# TABLE OF CONTENTS

<b>Efficient Hard Finishing of Asymmetric Tooth Profiles and Topological Modifications by Generating Grinding</b> .....	1
<i>A. Mehr, S. Yoders</i>	
<b>The Whirling Process in a Company that Produces Worm Gear Drives</b> .....	14
<i>M. Turci, G. Giacomozzi</i>	
<b>Worm Screw High-Speed Manufacturing</b> .....	36
<i>J. Feutren</i>	
<b>Twist Control Grinding (TCG)</b> .....	51
<i>W. Graf</i>	
<b>Review of Microstructure and Properties of Non-Ferrous Alloys for Worm Gear Application and Advantages of Centrifugally Cast Gears</b> .....	64
<i>G. Rajendran, J. Hassen</i>	
<b>Pre-Nitriding: A Means of Significantly Increasing Carburizing Throughput</b> .....	75
<i>T. Hart</i>	
<b>Performance and Machining of Advanced Engineering Steels in Power Transmission Applications – Continued Developments</b> .....	85
<i>L. Kamjou, N. Bylund, B. Marsh, T. Bjork, J. Fagerlund</i>	
<b>Gear Design Relevant Cleanness Metrics</b> .....	101
<i>E. Damm, P. Glaws</i>	
<b>Developments of High Hardness-Cast Gears for High-Power Applications in the Mining Industry</b> .....	118
<i>F. Wavelet</i>	
<b>Computerized Design of Straight Bevel Gears with Optimized Profiles for Forging, Molding, or 3D Printing</b> .....	132
<i>A. Fuentes, I. Gonzalez-Perez, H. Pasapula</i>	
<b>Contact Fatigue Characterization of Through-Hardened Steel for Low-Speed Applications Like Hoisting</b> .....	153
<i>M. Oetue, A. Nicolle, R. Genevier</i>	
<b>Determination of Load Distributions on Double Helical-Geared Planetary Gear Boxes</b> .....	171
<i>T. Schulze</i>	
<b>Designing Very Strong Gear Teeth by Means of High Pressure Angles</b> .....	185
<i>R. Miller</i>	
<b>Impact of Surface Condition and Lubricant on Effective Gear Tooth Friction Coefficient</b> .....	207
<i>A. Isaacson, M. Wagner, S. Rao, G. Sroka</i>	
<b>Surface Structure Shift for Ground Bevel Gears</b> .....	219
<i>S. Strunk</i>	
<b>Developing an Energy-Efficient Industrial Gear Oil</b> .....	239
<i>S. Basu, D. Wilkerson, J. Vinci</i>	
<b>Analysis of Excitation Behavior of a Two-Stage Gearbox Based on a Validated Simulation Model</b> .....	253
<i>C. Brecher, C. Lopenhaus, M. Schroers</i>	
<b>An Experimental and Analytical Comparison of the Noise Generated by Gears of Austempered Ductile Iron (ADI) and Steel Materials</b> .....	269
<i>D. Houser, K. Hayrynen, S. Shon, J. Lefevre</i>	
<b>Numerical Thermal 3D Model to Predict the Surface and Body Temperature of Spur and Helical Plastic Gears</b> .....	294
<i>N. Raghuraman, D. Houser, Z. Wright</i>	
<b>Influence of the Defect Size on the Tooth Root Load Carrying Capacity</b> .....	311
<i>C. Brecher, C. Lopenhaus, J. Brimmers, J. Henser</i>	
<b>Influence of Contact Conditions on the Onset of Micropitting in Rolling-Sliding Contacts Pertinent to Gear Applications</b> .....	325
<i>A. Kadiric, P. Rycerz</i>	
<b>Comparison of Tooth Interior Fatigue Fracture Load Capacity to Standardized Gear Failure Modes</b> .....	344
<i>B. Al, R. Patel, P. Langlois</i>	
<b>A New Approach to Repair Large Industrial Gears Damaged by Surface Degradation – The Refurbishment Using the Modification of Both the Profile Shift Coefficient and the Pressure Angle</b> .....	363
<i>H. Albertini, C. Gorla, F. Rosa</i>	
<b>Author Index</b>
