Table of Contents

<i>Detecting Sarcasm Using Different Forms Of Incongruity</i> Aditya Joshi	1
<i>Assessing State-of-the-Art Sentiment Models on State-of-the-Art Sentiment Datasets</i> Jeremy Barnes, Roman Klinger and Sabine Schulte im Walde	2
<i>Annotation, Modelling and Analysis of Fine-Grained Emotions on a Stance and Sentiment Detection Corpus</i> Hendrik Schuff, Jeremy Barnes, Julian Mohme, Sebastian Padó and Roman Klinger	13
<i>Ranking Right-Wing Extremist Social Media Profiles by Similarity to Democratic and Extremist Groups</i> Matthias Hartung, Roman Klinger, Franziska Schmidtke and Lars Vogel	24
<i>WASSA-2017 Shared Task on Emotion Intensity</i> Saif Mohammad and Felipe Bravo-Marquez	34
<i>IMS at EmoInt-2017: Emotion Intensity Prediction with Affective Norms, Automatically Extended Resources and Deep Learning</i> Maximilian Köper, Evgeny Kim and Roman Klinger	50
<i>Prayas at EmoInt 2017: An Ensemble of Deep Neural Architectures for Emotion Intensity Prediction in Tweets</i> Prayas Jain, Pranav Goel, Devang Kulshreshtha and Kaushal Kumar Shukla	58
<i>Latest News in Computational Argumentation: Surfing on the Deep Learning Wave, Scuba Diving in the Abyss of Fundamental Questions</i> Iryna Gurevych	66
<i>Towards Syntactic Iberian Polarity Classification</i> David Vilares, Marcos Garcia, Miguel A. Alonso and Carlos Gómez-Rodríguez	67
<i>Toward Stance Classification Based on Claim Microstructures</i> Filip Boltuzic and Jan Šnajder	74
<i>Linguistic Reflexes of Well-Being and Happiness in Echo</i> Jiaqi Wu, Marilyn Walker, Pranav Anand and Steve Whittaker	81
<i>Forecasting Consumer Spending from Purchase Intentions Expressed on Social Media</i> Viktor Pekar and Jane Binner	92
<i>Mining fine-grained opinions on closed captions of YouTube videos with an attention-RNN</i> Edison Marrese-Taylor, Jorge Balazs and Yutaka Matsuo	102
<i>Understanding human values and their emotional effect</i> Alexandra Balahur	112
<i>Did you ever read about Frogs drinking Coffee? Investigating the Compositionality of Multi-Emoji Expressions</i> Rebeca Padilla López and Fabienne Cap	113
<i>Investigating Redundancy in Emoji Use: Study on a Twitter Based Corpus</i> Giulia Donato and Patrizia Paggio	118

<i>Modeling Temporal Progression of Emotional Status in Mental Health Forum: A Recurrent Neural Net Approach</i>	
Kishaloy Halder, Lahari Poddar and Min-Yen Kan	127
<i>Towards an integrated pipeline for aspect-based sentiment analysis in various domains</i>	
Orphee De Clercq, Els Lefever, Gilles Jacobs, Tijl Carpels and Veronique Hoste	136
<i>Building a SentiWordNet for Odia</i>	
Gaurav Mohanty, Abishek Kannan and Radhika Mamidi	143
<i>Lexicon Integrated CNN Models with Attention for Sentiment Analysis</i>	
Bonggun Shin, Timothy Lee and Jinho D. Choi	149
<i>Explaining Recurrent Neural Network Predictions in Sentiment Analysis</i>	
Leila Arras, Grégoire Montavon, Klaus-Robert Müller and Wojciech Samek	159
<i>GradAscent at EmoInt-2017: Character and Word Level Recurrent Neural Network Models for Tweet Emotion Intensity Detection</i>	
Egor Lakomkin, Chandrakant Bothe and Stefan Wermter	169
<i>NUIG at EmoInt-2017: BiLSTM and SVR Ensemble to Detect Emotion Intensity</i>	
Vladimir Andryushechkin, Ian Wood and James O' Neill	175
<i>Unsupervised Aspect Term Extraction with B-LSTM & CRF using Automatically Labelled Datasets</i>	
Athanasios Giannakopoulos, Claudiu Musat, Andreea Hossmann and Michael Baeriswyl	180
<i>PLN-PUCRS at EmoInt-2017: Psycholinguistic features for emotion intensity prediction in tweets</i>	
Henrique Santos and Renata Vieira	189
<i>Textmining at EmoInt-2017: A Deep Learning Approach to Sentiment Intensity Scoring of English Tweets</i>	
Hardik Meisheri, Rupsa Saha, Priyanka Sinha and Lipika Dey	193
<i>YNU-HPCC at EmoInt-2017: Using a CNN-LSTM Model for Sentiment Intensity Prediction</i>	
You Zhang, Hang Yuan, Jin Wang and Xuejie Zhang	200
<i>Seernet at EmoInt-2017: Tweet Emotion Intensity Estimator</i>	
Venkatesh Duppada and Sushant Hiray	205
<i>IITP at EmoInt-2017: Measuring Intensity of Emotions using Sentence Embeddings and Optimized Features</i>	
Md Shad Akhtar, Palaash Sawant, Asif Ekbal, Jyoti Pawar and Pushpak Bhattacharyya	212
<i>NSEmo at EmoInt-2017: An Ensemble to Predict Emotion Intensity in Tweets</i>	
Sreekanth Madisetty and Maunendra Sankar Desarkar	219
<i>Tecnolengua Lingmotif at EmoInt-2017: A lexicon-based approach</i>	
Antonio Moreno-Ortiz	225
<i>EmoAtt at EmoInt-2017: Inner attention sentence embedding for Emotion Intensity</i>	
Edison Marrese-Taylor and Yutaka Matsuo	233
<i>YZU-NLP at EmoInt-2017: Determining Emotion Intensity Using a Bi-directional LSTM-CNN Model</i>	
Yuanye He, Liang-Chih Yu, K. Robert Lai and Weiyi Liu	238
<i>DMGroup at EmoInt-2017: Emotion Intensity Using Ensemble Method</i>	
Song Jiang and Xiaotian Han	243

<i>UWat-Emote at EmoInt-2017: Emotion Intensity Detection using Affect Clues, Sentiment Polarity and Word Embeddings</i>	
Vineet John and Olga Vechtomova	249
<i>LIPN-UAM at EmoInt-2017:Combination of Lexicon-based features and Sentence-level Vector Representations for Emotion Intensity Determination</i>	
Davide Buscaldi and Belem Priego	255
<i>deepCybErNet at EmoInt-2017: Deep Emotion Intensities in Tweets</i>	
Vinayakumar R, premjith b, sachin kumar s, soman kp and Prabakaran Poornachandran	259
