

2015 International Conference on Advanced Mechatronic Systems (ICAMechS 2015)

**Beijing, China
22-24 August 2015**

**IEEE Catalog Number: CFP1518R-POD
ISBN: 978-1-4673-7997-7**

2015 International Conference on Advanced Mechatronic Systems

August 22-24, 2015
Beijing, China

CONTENTS

Renewable sources of energy (SatM01)

<i>Cluster analysis on the service oriented alliance enterprise manufacturing resource</i>	Yunxia Wang, Shenghai Qiu, Chengchong Gao, and Jun Wei	1
<i>Performance and exhaust emissions of a turbocharged common rail DI diesel engine fueled with alcohol</i>	Bin Xu, Yibin Liu, Jian Wu, Chuang Li, Weiwei Shang, and Zhihao Ma	5
<i>Design and simulation of passive filter based on fundamental magnetic flux compensation</i>	Qun Chen and Zongxiao Yang	10
<i>Research on large supermarket fresh food supplier evaluation and selection based on SWOT-entropy weight fuzzy comprehensive model</i>	Ying Yuan, Yi Zhang, Long Di, Ganggang Wu, and Zongxiao Yang	15
<i>A novel outer rotor axial primary magnetic circuit permanent magnet generator</i>	Ximei Li and Zongxiao Yang, and Dongliang Song	20

Advanced intelligent control in robotics and mechatronics (SatM02)

<i>Active training research of a lower limb rehabilitation robot based on constrained trajectory</i>	Hongbo Wang, Dong Zhang, Hao Lu, Yongfei Feng, Peng Xu, Razvan-Viorel Mihai, and Luige Vladareanu	24
<i>Fuzzy controller design of the wire feeder of invasive vascular interventional surgery robot</i>	Hongbo Wang, Shuaishuai Wang, Wen Zhang, Liyu Xie, Xue Yang, Luige Vladareanu, and Radu Munteanu	30
<i>Advanced intelligent walking robot control through sliding motion control and bond graphs methods</i>	Ionel Alexandru Gal, Luige Vladareanu, Hongbo Wang, Hongnian Yu, and Mingcong Deng	36
<i>Versatile intelligent portable robot platform for flexible robotic cells with AGV</i>	Luige Vladareanu, Cristian Spirleanu, Mihaela Iliescu, Hongnian Yu, Mingcong Deng, Weizhong Guo, and Feng Gao	42
<i>Haptic intelligent interfaces for NAO robot hand control</i>	Octavian Melinte, Luige Vladareanu, Ligia Munteanu, Hongnian Yu, Shuang Cang, Zengguang Hou, Guibin Bian, and Hongbo Wang	50

Optimization methods and application I (SatM03)

<i>Weak reachability of probabilistic boolean control networks</i>	Zhiqiang Li and Huimin Xiao	56
<i>Oscillation criteria for a class of nonlinear impulsive parabolic system under dirichlet boundary condition</i>	Junhong Liu, Wenxue Liu, Lifeng Li, and Qi Jin	61

<i>Operator-based left coprime factorization for nonlinear systems</i>	Fazhan Tao and Mingcong Deng	66
<i>Passivity-based robust control for uncertain nonlinear feedback systems</i>	Ni Bu and Mingcong Deng	70
<i>Correlated neural activity in spiking networks with topographic couplings</i>	Jinli Xie, Qinjun Zhao, and Jianyu Zhao	75

Optimization methods and applications II (SatP01)

<i>Scheduling of rescue vehicles to forest fires via multi-objective particle swarm optimization</i>	Yaping Ren, Guangdong Tian, and Mengchu Zhou	79
<i>An effective VNSSA algorithm for the blocking flowshop scheduling problem with makespan minimization</i>	Chaoyong Zhang, Zhanpeng Xie, Xinyu Shao, and Guangdong Tian	86
<i>Simulation modeling of shuttle racking system based on automod</i>	Bingfeng Sang and Yukun Liu	90
<i>An expected value multi-objective optimization model to locate a vehicle inspection station</i>	Guangdong Tian and Mengchu Zhou	96
<i>Experimental study on nonlinear vibration control of an L-shape arm</i>	Yanfeng Wu, Mingcong Deng, and Longguo Jin	589

Advanced nonlinear control in robotics (SatP02)

<i>The mechatronic system of eco-dolphin - a fleet of autonomous underwater vehicles</i>	Hong Liu, Xudong Shi, Junzhen Shao, Qi Zhou, Stacey Joseph-Ellison, Johnathan Jaworski, and Ci Wen	108
<i>Extended development of LinuxCNC for control of a delta robot</i>	Feng Huo, Geoksoon Hong, and Anneow Poo	114
<i>Minimizing energy consumption in a U-shaped robotic assembly line</i>	J. Mukund Nilakantan, S.G. Ponnambalam, and George Q. Huang	119
<i>Charged system search algorithm for robotic drill path optimization</i>	G. Kanagaraj, S.G. Ponnambalam, and C.K. Loo	125
<i>Implementation of remotely controllable mobile robot system over mobile Ad-hoc network</i>	Mohammad Shahidul Hasan and Hongnian Yu	131

Control of mechatronic systems I (SatP03)

<i>An interpretation of unbalance vibration compensator for five-axes active magnetic bearing systems based on internal model principle</i>	Taiki Nakamura, Shinji Wakui, and Yukinori Nakamura	137
<i>Vibration suppression of galvano mirror considering whirling of shaft</i>	Keisuke Nakade, Taiki Nakamura, Shinji Wakui, and Yukinori Nakamura	143
<i>A consideration of parameter identification of a linear stage using particle swarm optimization</i>	Marino Watanabe, Yukinori Nakamura, and Shinji Wakui	149
<i>Development of a torque-sensorless viscometer for food processing applications</i>	Seiji Hashimoto, Yuqi Jiang, Amat Basari, and Wei Jiang	154
<i>Study on detection of earthquake using DI value and its application to switching control for air type anti-vibration apparatus</i>	Masayuki Kubota, Hirokazu Mineo, Shinji Wakui, and Yukinori Nakamura	158

New developments on ESP (SatE01)

<i>An overview of supplementary teaching materials for advanced EST students in Japan</i>	Yan Yu and Jie Shi	164
<i>Profiling Japanese EST students' vocabulary ability using the new general service list test (NGSLT) and the new academic word list test (NAWLTL)</i>	Shin'ichi Hashimoto, Yan Yu, Jie Shi, and Haiyan Zhan	170
<i>Peer evaluation of academic presentations by Japanese graduate students: qualitative evaluation</i>		

	Jie Shi and Cross John	174
<i>Teaching poster by using genre approach to science and technology students of a Japanese university</i>		
	Rajagopalan Maheswari Uma and Jie Shi	179
<i>Corpus-based analysis of academic RA genre: the "Results" sub-genre</i>		
	Louvigné Sébastien and Jie Shi	185
<i>Understanding the most essential types of words for Physics undergraduate students</i>		
	Sonia Sharmin	190

Information processing (SatE02)

<i>Modelling a 20MW scale solar farm in an unused angled area near Fukushima nuclear power plant</i>	Amin Mohammadirad and Ken Nagasaka	194
<i>Temporal and spatial projection of wind speed based on modular network SOM for installation of off-shore wind generation</i>		
	Mitsuharu Hayashi and Ken Nagasaka	200
<i>A household load priority scheduling model based on real-time electricity price</i>		
	Bo Hu, Xiao Zhong, and Song Liu	206
<i>Study on cutting surface stripe and wettability of AZ91D magnesium alloy by WEDM-HS</i>		
	Jinkai Xu, Kui Xia, Rongxian Qiu, Linshuai Zhang, Zhanjiang Yu, and Huadong Yu	212
<i>Influence of microstructure on surface wettability</i>		
	Xinxin Zhang, Jinkai Xu, Zhongxu Lian, Zhanjiang Yu and Huadong Yu	217

Nonlinear systems modeling, control and applications (SatE03)

<i>Influences from LCL filter on behaviors of three-phase three-level PWM rectifier</i>		
	Dongsheng Yu, Hong Zhu, and Ciyan Zheng	223
<i>Sliding mode output tracking control based on a fuzzy clustering model</i>		
	Shiwen Tong, Dianwei Qian and Jianjun Fang	228
<i>PID control of air tank temperature system with parameters tuning through network</i>		
	Shiwen Tong, Yushan Li, Junjie Ren, and Yinong Zhang	233
<i>Sliding-mode-based disturbance rejection control of nonlinear power systems with renewable sources</i>		
	Hong Liu and Dianwei Qian	238
<i>Research and application of predictive control algorithm based on fuzzy model</i>		
	Yuan Li, Sen Cong, Shiwen Tong, and JianJun Fang	244

Poster Session

<i>Bipolar neutrosophic sets and their application based on multi-criteria decision making problems</i>		
	Irfan Deli, Mumtaz Ali, and Florentin Smarandache	249
<i>Evaluation method of main production resource in society and industrial park of extreme arid region (I)</i>		
	Litifu Zulati	255
<i>Research on control methods of permanent magnet synchronous motor position servo system</i>		
	Fen Yang, Zhengfeng Ming, Tao Wen, Tong Zhang, and Zhanxia Zhu	261
<i>Comprehensive functions of eco-industrial park in conserving energy and improving ecology</i>		
	Litifu Zulati and Ken Nagasaka	267
<i>Study on fuzzy-logic PID control system of synchronous jack-up system of turbine runner static equilibrium experiment</i>		
	Yongxing Hao, Chaofeng Wang, and Lihui Song	273
<i>The straight line mechanism base on peaucellier inversion instrument</i>		
	Kai He, Lei Guo, and Yuan Song	277
<i>Mechanical design and realization of automatic docking mechanism</i>		
	Xinhu Mo, Lei Guo, Yuan Song, and Ying Zhang	282
<i>Design and implementation of a mechanical calculator for quadratic equation with one unknown</i>		

	Bin Xing, Lei Guo, Shimin Wei, Yuan Song, and Ying Zhang	286
<i>A comparative study on inter-tern short circuit fault of PMSM using finite element analysis and experiment</i>		
	Yongcan Li and Yongchun Liang	290
<i>A research on construction of 30 bus large-scale smart grid model</i>		
	Sho Kainose and Ken Nagasaka	295
<i>Modeling a lithium-ion battery based on a threshold model</i>		
	Zhi Zhang	301
<i>Modelling the relationship between constituents and anti-RSV effect of baikal skullcap root</i>		
	Ke Li, Bonian Zhao, Yan Gao, Bianli Wang, Zongyuan Yu, and Hongpeng Zhao	306
<i>Energy-saving improvement and simulation study on digital hydraulic system</i>		
	Fei Song, Jingjun Lou, and Likun Peng	310
<i>Path planning of airfoil surface for robotic fibre placement</i>		
	Lina Li, Xingang Wang, De Xu, and Min Tan	316
<i>Strongly stable GPC with suppression of steady state gain and closed-loop poles</i>		
	Akira Inoue, Tomohiro Henmi, and Mingcong Deng	322
<i>Model free fault detection using one set of reference input and output data</i>		
	Akira Inoue, Tomohiro Henmi, and Mingcong Deng	328
<i>Research on algorithm of nonlinear self-adaptive flight control system</i>		
	Hao Long and Shujie Song	332
<i>The indoor real-time 3D localization algorithm using UWB</i>		
	Xuehong Li and Shuhua Yang	337
<i>Operator and sliding mode based nonlinear control for cooling and heat-retention system actuated by Peltier devices</i>		
	Takafumi Hatano, Mingcong Deng, and Shin Wakitani	343
<i>Control system design for ionic polymer metal composite using a single neuron based adaptive PID approach</i>		
	Yiping Chang and Hui Wang	349
<i>Evaluation method of main production resource of society and industrial park of extreme arid region (2)</i>		
	Litifu Zulati	353
<i>Dynamic and energy analysis based on bumper system low-speed collision test</i>		
	Zhiming Wang and Li Chen	359
<i>Feasibility of neucube spiking neural network architecture for EMG pattern recognition</i>		
	Long Peng, Zengguang Hou, Nikola Kasabov, Guibin Bian, Luige Vladareanu, and Hongnian Yu	365
<i>Optimal fiber orientations and topology of compliant mechanisms using lamination parameters</i>		
	Xinxing Tong, Wenjie Ge, and Yonghong Zhang	370
<i>A software platform for interactive analysis on 3D medical data</i>		
	Wei Cheng, Yongfei Xiao, and Youlei Zhao	375
<i>Master-slave force control based on Grey GM(1,1) model of robot gripper</i>		
	Wei Cheng, Xuelin Wang, and Haiyan Ma	380
<i>Remote automatic test system based on MATLAB using VISA over LAN</i>		
	Wei Cheng, Fenggui Wang, and Haiyan Ma	384
<i>Cubic spline solution for a class of boundary value problems using spectral collocation method</i>		
	Tianjun Wang, Qixian Zhou, and Tengpeng Cui	388
<i>Maximum efficiency control method of permanent magnet synchronous motor based on three-dimensional table</i>		
	Gensheng Li, Jinfa Xie, and Liyou Xu	392
<i>Modeling and simulation of hydro-mechanical continuously variable transmission system based on Simscape</i>		
	Zhili Zhou, Jiazhen Zhang, Zhiqiang Guo and Liyou Xu	397
<i>Performance comparison for savonius type wind turbines by numerical analysis approaches</i>		
	Lei Song, Hongzhao Liu, and Zongxiao Yang	402

<i>Fuzzy clustering analysis of batch production recipe</i>	Shanzhong Liu and Xiaonan Song	408
<i>Fully discrete subgrid stabilized finite element method for the Darcy-Brinkman equations in double-diffusion convection</i>	Yunzhang Zhang, Zhoufeng Wang, and Qili Tang	413
<i>The simplified homogeneous balance method and its application to Whitham-Broer-Kaup-Like equations</i>	Wei Li and Xinrui Wang	418

Advanced control systems design - theory and applications (SunM01)

<i>Tracking control of quad-rotor helicopters suspended a power supply cable with on-line estimation of disturbances</i>	Hayami Hayakawa, Shogo Obata, and Manabu Yamada	423
<i>Multivariable controller design evaluating closed-loop interaction by iterative LMI optimization using frequency response data</i>	Shogo Shinoda, Kazuhiro Yubai, Daisuke Yashiro, and Junji Hirai	429
<i>Flow disturbance suppression for a pneumatic vibration isolator using a central pattern generator</i>	Yukinori Nakamura, Daishi Funaki, Mami Kimura, and Shinji Wakui	435
<i>Design of a fault tolerant control system using Mahalanobis-Taguchi (MT) system</i>	Shin Wakitani and Mingcong Deng	441
<i>Data-driven PID gain tuning for unknown impulse disturbance attenuation</i>	Shiro Masuda	445

Mechatronic systems analysis and control I (SunM02)

<i>Size and weight reduction of semicircular duplex manipulator for rescue operation</i>	Soichiro Kimura and Kazuyuki Ito	450
<i>Adaptive fault diagnosis for continuous time-delay repetitive system subject to sensor fault</i>	Haigang Zhang, Sen Zhang, and Yixin Yin	456
<i>Model identification and adaptive control design for a 6 DOFs manipulator</i>	Weiliang Ge, Wei He, Yunchuan Li, and Chenguang Yang	461
<i>Precise tracking control for Piezo-actuated stage using inverse compensation and model predictive control</i>	Nguyen Manh Linh, Tran Vu Minh, and Xinkai Chen	467
<i>Oscillatory behavior based fault feature extraction for bearing fault diagnosis</i>	Juanjuan Shi and Ming Liang	473

Complex systems control and applications I (SunM03)

<i>Switched reluctance motor/generator simulation research based on compressed air energy storage system</i>	Xiaoshu Zan and Hong Zhu	479
<i>Surface flaws detection algorithms for large aperture optical element</i>	Zhengtao Zhang, De Xu, Xian Tao, and Feng Zhang	485
<i>An adaptive observer-based fault detection and diagnosis for nonlinear systems with sensor and actuator faults</i>	Xiaomo Yan, Bailing Tian, and Hong Wang	491
<i>Minimum mutual information control for multi-variable non-Gaussian stochastic systems</i>	Qichun Zhang, Aiping Wang, and Hong Wang	497
<i>Design and simulation of dual fuzzy self-adjusting immune PID controller for grain drying system</i>	Aini Dai, Xiaoguang Zhou, Chi Zhang, Xiangdong Liu, and Huiling Zhou	503

Control of mechatronic systems II (SunP01)

<i>A brushless DC motor speed control system based on DSP controller</i>	Songming Cao, Yong Liu, Ming Hu, Xin Fu	508
<i>Precision size measurement instrument for irregular objects</i>	Wanji Liu and Xian Tao	513

<i>A new method of periodicity estimation for mechanical acoustic data</i>	Zipan Hong and Guoliang Lu	519
<i>Acoustic emission signal harr wavelet denoise research</i>	Kenan Shen, Mingcong Deng, and Ming Li	523
<i>Operator-based nonlinear networked control system with packet error</i>	Tomohito Hanawa and Mingcong Deng	528
<i>Optimal control of non-prehensile manipulation control by two cooperative arms</i>	Changan Jiang, Satoshi Ueno, and Yoshikazu Hayakawa	533

Mechatronic systems analysis and control II (SunP02)

<i>SVR-based input-output mapping of a micro-hand</i>	Kou Fujita, Shuichi Wakimoto, Mingcong Deng, and Shin Wakitani	538
<i>Nonlinear remote temperature control of a spiral plate heat exchanger</i>	Ryohei Fujii, Mingcong Deng, and Shin Wakitani	542
<i>Operator based voltage control experiments of thermoelectric generation system</i>	Ryuji Yoshida, Mingcong Deng, and Shin Wakitani	548
<i>Robust controller design for networked control system with packet dropout and quantization error</i>	Haiquan Wang, Rongxiang Gao, Qian Zhang, and Shengjun Wen	552
<i>Active power filter design for improving power quality</i>	Junming Xiao, Xiangming Zhang, Shengjun Wen, and Zhengbo Liu	557
<i>Fractional PID based stability control for a single link rotary inverted pendulum</i>	Wudai Liao, Zhengbo Liu, and Shengjun Wen, Shuhui Bi, and Dongyun Wang	562

Complex systems control and applications II (SunP03)

<i>Design of the automatic sample preparation system</i>	Xin Fu, Shimin Wei, Yong Liu, Ming Hu, and Songming Cao	567
<i>IPMC robust nonlinear tracking control design based on a multi-objective particle swarm optimization-based RRCF approach</i>	Wudai Liao, Tongbin Yan, Aihui Wang, and Yiwen Fu	571
<i>Robot arm with micro-hand robust control design using operator-based robust right coprime factorization approach</i>	Aihui Wang, Hongnian Yu, Dongyun Wang, and Mingcong Deng	577
<i>Complex event processing on uncertain data streams in product manufacturing process</i>	Na Mao and Jie Tan	583
<i>Detecting cracks on a concrete surface using histogram of oriented gradients</i>	Lin Meng, Zhongkui Wang, Yoshiyuki Fujikawa, and Shigeru Oyanagi	103
<i>Power balance control for switched reluctance generator integrated in DC microgrid</i>	T. Wang, D. He, Q. Wang, Y. Huo, and L. Lu and J. Li	594
