2015 16th International Conference on Computational Problems of Electrical Engineering (CPEE 2015)

Lviv, Ukraine
2-5 September 2015

IEEE Catalog Number: CFP15A10-POD
ISBN: 978-1-4673-7937-3

Contents

Sergiy Babak, Mykhailo Myslovych, Roman Sysak
Construction and Practical Application Peculiarities of Systems for Power Facilities Remote Monitoring and Diagnostics 1
Oleh Biletsky, Natalia Suprunovska, Anatoliy Shcherba
The Optimization of Energy Parameters of the Electrical Systems of Charge of Supercapacitor from Accumulator Battery 4
Yuriy Bobalo, Petro Stakhiv, Natalya Shakhovska
Features of an eLearning Software for Teaching and Self-Studying of Electrical Engineering 7
Liliana Byczkowska-Lipińska, Petro Stakhiv, Yuriy Kozak
The Influence of Parameters of Evolutionary Selection of Model Form on its Precision and Complexity 10
Marcin Cegielski
Estimating of Computation Time of Parallel Algorithm of Computations of Dynamic Processes in GPU Systems 14
Bartosz Chaber, Zuzanna Krawczyk, Jacek Starzyński
Log-Periodic Antenna – the Comparison of Different Simulation Models 17
Krzysztof Chwastek, Artur Wodzyński, Ajay P. S. Baghel, Shrikrishna V. Kulkarni
Anisotropic Properties of Electrical Steels 21
Piotr Dukalski, Robert Rossa, Andrzej Dzikowski, Igor Piotr Kurytnik
Design of PM Motor Dedicated to Longwall Shearer Advance Drive 24
Mykola Dyvak, Andriy Pukas, Iryna Oliynyk
Macromodel of Dynamics of the Electric Power Generated by Small Hydroelectric Power Station Based on Interval Data Analysis 32
Konstantin Dzjuba, Iryna Mazurenko, Yuriy Vasetsky
An Assessment of Accuracy of Approximate Mathematical Model of Pulse Electromagnetic Field of Current Flowing near Conductive Body 36
Volodymyr Emets, Jan Rogowski
Diffraction by a Strip with Different Boundary Conditions on Its Surfaces 39
Andriy Holovatyy, Vasyl Teslyuk
Verilog-AMS Model of Mechanical Component of Integrated Angular Velocity Microsensor for Schematic Design Level 43
Mariya Howykowycz
Comparison of Application Features of Static and Differential Parameters 47
Viacheslav Hrechko, Hrygorii Varskyi, Evgenii Tankevych
Electronic Current Transformer Gapped Sensor Design Parameters Calculation and Selection 52
Jan Izykowski, Eugeniusz Rosolowski, Piotr Pierz
Location of Open Conductor Failure Combined with Phase-to-Earth Fault on Power Line 56
Tadeusz Kaczorek
Positivity and Stability of Discrete-Time and Continuous-Time Nonlinear Systems 59
Andrzej Kandyba, Marian Hyla, Igor Piotr Kurytnik
Control of Transistors in AC Voltage PWM Controller with Elimination of Commutation Overvoltages 62
Myroslav Kiselychnyk
Complex Estimation of Electronics Quality 68
Ihor Kondratenko, Andriy Zhiltsov, Vyacheslav Vasyuk
Simulation of Discharge Capacity Axle Symmetric Systems “Coil - Non-Ferromagnetic Massive Disk” by the Method of Integral Equations 71
Peter Kondratov, Albert Oganesyan, Ivan Prudyus, Viktor Tkachenko,Sergiy Fabirovskyy
Subpixel Processing of Digital Images Obtained with CCD Matrix 74
Bohdan Kopchak
Synthesis of Automatic Control Systems by a Particle Swarm Optimization Method Using Butterworth Fractional Standard Forms 78
Vasyl Korud, Orest Hamola, Serhiy Rendzinyak, Olena Gajduchok
The Advantages of the Hybrid Laboratory Work on Electrical Engineering 81
Nikolai Kostin, Tatyana Mishchenko, Lyudmila Shumikhina
Correlation Theory of Random Processes in Problems Concerning Power Systems with Electric Transport 84
Oleksandr Kozlovskyi, Dmitro Trushakov, Serhiy Rendzinyak
Icing Sensor on the Overhead Powerlines Wires 88
Igor Piotr Kurytnik, Tomasz Dróżdż, Piotr Nawara

Sensitivity Method for Evaluating Impact of Accuracy of The Measurement Path During Esd Generator Verification 92
Vadim Lobodzinskiy, Lyudmila Maslak
Mathematical Modeling of the Three-Phase High-Voltage Cable Lines under the Theory of Multiterminal Networks 96
Andriy Lozynskyy, Lyubomyr Demkiv
Stability Analysis of Dynamical System with Variable Coefficients and Fuzzy Controller 99
Orest Lozynskyy, Yaroslav Paranchuk, Roman Paranchuk
Fuzzy Control Law of Electrode Travel in Arc Steelmaking Furnace 103
Vasyl Malyar, Orest Hamola, Volodymyr Maday, Ivanna Vasylchyshyn
Mathematical Modeling of Processes in Asynchronous Motors with Capacitors Connected in Series 107
Yaroslav Matviychuk, Olga Karchevska
Increasing of the Correctness of Mathematical Models by Novel Reduction Principle 110
Iryna Mazurenko, Andriy Pavlyuk, Yuriy Vasetsky
Application of Superconducting Magnetic Energy Storage (SMES) in Electric Power Grids 113
Mykola Medykovskyj, Vitaliy Kravchyshyn, Oleh Shunevych
Modeling of Input Load's Parameters of Control System of Wind Power System 116
Kazimierz Mikołajuk, Andrzej Toboła
Optimization Method for Harmonic Identification in Three-Phase Four-Wire Systems 118
Mehrdad Moradi, Mohamad Reza Besmi, Aref Doroudi, Mehrdad Fazli
Effects of FCL on Operation of SEF-DFIG in wind turbine systems During Grid Fault 122
Volodymyr Moroz, Volodymyr Konoval
High-Speed Power System Stability Analysis 129
Vitalij Nichoga, Liubomyr Vashchyshyn
Wavelet-Neural Network for Detection Signals From Transverse Cracks in the Rail Head 132
Anatolii Nikitenko
Methods of Spectral Analysis of Traction Voltages and Currents as Random Functions 135
Andriy Parfenyuk
Development of Technology of Through Planning of Electric Power Distribution Systems Based on Consistent Informative Model 139
Igor Pentegov, Volodymyr Sydorets, Iuliia Bondarenko, Oleksandr Bondarenko, Pavlo Safronov
Estimation of Supercapacitor Efficiency in Use for Resistance Welding 142
Zigmunt Piątek, Tomasz Szczegielniak, Dariusz Kusiak, Pavel Jabłoński
Magnetic Field of a Shielded Three-Phase Busbar System 146
Paweł Pistelok, Igor Piotr Kurytnik
Permanent Magnets Generator – Asymmetrical Mode of Operation 149
Nataliya Porplytsya, Mykola Dyvak
Interval Difference Operator for the Task of Identification Recurrent Laryngeal Nerve 156
Ivan Prudyus, Volodymyr Shkliarskyi, Yurij Matiieshyn
Features of Determination of the Acceleration of Different Dynamic Microobjects by the Television Scanning Optical Microscope 159
Dariusz Puchala, Kamil Stokfiszewski, Mykhaylo Yatsymirskyy, Bartłomiej Szczepaniak
Effectiveness of Fast Fourier Transform Implementations on GPU and CPU 162
Mykhailo Seheda, Tetyana Mazur, Oleksandr Kurylyshyn
Mathematical Model for Investigation of Wave Processes in High-Voltage Two-Winding Transformers 165
Abbas Seif, Shahram Karimi, Hamdi Abdi, Mehrdad Fazli
Comparison of DFIG and SEF-DFIG Operation in Wind Turbine Systems 168
Bartosz Sawicki and Artur Krupa
Study of Biological Tissues Variability Modeling 174
Krzysztof Siwek, Stanislaw Osowski
Dynamic Models of Epidemic – Preliminary Study 177
Yuriy Shapovalov, Bohdan Mandziy, Dariya Bachyk
Investigation of Stability Reserve of Linear Periodically-Time-Variable Circuits by the Frequency Symbolic Method 181
Maksym Shcherba
The Analysis of Solid Dielectrics Nonlinear Conductivity Influence on a Low-Frequency Electric Field Distribution in Them 185
Maksym Shcherba, Vladimir Zolotarev, Roman Belyanin
The Comparison of Electric Field Perturbations by Water Inclusions in Linear and Nonlinear XLPE Insulation 188
Konrad Sobolewski, Kamila Jania

The Concept of Using the Tent Structure as a Measure of Protection Against Lightning 192
Jan Sroka
An Alternative Approach to Determination of the S-Parameters of Noncoaxial Devices 196
Petro Stakhiv, Oksana Hoholyuk
Macromodeling as an Alternative Approach for Electric Power Systems Modeling Using ATP and MATLAB/Simulink 200
Jacek Starzyński, Robert Szmurło, Bartosz Chaber, Zuzanna Krawczyk
Open Access System for Radiotherapy Planning 204
Natalia Suprunovska, Anatoliy Shcherba
Methods for Optimization of Energy Exchange Modes between Linear and Nonlinear Capacitors 207
Volodymyr Sydorets, Oleksandr Bushma
Analytical and Numerical Techniques for Research of Bifurcation Processes in an Electrical Circuit with a Laser-Arc Discharge 211
Volodymyr Sydorets, Alexei Lebedev, Andrey Dubko
Mathematical Modeling of the Current Density Distribution in a High-Frequency Electrosurgery 215
Vasil Tchaban
Active and Passive co-Energy 218
Vasyl Tkachuk, Lidiya Kasha, Ihor Bilyakovskyy
Brush-less Motor for Wheel's Drive in Multisectional City Tram 222
Sergey Tykhovod, Tatiana Kornus
Accelerated Calculation of Steady States Processes in Complex Nonlinear Circuits 225
Grzegorz Utrata, Jaroslaw Rolek, Andrzej Kaplon
Induction Motor Electromechanical Quantities Estimation based on the Inductance Frequency Characteristic – Simulation Studies 229
Roman Yankevych
Newly Developed Method of Signal-to-Noise Ratio Estimation 233
Serhiy Yefimenko, Volodymyr Stepashko
Intelligent Recurrent-and-Parallel Computing for Solving Inductive Modeling Problems 236
Nikolai Zablodskiy, Vladyslav Pliugin
3D Magnetic Filed Distribution in a Screw Double-Stator Induction Motor 239
Mykhaylo Zagirnyak, Pavlo Kostenko
Method of Refining of Document Relevance in Search Engines Based on a User's Local Behavioral Description 242
Mykhaylo Zagirnyak, Mariia Maliakova, Andrii Kalinov
Compensation of Higher Current Harmonics at Harmonic Distortions of Mains Supply Voltage 245
Mykhaylo Zagirnyak, Viacheslav Prus, Oleksandr Somka
Reliability Models of Electric Machines with Structural Defects 249
Andriy Zhiltsov, Dmytro Sorokin
The Calculation of the Magnetic Field in the Working Area of the Linear Motor with Permanent Magnets 252
Vladimir Zolotarev, Roman Belyanin, Yulia Peretyatko, Sergey Lamanov
The Optimization of Power Supply Modes of Induction Melting Apparatus with a Total Metal Draining 255
Valerij Zvaritch, Elena Glazkova
Application of Linear AR and ARMA Processes for Simulation of Power Equipment Diagnostic Systems Information Signals 259

Index of Authors 262
