

# **2015 International Workshop on Pattern Recognition in NeuroImaging (PRNI 2015)**

**Stanford, California, USA  
10-12 June 2015**

**IEEE Catalog Number: CFP15PRN-POD  
ISBN: 978-1-4673-7146-9**

# 2015 International Workshop on Pattern Recognition in NeuroImaging

## PRNI 2015

### Table of Contents

Message from General Chairs.....	viii
Message from Program Chairs.....	ix
Workshop Organization.....	x
Program Committee.....	xi
Sponsors.....	xiii

---

#### Oral Session I: Graphical Methods and Connectivity

Graph Embeddings of Dynamic Functional Connectivity Reveal Discriminative Patterns of Task Engagement in HCP Data .....	1
<i>Ricardo Monti, Romy Lorenz, Peter Hellyer, Robert Leech, Christoforos Anagnostopoulos, and Giovanni Montana</i>	
Modeling Voxel Connectivity for Brain Decoding .....	5
<i>Itir Onal, Mete Ozay, and Fatos T. Yarman Vural</i>	
Mind the Noise Covariance When Localizing Brain Sources with M/EEG .....	9
<i>Denis Engemann, Daniel Strohmeier, Eric Larson, and Alexandre Gramfort</i>	
Tractography Mapping for Dissimilarity Space across Subjects .....	13
<i>Paolo Avesani, Bao Nguyen, Nivedita Agarwal, Mark Bromberg, Lubdha Shah, and Emanuele Olivetti</i>	

#### Oral Session II: Sparse Techniques

Speeding-Up Model-Selection in Graphnet via Early-Stopping and Univariate Feature-Screening .....	17
<i>Elvis Dohmatob, Michael Eickenberg, Bertrand Thirion, and Gaël Varoquaux</i>	
MEG/EEG Source Imaging with a Non-Convex Penalty in the Time-Frequency Domain .....	21
<i>Daniel Strohmeier, Alexandre Gramfort, and Jens Haueisen</i>	

Multivariate Effect Ranking via Adaptive Sparse PLS .....	25
<i>João M. Monteiro, Anil Rao, John Ashburner, John Shawe-Taylor, and Janaina Mourão-Miranda</i>	

Joint Feature Extraction from Functional Connectivity Graphs with Multi-task Feature Learning .....	29
<i>Andre Altmann and Bernard Ng</i>	

### **Oral Session III: Multimodal Integration**

Fusing Simultaneous EEG and fMRI Using Functional and Anatomical Information .....	33
<i>Sofie Therese Hansen, Irene Winkler, Lars Kai Hansen, Klaus-Robert Müller, and Sven Dähne</i>	

Testing Multimodal Integration Hypotheses with Application to Schizophrenia Data .....	37
<i>Martin C. Axelsen, Nikolaj Bak, and Lars Kai Hansen</i>	

Automatic Brain Tumor Segmentation from MR Images via a Multimodal Sparse Coding Based Probabilistic Model .....	41
<i>Yuhong Li, Qi Dou, Jinze Yu, Fucang Jia, Jing Qin, and Pheng-Ann Heng</i>	

Discriminative Multi-task Feature Selection for Multi-modality Based AD/MCI Classification .....	45
<i>Tingting Ye, Chen Zu, Biao Jie, Dinggang Shen, and Daoqiang Zhang</i>	

### **Oral Session IV: Statistical Estimation and Modeling**

Kernel Convolution Model for Decoding Sounds from Time-Varying Neural Responses .....	49
<i>Ali Faisal, Anni Nora, Jaeho Seol, Hanna Renvall, and Riitta Salmelin</i>	

Population Inference for Node Level Differences in Multi-subject Functional Connectivity .....	53
<i>Manjari Narayan and Genevera I. Allen</i>	

Variational Physiologically Informed Solution to Hemodynamic and Perfusion Response Estimation from ASL fMRI Data .....	57
<i>Aina Frau-Pascual, Florence Forbes, and Philippe Ciuciu</i>	

A Comparison of Strategies for Incorporating Nuisance Variables into Predictive Neuroimaging Models .....	61
<i>Anil Rao, João M. Monteiro, John Ashburner, Liana Portugal, Orlando Fernandes Jr., Leticia De Oliveira, Mirtes Pereira, and Janaina Mourão-Miranda</i>	

## **Oral Session V: Statistical Inference and Best Practices**

MVPA Permutation Schemes: Permutation Testing for the Group Level .....	65
<i>Josef A. Etzel</i>	
A Bayesian Test for Comparing Classifier Errors .....	69
<i>Emanuele Olivetti and Dirk B. Walther</i>	
Improving Sparse Recovery on Structured Images with Bagged Clustering .....	73
<i>Andrés Hoyos-Idrobo, Yannick Schwartz, Gaël Varoquaux, and Bertrand Thirion</i>	
Bolstering Heuristics for Statistical Validation of Prediction Algorithms .....	77
<i>Alex F. Mendelson, Maria A. Zuluaga, Brian F. Hutton, and Sebastien Ourselin</i>	

## **Oral Session VI: Novel Applications**

Predicting Numerical Processing in Naturalistic Settings from Controlled Experimental Conditions .....	81
<i>J. Schrouff, C. Phillips, J. Parvizi, and Janaina Mourão-Miranda</i>	
Predicting Pure Amnesic Mild Cognitive Impairment Conversion to Alzheimer’s Disease Using Joint Modeling of Imaging and Clinical Data .....	85
<i>V. Kebets, J. Richiardi, M. van Assche, R. Goldstein, M. van der Meulen, P. Vuilleumier, D. Van de Ville, and F. Assal</i>	
Hidden Markov Models for Reading Words from the Human Brain .....	89
<i>Sanne Schoenmakers, Tom Heskes, and Marcel van Gerven</i>	
Predicting Skill-Based Task Performance and Learning with fMRI Motor and Subcortical Network Connectivity .....	93
<i>Aki Nikolaidis, Drew Goatz, Paris Smaragdus, and Arthur Kramer</i>	
<b>Author Index</b> .....	97
