

2015 12th International Conference on Remote Engineering and Virtual Instrumentation

(REV 2015)

**Bangkok, Thailand
25-27 February 2015**

IEEE Catalog Number: CFP1549T-POD
ISBN: 978-1-4799-7840-3

Table of Contents

Title	Page range
Introductory Laboratories in Semiconductor Devices using the Digilent Analog Discovery	1–6
Supporting Access to STEM Subjects in Higher Education for Students with Disabilities using Remote Laboratories	7–13
The use of telecommunication technologies in education network	14–17
DC Motor Control in a 3D Real-Time Virtual Laboratory Environment	18–23
The Bibliographic Reference Collection GRC2014 for the Online Laboratory Research Community	24–31
From RGB led laboratory to servomotor control with websockets and IoT as educational tool	32–36
Safety in Interactive Hybrid Online Labs	37–42
Towards Massive Open Online Laboratories: an Experience about Electromagnetic Crowdsensing	43–51
Iterative Pattern for Remote Laboratories Embedding in Educational Process	52–55
A Remote Solar Photovoltaic Laboratory based on the iLabs Shared Architecture (ISA)	56–62
Real-Time ECG Acquisition Under Incorrect Electrode Positions	63–68
Development and Application of Remote Laboratory for Embedded Systems Design	69–73
Designing Remote Labs for Broad Adoption	74–80
Google Cloud and Analysis of Realtime Process Data	81–85
Real-time and turn-based biology online experimentation	86–89
A New Implementation of the iLab Service Broker	90–93
Design and Operational Reliability for a Peer-to-Peer Distributed Remote Access Laboratory	94–99
Low-cost Multi-Channel Analog Sampler and Signal Generator for Remote Laboratories	100–104
INCLINE – the remote experimental kit for research based teaching in the class	105–108
REMLABNET II - open remote laboratory management system for university and secondary schools research based teaching	109–112
Powerful Technologies Together for Engineering Education (PTT for EE)	113–117
Teaching and learning globally connected - Using live online classes for preparing international engineering students for transnational collaboration and for	118–126
Virtual and Remote triggered Industrial Automation Labs: Collaboration case study	127–130
Students' Performance Evaluation in Online Education System Vs Traditional Education System	131–135
Development of an Online Renewable Energy Laboratory	136–139
Leveraging motivation of learners to practice: a remote laboratory dedicated to system and network administration	140–142
A Collaborative Multi-Videoconferencing Platform for Online Optical Microscopy	143–151
Online Use of OpenModelica via Web Service	152–156
Integration of Remote and Virtual Laboratories in the Educational Process	157–162
Weblab of a Control Experiment in a Newborn Baby Incubator	163–171
A Low-cost Remote Laboratory of Field Programmable Gate Arrays	172–176
VISIR - Microcontroller Extensions (MCE)	177–179
The Challenge of Specimen Handling in Remote Laboratories (for engineering education)	180–185
Developing Virtual Lab to support the Computer Science Education in Moodle	186–191
Surfing Virtual Environment in the Galápagos Islands	192–198
Smart Device Specifications for remote labs	199–208
Node.js Based Remote Control of Thermo-optical Plant	209–213
Develop a Scheduler and Federated Authentication for Remote Laboratory Access	214–219
Converting a remote laboratory back end from Remote Panels in LabVIEW to HTML5	220–222
wCloud: automatic generation of WebLab-Deusto deployments in the Cloud	223–229
An HTML Client for the Blackbody Radiation Lab	230–234
Opportunities and Challenges in Virtual Reality for Remote and Virtual Laboratories	235–237
A Distinctive Approach to Enhance the Utility of Laboratories in Indian Academia	238–241
An Innovative Educational Concept of Teleworking in the High Precision Metrology Laboratory to Develop a Model of Implementation in the Advanced	242–248
