Table of contents

Volume 276

First Conference of Computational Methods in Offshore Technology (COTech2017)

30 November to 1 December 2017, Stavanger, Norway

Accepted papers received: 21 November 2017
Published online: 12 December 2017

Preface

First Conference of Computational Methods in Offshore Technology (COTech2017)

Peer review statement

Papers

Wind Engineering

What scaling means in wind engineering: Complementary role of the reduced scale approach in a BLWT and the full scale testing in a large climatic wind tunnel

Olivier Flamand.....1

Implementation and application of the actuator line model by OpenFOAM for a vertical axis wind turbine

L Riva, K-E Giljarhus, B Hjertager and S M Kalvig.....11

A high-fidelity weather time series generator using the Markov Chain process on a piecewise level

K Hersvik and O-E V Endrerud.....24

3D WindScanner lidar measurements of wind and turbulence around wind turbines, buildings and bridges

T Mikkelsen, M Sjöholm, N Angelou and J Mann.....33

Wind effects on long-span bridges: Probabilistic wind data format for buffeting and VIV load assessments

K Hoffmann, R G Srouji and S O Hansen.....47

Aeroelastic Response from Indicial Functions with a Finite Element Model of a Suspension Bridge

O Mikkelsen and J B Jakobsen.....62

Full-scale monitoring of wind and suspension bridge response

J T Snæbjörnsson, J B Jakobsen, E Cheynet and J Wang.....79

Super-long bridges with floating towers: the role of multi-box decks and Hardware-In-the-Loop technology for wind tunnel tests

A Zasso, T Argentini, I Bayati, M Belloli and D Rocchi.....92

Advanced computational Methods & Applications in Marine Technology

CFD Analysis in Subsea and Marine Technology

Hrvoje Jasak.....103

Multi-fluid CFD analysis in Process Engineering

B H Hjertager.....114

Accurate green water loads calculation using naval hydro pack

H Jasak, I Gatin and V Vukčević.....136

Study of lifting operation of a tripod foundation for offshore wind turbine

H Zhu, L Li and M C Ong.....144

Vortex-induced vibration (VIV) effects of a drilling riser due to vessel motion

R S Joseph, J Wang, M C Ong and J B Jakobsen.....163

Large eddy simulation of the tidal power plant deep green using the actuator line method

S T Fredriksson, G Broström, M Jansson, H Nilsson and B Bergqvist.....173

Fluid flow in steady and oscillatory lid-driven square cavities

J Zhu, L E Holmedal, D Myrhaug and H Wang.....185

Marine Operation for Cold Climate

Limitations related to marine operations in the Barents Sea

O T Gudmestad.....193

Implications caused by SARex on the implementation of the IMO polar code on survival at sea

K E Solberg.....204

On weather limitations for safe marine operations in the Barents Sea

A P Orimolade and O T Gudmestad.....211

A practical guideline for human error assessment: A causal model

Y Z Ayele and A Barabadi.....225

Limit cycle oscillations at resonances

K Hellevik and O T Gudmestad.....233

Finite Element, Boundary Element & Finite Volume Methods and Design Optimization

Boundary element method solution for large scale cathodic protection problems

D C Rodopoulos, T V Gortsas, S V Tsinopoulos and D Polyzos.....242

Finite element simulation of long wave impact on floating breakwaters with variable stiffness

T K Papathanasiou, A Karperaki and K A Belibassakis.....251

An efficient structural finite element for inextensible flexible risers

T K Papathanasiou, S Markolefas, P Khazaeinejad and H Bahai.....263

Influence of extreme low temperature conditions on the dynamic mechanical properties of carbon fiber reinforced polymers

S P Zaoutsos and M C Zilidou.....273

Numerical assessment of wind turbine blade damage due to contact/impact with tower during installation

Amrit Shankar Verma, Nils Petter Vedvik and Zhen Gao.....285

A case study on topology optimized design for additive manufacturing

A W Gebisa and H G Lemu.....302

A review of fatigue crack propagation modelling techniques using FEM and XFEM

K Rege and H G Lemu.....313

Experimental and numerical study of Bondura® 6.6 PIN joints

I Berkani, Ø Karlsen and H G Lemu.....328

Recursive thoughts on the simulation of the flexible multibody dynamics of slender offshore structures

J Schilder, M Ellenbroek and A de Boer.....344

A nonlinear dynamic corotational finite element model for submerged pipes

F H de Vries, H J M Geijselaers, A H van den Boogaard and A Huisman.....354

Application of foam-extend on turbulent fluid-structure interaction

K Rege and B H Hjertager.....369

Evaluating stress analysis and failure criteria for offshore structures for Pechora Sea conditions

S Nesic, Y Donskoy and A Zolotukhin.....387

Structural Integrity and Health Monitoring

Integrity management of offshore structures and its implication on computation of structural action effects and resistance

T Moan.....398

Analytical and numerical investigation of bolted steel ring flange connection for offshore wind monopile foundations

C A Madsen, J-C Kragh-Poulsen, K J Thage and M J Andreassen.....425

Natural frequency and vibration analysis of jacket type foundation for offshore wind power

Y-C Hung, Y-Y Chang and S-Y Chen.....441

Fracture mechanics analysis for a mooring system subjected to tension and out-of-plane bending

X Xue and N-Z Chen.....449

Effect of corrosion on the buckling capacity of tubular members

F H Øyasæter, A Aeran, S C Siriwardane and O Mikkelsen.....457

An accurate fatigue damage model for welded joints subjected to variable amplitude loading

A Aeran, S C Siriwardane, O Mikkelsen and I Langen.....475

Fatigue strength degradation of metals in corrosive environments

N D Adasooriya, T Hemmingsen and D Pavlou.....490
