

2015 International Conference on Embedded Software (EMSOFT 2015)

**Amsterdam, Netherlands
4 – 9 October 2015**

**IEEE Catalog Number: CFP15MSO-POD
ISBN: 978-1-4673-8080-5**

2015 Proceedings of the International Conference on Embedded Software (EMSOFT)

October 4-9, 2015

Mövenpick Hotel Amsterdam City Center
Amsterdam, The Netherlands

- 1.1 - The Federated Scheduling of Systems of Conditional Sporadic DAG Tasks** 1
Sanjoy Baruah
- 1.2 - Adaptive Runtime Shaping for Mixed-Criticality Systems** 11
Biao Hu, Kai Huang, Gang Chen, Long Cheng, Alois Knoll
- 1.3 - Can Real-Time Systems be Chaotic?** 21
Lothar Thiele, Pratyush Kumar
- 2.1 - Requirements Driven Falsification with Coverage Metrics** 31
Georgios Fainekos, Adel Dokhanchi, Aditya Zutshi, Rahul Sriniva, Sriram Sankaranarayanan
- 2.2 - Reachability of Hybrid Systems in Space-Time** 41
Goran Frehse
- 2.3 - Unbounded-Time Reachability Analysis of Hybrid Systems by Abstract Acceleration** 51
Peter Schrammel
- 3.1 - Numerical Static Analysis of Interrupt-driven Programs via Sequentialization** 55
Xueguang Wu, Liqian Chen, Antoine Miné, Wei Dong, Ji Wang
- 3.2 - Towards an Industrial Use of Sound Static Analysis for the Verification of Concurrent Embedded Avionics Software** 65
Antoine Miné, David Delmas
- 3.3 - A Scalable Algebraic Method to Infer Quadratic Invariants of Switched Systems** 75
Nikolas Stott, Xavier Allamigeon, Stephane Gaubert, Eric Goubault, Sylvie Putot
- 4.1 - Loosely Time-Triggered Architectures: Improvements and Comparisons** 85
Guillaume Baudart, Albert Benveniste, Timothy Bourke
- 4.2 - Parametrized Dataflow Scenarios** 95
Mladen Skelin, Marc Geilen, Francky Catthoor, Sverre Hendseth
- 4.3 - Executing Dataflow Actors as Kahn Processes** 105
Andreas Tretter, Jani Boutellier, James Guthrie, Lars Schor, Lothar Thiele
- 5.1 - Modeling and Simulating Cyber-Physical Systems using CyPhySim** 115
Edward Lee, Mehrdad Niknami, Thierry Noudui, Michael Wetter
- 5.2 - Building a Hybrid Systems Modeler from Synchronous Language Principles** 125
Marc Pouzet

2015 Proceedings of the International Conference on Embedded Software (EMSOFT)

October 4-9, 2015

Mövenpick Hotel Amsterdam City Center
Amsterdam, The Netherlands

- 5.3** - Formal Verification of ACAS X, an Industrial Airborne Collision Avoidance System 127
Jean-Baptiste Jeannin, Khalil Ghorbal, Yanni Kouskoulas, Ryan Gardner, Aurora Schmidt, Erik Zawadzki, André Platzer
- 6.1** - Scalable Scheduling of Energy Control Systems 137
Truong Nghiem, Rahul Mangharam
- 6.2** - Distributed Power Management of Real-time Applications on a GALS Multiprocessor SOC 147
Andrew Nelson, Kees Goossens
- 6.3** - Exp-HE: A Family of Fast Exponentiation Algorithms Resistant to SPA, Fault, and Combined Attacks 157
Carlos Moreno, M. Anwar Hasan, Sebastian Fischmeister
- 7.1** - Data Mining Approach to Temporal Debugging of Embedded Streaming Applications 167
Oleg Iegorov, Alexandre Termier, Vincent Leroy, Jean-François Méhaut, Miguel Santana
- 7.2** - A Framework for Mining Hybrid Automata from Input/Output Traces 177
Ramy Medhat, Ramesh S., Borzoo Bonakdarpour, Sebastian Fischmeister
- 8.1** - Static Memory Management for Efficient Mobile Sensing Applications 187
Octav Chipara, Farley Lai, Daniel Schmidt
- 8.2** - Nonvolatile Main Memory Aware Garbage Collection in High-Level Language Virtual Machine 197
Jingtong Hu, Chen Pan, Mimi Xie, Chengmo Yang, Zili Shao
- 8.3** - Managing GPU Buffers for Caching More Apps in Mobile Systems 207
Sejun Kwon, Sang-Hoon Kim, Jin-Soo Kim, Jinkyu Jeong
- 9A.1** - Automatic Verification of Linear Controller Software 217
Miroslav Pajic, Junkil Park, Insup Lee, George J. Pappas, Oleg Sokolsky
- 9A.2** - Forward Invariant Cuts to Simplify Proofs for Safety 227
Nikos Aréchiga, James Kapinski, Jyotirmoy Deshmukh, André Platzer, Bruce Krogh
- 9A.3** - Bounded Error Flowpipe Computation of Parameterized Linear Systems 237
Ratan Lal, Pavithra Prabhakar
- 9B.1** - Verifying Network Performance of Cyber-Physical Systems with Multiple Runtime Configurations 247
Martin Manderscheid, Gereon Weiss, Rudi Knorr
- 9B.2** - Using Traffic Phase Shifting to Improve AFDX Link Utilization 256
Renato Mancuso, Andrew Louis, Marco Caccamo
