2015 IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE)

IEEE catalog: CFP15TAL-ART ISBN: 978-1-4673-9226-6

Table of Contents

Title	Page range
An Initial Review: Programming Tutoring Tools	1–4
School Perceptions of Coding Education in K-12: A Large Scale Quantitative Study to Inform Innovative Practices	5–10
The Hacked Computer Science Teacher: Lessons from a Failed Flipped Classroom	11–15
Collaboration Leads to Success: A Study of the Effects of Using Pair-Programming Teaching Technique on Student Performance in a Middle Eastern Society	16–22
Towards Practical Programming Exercises and Automated Assessment in Massive Open Online Courses	23–30
Use of LEDs as a light receiving component and their application to demonstration experiments for educational purposes	31–35
The Brokerage Work of School Technology Coordinators	36–42
EVOV: An video recommendation system to support sustainable vocabulary learning	43–48
SEE ME: Software Engineering Education Methodology Exploration	49–53
Researching and Supporting Student Note-taking: Building a Multimedia Note-taking App	54–58
Dialectical Relationship of Lifelong Learning and Continuing Education	59–62
ICT Systems for Student Mobility Programs in Tertiary Education	63–66
Does Learning Really Happen in Online Learning?	67–71
Enhancement of Electrical Engineering Education by a Mentoring Scheme	72–76
Design of Advanced Active and Autonomous Learning System for Computing Education -A ³ Learning System-	77–82
Learning System and Analysis of Learning Styles for African and Asian Students	83–87
A New Challenge for the Training Sector: Further Education for Working on Electric Vehicles	88–95
Using Mobile and Flexible Technologies to Enable, Engage and Enhance Learning in Vocational Education and Training (VET)	96–101
Developing a Technoself System to Improve Lifelong learning Engagement	102–107
Challenges to Flipped Classroom Adoption in Hong Kong Secondary Schools: Overcoming the First- and Second- Order Barriers to Change	108–110
Teaching Methods of Engineering Practice Course for Senior Undergraduate Students	111–114
Comparison for deployment and skill evaluation of the software field	115–121
Use of mobile technology to deliver training in blended learning and independent study formats	122–126
Lecture Notes on Signal Processing in High Dimensional Space	127–130
Education of Practical Engineering Skills aiming for Solving Real Problems related to Local Area	131–136
Improvement of Teaching Quality for Senior Undergraduate Students in Interdisciplinary Courses	137–140
Effect of Language Difficulties on Results of Engineering Students	141–144

2015 IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE)

IEEE catalog: CFP15TAL-ART ISBN: 978-1-4673-9226-6

Table of Contents

Title	Page range
Work-in-Progress: Using Mobile Technology to Enhance Self-efficacy in Underrepresented Students for Engineering Education	145–148
Advancing MOOC and SPOC Development Via A Learner Decision Journey Analytic Framework	149–156
Investigating the Effects of Pair-Programming on Students' Behavior in an advanced Computer Programming Course	157–160
TUTORIAL – Teaching Software Testing Skills: Metamorphic Testing as Vehicle for Creativity and Effectiveness in Software Testing	161–162
Getting Practical with Digital: An Integrated Electronic Design Project for Undergraduates	163–168
Some notes on the strategic teaching and practicing with CDIO scheme in Engineering course	169–172
The New Thinking about the Changes of Adult Higher Education under the Life-long Education Idea	173–176
Cooperative Cultivation Mode for Excellent Engineer Training Program: Exploration and Practice in NJUPT	177–180
The architecture of an Information Management System through the cloud computing in accordance with the National Thai Qualifications Framework for Higher	181–188
PPeLE: a Photo-Processing e-Learning Environment based on HTML5	189–194
An Automatic Classifier for Exam Questions in Engineering: A Process for Bloom's Taxonomy	195–202
Enhancing Educational Data Mining Techniques on Online Educational Resources with A Semi-Supervised Learning Approach	203–206
Relationship between student development activities and core generic competencies among tertiary science and technology students	207–214
Coaching in Computer-mediated Communication at Workplace	215–219
A Comparison of Programming Way: Illustration-based Programming and Text-based Programming	220–223
Modeling Student Learning Outcomes in MOOCs	N/A
Improving undergraduate soft skills using m-learning and serious games	230–235
Learning to Create 3D Models via an Augmented Reality Smartphone Interface	236–241
Embedd "Art" and "Inclusion" into the STEM Education	242–245
Achieving Excellence in Engineering Education through Improved Teaching-Learning Process	246–252
Creation of Knowledge Portal using latest IT tools and Mobile Content Delivery System	253–257
Fostering a Telecommunication Engineering Pineline: a Curriculum Design	258–261
A scheme for composite ability evaluations in an engineering introductory seminar course	262–266
Chasing Higher Solar Cell Efficiencies: Engaging Students in Learning how Solar Cells are Manufacturered	267–271
Teaching Undergraduate Algorithms with Case Studies and Quizzes in Interactive Tutorials	272–276
On the Training Method for the Research Ability of Engineering Graduate Students	277–280
Teaching Engineering Design in a Four-Course Sequence	281–286

2015 IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE)

IEEE catalog: CFP15TAL-ART ISBN: 978-1-4673-9226-6

Table of Contents

Title	Page range
Engineering Undergraduate Professional Identity Formation: Intentional or Introjected?	287–290
Research context enhanced learning experience-Reflection from a case study	291–294
To Arouse Students' Interest in Learning: Does Inquiry Based Learning Make a Difference	295–300
