

2015 European Conference on Circuit Theory and Design (ECCTD 2015)

**Trondheim, Norway
24-26 August 2015**

**IEEE Catalog Number: CFP15ECC-POD
ISBN: 978-1-4799-9878-4**

Table of Contents

On Negative Resistance Oscillators as Modified Multi-vibrators	1
<i>Erik Lindberg, K. Murali and Arunas Tamasevicius</i>	
An All-Digital, CMOS Zero Current Switching Circuit for Thermal Energy Harvesting	5
<i>Mohammad Alhawari, Baker Mohammad, Hani Saleh and Mohammed Ismail</i>	
Analog Layout Synthesis with Knowledge Mining	9
<i>Po-Hsun Wu, Mark Po-Hung Lin and Tsung-Yi Ho</i>	
A Fully-Differential OTA in 28 nm UTBB FDSOI CMOS for PGA Applications	13
<i>Prakash Harikumar, J Jacob Wikner and Atila Alvandpour</i>	
Techniques for reliable and accurate numerical solutions of memristor models	17
<i>Alon Ascoli, Ronald Tetzlaff, Zdenek Biolek, Dalibor Biolek, Viera Biolkova and Zdenek Kolka</i>	
Pixel interlacing to trade off the resolution of a Cellular Processor Array against more registers	21
<i>Julien Martel, Miguel Chau, Matthew Cook and Piotr Dudek</i>	
Reliability Schemes for Nano-Communications	25
<i>Valeriu Beiu and Leonard Daus</i>	
From Fan-out Wafer to Fan-out Panel Level Packaging	29
<i>Tanja Braun, Karl-Friedrich Becker, Stefan Raatz, Volker Bader, Jörg Bauer, Rolf Aschenbrenner, Steve Voges, Tina Thomas, Ruben Kahle and Klaus-Dieter Lang</i>	
Grounded Inductance Simulator Topologies Realization with Single Current Differencing Current Conveyor	33
<i>Firat Kacar, Hakan Kuntman and Ayten Kuntman</i>	
A Fully Integrated Audio Amplifier in Flexible a-IGZO TFT Technology for Printed Piezoelectric Loudspeakers	37
<i>Reza Shabanpour, Corrado Carta, Tilo Meister, Koichi Ishida, Bahman Kheradmand-Boroujeni, Niko Stephan Munzenrieder, Giovanni Antonio Salvatore, Luisa Petti, Gerhard Troester and Frank Ellinger</i>	
Narrowest Band-pass Digital FIR Filters	41
<i>Pavel Zahradnik, Miroslav Vlcek, Michal Susta and Boris Simak</i>	
LNA Noise Parameter Measurement	45
<i>Bernhard Lehmeier, Michel T. Ivrlac and Josef A. Nossek</i>	

A Digitally Assisted 20MHz-600MHz 16-Phase DLL Enhanced with Dynamic Gain Control Loop	49
<i>Arash Hejazi, Sarang Kazeminia and Roozbeh Abdollahi</i>	
A Run-time Self-Adaptive Resource Allocation Framework for MPSoC Systems	53
<i>Wei Quan and Andy Pimentel</i>	
Optimized Linear Complementary Codes Implementation for Hardware Trojan Prevention	57
<i>Claude Carlet, Abderrahman Daif, Jean-Luc Danger, Sylvain Guilley, Zakaria Najm, Xuan Thuy Ngo, Thibault Porteboeuf and Cédric Tavernier</i>	
Analysis to Optimize Sensitivity of RF Energy Harvester with Voltage Boost Circuit	61
<i>Dan Luo, Hiroshi Fuketa, Kenichi Matsunaga, Hiroki Morimura, Makoto Takamiya and Takayasu Sakurai</i>	
Overview of Hardware Trojan Detection and Prevention Methods	65
<i>Julien Francq and Florian Frick</i>	
A High Voltage Current Sense Amplifier With Extended Input Common Mode Range Based On A Low Voltage Operational Amplifier Cell	69
<i>Razvan Puscasu, Pavel Brinzoi, Laurentiu Creosteanu and Gheorghe Brezeanu</i>	
A high dynamic range image sensor with linear response based on asynchronous event detection	73
<i>Juan A. Leñero-Bardallo, Ricardo Carmona-Galán and Ángel Rodríguez-Vázquez</i>	
Quick and Easy CMOS Amplifier Design And Optimization	77
<i>Gordon Roberts</i>	
PVT Variations in Differential Flip-Flops: A Comparative Analysis	81
<i>Massimo Alioto, Gaetano Palumbo and Elio Consoli</i>	
Negative Resistance Circuit for Damping an Array of Coupled FitzHugh-Nagumo Oscillators	85
<i>Arunas Tamasevicius, Elena Adomaitiene, Skaidra Bumeliene, Gytis Mykolaitis and Erik Lindberg</i>	
Design of an Op-Amp Free Voltage Reference with PWM Regulation	89
<i>Pinar Basak Basyurt, Edoardo Bonizzoni, Franco Maloberti and Devrim Yilmaz Aksin</i>	

Generalized Rule of Homothety of Ideal Memristors and Their Siblings . . .	93
<i>Zdenek Biolek, Dalibor Biolek, Viera Biolkova, Zdenek Kolka, Alon Ascoli and Ronald Tetzlaff</i>	
Hardware Property Checker for Run-Time Hardware Trojan Detection . . .	97
<i>Xuan Thuy Ngo, Jean-Luc Danger, Sylvain Guilley, Zakaria Najm and Olivier Emery</i>	
New Image Denoising Method using Multiple-Minimum Cuts based on Maximum-Flow Neural Network	101
<i>Masatoshi Sato, Hisashi Aomori, Tsuyoshi Otake and Mamoru Tanaka</i>	
A 100-MHz Radio-Frequency Energy Harvester for Passively Powered Devices	105
<i>Chih-Hsien Chou and Ping-Hsuan Hsieh</i>	
Generation of parameterized macromodels of two-port RF circuits for SPICE simulator	109
<i>Katarzyna Opalska</i>	
Reduction of Harmonic Balance Equations Through Galerkin's Method . .	113
<i>Federico Bizzarri, Angelo Brambilla and Lorenzo Codecasa</i>	
Statistical Analysis of Static Noise Margins	117
<i>Valeriu Beiu and Mihai Tache</i>	
Novel Control Methods for Phase Lock Loops	121
<i>Juergen Roeber, Christian Zwick, Andreas Baenisch, Simon Dirauf, Guenter Roppenecker and Robert Weigel</i>	
Design of Current Mode Front-end Amplifiers with Optimal Timing Performance for High-gain Photodetectors	125
<i>Fabio Ciciriello, Francesco Corsi, Francesco Licciulli, Cristoforo Marzocca and Gianvito Matarrese</i>	
Hardware Trojan Prevention using Layout-Level Design Approach	129
<i>Papa-.Sidy Ba, Manikandan Palanichamy, Sophie Dupuis, Marie-Lise Flottes, Giorgio Di Natale and Bruno Rouzeyre</i>	
Bendable Energy-Harvesting Module with Organic Photovoltaic, Rechargeable Battery, and a-IGZO TFT Charging Electronics	133
<i>Tilo Meister, Koichi Ishida, Reza Shabanpour, Bahman K. Boroujeni, Corrado Carta, Frank Ellinger, Niko Münzenrieder, Luisa Petti, Giovanni A. Salvatore, Gerhard Tröster, Michael Wagner, Pol Ghesquiere, Stefan Kiefl and Martin Krebs</i>	
Low Power Continuous-Time Delta-Sigma ADC with Current Output DAC	137
<i>Niels Marker-Villumsen, Ivan H. H. Jørgensen and Erik Bruun</i>	

SEMBA: a SEM Based Acquisition technique for fast invasive Hardware Trojan detection	141
<i>Franck Courbon, Philippe Loubet Moundi, Jacques Fournier and Assia Tria</i>	
Remarks on the Adler's Equation	145
<i>Antonio Buonomo and Alessandro Lo Schiavo</i>	
Memristor-based Center-of-Gravity (COG) Defuzzifier Circuit	149
<i>Sherif Amer, Ahmed Madian and Ahmed Emara</i>	
Memristor-Based Linear Feedback Shift Register Based on Material Implication Logic	153
<i>Mehri Teimoory, Amirali Amirsoleimani, Arash Ahmadi, Shahpour Alirezaee, Saeideh Salimpour and Majid Ahmadi</i>	
The Argo NOC: Combining TDM and GALS	157
<i>Evangelia Kasapaki and Jens Sparsoe</i>	
A Path Towards Average-Case Silicon via Asynchronous Resilient Bundled-data Design	161
<i>Peter Beerel and Ney Calazans</i>	
Phase noise spectrum of oscillators described by Itô stochastic differential equations	165
<i>Michele Bonnin, Fernando Corinto, Fabrizio Bonani and Fabio Traversa</i>	
Energy Harvesting Techniques: Energy Sources, Power Management and Conversion	169
<i>Philex Ming-Yan Fan, Oi-Ying Wong, Ming-Jie Chung, Tze-Yun Su, Xin Zhang and Po-Hung Chen</i>	
Realistic Path Loss Estimation for Capacitive Body-Coupled Communication	173
<i>Muhammad Irfan Kazim, Muhammad Imran Kazim and J Jacob Wikner</i>	
Effective (Spur-Free) Dithering of Digital Delta-Sigma Modulators with Pseudorandom Dither	177
<i>Hongjia Mo and Michael Peter Kennedy</i>	
Inductive Charging of an EDLC Powered Wristband Device for Medical Measurements	181
<i>Stijn Wielandt, Bart Thoen, Jean-Pierre Goemaere, Lieven De Strycker and Nobby Stevens</i>	
Impact of Guard Ring Layout on the Stacked Low-Voltage PMOS for High-Voltage ESD Protection	185

Seian-Feng Liao, Kai-Neng Tang, Ming-Dou Ker, Jia-Rong Yeh, Hwa-Chyi Chiou, Yeh-Jen Huang, Chun-Chien Tsai, Yeh-Ning Jou and Geeng-Lih Lin

Electromechanical analogy for d33 piezoelectric harvester power calculations	189
<i>Shadi Tawfiq and Mahmoud Alahmad</i>	
A High Resolution Time-to-Digital Converter Utilizing Coupled Oscillator, ORIGAMI	192
<i>Takeshi Shima and Nicodimus Retdian</i>	
Inverter-based Low-power, Low-noise SC-VGA and 8 Channel Pipelined S/H Analog Beamformer for Ultrasound Imaging Probes	196
<i>Peng Wang and Trond Ytterdal</i>	
A digitally corrected bandgap voltage reference with a 3 σ temperature coefficient of 3.8ppm/K	200
<i>Hannes Badertscher, Armin Stocklin, Roman Willi, Andreas Fitzi and Paul Zbinden</i>	
Modelling squeeze film damping in packaged energy harvesters	204
<i>Fredrik Ohlsson, Erik Svensson and Cristina Rusu</i>	
CNN Modeling of Nano-Structures	208
<i>Angela Slavova and Maya Markova</i>	
A High Resolution and Low Jitter Linear Delay Line for IR-UWB Template Pulse Synchronization	212
<i>Okan Zafer Batur, Naci Pekçokgüler, Günhan DüNDAR and Mutlu Koca</i>	
New Sensor Concept for Intra-Frame Scene and Speed Capturing	216
<i>Máté Németh and Ákos Zarándy</i>	
Loop Filter Design and Optimization for Quadrature Delta-Sigma Converters	220
<i>Marko Neitola</i>	
A Complete Classification of Memristor Devices	224
<i>Fernando Corinto, Pier Paolo Civalieri and Leon Chua</i>	
System Scenario Framework evaluation on EFM32 using the H264/AVC encoder control structure	228
<i>Yahya H. Yassin, Per Gunnar Kjeldsberg and Francky Catthoor</i>	
The Synthesis of Noise Transfer Functions for Bandpass Delta-Sigma Modulators with Tunable Center Frequency	232
<i>Enrico Roverato, Marko Kosunen and Jussi Ryyänen</i>	

Finding All DC Solutions of Nonlinear Circuits Using Parallelogram LP Test	236
<i>Kiyotaka Yamamura and Suguru Ishiguro</i>	
Memristive Crossbar Design and Test in Non-adaptive Proactive Reconfiguring Scheme	240
<i>Peyman Pouyan, Esteve Amat and Antonio Rubio</i>	
Thermal Load Analysis and Real Time Hot Spots Recognition in TOKAMAKs: a Cellular Nonlinear Networks approach	244
<i>Maria Laura Apicella, Fabio Battaglia, Arturo Buscarino, Claudia Corradino, Luigi Fortuna, Mattia Frasca and Giuseppe Mazzitelli</i>	
A Novel Forward Body Biasing Technique for Subthreshold Ring Oscillators	248
<i>Yuan Chang, Shailesh Singh Chouhan and Kari Halonen</i>	
A Survey about Testing Asynchronous Circuits	252
<i>Steffen Zeidler and Milos Krstic</i>	
Compensation Circuit with Additional Junction Sensor to Enhance Latchup Immunity for CMOS Integrated Circuits	256
<i>Hui-Wen Tsai and Ming-Dou Ker</i>	
Single-Miller All-Passive Compensation Network for Three-Stage OTAs ..	260
<i>Giuseppe Di Cataldo, Alfio Dario Grasso, Gaetano Palumbo and Salvatore Pennisi</i>	
Combined RF and multiphase PWM Transmitter	264
<i>Muhammaf Fahim Ul Haque, Ted Johansson and Dake Liu</i>	
Electrically Testable CMOS Image Pixel Circuit	268
<i>Masaki Hashizume, Shingo Saijiyo and Hiroyuki Yotsuyanagi</i>	
Design Consideration of Recent Advanced Low-Voltage CMOS Boost Converter for Energy Harvesting	272
<i>Ying-Khai Teh and Philip K.T. Mok</i>	
Cellular Network of Networks on Dynamically Partial Reconfigurable FPGA	276
<i>Emrah Abtioglu, Ramazan Yeniceri and Mustak Erhan Yalcin</i>	
Linearization of Synthesizable VCO-Based ADCs Using Delta Modulation	280
<i>Vishnu Unnikrishnan and Mark Vesterbacka</i>	
Multiconductor Transmission Line Model with Frequency Dependent Parameters in Time Domain	284
<i>Agnieszka Wardzińska and Wojciech Bandurski</i>	

Power-Efficient Estimation of Silicon Neuron Firing Rates with Floating-Gate Transistors	288
<i>Stephen Nease and Elisabetta Chicca</i>	
Surfing Front-end Architectures for Ultrasound Imaging Systems	292
<i>Peng Wang, Thomas Halvorsrød and Trond Ytterdal</i>	
A Differential Inverter-based Switched-Capacitor Oscillator in 65 nm CMOS Technology	296
<i>Peng Wang, Gyorgy Csaba, Wolfgang Porod and Trond Ytterdal</i>	
Power-Efficient Time-to-Digital Converter for All-Digital Frequency Locked Loops	300
<i>Muhammad Pasha, Niklas Andersson and Mark Vesterbacka</i>	
Motion Correction of Thermographic Images in Neurosurgery	304
<i>Vanessa Senger, Ronald Tetzlaff, Jens Müller, Nico Hoffmann, Julia Hollmach, Christian Schnabel, Yordan Radev, Matthias Kirsch, Uwe Petersohn, Gerald Steiner and Edmund Koch</i>	
Design of Efficient CMOS Rectifiers for Integrated Piezo-MEMS Energy-Harvesting Power Management Systems	308
<i>Martin Nielsen-Lönn, Prakash Harikumar, J Jacob Wikner and Atila Alvandpour</i>	
A micro power temperature compensated frequency generating circuit . . .	312
<i>Shailesh Singh Chouhan and Kari Halonen</i>	
Design of Low-Noise Switched-Capacitor Low-Pass Filters with Adaptive Configuration	316
<i>Nicodimus Retdian and Takeshi Shima</i>	
A lumped model of lymphatic systems suitable for large scale simulations	320
<i>Giancarlo Storti Gajani, Federica Boschetti, Daniela Negrini, Raffaele Martellaccio, Giorgio Milanese, Federico Bizzarri and Angelo Brambilla</i>	
All-Digital Phase-Locked Loop in 40 nm CMOS for 5.8 Gbps Serial Link Transmitter	324
<i>Yury Antonov, Tero Tikka, Kari Stadius and Jussi Rynänen</i>	
About quantization of audio signals for wildlife intruder detection systems	328
<i>Lacrimioara Grama and Corneliu Rusu</i>	
Transfer characteristics and bandwidth limitation in a linear drift memristor model	332
<i>Joakim Alvbrant, Vahid Keshmiri and J Jacob Wikner</i>	

Analog Computation Methods with the Help of Analog and Pseudo-Digital Carry Signals	336
<i>Christopher Soell, Lan Shi, Andreas Baenisch, Juergen Roeber, Thomas Ussmueller and Robert Weigel</i>	
Memristor State-Space Embedding	340
<i>Wael Dghais, Luis Nero Alves, Joana Catarina Mendes, Jonathan Rodriguez and José Carlos Pedro</i>	
A 65 nm Standard Cell Library for Ultra Low-power Applications	344
<i>Marten Vohrmann, Saikat Chatterjee, Sven Lütke-meier, Thorsten Jungeblut, Mario Porrmann and Ulrich Rückert</i>	
Ultra-Low Power Volatile and Non-Volatile Asynchronous Circuits using Back-Biasing	348
<i>Edith Beigne, Jean-Frederic Christmann, Eldar Zianbetov and Gregory Di Pendina</i>	
A Least Squares Method Applied to Multiphase Switched Capacitor Converters	352
<i>Alexander Kushnerov and Alexandre Yakovlev</i>	
On the Usage of Harmonic Balance to Simulate Memristive Devices and Circuits	356
<i>Rathnakannan Kailasam, Luis Nero Alves, Joana Catarina Mendes and José Carlos Pedro</i>	
VLSI Hybrid DC-DC Regulator	360
<i>Jordi Cosp-Vilella and Herminio Martinez-Garcia</i>	
A measurement system for wrist movements in biomedical applications . .	364
<i>Bence Borbely, Attila Tihanyi and Peter Szolgay</i>	
Efficient global sensitivity analysis method for models of systems with functional outputs	368
<i>Leszek Opalski</i>	
A Wide Range All-Digital Delay Locked Loop for Video Applications . . .	372
<i>Muhammad Pasha, Yasir Ali Shah and J Jacob Wikner</i>	
Complex behavior in memristor circuits based on static nonlinear two-ports and dynamic bipole	376
<i>Jacopo Secco, Mario Biey, Fernando Corinto, Alon Ascoli and Ronald Tetzlaff</i>	
A Pausible Clock with Crystal Oscillator Accuracy	380
<i>Robert Najvirt and Andreas Steininger</i>	

An Improved Estimation Method of 4 port S-parameters with 2 port Measurements	384
<i>Noboru Maeda, Shinji Fukui, Toshikazu Sekine and Yasuhiro Takahashi</i>	
Exploiting Short Channel Effects and Multi-Vt Technology for Increased Robustness and Reduced Energy Consumption, with application to a 16-bit Subthreshold Adder Implemented in 65 nm CMOS	388
<i>Ali Asghar Vatanjou, Trond Ytterdal and Snorre Aunet</i>	
Adaptive Sparse Matrix Indexing Technique for Simulation of Electronic Circuits Based on λ – calculus	392
<i>David Cerny and Josef Dobes</i>	
Use of GPUs in the LHCb trigger	396
<i>Alexey Badalov, Daniel Campora, Niko Neufeld and Xavier Vilasis-Cardona</i>	
Voltage-Mode All-Pass Filter Passive Scheme Based on Floating Negative Resistor and Grounded Capacitor	400
<i>Norbert Herencsar, Jaroslav Koton, Kamil Vrba, Shahram Minaei and Izzet Cem Goknar</i>	
Confidence Intervals at Multiconductor Transmission Lines with Stochastic Excitations	404
<i>Lubomir Brancik and Edita Kolarova</i>	
4 Sub-/Near-Threshold Flip-Flops with Application to Frequency Dividers	408
<i>Ali Asghar Vatanjou, Trond Ytterdal and Snorre Aunet</i>	
Bandwidth-to-Area Comparison of Through Silicon Vias and Inductive Links for 3-D ICs	412
<i>Ioannis Papistas and Vasilis Pavlidis</i>	
Generalized Division-Free Architecture and Compact Memory Structure for Resampling in Particle Filters	416
<i>Syed Asad Alam and Oscar Gustafsson</i>	
Clock Phase Imbalance and Phase Noise	420
<i>Fahad Qazi and Jerzy Dabrowski</i>	
Complex Path Impedance Estimation and Matching Requirements for Body-Coupled Communication	424
<i>Muhammad Irfan Kazim, Muhammad Imran Kazim and J Jacob Wikner</i>	
Application Possibilities of VDCC In General Floating Element Simulator Circuit	428
<i>Aslihan Kartci, Umut Engin Ayten, Norbert Herencsar, Roman Sotner, Jan Jerabek and Kamil Vrba</i>	

Distant Aircraft Detection in Sense-and-Avoid on Kilo-Processor Architectures	432
<i>Tamas Zsedrovits, Akos Zarandy, Borbala Jani Matyasne Pencz, Antal Hiba, Mate Nemeth and Balint Vanek</i>	
Design of Current-Mode Class 1 Frequency-Agile Filter Employing CDTAs	436
<i>Mesut Atasoyu, Hakan Kuntman, Bilgin Metin, Norbert Herencsar and Oguzhan Cicekoglu</i>	
On Fixed-Point Implementation of Symmetric Matrix Inversion	440
<i>Carl Ingemarsson and Oscar Gustafsson</i>	
Run-Time Middleware to Support Real-Time System Scenarios	444
<i>Kees Goossens, Martijn Koedam, Shubhendu Sinha, Andrew Nelson and Marc Geilen</i>
