

2015 IEEE Eighth International Conference on Software Testing, Verification and Validation Workshops

(ICSTW 2015)

**Graz, Austria
13-17 April 2015**

**IEEE Catalog Number: CFP1502F-POD
ISBN: 978-1-4799-1886-7**

2015 IEEE Eighth International Conference on Software Testing,
Verification and Validation Workshops (ICSTW)

Table of Contents

11th Workshop on Advances in Model Based Testing (A-MOST)

- Message from the chairs
Mike Papadakis, Levi Lucio and Gilles Perrouin
- A Test Automation Language Framework for Behavioral Models
Nan Li and Jeff Offutt
- On Model-Based Testing Advanced GUIs
Valria Lelli, Arnaud Blouin, Benoit Baudry and Fabien Coulon
- Test Generation from Timed Pushdown Automata with Inputs and Outputs
Hana MHEmdi, Jacques Julliand, Pierre-Alain Masson and Riadh Robbana
- Model-based Approach for Automated Test Case Generation from Visual Requirement Specifications
Kapil Singi, Dipin Era and Vikrant Kaulgud
- Covering both Stack and States while Testing Push-down Systems
Pierre-Cyrille Ham and Hana MHEmdi
- A Model-Based Testing Technique for Component-Based Real-Time Embedded Systems
Jing Guan and Jeff Offutt
- State Machine Flattening, a Mapping Study and Tools Assessment
Xavier Devroey, Maxime Cordy, Pierre-Yves Schobbens, Axel Legay and Patrick Heymans
- Towards Generation of Adaptive Test Cases from Partial Models of Determinized Timed Automata
Bernhard K. Aichernig and Florian Lorber

13th User Symposium on Software Quality, Test and Innovation (ASQT)

- Message from the chairs
Dietmar Wuksch and Bernhard Peischl
- Scaled Agile Framework - Presentation and Real World Example
Richard Brenner and Stefan Wunder
- A Guide to Lean Software Development in Action
Andrea Janes
- PMBOK vs. Agile Methods - How cultural change can become transparent
Wolfgang Richter
- Test Automation for NFC ICs using Jenkins and NUnit
Stephan Puri-Jobi

- Designing sustainable information systems for organizations operating in safety critical environments
Wolfgang Vorraber, Gerald Lichtenegger, Dietmar Neubacher, Siegfried Voessner
- Security Tests for Mobile Applications - Why using TLS/SSL is not enough.
Peter Kieseberg, Peter Frühwirt, Sebastian Schrittwieser and Edgar Weippl
- A Survey On Mobile Users Software Quality Perceptions and Expectations
Andr Nitze, Andreas Schmietendorf
- Implementing Tool Support for Analyzing Stakeholder Communications in Software Development
Vladimir A. Shekhovtsov, Heinrich C. Mayr, Matija Kucko
- Automated Testing in the Cloud - Test Infrastructure Management with SaaS
Georg Hansbauer
- From Agile Software Development to the Sharing Economy and the Collaborative Commons - Social Apps for Enterprises
Herbert Wagger
- Scaling a running agile fix-bid project with near shoring - Theory vs. reality and (best) practice
Violetta J. Wawryk, Christian Krenn and Thomas Dietinger
- nCanto - An agile software development case study
Wolfgang Richter
- Automated Testing in the Continuous Delivery Pipeline: A Case Study of an Online Company
Johannes Gmeiner, Rudolf Ramler and Julian Haslinger
- Testing Big Data (Assuring the Quality of Large Databases)
Harry M. Sneed and Katalin Erdoes

2nd International Workshop on Software Test Architecture (InSTA)

- Test Driven Development for Device Drivers and Rapid Hardware Prototyping
Dominic Eschweiler and Volker Lindenstruth
- Design principles in Test Suite Architecture
Yasuharu Nishi
- Automated Compatibility Testing Method for Software Logic by Using Symbolic Execution
Keiji Uetsuki, Tohru Matsuodani and Kazuhiko Tsuda
- Mining process models and architectural components from test cases
Vipul Shah, Chetan Khadke and Sunjit Rana
- A Study on an Approach for Analysing Test Basis Using I/O Test Data Patterns
Tsuyoshi Yumoto, Tohru Matsuodani and Kazuhiko Tsuda
- Semantic Analysis Technique of Logics Retrieval for Software Testing from Specification Documents
Satoshi Masuda, Futoshi Iwama, Nobuhiro Hosokawa, Tohru Matsuodani and Kazuhiko Tsuda

4th International Workshop on Combinatorial Testing (IWCT)

- Message from the chairs
Angelo Gargantini, Jacek Czerwonka, Raghu Kacker, Richard Kuhn, Yu Lei and Itai Segall
- Embedded Functions in Combinatorial Test Designs
George B. Sherwood
- Introducing Combinatorial Testing in the Organization a Report on a First Attempt
Douglas Hillmer
- Combining Minimization and Generation for Combinatorial Testing
Itai Segall, Rachel Tzoref-Brill and Aviad Zlotnick
- A First Systematic Mapping Study on Combinatorial Interaction Testing for Software Product Lines
Roberto E. Lopez-Herrejon, Stefan Fischer, Rudolf Ramler and Alexander Egyed
- Evaluation of the IPO-Family Algorithms for Test Case Generation in Web Security Testing
Josip Bozic, Bernhard Garn, Dimitris E. Simos and Franz Wotawa
- A process for nonfunctional combinatorial testing - Selection of parameter values from a nondiscrete domain space
Siegmar Züfle and Venkataraman Krishnamoorthy
- Combinatorial Interaction Testing of Tangled Configuration Options
Arsalan Javeed and Cemal Yilmaz
- Relationship between Pair-wise and MC/DC Testing: Initial Experimental Results
Sergiy Vilkomir and David Anderson
- Why Combinatorial Testing Works - Analyzing Minimal Failure-Causing Schemas in Logic Expressions
Ziyuan Wang and Yuanchao Qi
- Constraint Handling In Combinatorial Test Generation Using Forbidden Tuples
Limbin Yu, Feng Duan, Yu Lei, Raghu N. Kacker and D. Richard Kuhn
- Using Decision Trees to aid Algorithm Selection in Combinatorial Interaction Test Generation
Angelo Gargantini and Paolo Vavassori
- Flattening or Not of the Combinatorial Interaction Testing Models?
Christopher Henard, Mike Papadakis and Yves Le Traon
- Improving IPOGs Vertical Growth Based on a Graph Coloring Scheme
Feng Duan, Yu Lei, Limbin Yu, Raghu N. Kacker and D. Richard Kuhn
- Equivalence Class Verification and Oracle-free Testing Using Two-layer Covering Arrays
D. Richard Kuhn, Raghu N. Kacker, Yu Lei and Jose Torres-Jimenez
- BEN: A Combinatorial Testing-Based Fault Localization Tool
Laleh Sh. Ghandehari, Jaganmohan Chandrasekaran, Yu Lei, Raghu Kacker and D. Richard Kuhn

10th International Workshop on Mutation Analysis (Mutation)

- Message from the chairs
Mike Papadakis and Ren Just
- Faster Mutation-based Fault Localization With A Novel Mutation Execution Strategy
Pei Gong, Ruilian Zhao and Zheng Li
- Mutation Testing of Memory-Related Operators
Jay Nanavati, Fan Wu, Mark Harman, Yue Jia and Jens Krinke
- Towards Mutation Analysis of Android Apps
Lin Deng, Nariman Mirzaei, Paul Ammann, and Jeff Offutt
- Kernel Density Adaptive Random Testing
Matthew Patrick and Yue Jia
- Rehabilitating equivalent mutants as static anomaly detectors in software artifacts
Paolo Arcaini, Angelo Gargantini, Elvinia Riccobene and Paolo Vavassori
- Mutation Testing in Practice using Ruby
Nan Li, Michael West, Anthony Escalona and Vinicius H. S. Durelli
- Static Analysis of Mutant Subsumption
Bob Kurtz, Paul Ammann and Jeff Offutt
- Towards Systematic Mutations for and with ATL Model Transformations
Javier Troya, Alexander Bergmayr, Loli Burgueño and Manuel Wimmer
- Mutating Aspect-Oriented Models to Test Cross-Cutting Concerns
Birgitta Lindström, Sten F. Andler, Jeff Offutt, Paul Pettersson, and Daniel Sundmark
- Definition and Evaluation of Mutation Operators for GUI-level Mutation Analysis
Rafael A.P. Oliveira, Emil Algroth, Zebao Gao and Atif Memon

6th International Workshop on Security Testing (SECTEST)

- Dynamic Phishing Content Using Generative Grammars
Sean Palka and Damon McCoy
- Security Testing for Android mHealth Apps
Konstantin Knorr and David Aspinall
- A Novel Simulation Approach for Fault Injection Resistance Evaluation on Smart cards
Lionel Rivire, Julien Bringer, Thanh-Hà Lê and Hervé Chabanne
- Automated Testing of IDS Rules
Zeeshan Afzal and Stefan Lindskog
- Tool Support for Secure Programming by Security Testing
Keqin Li, Cdric Hebert, Jan Lindemann, Michael Sauter, Holger Mack, Tom Schröder, Abhay Tiple

10th Testing: Academic and Industrial Conference - Practice and Research Techniques (TAIC PART)

- Industry-Academia Collaboration in Software Testing: An Overview of TAIC PART 2015
Nadia Alshahwan, Michael Felderer and Rudolf Ramler
- Combining Model-Based and Risk-Based Testing for Effective Test Case Generation
Ceren Şahin Gebizli, Duygu Metin and Hasan Szer
- Requirements Document Based Test Scenario Generation for Web Application Scenario Testing
Xiaojing Zhang and Haruto Tanno
- Testing AUTOSAR software with QuickCheck
Thomas Arts, John Hughes, Ulf Norell, Hans Svensson
- Testing of a telecommunication protocol using constraint programming
Olga Grinchtein, Mats Carlsson and Justin Pearson
- Test Automation for Multi-touch User Interfaces of Industrial Applications
Thomas Wetzlmaier and Mario Winterer
- Writing Unit Tests: Its Now or Never!
Claus Klammer and Albin Kern
- Mapping software testing practice with software testing research - SERP-test taxonomy
Emelie Engström, Kai Petersen
- A Process to Increase the Model Quality in the Context of Model-Based Testing
Vladimir Entin, Mathias Winder, Bo Zhang and Andreas Claus
- Lessons learnt from using DSLs for Automated Software Testing
Mark Micallef and Christian Colombo
- Graphical editing support for QuickCheck models
Thomas Arts, Kirill Bogdanov, Alex Gerdes and John Hughes
- Automotive System Testing by Independent Guarded Assertions
Thomas Gustafsson, Mats Skoglund, Avenir Kobetski and Daniel Sundmark
- Software Quality Research - from Processes to Model-based Techniques
Bernhard Peischl
- Beyond Code Coverage - an Approach for Test Suite Assessment and Improvement
Dvid Tengeri, rpd Beszdes, Tams Gergely, Lszl Vidcs, Dvid Havas, Tibor Gyimthy
- A Learning-Based Method for Detecting Defective Classes in Object-Oriented Systems
Çağıl Biray and Feza Buzluca
- Supporting Software Product Line Testing by Optimizing Code Configuration Coverage
Lszl Vidcs, Ferenc Horvth, Jzsef Mihalicza, Bla Vancsics and rpd Beszdes
