Table of Contents

Advancements in technology and the challenges posed to electrical testing of Protective Relays and Controls.....1	(1)
ANALYSIS OF A DIFFERENTIAL AND OVERCURRENT OPERATION ON A 345KV HIGH VOLTAGE LINE REACTOR.....6	(2)
Application of the Line Differential Protection Scheme for Radial Transmission Lines.....25	(3)
A Review of Intertie Protection.....50	(4)
A Solution to Sensitivity Challenges for the Protection of Large Fuseless Capacitor Banks.....55	(5)
Bus Protection A New and Reliable Approach.....70	(6)
Capturing Generator Rotor Angle and Field Quantities – SDG&E Experience and Approach to Using Nontraditional Generator Measurements.....81	(7)
Catching Falling Conductors in Midair – Detecting and Tripping Broken Distribution Circuit Conductors at Protection Speeds.....90	(8)
Challenges in Application of Distance Relays under Power Swing Conditions.....101	(9)
Considerations for Connecting Photovoltaic Solar Plants to Distribution Feeders.....114	(10)
Detection of Time Spoofing Attacks on GPS Synchronized Phasor Measurement Units.....134	(11)
Do CTs Like DC? Performance of Current Transformers With Geomagnetically Induced Currents.....142	(12)
Does Every Millisecond Really Count – A Comparison of Protection Based Arc Flash Mitigation Techniques.....159	(13)
How do we fix the Network Model When it doesn't match Reality?.....167	(14)
How Transformer DC Winding Resistance Testing Can Cause Generator Relays to Operate.....173	(15)
How We Learn That It Depends In Protective Relaying.....187	(16)
IEC 61850 Multivendor Station and Process Bus Substation Design.....196	(17)
Improved Fault Location on Distribution Circuits Using Advanced Inputs.....204	(18)
Improved Understanding of Actual System Events using Synchrophasor Visualization.....212	(19)
Line Protection Response to a Three-Phase Intercircuit Fault.....221	(20)
Making Complex Protection and Control Systems Easy to Maintain.....227	(21)
Man-Made Faults – Line Protection Operation for an Unintended Phase Cross-Connect Condition.....236	(22)
Maximizing Line Protection Reliability, Speed, and Sensitivity.....251	(23)
Entergy's Mayflower EHV Substation Tornado Restoration.....279	(24)
Millisecond, Microsecond, Nanosecond: What Can We Do With More Precise Time?.....284	(25)
Modern Protection of Three-Phase and Spare Transformer Banks.....296	(26)
Moving the Focus from Relay Element Testing to Protection System Testing.....315	(27)
Not All Differentials are the Same: How Different Percent Differential Relay Algorithm Methods Can Impact Relay Settings and Performance.....332	(28)
Auto-reclose Scheme in a Ring Substation Configuration.....345	(29)
Performance of CTs and Relays at Low Frequencies.....354	(30)

Performance of Time-Domain Line Protection Elements on Real-World Faults.....372	(31)
Practical Considerations When Protecting Mutually Coupled Lines.....389	(32)
Protection & Controls Analytics for a Reliable Grid.....405	(33)
Protection and Control System Impacts from The Digital World.....415	(34)
Protection System for a Wind Generation Plant in Panama: Challenges and Solutions.....428	(35)
Reducing System Losses and Implementing Self-Healing to Minimize Impact of Faults in Distribution Networks.....443	(36)
RELAY LOADABILITY CHALLENGES EXPERIENCED IN LONG LINES.....451	(37)
Remote Maintenance Testing of Protection Devices and Schemes – Why We Need It and How We Can Do It?.....467	(38)
Requirements and Methods for Reducing Fault Clearing Times in Smart Grids.....476	(39)
Safety Considerations for AC Motor Thermal Protection.....485	(40)
Securing Communications for SCADA and Critical Industrial Systems.....492	(41)
Smart Substation For The French Power Grid.....502	(42)
Solutions to Common Distribution Protection Challenges.....507	(43)
Speed and Security Considerations for Protection Channels.....517	(44)
Stabilizing the Differential Protection of Transformers Supplied with High Charging Circuit.....526	(45)
Subsynchronous Oscillation Detection Using Microprocessor Relays.....543	(46)
The Importance of Testing Smart Grid IEDs against Security Vulnerabilities.....555	(47)
Understanding Generator Stator Ground Faults and Their Protection Schemes.....576	(48)
Understanding the Dynamic Mho Distance Characteristic.....590	(49)
University Implements Distribution Automation to Enhance System Reliability and Optimize Operations.....605	(50)
Using Loadability Studies to Comply with NERC PRC-025-1.....613	(51)
Voltage and Current Inversion Challenges When Protecting Series-Compensated Lines – A Case Study.....623	(52)
Why Testing Digital Relays Are Becoming So Difficult! Part 3 Advanced Feeder Protection.....637	(53)
Why Test Switches Still Matter.....643	(54)
Wide Area Protection & Control using High- Speed and Secured Routable GOOSE Mechanism.....646	(55)
