

2015 Power Generation System and Renewable Energy Technologies (PGSRET 2015)

**Islamabad, Pakistan
10 – 11 June 2015**

**IEEE Catalog Number: CFP15PGS-POD
ISBN: 978-1-4673-6814-8**

Table of Contents

1	Nuclear Education and Training for Nuclear Power Program	1
2	Spent Fuel Analysis of Material Test Research Reactor using ORIGEN2 Computer Code	5
3	4S Reactor: An Educational Model for Universities A Gen IV Reactor - Super Safe Small and Simple	12
4	Development of Reactor Physics Monte Carlo Model for MIT BEAVRS	15
5	Multi-group Cross section for New Group Structure Using Weighting Spectrum for Sodium Cooled Fast Reactor	18
6	Role of Advanced Nuclear Reactor Technologies in Meeting the Growing Energy Demands	22
7	Radioactive Waste Analysis of CNPP-1 (PWR) Spent Nuclear Fuel	27
8	Study of Gamma Irradiation Effects on CoaxialCables	32
9	Monte Carlo EGS5 Simulations of High PurityGermanium (HPGe) Detector	36
10	Design and Experimental Validation of Horizontal Axis Ocean Current Turbine	39
11	Design and Structural Analysis of Vertical Axis Ocean Current Turbine	45
12	Economic Evaluation of Tarbela Dam	48
13	Design and fabrication of wave energy power plant using oscillating water column technique	51
14	Performance of Grid-Integrated Photovoltaic/Fuel Cell/ Electrolyzer/Battery Hybrid Power System	55
15	Power Consumption Measurement & Configuration Time of FPGA	63
16	Review of Solar Thermal Water Heater simulations using TRNSYS	68
17	Power Optimization of Pseudo Noise Based optical transmitter using LVCMOS IO Standard	74
18	Non-Inductive DC-DC Regulated Boost Converter as Battery Charger for Photovoltaic	81
19	Comparative Analysis of Multi-Input DC/DC Converter Topology for Hybrid Renewable Energy Systems	85
20	PV based PHEVs Smart Charging Station Facility	90
21	Hybrid Renewable Energy Systems: Hybridization and Advance Control	96
22	Performance Analysis of Static Transfer Switch using MATLAB/Simulink	101
23	Economic Analysis of a Small Hybrid Power System	107
24	A Simple and Economical Design of Micro-Hydro Power Generation System	112
25	Smart Grid—Energizing Towards a Greener Future	119
26	Quaid-e-Azam Solar Power Park: Prospects and Challenges	124
27	Design Optimization and Experimental Investigation of Solar Assisted 1 Ton (3.516 KW) Vapor Absorption Air Conditioning System	130
28	Analysis and Optimization of 132KV Grid Using ETAP	136

29	Economic Power Generation for an off-grid site in Pakistan	142
30	Modeling of wind power plant using MATLAB	148
31	Comparison Based Distributed Generation Implementation Algorithm for the Performance Enhancement of Radial Distribution System	153
32	Investigation on physical properties of solutionprocessed inorganic metal-oxides based charge extraction layers for 3G hybrid solar cells	162
33	Effect of calcination on the particle size of nano-Nb2O5 for development as photo-anode material in advanced generation DSSCs	169
34	A study of inter-step stirring effects on the thickness and yield of graphene oxide prepared through an improved Hummers method	175
35	Low cost and non-toxic preparation of Cu ₂ ZnSnS ₄ absorber material for thin film photovoltaics and studies its structural and thermal properties	180
36	Dielectric Properties of Transformer Oil based Silica Nanofluids	184
37	Effect of Compound Parabolic Concentrator on performance of Photovoltaic module	187
38	CFD analysis of a Savonius Vertical Axis Wind Turbine	192
39	Insulating Properties of Transformer Oil-based Silica Nanofluids	195
40	Power Economic Dispatch Using Particle Swarm Optimization	198
41	A Survey of Control Strategies for Implementation of Optimized and Reliable Operation of Renewable Energy Based Microgrids in Islanded Mode	205
42	Generation of Isolated DC Voltage Sources for Multilevel Inverters	210
43	Smart Solar AC Generator without Inverter	216
44	Design and analysis of thermoelectric material based roof top energy harvesting system for Pakistan	222
45	Investigation of the effects of calcination temperature on the structure of LaMgAl ₁₁ O ₁₉ for thermal barrier coating applications	225
46	Considerations in the Design and Manufacturing of a Load Cell for Measuring Dynamic Compressive Loads	229
47	Analysis of impact induced damage in composites for wind turbine blades	235
48	Technical and financial analysis of 50MW wind farm at Gwadar, Baluchistan	241
49	Investigation of thermal behavior and kinetic analysis of Pakistani biomass: Rice husk, sugarcane bagasse and wheat straw using thermogravimetric analysis	246
50	Study of Scope and Effects of Isolated Small Distributed Generation Sources and their Integration With Existing System	253
51	Economic Planning of Network for Integration of Renewable: A Review	258
52	Optimal Electric Vehicle Load Management for Minimization of Losses	261
53	Reduction in Building Energy Requirements by Modern Energy Conservation Techniques	267
54	Heating/Cooling Degree Days and Building Energy Consumption in Pakistan	272
55	Modeling and Simulation of Vehicles' Energy Conversion Techniques	276
56	Utilisation of geothermal energy in Jordan	281
57	General Overview of Using High Voltage Direct Current (HVDC) Transmission in Pakistan for Maximum Efficiency and Performance	290

58	The status and prospectus of renewable energy in Palestine	295
59	Geothermal energy in Palestine practical applications	300
60	Heat Estimation of Road Side Herbs: GT Road, Wah Cantt	304
61	Prospects of Bagasse as a Feasible Bio-fuel for Electricity Generation in Pakistan – A Realistic Approach	308
62	The cost for economic growth: A study on the Energy Demand of Pakistan using TIMES	312
63	Effect of increase in Utility Price on feasibility of a Power Generation Project	316
64	Protection of Distribution Systems with Significant Penetration of Distributed Generation	320
65	Production of Biofuels from Micro ALGAE and green wastes through Anaerobic Digestion	326
66	Simulation and Implementation of Solar Power Battery Charger using Perturb & Observe Algorithm	332
67	Non- Linear Analytic Approaches of Power Flow Analysis and Voltage Profile Improvement	338
68	Simulation, Design and Fabrication of an Efficient Single phase Transformer	345
69	Electronic Ballast Circuit Configurations for Fluorescent Lamps	350
70	DC Voltage regulator for battery less PV system using MPPT	356
71	Voltage Profile – A study related to Sustainability to the Customers	362
72	Implementation and Performance Analysis of two MPPT Algorithms based on Push- Pull Converter	368
73	Optimization based Individual and Cooperative DS Min Smart Grids: A Review	374
74	Solar Power Remote Monitoring and Controlling Using Arduino, LabVIEW and Web browser	380
75	Robust Fault Detection of Linearized Power Grid Network System	384
76	Efficient Multiple Lines Outage Detection in Smart Grid	390
77	Analysis of Repetitive Control of Grid Connected Inverter	396
