PAPERS INDEX

110PB

Computer simulation used in diagnostic procedures analysis of breast cancer
[Simulação computadorizada utilizada na análise de procedimentos de diagnóstico do câncer de Mama]

112EB

Raman spectroscopy analysis of a flexible and electrically conductive material with applications as ECG electrode

114EA

Tracking and Regulation Control of a Scara Robot with Application to Minimally Invasive Surgeries

115EA

Assessment of respiratory muscle coupling through correlograms and multivariable singular spectrum analysis in mechanically ventilated patients

116EB

Exploring the usefulness of surface electromyography to evaluate the effect of PEEP on respiratory muscle activity during spontaneous ventilation

118EA

Respiratory Muscle Activity in Patients with Acute Organophosphorus Poisoning

120SB

Coherent self-averaging for the Pre-processing of Surface Electromyography Signals in the Detection of Nociceptive Withdrawal Reflexes.
[Auto-Promediación Coherente para el Pre-procesamiento de Señales de Electromiografía Superficial en la Detección de Reflejos de Retirada Nociceptivos]

121EB

Design of a Versatile Low Cost Mobile Health Care Monitoring System Using an Android Application

129EB

Control signal for a mechatronic hand orthosis aimed for neurorehabilitation

131EA

CFD simulation of blood flow through three different mechanical mitral valves.

133EA

A Biomechanical International Network for the Assessment of Tissue Engineered Blood Vessels

137EA

Device for integration of clinical information of biomedical equipments

138EA

Wireless Electrodes for Electrocardiography

139EB

Analysis of Total Cost of Ownership (TCO) Applied to Processes of Biomedical Technology Acquisition Competitive Intelligence

140SB

Improvement of emergency services using technological surveillance and competitive intelligence
Vigilancia tecnológica e inteligencia competitiva aplicadas al mejoramiento de los servicios de urgencias hospitalarias

141SB

Methodology for metrological confirmation in health care institutions
Metodología para la confirmación metrológica en instituciones de salud

142EB

A new approach to improve pulmonary function in quadriplegic people using dual synchronized functional electrical stimulation.

143SB

Asimov: Android based Mobile assistant for Robotic Teleoperation
[Asimov: Asistente Móvil para Teleoperación Robótica bajo la Plataforma Android]

145EB

Algorithm to estimate the level of elasticity of biological tissue with ultrasound elastography images

147EB

Power Meter for HIFU Transducers using Logarithmic Amplifiers

148EA

Proposal for Monitoring the Health Status of a Diabetic Patient by Using Impedance Spectroscopy Measurement

152EB

Thermal Changes in the Sacral Region with Different Hospital Mattresses

153EA

Non-Rigid Registration of Airway Region in Computed Tomography of ICU Patient Using B-Splines in 3D-Slicer

154EB

Development of fabrication method for a phantom emulating breast tumor tissue for percutaneous antenna coupling measurements in microwave thermotherapy.

155EB

Gait Analysis System by Augmented Reality

156SB

Validation of a Wireless Ambulatory ECG
[Validación de un ECG Ambulatorio Inalámbrico]

157EB

A 3D pseudospectral solver for nonlinear wave propagation in inhomogeneous attenuating media

159SB

Definition of a Methodology for the Development of Messaging HL7 2.7 Standard Implementation Guides
[Metodología para la Generación de una Guía de Implementación para un Sistema de Mensajería HL7]

160EB

Supplemental Melanoma Diagnosis for Darker Skin Complexion Gradients

163EB

Evaluation of acoustic and thermal properties of Gellan-gum phantom to mimic biological tissue

165EB

Virtual Machine Based PFT and New Approach for Serialized Collaboration in the Clinic/Specialized Test Facility

166SB

Ocular Surgery Emulator [Emulador de Cirugía Ocular]
