2015 AI & Robotics (IRANOPEN 2015)

Qazvin, Iran
12 April 2015

Rci g	Title of paper	Authors
1	Mars image segmentation with most relevant features among wavelet and color features	A. Rashno, M. Saraee, S. Sadri
8	Web Query Classification Using Improved Visiting Probability Algorithm and BabelNet Semantic Graph	H. Rashidghalam, F. Mahmoudi
13	An efficient hybrid approach based on K-means and generalized fashion algorithms for cluster analysis	A. Aghamohseni, R. Ramezanian
20	Mobile Robot Navigation using Sonar Vision Algorithm applied to Omnidirectional Vision	M.H. Bamorovat-Abadi, M.R. Asghari- Oskoei, A. Fakharian
26	Multi-view tracking using Kalman filter and graph cut	P. Jahanshahi, A. M. Eftekhari-Moghadam
31	Enhanced Comprehensive Learning Cooperative Particle Swarm Optimization with Fuzzy Inertia Weight (ECLCFPSO-IW)	M. Gholamian, M. R. Meybodi
38	Polynomial Based Optimal Trajectory Planning andObstacle Avoidancefor an Omni-Directional Robot	F. Tohfeh, A. Fakharian
44	Optimal Trajectory Planning for an Omni-Directional Mobile Robot with Static Obstacles: A Polynomial Based Approach	N. Azim- Mohseni, A. Fakharian
50	Word Concept Extraction Using HOSVD for Automatic Text Summarization	A. Biyabangard, M. Saniee- Abadeh
56	Consensus of Heterogeneous Multi-Agent SystemsUsing Static Output Feedback	N. Danaeefard, V. Johari- Majd
63	A feature selection method based on minimum redundancy maximum relevance for learning to rank	M. Barani- Shirzad, M. R. Keyvanpour
68	A note on Pearson Correlation Coefficient as a metric of similarity in recommender system	L. Sheugh, S. H. Alizadeh
74	Attitude Estimation of an Accelerated Rigid Body with Sensor Fusion based-on Switching Extended Kalman Filter	F. Edrisi, V. Johari- Majd
80	Adaptive Fuzzy-PD Controller for 3D Walking of Biped Robots	M. Talebi, M. Farrokhi
87	Trajectory Generation of a Micro Underwater Robot in 3D Space Considering Obstacles by Anovel Potential Function	A. M. Ghasemi-Toudeshki, M. Mahdavian, N. Jamali, A. Yousefi-Koma, M. Imani

Code	Title of paper	Authors
92	Model Free Robust Impedance Control of Robot Manipulators using Fourier Series Expansion	M. Baradaran- Fard, S. Khorashadizadeh
99	Attitude Control and Trajectory tracking of an Autonomous Miniature Aerial Vehicle	S. J. Haddadi, O. Emamgholi, F. Javidi-Niroumand, A. Fakharian
105	Dynamics Modeling of Planar Continuum Robots by Finite Circular Elements for Motion Control	M. Dehghani, S. A. A. Moosavian
111	Optimization of Dynamic Mobile Robot Path Planning based on Evolutionary Methods	M. Fetanat, S. Haghzad, S. Bagheri-Shouraki
118	Trajectory Tracking via Adaptive Nonlinear Control Approach for a Quadrotor MAV	F. Javidi-Niroumand, A. Fakharian
125	Implementation of a Frequency FIR Filter as 2D-FIR Filter Based on FPGA	A. Fakharian, S. Badr, M. Abdi
129	A New Approach for Kinematics-based Design of 3-RRR Delta Robot swith a Specified Workspace	M. Mahmoodi, M. Ghafouri- Tabrizi, K. Alipour
