CONTENTS

Integrated 3D Ship Design and Information Management - Saving time and reducing costs with integrated 3D ship design and on-line ship life cycle information management.....1

M. Juntunen, NUPAS-CADMATIC, Finland

An Efficient Retrofit Planning Workflow.....6

A Friedewald, F Titov, P S Halata and H Lödding, Hamburg University of Technology, Germany

A Computer System for Real Option Analysis of Investment in Ships.....15

F. C. M. Pires Jr, Rio de Janeiro Federal University, Brazil

M. Rezende Filho, Gama Filho University, Brazil

Case-Based Configuration Estimation of Steel Weight in Ships According to Principal Component Analysis.....21

Liang-Chun Chen, Ching-Hsiang Chuang, I-Hsin Ko, Chih-Chiang Ying, Cheng-Kuan Lin , CSBC Corporation, Taiwan

Ying-Han Wu, Heiu-Jou Shaw, Department of Systems and Naval Mechatronic Engineering, National Cheng Kung University, Taiwan

4D Planning – Production-Scheduling Optimization for Hull Outfitting.....28

C Bouvet, Siemens PLM Software, FRANCE

Reducing Workload in Production Design Stage by Rule-Based Automation of CAD.....36

S. Yamauchi, Intergraph Corporation, Japan

A. Zuurhout, Intergraph Corporation, USA

Y. Kosaka, Shin Kurushima Dockyard Co., LTD., Japan

Role of Classification Societies Towards Advances in Software Development.....45

A K Shetty, India

An Advanced Solution for Recording, Visualization, and Assessment of Thickness Measurements of Ships.....47

M Wilken, U Langbecker and M Moldenhauer, Germanischer Lloyd, Germany

How Classic Systems Engineering Process Must Change to be Effective for Use in Ship Design.....57

J L Martin, SAMOSC Ltd. UK

A Study on the Optimization of Ship Design Process Using Wildcard GA.....68

K Hamada, R Fujii, Y Hironaka and M Kitamura, Hiroshima University, Japan

Interactive Steering of a Ship Synthesis Model for Early Requirements Elucidation.....78

EAE Duchateau, Delft University of Technology, The Netherlands

BJ van Oers, Defence Materiel Organisation MoD, The Netherlands

JJ Hopman, Delft University of Technology, The Netherlands

Next-Generation Design Paradigm for Shipbuilders.....91

Stewart Bresler, Amy Strucko, Paul Sicking, Siemens PLM Software, USA

New Approach to Design Transition in Korean Production Environment.....102

D J Lee, Sener Korea Engineering and Systems Co., Ltd., Korea

R Perez, Sener Ingeniería y Sistemas S.A., Spain

Effect of Different Corrosion Additions on Ultimate Strength Performance of Double Hull Oil Tankers.....112

C G Li, X M Zhang, J K Seo, B J Kim, J K Paik, The Ship and Offshore Research Institute, (The Lloyd's Register Foundation Research Centre of Excellence), Pusan National University, Republic of Korea, D K Kim, Graduate School of Engineering Mastership, Pohang University of Science and Technology, Republic of Korea

Collapse Strength Analysis of I-Girder at Elevated Temperatures.....122

S I Park, J H Kim and D H Lee The Ship and Offshore Research Institute (The Lloyd's Register Foundation Research Centre of Excellence), Pusan National University, Korea

Structural Response Characteristics of Ships Involved in Collision Accident.....128

S T Ince, S A M Youssef, Y S Kim, J K Seo, B J Kim and J K Paik, The Ship and Offshore Research Institute (The Lloyd's Register Foundation Research Centre of Excellence), Pusan National University, Busan, Republic of Korea

Combining Layout Features of Multiple Designs into a New Design.....137

*E H Takken, Netherlands' Defence Materiel Organisation, The Netherlands
A Bons, Maritime Research Institute Netherlands, The Netherlands*

Development of Marine Propulsion Shafting Load Measurement and Calculation System.....146

*Ji Wang, Shengjun Gu, Yu-jun Liu, Zhiyuan Wei, Zhi Qu,
School of Naval Architecture, Dalian University of Technology, Dalian, China*

Migration Process Between CAD Systems.....152

*José Sánchez-Arévalo Agundo, SENER Ingeniería y sistemas, Spain.
Guangwu Liu, Sener Shanghai System, China*

An Advanced Step in Integrating Database-Controlled Shipbuilding CAD with PLM Systems.....161

R Penas, Sener Ingeniería y Sistemas S.A., Spain

International Conference on Computer Applications in Shipbuilding 2013

Busan, Korea
24 - 26 September 2013

Volume 2 of 3

CONTENTS

Innovative Tool for Piping and Instrumentation Diagrams and Electrical Schematics.....1

A Cebollero, Sener Ingeniería y Sistemas S.A., Spain

Y H Kim, Sener Korea Engineering and Systems Co., Ltd., Korea

Development of Visualized Status Management System for Ship Outfitting Using BOM And 3D Model.....6

Y Yoshitomi and H Mizokawa, Japan Marine United Corporation, Japan

The Digital Handover.....11

D Thomson, AVEVA Solutions Ltd, UK

Development of High Precision Basic Design.....18

Y Nakao, K Hirai, T Hirayama and M Katsuragi Oshima Shipbuilding Co., Ltd., Japan

Ken Ito CIM Creation Co., Ltd., Japan

A Novel Modeling for Performance Assessment of Kites as Auxiliary Propulsion Device for Merchant Ships.....24

R Leloup, K Roncin, G Bles, J-B Leroux, C Jochum, LBMS (EA 4325), ENSTA - Bretagne, France,

Y Parlier, OCEA, France

Product Lifecycle Management in the Shipbuilding and Shipping Industries - An Update.....35

Matthias Grau, Lars Wagner, PROSTEP, Germany

Christian Cabos, Germanischer Lloyd SE, Germany

How 3D Laser Scanning Brings New Opportunities in Refitting and Conversion.....45

G Farrow, AVEVA Solutions Ltd, UK

Materials Management in Shipyards from an Offshore Perspective.....50

Marcel Veldhuizen, Intergraph Corporation, Netherlands

Michael Buss, Intergraph Corporation, Huntsville

Satish Hota, Intergraph Corporation, Huntsville

LTE-Based Smart Shipyard Implementation and BYOD Strategy.....56

Seung-Uk So, Ok-Hung Hyun, In-Sung Lee, Da-Hye Jang and Hyung-Tae Cho, Daewoo Shipbuilding &

Marine Engineering co. LTD. Republic of Korea

Application of Speech Recognition Technology in Shipyards.....64

M. Nagano, Japan Marine United Corporation, Japan

FE Analysis and Lead Time Reduction by Combined Use of CAD and CAE.....72

S Kasai, SENER JAPAN Engineering and Systems, K.K, Japan

T Kunisada, Sanoyas Shipbuilding Corporation, Japan

Y Ohtsuki, Tsuneishi Shipbuilding Co., Ltd, Japan

R Ikeda, Namura Shipbuilding Co., Ltd, Japan

Y Tamura, Altair Engineering, Ltd, Japan

Y Sasaki, Nippon Kaiji Kyokai, Japan

Utilization of a 3D Product Model to Fulfill the New IACS CSR-H Rule Requirements.....76

T Hulkkonen, NAPA, Finland, C Cabos, GL, Germany, M Kidogawa, ClassNK, Japan, T Kurki, NAPA,

Finland, B Tietgen, GL, Germany

Development of Light-Weight Model Based Erection Clearance Check System for Shipbuilding and Ocean Engineering.....83

Heung-Won Suh, Dae-Hyung Lee, Jong-Yeol Jung, Sung-Min Kim, Seong-Hyun Shin, Jae-Jun Lee, Ho-

Young Lee, Ji-Hoon Lee, Daewoo Shipbuilding & Marine Engineering CO.,LTD. R&D Institute

Use of CFD in Optimizing Engine Room Air-Conditioning.....88

Rahul Banerjee, Arjun Mandrekar and Vivek Meena, Indian Maritime University – Visakhapatnam Campus, India

Using Simulation to Justify and Develop Quiescent Period Prediction Systems for the Royal Navy.....92

*Dr. B Ferrier, Hoffman Engineering Corporation, Dynamic Interface Laboratory, USA
Dr. J Duncan, Defence Equipment & Support, MOD, UK
Dr. M. R. Belmont, Exeter University, UK
Mr. A Curnow, Defence Equipment & Support, MOD, UK
Mr. P. Crossland, QinetiQ Haslar, UK
Mr. J. Duncan, Defence Equipment & Support, MOD, UK*

Application of a Factory Simulation Tool to the Outfitting Process.....101

Y. Sasaki, K. Okada and S. Inoue, Mitsubishi Heavy Industries, LTD., Japan

Ship Hull Form Optimization Using Genetic Algorithms.....107

M. Thombre, Sea Syst Consultants and Engineers, India

Class Surveys – Milestones in the Ship Lifecycle.....115

Ulrike Moser and Wiegand Grafe and Christian Cabos, Germanischer Lloyd SE, Germany

Development of Software System for Generating Curved Shell Plates' Processing Plan Using Virtual Templates.....123

*J Sun, K Hiekata, H Yamato, Graduate School of Frontier Sciences, The University of Tokyo, Japan.
N Nakagaki and A Sugawara, Sumitomo Heavy Industries Marine & Engineering Co. Ltd., Japan*

Numerical Simulation on Doubly Curved Ship Hull Thick Plate Forming With Multi-Press Head.....131

*Hu Yong^{1,2}, Xiang Yong², Zheng Beijia², Zhang Yi², Wang Chengfang²
¹ Key Laboratory of High Performance Ship Technology of Ministry of Education, Wuhan University of Technology, CHINA
² School of Transportation, Wuhan University of Technology, China*

Automatic Pipe Routing to Avoid Air Pockets.....138

Y Ando and H Kimura, Naval Architecture and Marine Systems Engineering Course of Kyushu University, Japan

Numerical Simulation of Ship Frame Cool Forming Process.....145

LI Pei-yong, Song Jun-jie, WANG Cheng-fang, MAO Yun-sheng, Key Laboratory of High Performance Ship Technology of Ministry of Education, Wuhan University of Technology, China

Prediction and Control of Car Ferry Superstructure Blocks Deformation Induced by Welding and Straightening.....150

*Y Hama, M Sano, M Kawaji, Naikai Zosen Corp, Japan,
Y Katayama, H Murakawa, Y Okumoto, S Rashed, Osaka University, Japan*

Demonstration of AR Application for Sheet Metal Forming Works in Shipyard.....156

Kohei Matsuo, National Maritime Research Institute, Japan

Monitoring System for Advanced Construction Management (Integration Methods of Monitoring Data to Generate Virtual Job Shop).....160

J Liu, J Hirota, CX Wu, and K Aoyama, Department of Systems Innovation, School of Engineering, University of Tokyo, Japan

Research on the Intelligent Design Method of Block Lifting in Shipbuilding.....171

R Li, Y J Liu, J Wang, F Zhang, X M Zhang, School of Naval Architecture, Dalian University of Technology, China

Optimization of the Welding in the Erection Scheduling of a Suezmax Tanker Ship.....177

H A Tokola, Aalto University School of Engineering, Finland

L F Assis, and R M Freire, Federal University of Rio de Janeiro, Brazil

E Niemi, Aalto University School of Engineering, Finland

A Material Distribution Scheduling for Rigging Ship-Hull Blocks with Pipes.....184

K Noda, S Shindo, and H Kimura, Kyushu University, Japan

Innovative Collaboration Between Initial Structural & Production.....190

D Y Park, Timetec Co.Ltd, Korea

Integrating CAD/ CAM In A PDM/ERP Environment.....196

T. de Jonge and P. Filius, Nupas-Cadmatic, Netherlands

T. Hokuni, Nupas-Cadmatic Finland

International Conference on Computer Applications in Shipbuilding 2013

Busan, Korea
24 - 26 September 2013

CONTENTS

JT as the Foundation of Collaboration in Ship Lifecycle: The First ISO Standard for Lightweight 3D Visualization.....1

Ji Zheng Zhao, Siemens PLM Software, China

Diversification – The Technology Aspects.....9

S Neuvéglise, AVEVA Solutions Ltd, UK

Development of Real-Time and Paperless Collaborative System Due to Engineering Changes in Shipbuilding Using Mobile Platform.....13

G. Baek, D. H. Lee, M. K. Han, S. U. Cheon, J. R. Son, Y. T. Kim, and H. Yoon, Daewoo Shipbuilding & Marine Engineering Co., Ltd., Korea

‘Robot Tank System’ And Development of Integrated Management System for Various Measured Data in Tank Tests.....20

H Yamato, K Hiekata, T Mitsuyuki and Y Kawano, Graduate School of Frontier Science, The University of Tokyo, Japan

M Enomoto, Y Tsuchiya, Graduate School of Engineering, The University of Tokyo, Japan

Study of Icing-Up in the Fresh Water Tanks of the Semisubmersible Drilling Rigs Operated in Northern Seas.....26

I.V. Kudinovich and M.N. Syraleva, Krylov State Research Centre, Russia

The Use of Computer Simulation Technology in Early Stage Ship Design.....32

A. Gharib, D. J. Andrews and H. D. Griffiths, University College London, UK

Advanced Ship Direct Strength Analysis System in Full Compliance with Common Structural Rules (TCAD-DSA/CSR), Using Parametric Modelling Application TCAD.....42

Y Miyoshi and T Fujii, Oshima Shipbuilding Co., Ltd., Japan

M Maki and S Hirakawa, Japan Marine United Corporation, Japan

D Fujita and Y Kamimaru, Technostar Co., Ltd., Japan

A Scalable Approach to 3D Visualization and Review Throughout the Shipbuilding Lifecycle.....48

D Larkins, M Waldie, and D Morais, SSI, Canada

Securing Data Quality Along the Supply Chain.....57

M Grau and J Stjepandic, PROSTEP AG, Germany

C Rupert, Heidelberger Druckmaschinen AG, Germany

Empowered Engineering: Availability of Engineering Data Throughout the Shipyard.....64

D Morais, M Waldie and D Larkins SSI, Canada

Virtual Offshore Rig Experience Based on Modelling and Simulation Technology.....73

KP Park, SH Ham, JB Lee and AR Jo, Daewoo Shipbuilding and Marine Engineering, Korea

Crane Lifting Simulation for Production Planning in Shipbuilding.....79

Seung-Ho Ham, Kwang-Phil Park and Chan-Young Lee, Daewoo Shipbuilding and Marine Engineering, Korea

The Use of Aircraft/Ship Dynamic Interface Simulation in the Deck Design of All Weather Manned and Unmanned Helicopter Shipboard Operations.....88

Dr. B Ferrier, Hoffman Engineering Corporation, Dynamic Interface Laboratory, USA

Dr. J Duncan, MOD, DE&S HQ, Ships Operating Centre, UK

Mr. R. Ernst, NAVAIR PMA 266, Patuxent River, USA

Challenges Faced by a Small Ship Yard in Integrating Computer Aided Design and Production Processes – A Real Life Case Study.....102

A N O Paine, Dr R S Ransing, Dr D T Gethin, Swansea University, UK

G J Sims, J M Richley, L J Boissevain, M W Lewis, Mustang Marine (Wales) Ltd, UK

Integrated Design and Production Planning for Ship Block Assembly and Construction.....110

CY Shon, K Cochran, T Ladran, JH Lee, Intergraph Corporation, South Korea and USA

Challenges in Early Ship Design. Integrated Solution from Concept to Production.....120

R. de Góngora, SENER, Ingeniería y Sistemas S.A., Spain

Multi-Platform Collaboration Tool for Ship Design and Production.....130

R.Benčić, M.Milanović, G.Šikić and M.Bistričić, Uljanik Shipbuilding Computer Systems (USCS), Pula, Croatia

Multi-Agent System for an Emission Policy Making on International Shipping to Plan Specifications of Innovate Green Shipping.....138

Le SUN, Takeki MORI, Chenxi WU, Kazuya OIZUMI and Kazuhiro AOYAMA

Department of Systems Innovation, School of Engineering, University of Tokyo, Japan

Ontology-Based Method for Ship General Arrangement Design Using Design Intention Driven Technology.....147

K Li, M Chen, Y Lin, School of Naval Architecture and Ocean Engineering, Dalian University of Technology, China

Adapting and Adopting 3D Design Technology to Cruise Ships.....157

M Polini, Intergraph, Corporation

Y Limon Duparcmeur, Intergraph Corporation

P Lemoine, STX France

Anti-Vibration Reinforcement Design Methodology of Ship Engine Room Using Topology Optimization.....169

M Daifuku, K Kawasaki, A Takezawa and M Kitamura, Hiroshima University, Japan

H Terashita and Y Ohtsuki, Tsuneishi Shipbuilding Co., Ltd., Japan

Intellectual Property Protection in the Maritime Industry – State-of-the-Art Review and Solution Approaches.....174

M Grau, H Liese and J Stjepandic, PROSTEP, Germany

Issue Management Fidelity in Shipbuilding Lifecycle.....189

Malay Pal, Siemens PLM Software, India

HOMER - Integrated Hydro-Structure Interactions Tool for Naval and Off-Shore Applications.....200

S.Malenica, Q.Derbanne, F.X.Sireta, F.Bigot, E.Tiphine, G.De-Hauteclocque and X.B.Chen, Bureau

Veritas, France

Tank Hydrodynamics in the Organized Analysis By SESAM Manager.....213

Z Pan, T Vada, A Ludvigsen, S Finne, DNV, Norway

Hydrodynamic Analysis for NPL Series Round Bilge Hull Form Ships.....220

Tatan Paul, Anuj Kumar Verma, Prमित Kumar Sarkar, Indian Maritime University, Vishakhapatnam

Campus-Department of Naval architecture and Ocean engineering, India

Revathi Chavali, School of Maritime Design and Research, Visakhapatnam, India

Computer Application for Shaft Alignment Design.....226

Yu. Batrak, R. Batrak, D. Berin, Intellectual Maritime Technologies, Ukraine

Development of a Life Cycle Cost Optimised Safety System for Stabilising Damaged Vessels or Lifting Sunken Vessels.....235

N. Fischer and R. Ahlers, BALance Technology Consulting GmbH, Germany

2D in a 3D World: Classification Drawings from 3D Product Model.....243

D Morais, D Larkins and M Waldie, SSI, Canada
