Table of Contents

Title	Page range
Remote Interactive Mobile Learning - Application in Electronics Learning	1–3
Interactive Storytelling and Mobile Augmented Reality Applications for Learning and Entertainment – A rapid prototyping perspective	4–8
Gamification Designs in Wearable-technology Enhanced Learning for Healthy Ageing	9–15
How does personality affect wiki-mediated learning?	16–18
Everyday devices taught and explained to primary school children by following the energy transformations, using web-based software	19–27
Role of Biotechnology Simulation and Remotely Triggered Virtual labs in Complementing University Education	28–32
Introducing an innovative robot-based mobile platform for programming learning	33–38
Mobile Learning and Biotechnology Education via Remote Labs: Deployment-based study on Real Time Shared Resources	39–43
10 User Interface Elements for Mobile Learning Application Development	44–50
Mobile in support of a system of education: between presence and ubiquity	N/A
CyberAware: A Mobile Game-based app for Cybersecurity Education and Awareness	54–58
Exploring cultural heritage landscapes in an interactive game-based learning application	59–62
Development of a mobile wind laboratory for teaching purposes in emerging countries	63–65
A mobile app for emergency contraception awareness and education	66–68
Implementation and evaluation of a game using natural user interfaces in order to improve response time	69–72
A novel system architecture for efficient management of skiing injuries	73–77
E-learning as a tool for improving access to academic education in the opinion of University of Gdansk students and teachers	78–82
Designing Eco-apps to Engage Adult Learners	83–87
Raising safer internet awareness through a mobile application based on contrasting visual stories	88–90
Digital storytelling with locative media in museum education: when the student becomes the author of the museum experience	91–95
Mobile Crowd Sensing-based Noise Monitoring as a Way to Improve Learning Quality on Acoustics	96–100
A Mobile Learning Application for Self-Management of Health and Disease	101–105
Examining the interrelation between Interaction Analysis and Learning Styles in blog-based collaborative learning activities: The case of the G.I.A.N.T. toolkit	106–110
User-oriented service composition platforms	111–115
Data Analytics Support for Inquiry Based Learning	116–120
Using digital learning technologies to bridge the gap between student expectations and experiences	121–123
Using the latest developments in mobile technology to improve students' engagement with assessment feedback.	124–126
Effective English for Industrial Engineering Students	127–130
Trust and Forgiveness in Virtual Teams: A Case Study in Algerian E-Learning Context	131–135
mSchools Programme. A new way of teaching and learning.	136–140
Towards an Ontology-driven Game-based Educational Platform with Automatic Students Monitoring	141–145
Speaky Notes: learn languages with AR	146–150
Constantine Capital of Arab Culture for 2015	151–153
Dihya: an Intelligent Learning Object Repository	154–159
Design of remote electronic laboratory	160–162
Felt – A Social Feeling App	163–166
The effects of Perceived Mobility and Satisfaction on the adoption of Mobile-based Assessment	167–171
An F1 Mobile Application	172–175
Graphing Equations in Economics	176–180
BBA Virtual Laboratory through M-Learning	181–184
Collaborative Learning using Pocket Labs	185–189
Students' Readiness for Mobile Learning in Republic of Yemen – a Pilot Study	190–194
PASS – a Programming Assignment Submission System	195–199
Secure Fingerprint-based authentication and non-repudiation services for mobile learning systems	200–204
The Implementation of Cardiopulmonary Resuscitation Training Using Mobile Uploads, Gamification and Direct Feedback Manikins: A Study in Sixth Form	205–209
Spatio-Textual technology: the future of web search	210–213
Spatial evaluation for data inconsistency	214–218
A Preliminary Study on Fall Risk Evaluation through Electromiography Systems	219–221
SuperAvatar: Children and mobile tourist guides become friends using superpowered avatars	222–226
Supporting undergraduate students via Webinars	227–231
Hi kids: that's funny! Mechanics 3D Virtual lab	232–235
AR Stereoscopic Human Eye Examination App	236–238
Using mobile learning games for delivering purposes in Humanities	239–243
Edu-simulation: a serious games platform designed to simulate a teaching environment	244–248

Table of Contents

Title	Page range
Supporting undergraduate University's students MyCourse Application	249–253
Transferring Full Body Exergames from Desktop Applications to Mobile Devices: the Role of the Internet of Things	254–258
A Mobile Serious Game for Lifestyle Change: Conveying nutritional knowledge and motivation through play	259–263
Multilingual and Multisensorial Dictionary Tool as a Support for the Effective Learning in the Area of ICT	264–268
Green@CU: An environmental game for Residential Accommodation	269–273
Engaging end-users in creating data-intensive mobile applications: A creative 'e-learning-by-doing' approach	274–278
The Future of Mobile Health ADHD Applications	279–282
Application of Immersive Technologies for Education: State Of The Art	283–288
Student Generated Content in Higher Education Technology-related Blogs	289–295
Olfactory Media Impact on Task Performance: The Case of a Word Search Game	296–300
Task Suitability and Multimedia Interaction at the 2.4 GHz Arena for Educational Purposes - The Impetus for Usability vs Cost Effectiveness	301–306
Perceptually captured gesture interaction with immersive information retrieval environments.	307–311
Haptic Interaction in Educational Applications	312–314
Towards a Quantified-Self web application for seniors' self-tracking	315–317
Y.S.Y.D. – You Stay You Demand: User-Centered Design approach for Mobile Hospitality Application	318–322
Gamedec.UKW: A Case of Edu-Gamification for Game Designers	323–326
THE GROWTH: A quiz-based game for addressing growing population issues	N/A
Designing a gamified News Reader for mobile devices.	332–337
Digital game creation as a creative learning activity	338–342
Towards the Gamification of Inquiry-Based Flipped Teaching of Mathematics - A Conceptual Analysis and Framework	343–347
Creative Thinking Experimentations for Entrepreneurship with A Disruptive, Personalised and Mobile Game-based Learning Ecosystem	348–352
Sensor-based In-home Monitoring of People with Dementia Using Remote Web Technologies	353–357
Real-time Health Monitoring and Contextualised Alerts Using Wearables	358–362
Girls and Science Education: Exploring Female Interests towards Learning with Serious Games A Study of KS3 Girls in the North East of England	363–366
Treasure hunt pervasive games in cultural organisations	367–371
MyAirCoach: Designing a mobile application for the education of patients regarding asthma disease	372–376
Cypriot Firms, Social Media & User Generated Content Platforms	377–381
Small and flexible web based framework for teaching QR and AR mobile learning application development.	382–384
What ICT tools use the undergraduate students ?	385–387
NEW TRENDS OF ICT IN EDUCATION	388–388
The urge for GREEN IT courses at Universities and Technical Institutes	389–391
Augmented Reality for Supporting Inquiry Based Learning	392–394
Cochlear implants and wireless connectivity - Inner core Connectivity cradling into the 2.4 GHz Arena	395–399
LectureMonkey – A Platform for Collaborative Mobile Lecture Capturing and e-Learning Publishing	400–404
Gamification Design Framework Based on SDT for Student Motivation	405–409
Evaluation of OpenDelos online video editing and publishing platform for MOOCs	410–414
An Adaptive Serious Neuro-game using a Mobile version of a Bio-feedback device	415–419
Mobile learning: open topics, concept and design of a learning framework	420–423
Cognitive Training Supported by Information and Communication Technologies	424–428
Serious+: A technology assisted learning space based on gaming	429–431
