungary; R&R Software, Hungary</i>	91
---	----

On Crashes and Traces

JCHARMING: A Bug Reproduction Approach using Crash Traces and Directed Model Checking Mathieu Nayrolles, Abdelwahab Hamou-Lhadj, Sofiene Tahar, and Alf Larsson — <i>Concordia University, Canada; Ericsson, Sweden</i>	101
Towards a Common Metamodel for Traces of High Performance Computing Systems to Enable Software Analysis Tasks Luay Alawneh, Abdelwahab Hamou-Lhadj, and Jameleddine Hassine — <i>Jordan University of Science and Technology, Jordan; Concordia University, Canada; KFUPM, Saudi Arabia</i>	111
Automated Extraction of Failure Reproduction Steps from User Interaction Traces Tobias Roehm, Stefan Nosovic, and Bernd Bruegge — <i>TU München, Germany</i>	121
Misery Loves Company: CrowdStacking Traces to Aid Problem Detection Tommaso Dal Sasso, Andrea Mocci, and Michele Lanza — <i>University of Lugano, Switzerland</i>	131

Code Reviews

Who Should Review My Code? A File Location-Based Code-Reviewer Recommendation Approach for Modern Code Review Patanamon Thongtanunam, Chakkrit Tantithamthavorn, Raula Gaikovina Kula, Norihiro Yoshida, Hajimu Iida, and Kenichi Matsumoto — <i>NAIST, Japan; Osaka University, Japan; Nagoya University, Japan</i>	141
Code Review: Veni, ViDI, Vici Yuriy Tymchuk, Andrea Mocci, and Michele Lanza — <i>University of Lugano, Switzerland</i>	151
Would Static Analysis Tools Help Developers with Code Reviews? Sebastiano Panichella, Venera Arnaoudova, Massimiliano Di Penta, and Giuliano Antoniol — <i>University of Zurich, Switzerland; Polytechnique Montréal, Canada; University of Sannio, Italy</i>	161
Do Code Review Practices Impact Design Quality? A Case Study of the Qt, VTK, and ITK Projects Rodrigo Morales, Shane McIntosh, and Foutse Khomh — <i>Polytechnique Montréal, Canada; Queen's University, Canada</i>	171

Searching and Cloning

Scaling up Evaluation of Code Search Tools through Developer Usage Metrics Kostadin Damevski, David C. Shepherd, and Lori Pollock — <i>Virginia State University, USA; ABB, USA; University of Delaware, USA</i>	181
Optimized Feature Selection towards Functional and Non-functional Requirements in Software Product Lines Xiaoli Lian and Li Zhang — <i>Beihang University, China</i>	191
Threshold-Free Code Clone Detection for a Large-Scale Heterogeneous Java Repository Iman Keivanloo, Feng Zhang, and Ying Zou — <i>Queen's University, Canada</i>	201
Detecting Duplicate Bug Reports with Software Engineering Domain Knowledge Karan Aggarwal, Tanner Rutgers, Finbarr Timbers, Abram Hindle, Russ Greiner, and Eleni Stroulia — <i>University of Alberta, Canada</i>	211

Change Impact Analysis

Impact Analysis Based on a Global Hierarchical Object Graph Marwan Abi-Antoun, Yibin Wang, Ebrahim Khalaj, Andrew Giang, and Václav Rajlich — <i>Wayne State University, USA</i>	221
A Framework for Cost-Effective Dependence-Based Dynamic Impact Analysis Haipeng Cai and Raul Santelices — <i>University of Notre Dame, USA</i>	231
Circular Dependencies and Change-Proneness: An Empirical Study Tosin Daniel Oyetoyan, Jens Dietrich, Jean-Rémy Falleri, and Kamil Jezek — <i>NTNU, Norway; Massey University, New Zealand; LaBRI, France; University of Bordeaux, France; University of West Bohemia, Czech Republic</i>	241
An Empirical Study of Work Fragmentation in Software Evolution Tasks Heider Sanchez, Romain Robbes, and Victor M. Gonzalez — <i>University of Chile, Chile; ITAM, Mexico</i>	251

SCAM at SANER

Library Functions Identification in Binary Code by Using Graph Isomorphism Testings Jing Qiu, Xiaohong Su, and Peijun Ma — <i>Harbin Institute of Technology, China</i>	261
A Non-convex Abstract Domain for the Value Analysis of Binaries Sven Mattsen, Arne Wichmann, and Sibylle Schupp — <i>TU Hamburg, Germany</i>	271
Precision vs. Scalability: Context Sensitive Analysis with Prefix Approximation Raveendra Kumar Medicherla and Raghavan Komondoor — <i>Tata Consultancy Services, India; Indian Institute of Science, India</i>	281
MG++: Memory Graphs for Analyzing Dynamic Data Structures Vineet Singh, Rajiv Gupta, and Iulian Neamtiu — <i>University of California at Riverside, USA</i>	291

Mining Software Repositories

SQA-Profiles: Rule-Based Activity Profiles for Continuous Integration Environments Martin Brandtner, Sebastian C. Müller, Philipp Leitner, and Harald C. Gall — <i>University of Zurich, Switzerland</i>	301
Cross-Project Build Co-change Prediction Xin Xia, David Lo, Shane McIntosh, Emad Shihab, and Ahmed E. Hassan — <i>Zhejiang University, China; Singapore Management University, Singapore; Queen's University, Canada; Concordia University, Canada</i>	311
The Influence of App Churn on App Success and StackOverflow Discussions Latifa Guerrouj, Shams Azad, and Peter C. Rigby — <i>Concordia University, Canada</i>	321
Beyond Support and Confidence: Exploring Interestingness Measures for Rule-Based Specification Mining Tien-Duy B. Le and David Lo — <i>Singapore Management University, Singapore</i>	331

On Code Changes

Untangling Fine-Grained Code Changes Martín Dias, Alberto Bacchelli, Georgios Gousios, Damien Cassou, and Stéphane Ducasse — <i>INRIA, France; University of Lille, France; Delft University of Technology, Netherlands; Radboud University Nijmegen, Netherlands</i>	341
A Comprehensive and Scalable Method for Analyzing Fine-Grained Source Code Change Patterns Masatomo Hashimoto, Akira Mori, and Tomonori Izumida — <i>RIKEN Advanced Institute for Computational Science, Japan; National Institute of Advanced Industrial Science and Technology, Japan</i>	351
Summarizing Evolutionary Trajectory by Grouping and Aggregating Relevant Code Changes Qingtao Jiang, Xin Peng, Hai Wang, Zhenchang Xing, and Wenyun Zhao — <i>Fudan University, China; Nanyang Technological University, Singapore</i>	361
Identifying the Exact Fixing Actions of Static Rule Violation Hayatou Oumarou, Nicolas Anquetil, Anne Etien, Stéphane Ducasse, and Kolyang Dina Taiwe — <i>University of Maroua, Cameroon; INRIA, France; University of Lille, France</i>	371

The Human Within

CloCom: Mining Existing Source Code for Automatic Comment Generation Edmund Wong, Taiyue Liu, and Lin Tan — <i>University of Waterloo, Canada</i>	380
amAssist: In-IDE Ambient Search of Online Programming Resources Hongwei Li, Xuejiao Zhao, Zhenchang Xing, Lingfeng Bao, Xin Peng, Dongjing Gao, and Wenyun Zhao — <i>Fudan University, China; Jiangxi Normal University, China; Nanyang Technological University, Singapore; Zhejiang University, China</i>	390
Reverse Engineering Time-Series Interaction Data from Screen-Captured Videos Lingfeng Bao, Jing Li, Zhenchang Xing, Xinyu Wang, and Bo Zhou — <i>Zhejiang University, China; Nanyang Technological University, Singapore</i>	399
Niche vs. Breadth: Calculating Expertise over Time through a Fine-Grained Analysis Jose Ricardo da Silva Junior, Esteban Clua, Leonardo Murta, and Anita Sarma — <i>Federal Fluminense University, Brazil; University of Nebraska-Lincoln, USA</i>	409

Search, Touch, Tweet

Protecting Web Applications via Unicode Extension Boze Zekan, Mark Shtern, and Vassilios Tzerpos — <i>York University, Canada</i>	419
A Search-Based Approach to Multi-view Clustering of Software Systems Amir M. Saeidi, Jurriaan Hage, Ravi Khadka, and Slinger Jansen — <i>Utrecht University, Netherlands</i>	429

CEL: Touching Software Modeling in Essence Remo Lemma, Michele Lanza, and Andrea Mocchi — <i>University of Lugano, Switzerland</i>	439
NIRMAL: Automatic Identification of Software Relevant Tweets Leveraging Language Model Abhishek Sharma, Yuan Tian, and David Lo — <i>Singapore Management University, Singapore</i>	449

Tool Demonstrations

A Static Code Analysis Tool for Control System Software Sreeja Nair, Raoul Jetley, Anil Nair, and Stefan Hauck-Stattemann — <i>ABB Research, India; ABB Research, Germany</i>	459
RbG: A Documentation Generator for Scientific and Engineering Software Michael Moser, Josef Pichler, Günter Fleck, and Michael Wiltatschil — <i>Software Competence Center Hagenberg, Austria; Siemens Transformers Austria, Austria</i>	464
Historef: A Tool for Edit History Refactoring Shinpei Hayashi, Daiki Hoshino, Jumpei Matsuda, Motoshi Saeki, Takayuki Omori, and Katsuhisa Maruyama — <i>Tokyo Institute of Technology, Japan; Ritsumeikan University, Japan</i>	469
ClonePacker: A Tool for Clone Set Visualization Hiroaki Murakami, Yoshiki Higo, and Shinji Kusumoto — <i>Osaka University, Japan</i>	474
GiLA: GitHub Label Analyzer Javier Luis Cánovas Izquierdo, Valerio Cosentino, Belén Rolandi, Alexandre Bergel, and Jordi Cabot — <i>AtlanMod, France; University of Chile, Chile</i>	479
SPCP-Miner: A Tool for Mining Code Clones That Are Important for Refactoring or Tracking Manishankar Mondal, Chanchal K. Roy, and Kevin A. Schneider — <i>University of Saskatchewan, Canada</i>	484
TracerJD: Generic Trace-Based Dynamic Dependence Analysis with Fine-Grained Logging Haipeng Cai and Raul Santelices — <i>University of Notre Dame, USA</i>	489
Umple: A Framework for Model Driven Development of Object-Oriented Systems Miguel A. Garzón, Hamoud Aljamaan, and Timothy C. Lethbridge — <i>University of Ottawa, Canada</i>	494
Assessing the Bus Factor of Git Repositories Valerio Cosentino, Javier Luis Cánovas Izquierdo, and Jordi Cabot — <i>AtlanMod, France</i>	499

Industrial Research

Old Habits Die Hard: Why Refactoring for Understandability Does Not Give Immediate Benefits Erik Ammerlaan, Wim Veninga, and Andy Zaidman — <i>Exact International Development, Netherlands; Delft University of Technology, Netherlands</i>	504
Bash2py: A Bash to Python Translator Ian J. Davis, Mike Wexler, Cheng Zhang, Richard C. Holt, and Theresa Weber — <i>University of Waterloo, Canada; Owl Computing Technologies, USA</i>	508
On Implementational Variations in Static Analysis Tools Tukaram Muske and Prasad Bokil — <i>Tata Consultancy Services, India</i>	512
Tracking Known Security Vulnerabilities in Proprietary Software Systems Mircea Cadariu, Eric Bouwers, Joost Visser, and Arie van Deursen — <i>Software Improvement Group, Netherlands; Delft University of Technology, Netherlands; Radboud University Nijmegen, Netherlands</i>	516

Early Research Achievements

Evolution and Reuse

Trusting a Library: A Study of the Latency to Adopt the Latest Maven Release Raula Gaikovina Kula, Daniel M. German, Takashi Ishio, and Katsuro Inoue — <i>Osaka University, Japan; University of Victoria, Canada</i>	520
---	-----

Evolution of Dynamic Feature Usage in PHP Mark Hills — <i>East Carolina University, USA</i>	525
Towards Incremental Model Slicing for Delta-Oriented Software Product Lines Sascha Lity, Hauke Baller, and Ina Schaefer — <i>TU Braunschweig, Germany</i>	530
Understanding Software Performance Regressions using Differential Flame Graphs Cor-Paul Bezemer, Johan Pouwelse, and Brendan Gregg — <i>Delft University of Technology, Netherlands; Netflix, USA</i>	535

Text and Labeling

TextRank Based Search Term Identification for Software Change Tasks Mohammad Masudur Rahman and Chanchal K. Roy — <i>University of Saskatchewan, Canada</i>	540
Query Expansion via Wordnet for Effective Code Search Meili Lu, Xiaobing Sun, Shaowei Wang, David Lo, and Yucong Duan — <i>Yangzhou University, China; Nanjing University, China; Singapore Management University, Singapore; Hainan University, China</i>	545
Exploring the Use of Labels to Categorize Issues in Open-Source Software Projects Jordi Cabot, Javier Luis Cánovas Izquierdo, Valerio Cosentino, and Belén Rolandi — <i>AtlanMod, France</i>	550
Explore the Evolution of Development Topics via On-Line LDA Jiajun Hu, Xiaobing Sun, and Bin Li — <i>Yangzhou University, China; Nanjing University, China</i>	555

Bugs and Violations

Code Coverage and Test Suite Effectiveness: Empirical Study with Real Bugs in Large Systems Pavneet Singh Kochhar, Ferdian Thung, and David Lo — <i>Singapore Management University, Singapore</i>	560
Detection of Violation Causes in Reflexion Models Sebastian Herold, Michael English, Jim Buckley, Steve Counsell, and Mel Ó Cinnéide — <i>Lero, Ireland; University of Limerick, Ireland; Brunel University, UK; University College Dublin, Ireland</i>	565
A Comparative Study on the Effectiveness of Part-of-Speech Tagging Techniques on Bug Reports Yuan Tian and David Lo — <i>Singapore Management University, Singapore</i>	570

Static and Dynamic Analysis

Efficiently Identifying Object Production Sites Alejandro Infante and Alexandre Bergel — <i>University of Chile, Chile</i>	575
Where Was This SQL Query Executed? A Static Concept Location Approach Csaba Nagy, Loup Meurice, and Anthony Cleve — <i>University of Namur, Belgium</i>	580
Taint Analysis of Manual Service Compositions using Cross-Application Call Graphs Marc-André Laverdière, Bernhard J. Berger, and Ettore Merlo — <i>Tata Consultancy Services, Canada; Polytechnique Montréal, Canada; University of Bremen, Germany</i>	585

Tutorials and Briefings

TXL Source Transformation in Practice James R. Cordy — <i>Queen's University, Canada</i>	590
Software Risk Management in Practice: Shed Light on Your Software Product Jens Knodel, Matthias Naab, Eric Bouwers, and Joost Visser — <i>Fraunhofer IESE, Germany; Software Improvement Group, Netherlands; Radboud University Nijmegen, Netherlands</i>	592
Software Architecture Reconstruction: Why? What? How? Mehdi Mirakhorli — <i>Rochester Institute of Technology, USA</i>	595

Doctoral Symposium

SKilled Communication for Toolchains Timm Felden — <i>University of Stuttgart, Germany</i>	596
The Impact of Column-Orientation on the Quality of Class Inheritance Mapping Specifications Martin Lorenz — <i>HPI, Germany</i>	597

Improving the Integration Process of Large Software Systems	
Yujuan Jiang — <i>Polytechnique Montréal, Canada</i>	598
Handling the Differential Evolution of Software Artefacts: A Framework for Consistency Management	
Ildiko Pete and Dharini Balasubramaniam — <i>University of St. Andrews, UK</i>	599
Towards a Framework for Analysis, Transformation, and Manipulation of Makefiles	
Doug Martin — <i>Queen's University, Canada</i>	601
Towards a Framework for Automatic Correction of Anti-patterns	
Rodrigo Morales — <i>Polytechnique Montréal, Canada</i>	603
Towards an Ontology-Based Context-Aware Meta-Model for the Software Domain	
Mostafa Erfani — <i>Concordia University, Canada</i>	605
Investigating Modern Release Engineering Practices	
Md Tajmilur Rahman — <i>Concordia University, Canada</i>	607
