2015 IEEE 9th International Conference on Research Challenges in Information Science

(RCIS 2015)

Athens, Greece
13-15 May 2015

IEEE Catalog Number: CFP1540D-POD
ISBN: 978-1-4673-6631-1

Table of Contents

Keynotes

Strategic research challenges in the Internet of Things 1
John Favaro

How can data (and graph) mining techniques support research in Information Systems? .. 2
Bénédicte Le Grand

On the role of Architectural models: what can we learn from Information System and from Construction projects? 3
Eric Dubois and Cyril Mauger

Session 1: Business Processes - 1

Social Specification of Business Processes with Azzurra 7
Fabiano Dalpiaz, Evellin Cardoso, Giulia Canobbio, Paolo Giorgini and John Mylopoulos

Automatic Process Model Discovery from Textual Methodologies 19
Elena Viorica Epure, Patricia Martín-Rodilla, Charlotte Hug, Rebecca Deneckère and Camille Salinesi

Collaborative Process Modeling with Tablets and Touch Tables - A Controlled Experiment 31
Klaus Kammerer, Jens Kolb, Sebastian Ronis and Manfred Reichert

Session 2: IS Engineering - 1

Measuring sustainability for an effective Information System audit from public organization perspective 42
Alifah Aida Binti Lope Abdul Rahman, Shareeful Islam and Ameer Al-Nemrat

Supply Chain Integration (SCI) measured from an information sharing perspective: examining its impact on business success 52
Dimitrios Chatzoudes and Prodromos Chatzoglou

Modelling language quality evaluation in model-driven information systems engineering: a roadmap 64
Fáber Danilo Giraldo Velásquez, Sergio España, William Joseph Giraldo Orozco and Oscar Pastor Lopez

Quality-Based Bottom-up Design of Reference Architecture applied to Healthcare Integrated Information Systems 70
Francisca Losavio, Oscar Ordaz and Victor Esteller

Session 3: Modelling and Design - 1

A GUI Modeling Language for Mobile Applications 76
Sebastian Geiger, Beatriz Marín, Sergio España and Giovanni Giachetti

What do we know about the Defect Types detected in Conceptual Models? 88
Maria Fernanda Granda, Nelly Condori-Fernandez, Tanja E. J. Vos and Oscar Pastor Lopez

Adaptive Software-based Feedback Acquisition: A Persona-based Design 100
Malik Almaliki, Cornelius Ncube and Raian Ali

Session 4: Information Search and Discovery - 1

COnnected KEywords 112
Grégory Smits, Olivier Pivert and Virginie Thion

A Sequence-based Tree Similarity Search 121
Alsayed Algergawy and Friederike Klan

A Novel Method for Automatic Discovery, Annotation and Interactive Visualization of Prominent Clusters in Mobile Subscriber Datasets 127
Shabana K M and Jobin Wilson

Session 5: Requirements Engineering - 1

Configuring Crowdsourcing for Requirements Elicitation 133
Mahmood Hosseini, Alimohammad Shahri, Keith Phalp, Jacqui Taylor, Fabiano Dalpiaz and Raian Ali

A Goal-based Approach for Automated Specification of Information Quality Policies 139
Mohamad Gharib and Paolo Giorgini

Towards a Model of Topic Relevance during Requirements Elicitation - Preliminary Results 151
Corentin Burnay, Ivan Jureta and Stéphane Faulkner

Session 6: Servicification

Accounting for Service Value – an Ontological Approach 159
Hans Weigand, Paul Johannesson and Maria Bergholtz

A Collaborative Filtering Algorithm with Clustering for Personalized Web Service Selection in Business Processes 169
Dionisis Margaris, Panagiotis Georgiadis and Costas Vassilakis

Multi-Platform Mobile Application Development Analysis 181
Lisandro Delia, Nicolas Galdamez, Pablo Thomas, Leonardo Corbalan and Patricia Pesado

Opinion mining on experience feedback: A case study on smartphones reviews 187
Laurent Brisson and Jean-Claude Torrel

Session 7: Modelling and Design - 2

Formal Modeling for Verifying SCA Composition 193
Lazhar Hamel, Mohamed Graiet and Mourad Kmimech

Re-Designing Process Architectures: Towards a Framework of Design Dimensions 205
Alexei Lapouchnian, Eric Yu and Arnon Sturm

Three strategies to specify multi-instantiation in product lines 211
Raouia Triki, Camille Salinesi and Raul Mazo

Personalization Mobile P2P Network using FCA Based Multidimensional Aggregation 217
Saloua Zammali, Khedija Arour and Amel Bouzeghoub

Session 8: Strategic Management

Modeling Strategic Business Plans: the Montreux Jazz Festival Case Study 229
Fabiano Francesconi, John Mylopoulos and Fabiano Dalpiaz

Business Intelligence for Business Intelligence: A case study at STMicroelectronics 239
Manel Brichni, Sophie Dupuy-Chessa, Lilia Gzara, Nadine Mandran and Corinne Jeannet

Information for decision-making is ubiquitous: revisiting the reverse engineering mode in breadmaking technology 250
Rallou Thomopoulos, Ahmed Chadli, Madalina Croitoru, Joël Abécassis, Gérard Brochoire and Hubert Chiron

Session 9: IS Engineering - 2

Alignment of ReMMo with RBAC to Manage Access Rights in the Frame of Enterprise Architecture 262
Christophe Feltus, Eric Dubois and Michael Petit

Method Association Approach: Situational construction and evaluation of an implementation method for software products 274
Rebecca Deneckère, Charlotte Hug, Juliette Onderstal and Sjaak Brinkkemper

A Domain-specific Language for Modeling Method Definition: from Requirements to Grammar 286
Niksa Visic, Hans-Georg Fill, Robert Andrei Buchmann and Dimitris Karagiannis

Session 10: Modelling and Design - 3

Comparison of software repositories for their usability in software process reconstruction .. 298
Marko Janković and Marko Bajec

Evaluation of BehaviorMap: a User-Centered Behavior Language 309
Fernando Wanderley, Joao Araujo and António Silva

Revealing intricate properties of communities in the bipartite structure of online social networks 321
Tackx Raphaël, Guillaume Jean-Loup and Tarissan Fabien

Automated Refinement of Business Processes through Model Transformations Specifying Business Rules 327
Roman Popp and Hermann Kaindl

Session 11: Social Network Analysis

How do we Spread on Twitter? 334
Erick Stattner, Reynald Eugenie and Martine Collard

Ranking Educational Videos:The Impact of Social Presence 342
Dimitrios Kravvaris, Katia Lida Kermanidis and Konstaninos Chorianopoulos

Session 12: Data Management - 1

An Analytical Model for Data Persistence in Business Data Warehouses 351
Veit Koeppen, Thorsten Winsemann and Gunter Saake

Diamond multidimentional model and aggregation operators for document OLAP 363
Maha Azabou, Kais Khrouf, Jamel Feki, Chantal Soulé-Dupuy and Nathalie Vallès

Session 13: Requirements Engineering - 2

Identifying Reputable Contributors in Collaborative Software Development Platforms 374
Zeina Azmeh and Isabelle Mirbel

Modeling Analytics as Knowledge Work: Computing Meets Organizational Psychology ... 382
Guangchao Yuan, Nirav Ajmeri, Chris Allred, Pankaj Telang, Mark Wilson and Munindar P. Singh

Session 14: Business Processes - 2

Modeling Business Processes for Automated Crisis Management Support: Lessons Learned 388
Elena Kushnareva, Bénédicte Le Grand and Irina Rychkova

Flexibility of Collaborative Processes using Versions and Adaptation Patterns 400
Imen Bensaid, Mohamed Amine Chaabane, Eric Andonoff and Rafik Bouaziz

Session 15: Information Search and Discovery - 2

Iterative joint extraction of entities, relationships and coreferences from text sources 412
Slavko Žitnik and Marko Bajec

Recommendations on Adapting Crowdsourcing to Problem Types 423
Mahmood Hosseini, Alimohammad Shahri, Keith Phalp and Raian Ali

Concise representation of hypergraph minimal transversals : approach and application on the dependency inference problem 434
M. Nidhal Jelassi, Christine Largeron and Sadok Ben Yahia

Session 16: Data Management - 2

Arabic Document Similarity Analysis using N-grams and Singular Value Decomposition .. 445
Ashraf Hussein

Using Collaborative Filtering to Enhance Domain-Independent CBR Recommender's Personalization 456
Jihane Karim, Raja Chiky, Matthieu Manceny, Michel Manago and Marie-Aude Aufaure

Session 17: Data Management - 3

Holistic Statistical Open Data Integration Based On Integer Linear Programming 468
Alain Berro, Imen Megdiche and Olivier Teste

Benchmark for OLAP on NoSQL Technologies, Comparing NoSQL Multidimensional Data Warehousing Solutions 480
Max Chevalier, Mohammed El Malki, Arlind Kopliku, Olivier Teste and Ronan Tournier

Competitive intelligence: History, importance, objectives, process and issues 486
Dhekra Ben Sassi, Anissa Frini, Wahiba Ben Abdessalem and Naoufel Kraiem

Doctoral Consortium - 1

Model-Based Enterprise Information System Architectural Design with SysML 492
Anargyros Tsadimas

Studying Social Network Sites via Computational Methods 498
Tasos Spiliotopoulos

Doctoral Consortium - 2

Enabling System Models Automated Evaluation through Cross-Concept Information Utilization 504
George-Dimitrios Kapos

A Goal-Oriented Approach For Dynamic Execution of Services based on Aspect-Oriented Programming 510
Omnia Saidani Neffati

Poster and Demo Session

E-Genomic Framework for delivering genomic services. An application to JABAWS..... 516
David Roldán Martínez, Oscar Pastor Lopez and José Fabián Reyes Román

Traceability and Modeling of Requirements in Enterprise Architecture from a Design Rationale Perspective 518
Georgios Plataniotis, Sybren de Kinderen, Qin Ma and Henderik Proper

Requirements Elicitation Approaches: A Systematic Review 520
Aldrin Fredy Jaramillo Franco

Opinion detection: influence factors 522
Faiza Belbachir and Bénédicte Le Grand

Towards Detecting Emotional Communities in Twitter 524
Andreas Kanavos and Isidoros Perikos

Towards a Reeingeniering of Business Process Management Lifecycle by the Use of Social Networks 526
Samiha El Hamali and Latifa Mahdaoui

A theoretical examination of constructs underlying Information Technology Capability.... 528
Soerin Bipat and Lineke Sneller

Comparing game input modalities: A study for the evaluation of player experience by measuring emotional state and game usability 530
Stavroula Bampatzia, Eftychia Roumelioti, Angeliki Antoniou, George Lepouras and Varvara Bravou

Pragmatic paradigm: the use of mixed methods in evaluating visualization 532
Azira Binti Ab Aziz, Jonathan H. Klein and Melanie J. Ashleigh

Music Archipelago, A Facet-like Music Library Comparison Tool 534
Eric Languénou, Pascale Kuntz and Nicolas Greffard

Taming News Streams with Linked Data 536
Jon Espen Ingvaldsen and Jon Atle Gulla

Online Knowledge Sharing – Investigating the Antecedents of Frequency and Intensity 538
Lg Pee

Classifying and Ranking Microblogging Hashtags with News Categories 540
Shuangyong Song and Yao Meng
