PRNI 2016
The 6th International Workshop on
Pattern Recognition in Neuroimaging

Trento, Italy
June 22nd – 24th, 2016

Table of Content

MRI based biomarker for brain aging in rodents and non-human primates 1

Katja Franke, Structural Brain Mapping Group, University Hospital Jena
Robert Dahnke, Structural Brain Mapping Group, University Hospital Jena
Geoffrey Clarke, Radiology, University of Texas Health Science Center San Antonio, San Antonio, TX, United States
Anderson Kuo, Radiology, University of Texas Health Science Center San Antonio, San Antonio, TX, United States
Cun Li, Texas Pregnancy & Life Course Health Research Center, Southwest National Primate Research Center, Texas Biomedical Research Institute, San Antonio, TX, United States
Peter Nathanielsz, Animal Science, University of Wyoming, Laramie, WY, United States
Matthias Schwab, Department of Neurology, University Hospital Jena, Jena, Germany
Christian Gaser, University of Jena

Fixed Low-Rank EEG Spatial Filter Estimation for Emotion Recognition Induced by Movies 5

Ken Yano, Advanced Telecommunications Research Institute International
Takayuki Suyama, Advanced Telecommunications Research Institute International

Regularization Parameter Selection for a Bayesian Group Sparse Multi-Task Regression Model with Application to Imaging Genomics 9

Farouk Nathoo, University of Victoria
Keelin Greenlaw, University of Victoria
Mary Lesperance, University of Victoria

Text-mining the NeuroSynth corpus using Deep Boltzmann Machines 13

Ricardo Monti, Imperial College London
Romy Lorenz, Imperial College London

Robert Leech, Imperial College London
Christoforos Anagnostopoulos, Imperial College London
Giovanni Montana, Kings College London

Spatial pyramid match kernels for brain image classification 17

Jonathan Young*, Centre for Neuroimaging Sciences, King's College London

Recovery of non-linear cause-effect relationships from linearly mixed neuroimaging data 21

Sebastian Weichwald, Max Planck Institute for Intelligent Systems
Arthur Gretton, Gatsby Computational Neuroscience Unit
Bernhard Schölkopf, Max Planck Institute for Intelligent Systems
Moritz Dr. Grosse-Wentrup, Max Planck Institute for Intelligent Systems

Collapsed Variational Bayesian Inference of the Author-Topic Model: Application to Large-Scale Coordinate-Based Meta-Analysis 25

Gia Ngo, Singapore Institute for Neurotechnology
Simon Eickhoff, Heinrich Heine University
Peter Fox, University of Texas Health Science Center at San Antonio
Thomas Yeo, National University of Singapore

Voxel importance in classifier ensembles based on sign consistency patterns: Application to sMRI 29

Vanessa Gómez-Verdejo, Universidad Carlos III de Madrid
Emilio Parrado-Hernández, Universidad Carlos III de Madrid
Jussi Tohka, Universidad Carlos III de Madrid

Novel histogram-weighted cortical thickness networks and a multi-scale analysis of predictive power in Alzheimer's disease 33

Pradeep Reddy Raamana, University of Toronto
Stephen Strother, Rotman Research Institute, Baycrest and U. of Toronto

Classification-based Tests for Neuroimaging Data Analysis: Comparison of Best Practices 37

Muhaddisa Ali, University of Trento
Emanuele Olivetti, Fondazione Bruno Kessler and University of Trento

Automated rejection and repair of bad trials in MEG/EEG 41

Mainak Jas, Telecom ParisTech
Denis Engemann, NeuroSpin, CEA
Federico Raimondo, University of Buenos Aires
Yousra Bekhti, Telecom ParisTech
Alexandre Gramfort, Telecom ParisTech

M/EEG source localization with multi-scale time-frequency dictionaries 45

Yousra Bekhti, Télécom ParisTech
Daniel Strohmeier, Institute of Biomedical Engineering and Informatics
Mainak Jas, Télécom ParisTech
Roland Badeau, Télécom ParisTech
Alexandre Gramfort, Telecom ParisTech

Towards tailoring non-invasive brain stimulation using real-time fMRI and Bayesian optimization 49

Romy Lorenz, Imperial College London
Ricardo Monti, Imperial College London
Adam Hampshire, Imperial College London
Yury Koush, EPFL
Christoforos Anagnostopoulos, Imperial College London
Aldo Faisal, Imperial College London
David Sharp, Imperial College London
Giovanni Montana, Kings College London
Robert Leech, Imperial College London
Ines Violante, Imperial College London

Classifying HCP Task-fMRI Networks Using Heat Kernels 53

Ai Wern Chung, King's College London University
Emanuele Pesce, King's College London University
Ricardo Monti, Imperial College London
Giovanni Montana, Kings College London

Studying the brain from adolescence to adulthood through sparse multi-view matrix factorisations 57

Zi Wang, Kings College London
Vjaceslavs Karolis, Kings College London

Chiara Nosarti, Kings College London
Giovanni Montana, Kings College London

Representational similarity of actions in the human brain 61

Burcu Urgen, UC San Diego & University of Parma
Selen Pehlivan, TED University
Ayse Saygin, UC San Diego

Multiclass classification of 18F-DMFP-PET data to assist the diagnosis of parkinsonism 65

Fermin Segovia, University of Granada
Juan Manuel Górriz, University of Granada
Javier Ramírez, University of Granada
Diego Salas-Gonzalez, University of Granada

SHORE-based microstructural indices: do they tell us more? 69

Andrès Mendez Guerrero, University of Verona
Gloria Menegaz, University of Verona
Silvia Obertino, University of Verona

Beyond Cost Function Masking: RPCA-based Non-linear Registration in the Context of VLSM 73

Rene Werner, Department of Computational Neuroscience, University Medical Center
Hamburg-Eppendorf
Matthias Wilms, Institute of Medical Informatics, University of Lübeck
Bastian Cheng, Department of Neurology, University Medical Center Hamburg-Eppendorf
Nils Forkert, Department of Radiology & Hotchkiss Brain Institute, University of Calgary

Comparing magnitudes across dimensions: a univariate and multivariate approach 77

Valentina Borghesani, Université Pierre et Marie Curie
Maria Dolores de Hevia, Université Paris Descartes, Sorbonne Paris Cité, Paris, France
Arnaud Viarouge, Laboratory for the Psychology of Child Development and Education,
University Paris Descartes – CNRS, Paris, France
Pedro Pinheiro Chagas, Université Pierre et Marie Curie, Paris 6, Paris, France
Evelyn Eger, Cognitive Neuroimaging Unit, INSERM, Gif sur Yvette, France
Manuela Piazza, Center for Mind/Brain Sciences, University of Trento, Italy

Age-related changes of the representative modular structure in the brain 81

Bálint File, Pázmány Péter Catholic University
Zoltán Klimaj, MR Research Center, Semmelweis University
Zoltán Somogyvári, Wigner Research Institute for Physics, HAS
Lajos Kozák, MR Research Center, Semmelweis University
Gyula Gyebnár, MR Research Center, Semmelweis University
Brigitta Tóth, Institute of Neuroscience and Psychology, HAS
Zsófia Kardos, Institute of Neuroscience and Psychology, HAS
István Ulbert, Institute of Neuroscience and Psychology, HAS
Márk Molnár, Institute of Neuroscience and Psychology, HAS

Infinite Feature Selection on SHORE-based biomarkers reveals connectivity modulation after stroke 85

Silvia Obertino, University of Verona
Giorgio Roffo, University of Verona
Gloria Menegaz, University of Verona

Addressing the “problem” of temporal correlations in MVPA analysis 89

Roe Gilron, Tel Aviv University
Jonathan D. Rosenblatt, Ben Gurion University
Roy Mukamel, Tel Aviv University

WeiRD – a fast and performant multivoxel pattern classifier 93

Matthias Guggenmos, Charité Universitätsmedizin Berlin
Katharina Schmack, Charité Universitätsmedizin Berlin
Philipp Sterzer, Charité Universitätsmedizin Berlin

Fast brain decoding with random sampling and random projections 97

Andres Hoyos-Idrobo, MSR-Inria
Gael Varoquaux, INRIA
Bertrand Thirion, INRIA

Independent Vector Analysis for Capturing Common Components in fMRI Group Analysis 101

Astrid Engberg, DTU
Kasper Andersen, DRUMR
Morten Mørup, DTU
Kristoffer Madsen, DRUMR

Social-sparsity brain decoders: faster spatial sparsity 105

Gael Varoquaux, INRIA
Matthieu Kowalski, Supelec
Bertrand Thirion, INRIA Saclay-île-de-France

Boosting Connectome Classification via Combination of Geometric and Topological Normalizations 109

Dmitry Petrov, The Institute for Information Transmission Problems, Moscow, Russia
Yulia Dodonova, IITP
Leonid Zhukov, NRU HSE
Mikhail Belyaev, The Institute for Information Transmission Problems, Moscow, Russia

Synergism of spectral and coupling modalities in epileptic focus localization from iEEG recordings 113

Tibor Nánási, Inst. of Cog. Neurosci. and Psy., RCNS, HAS

Cross-modal searchlight classification: Methodological challenges and recommended solutions 117

Samuel Nastase, Dartmouth College
Ben Davis, University of Trento
Yaroslav Halchenko, Dartmouth College
Uri Hasson, University of Trento

Evaluation of weight sparsity control during autoencoder training of resting-state fMRI using non-zero ratio and Hoyer's sparseness 121

Hyun-Chul Kim, Korea University
Jong-Hwan Lee, Korea University

Variational Group-PCA for Intrinsic Dimensionality Determination in fMRI Data 125

Jesper Hinrich, Technical University of Denmark, Section for Cognitive Systems
Søren F. V. Nielsen, Technical University of Denmark, Section for Cognitive Systems
Kristoffer Madsen, DRUM
Morten Mørup, Technical University of Denmark, Section for Cognitive Systems

Prediction of Clinical Scores from Neuroimaging Data with Censored Likelihood Gaussian Processes 129

Anil Rao, University College London

Joao Monteiro, University College London

Janaina Mourao-Miranda, University College London

Comparing functional connectivity based predictive models across datasets 133

Kamalakar Reddy, CEA / INRIA

Alexandre Abraham, INRIA

Mehdi Rahim, CEA / INRIA

Bertrand Thirion, INRIA Saclay-ile-de-France

Gael Varoquaux, INRIA
