Contents

Regular TEC Variations in Mid-latitude and Polar Regions	30
Scintillation Studies of Scattered Radio Waves in the Ionosphere	34
Magnetoelectric Effects in Compositionally-stepped Multilayers of Lead-free Piezoelectric and Magnetostrictive Components	39
Kinetics of Structuring of Protein Solutions in Magnetic Fields in Dehydration	42
Exploiting the Goos-Hänchen and Imbert-Fedorov Effects in a Magneto-electric Liquid-crystal-based System for Applications to Tunable Chemical Vapor Detection	45
High-resolution Fiber Plasmon Sensor	53
An LP-DOAS Instrument with a Laser Driven Light Source for Open-path Measurement of Atmospheric NO ₂ in Shanghai	57
Laser Induced Cell Death Stages Investigation by Raman Spectroscopy	63
Augmented Combined Field Integral Equation for Low Frequency Problems	66
Heating of Metal Powders in the External High-frequency Field	70
Optimal Design and Modeling of the Multi-stage Saturable Magnetically Controlled Reactor	76
Mini- and Microgenerators Magnetic Circuits Design	82
Electrical Impedance Tomography in the Testing of Material Defects	90
Terahertz Symmetrical Polarization Conversion in Asymmetrical Chiral Metasurface	95
Switchable Terahertz Polarization Conversion via Phase-change Metasurface	102
Subwavelength Focusing of Laser Light Using Zone Plates with Silver and Chromium Rings	107
A Metalens for Subwavelength Focus of Light	112
Topological Edge Solitons in Polaritonic Lattice	118
Zero Phonon Line Enhancement by Mie-type Resonances of Nanodiamonds with Nitrogen-vacancy Centers	122
Purcell Factor Enhancement by Dielectric Nanoantennas for Nanodiamonds with NV-centers	125
Approach for Fine-tuning of Hybrid Dimer Nanoantennas via Laser Melting	129
A Calibration Method for Phase-only Spatial Light Modulator	133
Optimal Phase Element for Generating an Elliptic Perfect Optical Vortex	136
On the Bi-elliptical Toroidal Helical Antenna Problem	141
A Low Frequency Forward Looking Antenna Array for LWD and MWD	151
Design of Slot Arrays for the Generation of Stair-step Patterns	155
Analysis and Measurement of Attenuation Constants of Ultra Wideband Signal through Commonly Used Building Materials	161
Concerning the Influence of Edge and Corner Feeds on the Radiation Fields of a Square-loop Antenna	165
Analysis of a Circular-loop Antenna Backed by a Circular Ground-plane of Finite Extent	173
Design of Ring-shaped Circular Microstrip Antenna for ULB Application	180
A Zeroth-order Resonant Antenna with Bandwidth Extended by Merging the Zeroth-order Mode with the First-negative Mode	185

Compensation of Pointing for the Parabolic Antenna of a Radio Telescope	190
Synthesis of Plane Wave Applied to 5G Communication Antenna Measurement	195
Design of Semi-active RFID Antenna	199
Frequency Transformation to Design Single Band Rectangular Patch MMW Antennas	203
Asymmetric Coplanar Waveguide Fed Monopole Antenna with Perturbed Ground Plane	211
Investigation on the Circularly Polarized Ferrite Antenna in Different Designs	216
A Wideband Dual Circular Polarization Feed Chain for Satellite Antennas at K/Ka Bands	222
Detection of Vulnerable Road Users in Blind Spots through Bluetooth Low Energy	227
Effects of the Acoustic Gravity Waves on Altitudinal Atmospheric Profiles for Radio Occultation Experiments	232
Analytic Modeling and Optimization of the SSD Performance in Remote Sensing Systems	234
A Hybrid Integration Method for Uniformly Accelerated Target	238
A Wavelet Based Denoising Method for Weak Target Detection of Pulse Compression Radar	244
Modeling of the Energy Flux Density in a Circular Waveguide with a Layer of the Metamaterial	250
Design Tunable Filter-antennas for Cognitive Radio Applications	253
Numerical Study of the Exciton-light Coupling in Quantum Wells	258
Generalized Design Technique for Fast Waveguide Ferrite Phase Shifters	263
Analysis of Schottky Barrier Indium Arsenide Nanowire MOSFET for High Frequency Application	270
Thermal Analysis of III-V Transistor at High Frequencies	275
Real-time Characterization of the Phase-shift Formed in a Helical Long-period Fiber Grating	280
Optical Comb Characterization of an All-fiber Mode-locked Erbium-doped Ring Laser with a Highly-nonlinear Resonator	284
Atomically Transition Metal Dichalcogenides Heterostructures for Ultrafast Photonics	287
Design of Optical Microresonators for Fiber-optic Sensor Networks Transparent in Mid-IR	291
Point-by-point Inscription of Phase-shifted Fiber Bragg Gratings by Femtosecond IR Radiation in Passive and Active Rare-earth Doped Optical Fibers	296
Simulation of z-dependent Dispersion Coefficients in Tapered Photonic Crystal Fibers	299
Reduced-complexity ML Method for Monostatic MIMO Radar	305
An Improved Algorithm for LFM Signal Frequency Modulation Slope Estimation	311
Performance of Double Threshold Energy Detection in Cooperative-cognitive Network by Using AF Relaying Scheme over Rician Fading Channel	314
Cooperative-cognitive Radio Networks: Performance Analysis of Energy Detection	320
A Classification Technique for Condensed Matter Phases Using a Combination of PCA and SVM	326
RFI Filtering in AERA Radio-detection of Cosmic Rays	332
Optimization of the Neural Network Trigger for a Detection of Cosmic Rays in Surface Detectors of the Pierre Auger Observatory	338
Two-dimensional Multiplier-less Wavelet Trigger for a Radio-detection of Cosmic Rays	343
The Azimuthal Symmetric Hybrid Waves in Nonlinear Cylindrical Waveguide	348
Control Approach in Inverse Problems for Time-harmonic Maxwell Equations under Mixed Boundary Conditions	354
Electromagnetic Wave Propagation in Nonlinear Media with Saturation	359
Analysis of Radiated Fields of Moving Dipole Source with Lorentz-FDTD	365
Design of Reconfigurable Antenna Using RF MEMS Switch for Cognitive Radio Applications	369
Modeling of Excitation Source for Time-domain EM Solvers	377

Modeling of Structures Using Adaptive Mesh in DGTD Method for EM Solver	383
Analysis of the Multipactor Effect by Means of the 3D BI-RME Method	389
Strip-line StF4 Antenna Excited by Step-like Pulsed Voltage as Radiator of Calibrated UWB Electro- magnetic Delta-like Impulses	393
A Mechanism of QML Lasing in Solid-state Laser with an Acousto-optic Travelling Wave Modulator ..	401
Temporal Stability of a Multi-wavelength Fiber Laser	406
High-power Narrowband Raman Fiber Laser Based on Random FBG	410
Investigation of the Features of Long-term Global Atmospheric Circulation via Satellite Radiothermovi- sion	413
Super-resolution SAR Imaging: Optimal Algorithm Synthesis and Simulation Results	419
Multiantenna Radiometric Complex for High Resolution Imaging: Synthesis of Algorithm for Optimal UWB Signal Processing and Development of Functional Flow Block Diagram	426
Chopper Radiometer of New Type: Synthesis Algorithm and Development of Functional Flow Block Diagram	431
Digital Beamforming Based on FPGA for Phased Array Radar	437
SAR Polarimetry Techniques in Remote Sensing of Arctic Region	441
Development and Study of Demodulators for Frequency-hopping Spread Spectrum Signals	445
Data Representation in the Modular Code	449
High Order FDTD Computations Using Mesh Thickening	453
A New Search Method for Costas Arrays by Using Difference Triangle Analysis	456
Spectral Problem in a Generalized Theory of Electromagnetic Waves	462
The Casimir Force in Experiments with Si Gratings	467
Superresolution in Signal Processing Using Smart Antenna	471
Shape Optimization of UWB Pulses	475
Backfire Helix Antennas for mm Precision of Satellite Positioning in Real Time	479
A S-shaped Millimeter Wave Antenna for UWB Applications	484
Evaluation of the Influence of Directivity Factor of Directive Elements of Conformal Antenna Arrays on the Performances of Azimuth-elevation DOA Estimation	490
Wavelet-based Method for Nonlinear Inverse Scattering Problem Using Least Mean Square Estimation	496
Performance Analysis of Conductive Patch Materials for the Design and Fabrication of Microstrip Patch Antennas	502
Understanding Rate Allocation Mechanism in Strategic and Structural Communication Network via Dynamic Adjacency	509
Design and Performance Analysis of Rectangular Textile Microstrip Patch Antennas Employing Different Textile Materials for Ku Band Applications	516
Bandwidth and Efficiency Enhanced Miniaturized Antenna for WLAN 802.11ac Applications	523
Influence of Permittivity and Substrate Thickness for Miniaturization of Artificial Magnetic Conductor	529
Analysis of Electric Field Distribution on Artificial Magnetic Conductor: Via Bowtie Shape	534
Optical Diffraction from Photonic-graphene Metasurfaces	540
Hg _{1-x} Cd _x Te Based <i>p-i-n</i> IR Photodetector for Free Space Optical Communication	544
The Laser-induced Synthesis of Linear Carbon Chains	548
Integrated Polymeric Interferometer with Slot Waveguide for Photonics Sensing	551
Research on the Influence of Dielectric Material Surface Fidelity and Finish on Scattering Characteristics	556
A New Signal Processing Algorithm for Ultra-wideband Radar Life Detection	560

Analysis of Multi-loop Retrodirective Cross-eye Jamming System for Large Platform	565
Micro-motion False Target Identification in Random Pulse Initial Phase Radar Based on Compressed Sensing	573
Detection of Thin Ferromagnetic Layers Based on Faraday Effect	579
Optical Binding near a Planar Interface	581
Propagation Modeling of Vortex Generalized Airy Beams in Parabolic Fiber	583
Study of Conservation of the Topological Charge of Vortex Beams Transferring in a Random Media ...	590
Diffraction of the Focused Pulsed Laser Beam on a Binary Phase Plates	597
Application of Digital Holography in Jamin-Rozhdestvenskiy Interferometer	605
Digital Holographic Interferometry for the Nanodisplacement Measurement	610
A Dual Circularly Polarized Omnidirectional Receiver Antenna for Satellite Communication	613
Effects of Printed Circuit Board on the Performance of Tag Antennas for Passive RFID	621
Design and Implementation of Leaky Wave Antenna with Adjusted Placement of Meandering Long Slot on the Broad Wall of SIW	627
Modeling of Microwave Antenna Array with Magnetoelectric Effect Control	633
Hybrid Microstrip Patch Antenna for Dual Frequency of Operation	638
A Double T-shaped Decoupling Array Antenna with Spiral Shape	643
New Electrical Equivalent Circuit Model of the Inset Fed Rectangular Patch Antenna	646
Textile Yagi Antenna at 1.8 GHz	652
Wearable Embroidered GPS Textile Antenna	655
A Low Mutual Coupling MIMO Antenna Using EBG Structures	660
A Novel Compact Tri-band Antenna for WLAN Application	664
A Low Mutual Coupling Array Antenna Based on E-shaped Structure with Spiral	667
A Compact Dual-band Slot Antenna Based on Koch Fractal Snowflake Annular Ring	670
An Improved Track Segment Association Algorithm Using MM-GNN Method	675
Parameter Estimation of Radar Target in Fractional Fourier Domain Based on Compressed Sensing ...	682
Radar Observations of Small Space Objects of Natural and Artificial Origin with Extended Antenna Fields	688
On the Possibility Use Microwave Radiometers Data for Remote Retrieval of the Evaporation from the Soil Surface	691
The Method to Use GPS Observations for Statistical Evaluation of the Diagnostic Slips Level of Total Electron Content at Different Latitudes	695
Importance of the Bioradar Signal Preprocessing in Fall Detection	699
Analysis of Microstrip Bandstop Filter Characteristic Based on Defected Microstrip Structure	704
Non-linear Dynamics of Positional Parameters of the Collimated Coherent Beam at the End of the Long Atmospheric Path	708
A Design of a Broadband Single Layer Polarization Beam Splitting Reflectarray Using Varying-sized Cross Dipoles	715
A Novel Metasurface-based Low-RCS Fabry-Perot Cavity Antenna	720
Comparative Study of Antennas for Microwave Tomography	727
Doppler Spectrums Based Translational Motion Compensation for Narrowband Radar Imaging	732
Design of a Slot Antenna for Future 5G Wireless Communication Systems	739
Optical Mapping of the Pulsatile Blood Flow <i>in-vivo</i>	742
Many-sided Investigation of a Liquid Droplet Lying on a Substrate by Different Optical Techniques ...	750
Laser Radiation Caustics Method for Quantitative Diagnostic of Transparent Inhomogeneous Media ..	754

Modeling the Propagation of a Modulated Ultrasonic Wave in a Nonlinear Medium	759
The Optimization of Electrical Tomography Algorithms	763
Highly Accurate Image Reconstruction Using Electrical Impedance Tomography	767
Comparison of Switch Controlling Alternatives	772
Subjective Comparison of Modern Video Codecs	776
The Modeling of Power Line for PLC in Smart Grids	780
What Mechanism Makes EM Radiation Quantized. Photon Structure and Size	787
Electrical Shielding Effectiveness of Metallic Enclosures; Effect of Source Orientation and Aperture Dimension	795
Semitransparent Screen for Cutoff of the Far Fields in the Shadow Domain	800
GLC Cloud Computing Method and Simulations of GLHUA Outer Layer Cloak	805
The Numerical Solution of Electromagnetic Integral Equation in Frequency Domain Based on Higher-order Basis Functions	809
Iterative Non-ambiguous Estimation of Dielectric Permittivity from Broadband Transmission/Reflection Measurements	817
Microstrip Bandstop Filter Using G-shaped Defected Microstrip Structure	822
A Modeling Method of Lossy Transmission-line Using Step-response Obtained by Slow Rising Waveform	826
3D Electromagnetic Elastic Joint Finite Element Method and Stochastic SGILD Method	832
Comparing the Calderón and $A\text{-}\Phi$ Formulation for Lossy Dielectric Simulation at Low Frequency	837
Nonstandard Description of the Electromagnetic Field (Part 1, Computational Analysis of Charge Motion in EM)	841
A New Method for Constructing an Orthogonal System of Eigenwaves of an Open Cylindrical Waveguide Surrounded by an Isotropic Medium	843
Influence of Damping Resistance in Electromagnetic Transients Using Alternate Structures of π Circuits	849
Whistler Wave Radiation from a Loop Antenna Located in an Enhanced Density Duct in a Nonresonant Magnetoplasma	856
Computation of Electromagnetic Field and Complex Materials Interaction	862
Resonant and Slow-light 2×2 Switches Enabled by Nanobeams and Grating-coupled Waveguides	868
Spectral Variability of the Atmosphere Downwelling Radiation Measured by Microwave Radiometer-spectrometer in the Range of 18–27 GHz	872
An Influence of Meteorological Conditions on the Accuracy of PS Interferometry Measurements	876
Observation of Earthquake Swarm Consequences in the Baikal Rift System with ALOS-2 Interferometry	880
PolSAR Image Fast Classification Based on Random Similarity	883
Multi-threshold Fuzzy Clustering Sorting Algorithm	889
Improving the Efficiency of Radar Functioning in Conditions of Unpredictable Factors	893
Field Measurements of the Wind Profile Using Millimeter Doppler Radar	897
Space-temporal Stochastic Characteristics of Complex Amplitude for the Sounding Vector Optical Beam	902
Electromagnetic Propagation Characteristics in K-layered Dissipative Media with Rough Surface	909
Electromagnetic Wave Diffraction by a System of Arbitrarily Located 1D, 2D, and 3D Scatterers	913
An Efficient Numerical Model for Analysis of Microstrip Antenna	920
Accuracy of the Surface Integral-equation Formulations for Large Negative Permittivity Values	926

High Gain Reduced Ground Terahertz Microstrip Patch Antenna Design for the Detection of Trinitrotoluene (TNT) Explosives Material	934
Multi-band Frequency Tunable LTE Antenna for Mobile Phone Applications	939
Superresolution in Signal Processing Using a Priori Information	944
Design and Performance Analysis of High Gain Flexible Yagi Microstrip Patch Antenna for Fixed-satellite, Radio Location and Amateur-satellite Service Applications	948
Flexible Microstrip Patch Antenna Designs for Bluetooth, IMT, WLAN and WiMAX Applications	953
Parabolic Reflector Near-field to Far-field Transformation Using FDTD and Pocklington Equation ..	958
Experimental Wireless Ultra Wideband Sensor Network for Data Collection	965
An Investigation of Pattern and Frequency Reconfigurable Microstrip Slot Antenna Using PIN Diodes	971
Mode Analysis of the Tree-like Networks of Nonlinear Oscillators	977
Magneto-dielectric Properties of Composite Ferrite Based Substrate for UHF Band Microstrip Antenna	981
In-Building Solutions Using Distributed Antenna System Based on Fractal Array	984
Impact of Geometrical Parameters on Performance of MWCNT Based Chip Interconnects	988
Optimizing the Drude-Lorentz Model for Material Permittivity: Examples for Semiconductors	994
Atomic-force Lithography for Photonic Applications	1001
Nanoimprinted Hybrid Perovskite Metasurfaces	1005
Photonic Crystal Waveguides for Particle Acceleration	1008
Hollow-core Electromagnetic Band Gap Waveguide as DC-break for Ion Sources	1014
The Colloidal Systems on Semiconductor Nanoparticles	1018
Precompensation and Windowing for Nonlinear Frequency-division Multiplexing	1022
Noise Modification by Fabry-Perot Filter and Its Influence on the Throughput of the Optical Telecommunication Channels	1026
DMGD Reducing in Few-mode Fiber Optic Links by Special Refractive Index Profile and Selective Mode Excitation Provided by Designed MDM Channels Placement Scheme over Fiber Core End	1032
A 5–11 GHz Wideband Low Noise Amplifier Using Transformer Feedback Technique	1039
Chip Design of Wireless Power Transfer Using Frequency Variation	1043
Wide Bandwidth Left-handed Circularly Polarized Printed Antenna with Crescent Slot	1047
Propagation of Guided Waves in Moving Media with Application to the Theory of Small-scale Electromagnetic Waves in the Solar Wind Plasma	1051
Searching for an Alternative Method of the Ionosphere Monitoring	1055
Dual UWB Bandstop Filter Based on M-shaped Defected Microstrip Structure	1060
Hyper-chaos Mode in the Mutual Coupled and Partial Stable Microwave Oscillators System	1065
Low-profile Planar Multiport Elliptical Patch Antenna for Wireless Communication Applications	1070
Ultra Small Satellite Based on KickSat Model: FemtoSat Feasibility Study and Service	1075
Radiation of a Charge Exiting Open-ended Waveguide with Dielectric Filling	1083
Relativity and the Doppler Effect	1089
Experimental Verification of Quadrupole Model of the Electric Field of a Rotating Magnet	1096
Hypothesis of the Electromagnetic Nature of Inertia and Gravity	1101
Fast Correction of Analytical Reconstructions in Sparse View X-ray Computed Tomography	1109
A New Method for SSD Black-box Performance Test	1116
Radiation and Control of Coupled Charged Inverted Pendulums	1123
Fine Adjustment of the Optical Axes of the Convex-concave Lenses by Laser Beams Interference	1129
An Efficient Dimming Scheme for a Plasma Lighting System Using Solid-state Power Amplifier	1131

Dual Comb Mode-locked Laser: Design and Stabilization	1135
Design and Analysis of a Tunable Microwave Photonic Delay Line in X Band	1138
Art Painting Testing with Terahertz Pulse and Frequency Modulated Continuous Wave	1145
Novel Design of a Diamond-core Photonic Crystal Fiber for Terahertz Wave Transmission	1148
Tunable Impedance Microwave Matching of Laser Diodes	1152
Mutual Phase Locking of the Magnetolectric Spin-torque Nanooscillators	1158
Theoretical Analysis of the Propagation of Surface Plasmon Waves in Multilayer Surface Plasmon Resonance Biosensor	1162
Broadband X-band Circularly Polarized Microstrip Antenna with Elliptical Patch Ring-slotted for Airborne SAR System	1168
Novel Miniaturized UWB Antenna Based on EBG Structure	1171
Novel Miniaturized UWB Antenna with Triple Band-notched Characteristics Utilizing SRR and Folded U-shaped Slot	1176
Fast and Accurate Technique for CAD of Ridge Waveguide Polarizers	1181
Unequal Bagley Power Divider Using Uniform Transmission Lines	1184
The Heating System of Metal Particles in the Microwave Field with a Frequency of 24 GHz	1188
UWB Sixport Analysis and Design in mm-Wave for 5G Applications	1190
Design and Analysis of a High Power Controllable Phase Shifter Based on SIW in X-band	1195
Tolerance Analyses for Metal EBG Waveguides	1201
A Compact Three-way Power Divider with Third-harmonic Suppression	1206
Mode Converters in Overmoded Circular Waveguide for a 250 GHz CARM Source	1211
Phaseless Arrays Diagnostic by Phaselift in Near Zone: Numerical Experiments	1217
Closely Spaced Multi-band MIMO Antenna for Mobile Terminals	1222
The Use of Navigation Satellites Signals for Measurement the Absorbance of the Forest Canopy	1227
Super-resolution Imaging for Fully Polarimetric Radar Based on Efficient Analysis of EM Scattering from Objects within a Half-space	1232
Monostatic ISAR Coherent 3-D Imaging of Space Target Based on Sparse Constraint	1238
SAR Imaging for Targets within a Half-space Using Efficient Numerical Simulation of Maxwell's Equation	1244
3D Print X-band Horn Antenna for Ground-based SAR Application	1250
Reconfigurable Sparse Concentric Ring Arrays with Optimized Number of Rings and Elements	1254
A New Six-way Broadband Spatial Power Combiner/Divider Based on Conical Cavity	1260
Glass-embedded Optofluidic Lasers	1263
Optofluidic Lab-on-chip Platform for Realtime Sensing Applications	1267
Applying the DWFT Method for Describing Scattered Wave Fields in an Inhomogeneous Plasma	1273
On Radio Wave Propagation in Multiscale Randomly Inhomogeneous Ionosphere	1278
Recent Developments of the Hybrid Scintillation Propagation Model of Transionospheric Stochastic Channel	1285
Advanced Model of HF Radio Waves Propagation Based on Normal Wave Method	1291
Exploring the Ionospheric Structures by Radio Tomographic Methods under Different Space Weather Conditions	1298
Formation of Ray Trajectories of HF Radiowaves in Artificially and Naturally Disturbed Ionosphere according to Radiotomography and IRI Model Data	1305
The Research of Backscatter Ionosphere Sounding Features on the Base of Chirp Ionosonde	1309

Large-scale Traveling Ionospheric Disturbances Registered Using Oblique-incidence Sounding over North-Eastern Region of Russian Federation	1316
Inverse Design Method in 3D Electromagnetic Cloaking Problems	1322
Optimization Method in Static Magnetic Cloaking Problems	1327
Design of the Boundary Reflection Properties to Minimize the Energy Flows	1332
Numerical Analysis of 3D Multilayered Cloaking in Static Fields	1337
Inverse Coefficient Problems for Static Maxwell Equations	1342
Inverse Design Method for the 2D Problems of Thermal Cloaking	1349
Optimization Method in Problems of Manipulating DC Currents	1354
Analysis of the Radiative-conductive Heat Transfer Equations with Unknown Intensity of Heat Sources	1359
Numerical Analysis of Problem of Designing Magnetic Bilayer Cloak	1362
Boundary Value and Extremum Problems for the Nonlinear Acoustic Model	1367
Diffraction of an Electromagnetic Vortex Bessel Beam by the End of a Semi-infinite Magnetized Plasma Cylinder	1372
Laboratorial Tests with Transmission Line Model Based on Modified π Circuits	1380
CICT Phased Generator in Nanoscale EM and BEM Modeling for Stronger Bioengineering Simulation Solutions	1387
The TRIZ-based Tool for the Electrical Machine Development	1396
Machine Learning Based Numerical Computation of \mathbf{E} -field	1404
Measurement of Ferrofluid Dynamics in Undergraduate Physics Laboratory	1410
Four-dimensional Electromagnetic Field Theory	1414
Skin Layer as a Tool for Probing Strongly Absorbing Media	1421
First Use of the Meteor-M No. 2/MTVZA-GYa Radiometer for Remote Sensing of Soil Moisture and Temperature in the Arctic Region	1426
Microwave Band Radiative Transfer in the Rain Medium: Implications for Radar Sounding and Radiometry	1430
High-resolution Mapping and Scaling Behavior of Passive L-band Measurements and Soil Moisture Retrieval in Complex Terrain	1438
Soil Moisture Retrieval in the North Slope of Alaska From GCOM-W1/AMSR2 and Meteor-M No. 2/MTVZA-GYa Radiometers Data	1442
Effect of Multiple Reflections in High-frequency Diffraction by an Elongated Spheroid	1449
Method of the Boundary Integral Equation for the Parabolic Equation on a Curved Surface	1454
Resonance Scattering of a Plane Electromagnetic Wave by Electric Dipole Located Inside Resonator Formed by Two Parallel Disks	1460
The Method of Parabolic Equation in Application to Weinstein's Problems	1469
Influence of the Longitudinal Inhomogeneity of the Coated Graded-index Planar Waveguide on the Non-linear Modulated Pulse Propagation	1476
Decompositions in Gaussian Beams by Wavelet Methods	1482
Highly Efficient Optical Heating of Non-plasmonic Nanoparticles	1488
Multifunctional Sensing with Hybrid Nanophotonic Structures	1491
Invisibility Cloaking of a High-index Dielectric Cylinder via Fano Resonances	1494
Crystalline Structure Dependence on Optical Properties of Silver Thin Film Over Time	1497
Light Scattering Characteristics of a Small Sphere: Resonant and Directive Scattering Conditions	1503
Electromagnetic Forces in Negatively Refracting Photonic Crystals	1511
Wide Range Plasma Equation of State	1517

Effective Conductivity Tensor of Plasmonic Anisotropic Metasurface: Theory and Experiment	1524
2D-plasmons in a Random Impedance Network Model of Disordered Nanocomposites	1529
Improved CDS Interleaved Linear Array	1535
Sparse-regular Aperture Array SKA Telescope Concept	1540
HERA RF and Calibration System Design	1544
Inclusion of Signal and Noise Coupling in Sparse Wideband Array Synthesis	1549
The Comparison of the Characteristics of the Double-ridged Horn Antennas Depending the Geometry of Ridge Profiles for Wideband Application	1553
Design of Rectangular Patch Antenna Array for 5G Wireless Communication	1558
Frequency Tunable Directive Antenna by Ferromagnetic Photonic Crystals	1563
Optical Fibres with Arrays of FBG: Properties and Application	1568
300 Mbps Photonic QPSK Modulator for Space Applications	1574
The Minimisation of Phase Errors in MMI Devices	1581
An Integrated Multi-wavelength Tunable Ultra-narrow Bandwidth Filter Based on Lithium Niobate ..	1584
Characterization of X-band Analog-to-digital Converter Based on High-order Harmonic-repetition-rate Passively Mode-locked Fiber Laser and Photonic Sub-sampling Techniques	1588
Model of an Active Optoelectronic Switchable Element for Integrated Photonics-based Optical Beam-forming Network	1592
Short-cavity DFB Fiber Lasers	1594
Hybrid Mode-locked Erbium-doped All-fiber Ring Laser with High-density Well-aligned Single-walled Carbon Nanotubes	1598
Theoretical Aspects of a Pulse Repetition Rate Stabilization in the Er-doped All-fiber Hybridly Mode-locked Similariton-like Ring Laser	1601
Generation of Highly-chirped Dissipative Solitons in Er-doped All-fiber Oscillator	1605
About the Phase Sensors in the Receiving-transmission Paths of Laser Systems	1610
On-chip Grounded CPW Line Model with Anomalous Skin Effect in THz Band	1616
A Simple Method for On-wafer Antenna Gain Measurement	1620
Lens Antenna Design for E-band Point-to-Point Radio Links	1625
Wireless Power Transfer through Multipole Coupling in Dielectric Resonators	1632
A Compact Dual-band GCPW-fed Antenna for WLAN, WiMAX and Bluetooth Applications	1636
Application of Atomic and R-functions in Numerical Methods for Inversion of the Radon Transform ..	1641
Modelling the Behaviour of an Open-ended Coaxial Probe to Assess the Permittivity of Heterogeneous Dielectrics Solids	1650
Microwave Hyperthermia System for Head and Neck Area with Noninvasive UWB Temperature Change Detection	1657
Non-linear Dynamics of Positional Parameters of the Collimated Coherent Beam at the End of the Long Atmospheric Path	1663
Development of a Prototype of Applicator Based on 16 Antennas for Hyperthermia Treatments in the Head and Neck Region	1670
Sparse Normalized Maximum Correntropy Criterion Algorithm with l_1 -norm Penalties for Channel Estimation	1677
An Enhanced Mixed Norm Error Criterion Adaptive Filtering Algorithm for Sparse Channel Estimation	1683
The Freshness Analysis of an Apple and a Potato Using Dielectric Properties at the Microwave Frequency Region	1688
Communication Technology for Industry 4.0	1694

Periodical Structures and Multiscale Modelling	1698
Electronic Transmission of Ethynyl-oestradiol in Menopausal Women	1704
Towards a Biophysical Management of Neck Pain and Disability	1707
Electrical Impedance Tomography Methods and Algorithms Processed with a GPU	1710
Digital Signal Processing of the Doppler Blood Flow Meter Using the Methods of Nonlinear Dynamics	1715
Vital Signs Detection via Doppler Radar and CFAR in Complex Environment	1721
Wearable Wireless ECG Sensor	1727
Optimization of Microwave Hyperthermia Applicator System for Deep Placed Tumors Treatment in Head and Neck Area	1733
Effects of 2G Mobile Phone Exposure on Both Behavioural Performance and Levels of Enzyme from NMDA-dependent Pathway	1739
Magnetic Field Risk Analysis for Employees and Patients Due to Power Transformers in Hospital Buildings	1743
Suppression of CC-FWM Inter-channel Crosstalk Using Unequal Channel Spacing in an 8-channel WDM Transmission System with Parametric Amplification	1747
Investigation of Amplification Span Length Impact on the Quality of the Signal in WDM Transmission Systems with Erbium-doped Fiber Amplifiers	1753
Influence of Structure and Doping Concentration on SBS Fast Light in Photonic Crystal Fibers	1760
Effects of Power and Shape of Pump Light on Pulse Compression Based on Stimulated Brillouin Scattering	1765
Measurements of Value and Location of Multiple Spots of Thermal Impacts on Long FBG	1768
Spectral Effective Solutions for Mixed Line Rate WDM-PON Systems	1771
Ferroelectric Film mm-wave Tripler for Elevated Power Applications	1778
A New MEM-DOA Proposal for DSM in a Grid Connected Smart Microgrid	1782
Equipment for Power Line Communication Based on Single-carrier System for Home Automation System	1787
Analyze Punch-through and Reach-through Breakdown Voltage in N+PN+ and N+P+NN+ Sandwich Structures	1793
Influence of SiO ₂ /Si Interface Charge on Performance of UMOS	1798
The Research of Threshold Voltage between Theoretical Computation and Simulation	1802
Buried-Oxide-In-Drift-Region Technique for Breakdown Voltage of Trench Power MOSFETs	1806
Compact Dual-band Microstrip Band Pass Filter Design Based on Stub Loaded Resonator for Wireless Applications	1810
Compact Dual-band Bandpass Filter Based on Fractal Stub-loaded Resonator	1815
Modeling of a Novel Microstrip Ring Resonator for Wireless Applications	1820
Equivalent Circuit Characterization of a Novel Microstrip Ring Resonator Bandpass Filter	1826
Design of a Narrow-band Microstrip Ring Resonator Bandpass Filter	1835
Broadband Eight-way Coaxial Waveguide High Power Combiner/Divider	1842
Study on Dual-threshold Detection Method for Dual-polarization Receiving Radar	1848
Ionosphere Effect Estimation in Micro-Doppler Signature Extraction for P-band Radar Targets	1854
The Troposcatter Channel Fading and Diffusion Modeling for Multi-beamforming in Receiving Antennas	1862
Possible Enhancements of TEC and Their Effects on Radio Propagation in Mexican Region	1867
The Response of the Ionospheric TEC on Travelling Convection Vortices	1875
Strong Range SF Observed in Low Latitude Ionosphere over Ascension IS in Atlantic Ocean	1879

Efficient Pumping Scheme of Er-doped DFB Fiber Laser with Suppressed Relaxation Oscillations	1884
An Ultra-thin Polarization-insensitive Wide-angle Metamaterial Absorber	1887
A Novel Reconfigurable Electromagnetically Induced Transparency Based on Solid State Plasma	1893
Detection Mechanism and Magnetic Field Distribution Characteristics for Plate Remote-field Eddy-current Testing	1898
±Electron’s Helical Structure and Mass Radius Relation	1906
Multiphysics Simulation of InP NWT for High Speed Digital Applications	1913
Simulations of a Few-mode Fiber Optic Link	1918
GLR Test for Minimum Detectable Velocity Indication in OFDM Radar	1924
Fast Algorithm for Suppressing Sidelobes at Specified Intervals	1929
SAR Target Recognition via Linear t-stochastic Neighbor Embedding and Sparse Representation	1935
Analysis of Micro-motion Model for Radar Target	1939
Optical Antitrapping of Nanoparticles in Gaussian Beam Due to Surface Modes of a Substrate	1945
Recoil Force of Surface Plasmon Polariton	1949
Developments in HF Propagation Predictions to Support Communications with Aircraft on Trans-polar Routes	1953
Ionospheric Providing of HF Propagation in High Latitudinal Regions	1960
Observations of Traveling Ionospheric Disturbances on the Basis of Vertical and Near-vertical Sounding Data	1966
Geophysical Conditions for Round-the-World Propagation of HF Radio Signals	1970
The Real-time Forecast of HF Radio Channel on the Base of Backscatter Sounding Data	1973
Peculiarities of Decameter Radio Wave Propagation over High-latitude Paths Using Data of LFM-ionosondes Network	1981
Ionospheric Disturbances during 17–19 March 2015 Magnetic Storm over Northern Region of Russia .	1985
Sources of Longitudinal Variations in the High-middle Latitude Ionosphere over Eurasia	1990
Expanding the Diagnostic Capabilities of Incoherent Scatter Radar Technique	1996
Study on Plasma Blob to Result in Radio Signal Scintillations in Low Latitude Ionosphere	2004
The Use of GNSS Data for Constructing the Indices of Electron Density Perturbation in the Ionosphere	2008
Seasonal and Helio-geomagnetic Activity Pattern of the Ionospheric Variability over Russia’s Eastern Siberia and Far East Region from the GPS/GLONASS Data	2015
Broadband THz Time Domain Bistatic Radar Cross Section Measurements	2023
Radiation and Scattering Characteristics of a Conformal Magnetic Antenna of a Large Aircraft	2026
Cross-eye Monopulse Jammer Located on UAV	2032
Reducing Radar Cross Section of TEM Horn Antenna Component with Predetermined Radiation Characteristics	2036
Synthesis of Anisotropic Plane with an Array of Randomly Oriented Impedance Strips	2040
Damping of the Scattered Field of a Plane Object by a Waveguide Array	2047
VHF-UHF Radio Monitoring Antenna with a Small Radar Cross Section	N/A
Surface Synthesis of the Reflector Antenna with Radiation Pattern of Special Form	2058
Controlling Van-Atta Array Scattering Characteristics with HITITE HMC247 Phase Shifter	2065
High Efficiency Horn with Hexagonal Aperture for Antenna Arrays	2069
Wideband Quad-ridged TEM-horn with Switched Polarization	2072
The Novel Waveguide Filters on Complex Multilayered Metal-dielectric Structures	2077
Electrodynamic Analysis of Electromagnetic Fields in the Ridge Waveguides with Piecewise-layered Dielectric Filling	2081

Wave Propagation of Induced Soft X-ray Radiation (VUV) through μ -capillary Holes of Ordered Structures of Glass Micro-Channel Plate: Comparison among Theoretical and Experimental Data	2087
Investigation of Algorithms Utilizing Wavelets to Solve Various Partial Differential Equations	2092
Incorporation of Non-local Optical Response into the Discrete Sources Method to Solve 3D Scattering Problems of Nanoplasmonics	2097
Solution of Boundary Problems for Elliptic Equation in Domains with Conical or Corner Points	2102
Mathematical Modeling of Mirror Collimator with Impedance Rolled Edges	2106
Mathematical Problems of the Diffraction Theory on Bodies with Irregularly Boundary	2110
Modeling of Periodic Rectangular Ladder-type Waveguide Systems	2115
Synthesis of Layered Waveguiding Systems Based on Metamaterials	2120
Error Estimations for the Regularized Double Period Method	2123
Design and Performance Analysis of Cockroft-Walton Voltage Multiplier (CWVM) Energy Harvesting for Low Power Applications	2131
Annealing Effect of Sputtered Crystalline MoO ₃ Films on Hole Transporting in Inverted Type Perovskite Solar Cells	2137
Estimation of Solar and Geomagnetic Activity Contribution in Solar Cycle Variations of Median Peak Electron Density NmF ₂	2140
On the Effect of Refractive Index Perturbations on Propagation of Radio Waves in the Evaporation Duct	2145
Estimation of Annual Daily Averaged Evapotranspiration across China during 1996–2015 Using Passive Microwave Observations	2150
Single-frequency Dielectric Model of Frozen Mineral Soils for Frequencies of the Basic Satellites	2155
Adiabatic Design of Micropillar Cavities for 1.55- μ m Quantum-dot Single-photon Sources	2162
Spin Noise in Quantum Dot Microcavities in Strong Coupling Regime	2170
Power Combining in THz Band by Quasi Optical Technique	2173
Stop-band Frequency-selective Structures for Controlling Back-scattering Pattern of L-band Linear Antenna Arrays	2179
Adaptive Impedance-matching Network for Wireless Power Transfer System with Off-center Receiver	2185
Dual-band Dual-polarized Hybrid Cylindrical Dielectric Resonator Antenna for Wireless Applications	2190
Experimental Investigation on Probe Feed Equilateral Triangular Dielectric Resonator Antenna for 5.8 GHz ISM Band (IEEE 802.11)	2195
Power Characteristics of Varactor-controlled Tunable Bandpass Filters on Lumped Elements	2200
Design and Optimization of Artificial Magnetic Conductor for Aperture Coupled SatCom Antenna	2206
All-band GNSS Antenna with Artificial Magnetic Conductor	2211
Resonant Processes of Quantum Electrodynamics in a Pulsed Laser Field	2215
A Distributed Fiber-optic Vibration Sensor for Power-frequency Electric-field Sensing	2223
Phase-sensitive Optical Time-domain Reflectometry with Pulse Mode EDFA: Probe Pulse Preparation	2231
Asymmetric Waveguide Design of Laser Diodes for Pico- and Nanosecond Pulse Generation in the Eye Safe Spectral Range: Linear and Nonlinear Electromagnetic Effects	2237
Optical RF Self-interference Cancellation for Full-duplex Communication Using an Integrated DP-MZM	2240
A Novel Tunable Dual-band Bandstop Filter (DBBSF) Using Spurlines with a Stepped Impedance Resonator	2245
Dual-mode Bandpass Filter with Tunable Transmission Zeros Based on Liquid Crystal Technology	2253
Lossy Acoustic Filter Synthesis by Gradient-based Optimization Technique	2257
Switchable and Tunable Band Stop Filter	2262

A Narrowband Absorptive Band-stop Filter Based on a Resistor-loaded Compact Resonator	2268
Compact Dual-band Power Divider with Highly Selective Bandpass Response	2272
A Novel Dual-band Bandpass Filter Using Nested Quarter-mode Substrate Integrated Waveguides ...	2277
Circuit Analysis of Coupled Lines and Open Stubs Based UWB Microstrip BPF	2282
Finite Element Simulation of Switchable and Tunable Resonators with BST	2286
Classification of Interference Signals Using Advanced Baseband Statistics in $\pi/4$ -DQPSK Systems ...	2292
Optoelectronic Oscillator with Delay Elements in Optical and RF Domain	2297
Photonic Interferometry Based Optical Carrier Cancellation for Optical Interference Noise Reduction	2303
Color Digital Holographic Microscopy for In-flow Observation of Plankton Microorganisms	2308
3D Printing of Polymer Structures by Two-photon Polymerization Using Q-switched Microchip Laser	2313
Brillouin Optical Spectrum Analyzer Based on Self-sweeping Fiber Laser	2316
Edge States of Bound Photon Pairs: Topology and Interactions	2321
Toroidal Dipole Associated Resonant Forward Scattering of Light by Silicon Nanoparticles	2325
Towards Solving Lippmann-Schwinger Integral Equation in 2D with Polylogarithmic Complexity with Quantized Tensor Train Decomposition	2329
Vico-Greengard-Ferrando Quadratures in the Tensor Solver for Integral Equations	2334
Collective Behavior of Multiple Atoms in General Electromagnetic Environments: Dressed Atom Fields and Bound States	2340
The Riemann-Silberstein Vectors Theory and Vector Spherical Expansion	2346
Radiation of a Charge Intersecting the Boundary between Area with Dielectric Layer and Vacuum Area inside a Cylindrical Waveguide	2356
Design and Development for a Fine Spectral Microwave Radiometer	2362
Registration of Ionospheric Response to Operation of the Engine of Spacecraft “Progress” According to GNSS Data	2365
Buffer Layer Effects on Magnetic Resonance in Ferrite-piezoelectric Bilayer	2370
A Study of the Dielectric Properties of Biological Tissues: Ex-vivo vs Preserved Samples	2373
Speed of Light in Vacuum Revisited	2378
A Novel Menu Interaction Method Using Head-mounted Display for Smartphone-based Virtual Reality	2384
Image Enhancement and Denoising for Fringe Projection Patterns	2389
Point-like Source of Extreme Ultraviolet Radiation Based on the Plasma of THz Gas Discharge in a Focused Beam	2394
On the Impact of Motion of Strongly Magnetized Plasma to the Radiation of Traveling-wave Antenna at Frequency Lower than Plasma Frequency	2399
Simulation of SiH ₄ and N ₂ O PECVD Process for Preparing SiO ₂ Thin Film	2406
Research on Electromagnetic Scattering and Plasma Stealth Design of S-shaped Inlet	2412
Metasandwich Ferrite Plate/Wire Grating/Longitudinal Copper Strip with Varactor to Achieving Con- trolled Microwave Nonreciprocal Absorption	2419
Demonstration of Scalable Spectrum-sliced Optical WDM-PON Access System	2425
Comparison of Dispersion Compensation Methods for 40 Gbit/s WDM-PON Transmission Systems ..	2431
Performance Investigation of Dispersion Compensation Methods for WDM-PON Transmission Systems	2437
Hybrid Single and Multi-path Routing and Distance Adaptive Modulation Level Spectrum Allocation in OFDM-based Elastic Optical Networks	2443
Investigation of 4-PAM Modulation Format for Use in WDM-PON Optical Access Systems	2450
Algorithm of Objects Classification by Optoelectronic Systems of Unmanned Aerial Vehicles	2455
Development of Y-type Receiver for Atmospheric Optical Communication	2460

Portable Atmospheric Optical Communication System	2464
A Low-cost, Compact OEIC without Equalizer for 5 Gb/s Application	2468
Modeling of a Straight Channel and Y-splitter Waveguides by Loading SiO ₂ Planar Waveguide with MgF ₂	2472
Tunable Frequency Selective Radome with Broadband Absorbing Properties	2478
Design of Edge Coupled Open Loop Metamaterial Filters	2483
Fully Reconfigurable Evanescent Mode Bandpass Filter Embedded with Metallic Grid	2489
Implementation of a Wide Band VHF High Power Tubular Band Pass Filter	2495
Architecture and Research of M2M Wireless Mesh Networks	2500
Simulation Analysis of Microwave Propagation Channel Based on Stochastic Modeling in Sea Environment	2504
A Novel Multi-corridor Path-Loss Model for Indoor Communications	2508
Electromagnetic Compatibility Assessment of LTE 700 Networks for Co-channel Case	2511
Simulation of Intelligent Public Light System in Smart City	2515
A Blocking Collision Tracking Tree Algorithm in Mobile RFID Systems	2520
Quality of Service Measurements and Service Mapping for the Mobile Internet Access	2526
Single-satellite Positioning Algorithm Based on Direction-finding	2533
Design and Analysis Performance of a New Patch Array Antenna for SSR	2539
Frequency-, Temperature-, and Texture-dependent Dielectric Model for Frozen and Thawed Arctic Mineral Soils	2546
An Improved PCA-SIFT Algorithm Application in Light Small UAV Image Registration	2554
Simultaneous Radar and Video Observations of the Sea Surface in Field Conditions	2559
Dynamics of Excitonic Polaritons in Semiconductor Heterostructures with Quantum Wells	2566
Analytical Approximation-based Method for Calculation of Generalized Ambiguity Function and 3D Down-looking SAR Image Reconstruction	2572
Monitoring of the Moon as the Natural Satellite of the Earth in the Solar System	2579
A Dynamical Balance of the Moon on the Lunar Orbit	2583
A Broadband Polarization Insensitive Metamaterial Absorber Based on Three-dimensional Structure	2585
A Tunable Microwave Metamaterial Absorber/Cross-polarization Reflector	2589
An Adaptive Information-Modeling System (AIMS) for Monitoring Aquatic Ecosystems	2594
Gas Breakdown by a Focused Beam of CW THz Radiation	2600
Investigation on Structural, Ferroelectric and Magnetic Properties of BiFeO ₃ -PbTiO ₃ Multiferroic System	2603
Design of Simulation System for Multi-function Radar Behaviour Analysis	2606
Research on Extension of Hierarchical Structure for Multi-function Radar Signals	2612
Waveform Design and Imaging Method of MIMO ISAR Based on Orthogonal LFM Signal	2617
Estimation of Micro-Doppler Parameter Based on Adaptive PWV-Hough Transform	2627
Temperature Dependence of Photo- and Radioluminescence of (Gd,Y) ₃ Al ₅ O ₁₂ :Ce ³⁺ Mixed Oxide Garnet Ceramics	2633
Numerical Blow-up Diagnostics for Differential Equation Solutions	2637
Reconfiguration of Plasma Antenna Using 3D FDTD Method	2644
Chaotic Synchronous Response in Multipath Channel	2648
The Interaction between Ultrawideband Chaotic Radio Pulses and Medium within Living Organisms	2654
Multipath Propagation of Ultrawideband Chaotic Radio Pulses in Wireless Local Area Networks	2659

Radiation Characteristics of Ensemble of UWB Chaotic Sources	2665
Chaotic Communications for the Internet of Things	2671
Identification System Based on Ultrawideband Direct Chaotic Communication System	2677
Designing a Printed Miniature Antenna for 3–5 GHz Range Integrated on PCB with UWB Direct Chaotic Transceiver Module	2680
Topographic Metamaterials for Ultrasonic Non-destructive Evaluation	2688
Aluminum Nanopowder Combustion Monitoring Using an Optical System with Brightness Amplification	2694
The Assessment of Crack Formation Processes in Reinforced Concrete under Uniaxial Compression by Parameters of the Electric Response to Mechanical Impact	2699
Subwavelength Imaging of Cracks in Metallic Materials	2703
Spectral Characteristics of Magnetic Fluid with Particles of Different Dimensions in the Terahertz Frequency Range	2707
Fluctuations in the Values of the Activity Parameters of Micron Iron Powder after Microwave Irradiation	2712
Core Losses Estimation of High Speed Electrical Machines Based on Corrections in Epstein Frame Method Data	2716
Numerical Solution of Problem of Electromagnetic Wave Diffraction by a Perfectly Conducting Body of Small Thickness	2721
Modified Thin Dielectric Sheet Model to Efficiently Analyze the High Contrast Problem	2728
Effective FDTD Modeling of Microwave Ceramics	2732
Effects of Cavities RF Field Radial Non-uniformity on Multiple-beam Klystron Efficiency	2734
Joint Application of the Finite Element Method and the Scattering Matrix Method for Solving Diffraction Problems on Multilayer Reflection Gratings	2738
Stability of the Optical Characteristics of Approximant Structures with Fractal Properties	2742
Local Excitation of Resonance Modes in the Sub-THz Planar Resonators by AC Josephson Effect	2746
Antenna Radiation Imitation out Its Real Location Using Hyperbolic Metamaterial Lens via Transformation Optics	2753
Terahertz Biomedical Imaging: From Multivariate Analysis and Detection to Material Parameter Extraction	2756
Investigation of Artificial Dielectric Periodical Structures for Formation of Terajets	2763
A Generalized Split-window Algorithm for Retrieving Land Surface Temperature from GF-5 Thermal Infrared Data	2766
Land-cover Classification of Suburban Areas Based on Multi-polarized Airborne SAR Data Using Texture Measures	2772
Normalized Radar Backscattering Cross-section and Doppler Shifts of the Sea Surface in Ka-band	2779
The Concept Design of a Fore-field Camera for the Intelligent Hyperspectral Remote Sensing Satellite	2787
A 3D Discontinuous Galerkin Time-domain Method for Nano Plasmonics with a Nonlocal Dispersion Model	2792
I-shaped Metamaterial Antenna for X-band Applications	2800
Light Propagation in Semiconductor Resonant Exciton-polariton Hyperbolic Metamaterials	2804
Invisibility Cloak Scheme with Composite Plasmonic Waveguides and Metasurface Overlayers	2809
Optimization for Spatial Separation of Optical Fields' Components in All-dielectric Structures	2813
Optical Bound State in the Continuum in the One-dimensional Photonic Structures: Transition into a Resonant State	2817
Mie Bands in All-dielectric High-index Metamaterials	2825

Flame Temperature Measurements in CI Engines Using an Emission Spectroscopy Sensor System	2828
Identification of Pure Rotational CARS Spectra Influenced by High Temperature Gradients	2835
THz Electric Field-induced Second Harmonic Generation in Ferroelectric Thin Film BaSrTiO ₃	2841
Highly Sensitive Photodetector Based on Transition Metal Dichalcogenides Monolayer	2845
Metal-carbyne Clusters for SERS Realization	2848
Plasmon Modes of Vertically Aligned Superlattices	2852
Bulk Photoemission from Plasmonic Nanoparticles: Physical Models and Software Tools	2858
Quantum State Model of Non-radiative Decay for Description of Superradiance	2864
States Tomography of Quantum Systems via Twisted Light	2871
Hybrid Homodyne-like Detection Scheme with Photon-Number-Resolving Detectors	2874
Application of Strip Lines for Magnetolectric Device Design	2879
The Electromagnetic Characteristics of the Composites Based on Hexaferrites and MCNT at Gigahertz and Terahertz Frequency Bands	2884
The Radar Absorption Properties of the Hollow Fe ₃ O ₄ Microspheres Synthesized by the Plasma Dynamic Method	2889
Improving the Efficiency of the Transformer Rectifier Unit for the Aerospace Area	2894
Entanglement Dynamics of Two Electrons in Noisy Quantum Walks	2900
Maehly Approximation and Phase Extraction Hybrid Method for Fast Analysis of Wideband Electromagnetic Scattering from a Rough Surface	2904
Application of MUSIC to Microwave Imaging for Detection of Dielectric Anomalies	2908
On the Reconstruction of Perfectly Conducting Crack in Transverse Electric Case	2913
Least Condition of the Topological Derivative for Imaging of Thin, Flat Dielectric Inhomogeneity	2918
Shape Identification of Extended Dielectric Targets in an Inhomogeneous Medium Using Kirchhoff Migration	2922
Application of Linear Sampling Method for Identifying Location of Small Dielectric Inhomogeneities in a Half-space	2927
A Novel Method Based on the Vondrak-Cepek Algorithm for Correction of TWSTFT Diurnal	2931
A Novel High-speed Parallel Sampling Technique by Analog and Digital Twice Mixing	2938
Modified Superformula Contours Optimized via Genetic Algorithms for Exponentially Converging 2D Solutions of MFIE	2945
On Electromagnetic Forces and Works Done by Them	2948
Nonlocal Homogenization of Coated Wire Medium	2956
Investigation of the Electrical and Magnetic Properties of Combined Metamaterials	2963
Manipulator to Extract Foreign Objects from the Hot Chamber of the Mine	2967
Lighting Systems for the Control of the Processes, Occurring in the Pressurized-water Reactor	2970
Using 3D Printing Technology to Develop the Unmanned Aerial Vehicle Electro-optical Pod for Free-space Optical Communication	2972
Application of a Magnetic Sensor for Determining the Mass Imbalance of the Coriolis Vibratory Gyroscope with Cylindrical Metallic Resonator	2975
Investigation of Transmission Line Response to Random Plane Waves through Stochastic Reduced Order Modeling	2980
Design and Implementation of a High-speed, Large-capacity, Multi-type Data Recording System Used in Wideband Phased-array Radar	2984
The Impact of Signal Regeneration on the DWDM System's Power Efficiency Using 10 Gbps NRZ-OOK	2990
Circular Microstrip Patch Assisted Planar Crossover for GPS Application	2995

The Analysis of Transient Phenomena on Power Transmission Lines Due to Lightning Electromagnetic Pulses	3000
Analysis of Discrete-time Energy-harvesting DF Relay in Rician Fading Channel	3006
Miniaturized Cavity-backed Slot Antenna Loaded with Magneto-dielectric Ferrite for RFID Tag Reader	3012
Peculiarities of Salt Marshes Microwave Radiation in South of Western Siberia	3018
Seasonal Variations of Microwave Radiation of Saline Soils in the Kulunda Steppe on Evidence Derived from SMOS	3025
On Possible Effect of Mineralized Water Bodies on Microclimate	3032
Estimating the Absolute Total Electron Content from the Single-frequency GPS/GLONASS Data ...	3036
Relaxation Model of Complex Relative Permittivity of Sandstones for the Frequency Range from 10 kHz to 1 GHz	3041
Complex Dielectric Permittivity of Saline Soils and Rocks at Frequencies from 10 kHz to 8 GHz	3046
Hand-held Radar with Video Positioning System for Microwave Imaging	3052
An Improved High Angular Resolution Method by Using Four-channel Jointed Monopulse Radar ...	3056
Multitarget Track-before-detect from Image Observations Based on Multi-object Particle PHD Filter	3062
Multi-sensor Multi-object Joint Detection and Tracking from Image Observations Using Labeled Multi-Bernoulli Densities	3067
Joint Cumulative Detection Probability and Cost Functions Optimization for Guided Search of Phased Array Radar	3072
A Sparse Signal Perspective for Blind User Identification in Multiuser DS-CDMA	3078
Future Gyros on the Base of Whispering Gallery Mode Resonators	3085
High Confinement InP Nanophotonic Circuits for Optical Sensing Opportunities	3090
Biological Object Determination by Raman Scattering Enhancement Supported on the Multilayer Dielectric Thin Film	3094
30-GHz OFDM Radar and Wireless Communication Experiment Using Radio over Fiber Technology	3098
Optical Absorption at Free Electrons in Semiconductors Induced by Acoustic and Longitudinal Optical Phonon-assisted Processes	3102
Circular-lattice Photonic Crystal Fiber with Square Air Holes Supporting 58 OAM Modes	3105
Hyperbolic Chaos and Quasiperiodic Dynamics in Experimental Nonautonomous Systems of Coupled Oscillators	3109
Synchronization of Hidden Chaotic Attractors on the Example of Radiophysical Oscillators	3114
Generation of Chaotic and Quasi-periodic Oscillations in Multi-contour Self-generator	3119
Robust Chaos in Systems of Circular Geometry	3122
Chaotic Communication with Robust Hyperbolic Transmitter and Receiver	3129
Chaotic Flux Flow in T-junction Josephson Oscillator	3137
Integrated Ultrawideband Microwave 30–60 GHz Chaotic Oscillator Model	3141
The Unit Cell of Radiolight Receiver	3144
Comparative Analysis for Effectiveness of Musical and Ultrasound PWD Mode Signal to Stimulate the Fetal Response	3149
Microwave Imaging of Concealed Objects Beneath Clothing by Creating Synthetic Aperture due to Natural Motion of the Subject	3153
Objects Detection and Recognition in Biomedical Microscopic Images for the Purpose of Non-invasive and More Precise Diagnostic	3159
Optimization of a Method of a Polysectional Wide-band Bioelectrical Impedance Analysis of Complex Biological Structures for Screening Purposes in Rehabilitation Medicine	3166
Liquid Transparency Changing Dynamics Estimation by Means of Digital Speckle Correlation	3172

Capacitive Sensor of Weak Magnetic Field on the Basis of Ferromagnetic Fluid with Micro- and Nanoscale Particles	3176
A Theoretical Study of Line Intensities in Emission Spectra of Rare Gas Atoms in an Alternating Electric Field	3182
FDTD Solution of Reconstructing Permittivity of a Dielectric Inclusion in a Waveguide Taking into Account Measurement Inaccuracy	3188
Diffraction by a Narrow Circular Cone in Parabolic Equation Approximation	3196
Numerical Method for Electromagnetic Wave Propagation Problem in a Cylindrical Anisotropic Inhomogeneous Metal-dielectric Waveguide	3201
TM Scattering by a Homogeneously Filled Slit in a Thick Impedance Screen	3209
Numerical Model of On-chip Mode-locked Lasers for Millimeter Wave Generation	3216
Metal Grating Terahertz Polarizers on Substrate	3223
Impact of Chiral Unit Element Curvature on Chiral Metasurface Optical Properties in Terahertz Frequency Range	3226
Application of Terahertz Pulsed Spectroscopy for the Development of Non-invasive Glucose Measuring Method	3229
Optically Switchable THz Ultrafast Modulator Based on Cross-shaped Resonators Graphene Metasurface	3233
Modeling of the Methodical Errors of High-precision Aircraft Radar Altimeter Operating above the Sea Surface at Low Altitudes	3236
MW Holographic Imaging System for Detection of Hidden Dinosaur Tracks	3241
An Impedance Tuner Based Self-interference Canceller for Monostatic Low Noise CW GPR Sensor	3247
High Altitude Terrain Correlation Navigation Resetting by Nadir Looking Synthetic Aperture Radar	3252
Comparison of Polarimetric SAR Features for Terrain Classification Using Incremental Training	3258
Accelerated Boundary Integral Method for Solving the Problem of Scattering by Multiple Multilayered Circular Cylindrical Posts in a Rectangular Waveguide	3263
Application of Feature Selective Validation to the Design of Microstrip Antenna	3272
Effective Combined Method for Calculation of Circular Excitation Dielectric Cylinder with a Heterogeneous Object	3276
Computational Power Conservation Technique Using Mobility Adaptation Method in MANET	3283
Numerical Calculation of Magnetic Dipole Fields by Three-dimensional QS-FDTD Method	3293
Analysis of Shielded Ring Waveguide	3297
Erroneous Reading of Information in Chipless RFID Tags	3304
Design of Wireless Sensors by Using Chipless RFID Technology	3309
Detuned Dipole Array Backed by Rectangular Plate Applied as Chipless RFID Tag	3314
Two-part Stretchable Passive UHF RFID Textile Tags	3318
Fabrication and Performance Evaluation of 3D-printed Graphene Passive UHF RFID Tags on Cardboard	3322
Realization of Desired Shaped Beam Array of Helical Antennas	3326
A New Technique to Suppress Grating Lobes beyond Full Wavelength Element Spacing for Linear Arrays	3330
Independent Control of the Beamwidth and Sidelobe Level of Taylor One-parameter Arrays	3335
Beam Steering Performance of Wideband Cavity-backed Patch Antenna Array Element	3340
Dispersion of Surface Waves in All-dielectric Hyperbolic Metasurfaces	3347
The Spectral Characteristics of the Excitation of Cylindrical Surface with Nonlinear Loads with a Metamaterial Layer	3351

Digital 2-bit Anisotropic Impedance Metasurfaces for UWB RCS Reduction	3358
Possibility of Isotropic Metafilm Representation by an Equivalent Homogeneous Layer	3365
Nanocrystalline Resonant Silicon Nanoparticle for Highly Efficient Second Harmonic Generation	3368
Ultrafast Carrier Dynamics in LT-GaAs, Doped by δ -Si	3371
Kinetics of Photoexcited Carriers in WSe ₂ Monolayer under High Excitation	3375
Nonlinear Localization of Chirped Femtosecond Pulse in Layered Photonic Structure	3378
Influence of Artificially Created Stress in the Buffer Layer of the Structure with Active Layer In _{0.38} Ga _{0.62} As on the THz Generation by Ultrashort Laser Pulses	3383
Fractal Bimetallic Thin Films Obtained by Laser Deposition of Colloidal Nanoparticles	3386
The CW-laser Ablation of Resonant Silicon NPs in Liquid	3389
A Range of Fields over the Spectrum in a Cell Colony May Control the Timing of Its Cell Cycle	3393
The Topological Electroconductivity Control in the Semiconductor/Metal/Carbon Unit by Laser-induced Nanogranular Structures	3398
Fabrication of Sub-150 nm Structures by Two-photon Polymerization for Plasmon Excitation	3402
Impact of Histology Region Size on Measured Dielectric Properties of Biological Tissues	3406
Porphyritic Photodiagnosis Agents: Comparative Studies in Aqueous, Buffer and Albumin-containing Solutions	3412
Optical-physical Aspects of Fractal Art Therapy	3418
A Feasibility Study for Circadian Rhythm Monitoring via a Continuous-wave Radar	3422
Through the Wall Detection of Heartbeat and Breathing Using SFCW Radar	3427
Investigation of Distribution of Electromagnetic Fields Inner Biological Objects	3433
Analysis and Comparison of an Inductive Powering Unit Control Methods	3439
An Improved Resource Allocation Algorithm Based on Stackelberg Game and Gradient Theory	3446
Application of Feature Selective Validation to Radio Scattering Models for Sea Surface Propagation ..	3452
A Novel RMS Delay Spread Model for VHF/UHF Bands	3456
An Analysis of Maritime Communications between a Ship at Sea and a Shore Station by a Ray-based Monte Carlo Method	3462
An Improved Mechanical Fault Diagnosis Algorithm Based on Weighted Entropy Fusion and Modified DS Theory	3467
Interference Cancellation and PAPR Reduction Using Carrier Interferometry Codes for Adaptive NC-SOFDM System Used with Dynamic Spectrum Access	3473
Indoor Positioning System Based on INS/WiFi Propagation Model	3478
Kolmogorov Entropy of Near Field: Numerical Results	3481
Analytical Representation of the Sensitivity Functions for High-resolution Image Reconstruction in Parallel-plate Time-domain Diffuse Optical Tomography	3487
Newton-Kantorovich Method Applied to the Reconstruction of Surface Profiles under Tikhonov's Regularization with Domain Constraint	3495
Passive Crosswind Profiling Based on the Analysis of Turbulent Distortions Evolution in Incoherent Images	3501
An Inverse Problem for Angularly Varying Sources: Preliminary Results	3508
Numerical Convergence Study of Some Iterative Algorithms for Coupled Physics Electrical Conductivity Imaging	3516
Diffraction by a Transversal Screen in a Planar Waveguide	3521
Aposteriori Estimates in Inverse Problems for the Helmholtz Equation	3526
On Principle of the Least Action in Classical Electrodynamics	3532

The Method of Surface Plasmon-polariton Pulses Generation via Cooperative Effects in Waveguide Spaser	3539
Heat Island Phenomena and It's Influence on Troposphere Mezo-scale Structure Measured by Set of GPS-GLONASS Receivers	3547
GPS Signals Phase Fluctuations Caused by Atmospheric Integral Water Vapor Mesoscale Variability	3551
Molecular Dynamics as Studied by Laser Correlation Spectroscopy	3556
The Dual Jones Birefringence in Magneto-electric Media	3563
Synthesis of an Artificial High Effective Permittivity Medium in a SIW Periodically Loaded with Metallic Cylinders	3573
Design of Compact Strip-line Directional Couplers for High Power Operation within Frequency Band 4–12 GHz	3579
Full Wave Analysis and Design of Waveguide Diplexer with Ridged Sections and Diaphragms	3582
On the Complexity of Randomly Overlapped Subarray Feeding Networks	3586
Compact Microstrip Feed Networks for Low-impedance Quadrifillar Helix Antennas	3590
Multiphysics Analysis of High Power CW Ferrite Phase Shifter Designs for Application in Circulators	3596
Design of Wideband Lumped Element Circulator	3602
Spin-polarization Dynamics of Exciton Polaritons under the Artificial Gravitation Effect in Wedged Microcavities	3609
Practical Aspects of Active Phased Arrays Characterization during Thermal Testing	3615
Leaky Coaxial Cable with Continuous Scanning Directive Beam	3622
Design of a W-band One-dimensional Beam Scanning Slotted Waveguide Antenna with Narrow Beam and Low Side Lobe	3625
Design of Metasurface Radomes for Wide-scan Phased Array Antennas	3629
Design of Waveguide Slot Array to Generate Sum and Difference Pattern for Synthetic Aperture Radar	3632
TEM Antenna's Arrays and High Power Radiators of UWB Electromagnetic Sub-nanosecond Impulses	3637
Double-layer Variable Geometry Inductor for Energy Harvesting Applications	3644
The Planar Inductor with Adjustable Surface for Energy Harvesting Applications	3651
In Vivo Magnetic Resonance Imaging of Human Knee with Metasurface	3657
Hybridized Eigenmodes of Periodic Wire Arrays and Their Application in Radiofrequency Coils for Preclinical MRI	3661
Readout Circuit Design for Noise-based Photodetection	3667
Investigation of Nanoantenna Geometries for Maximum Field Enhancements at Optical Frequencies	3673
III-V Heterostructure Based Three Terminal Thermal Rectifier	3681
Co-rotating Leo Satellites for Estimating the 2D Tropospheric Water Vapor	3684
Simultaneous Observation of UHV and VHF Radio Signal Ionospheric Scintillations in the Magnetic Zenith	3690
A 3D Unidirectional Antenna for Microwave Application	3694
An Iterative Decision Directed Channel Estimation for Multi-user MIMO Systems	3699
A Single Cylindrical Dielectric Resonator Based MIMO Antenna System for WiMAX Applications	3707
Electromagnetic Wave Scattering from Statistically Distributed System of Reflectors over Smooth Sea Surface	3713
Radioholography Based Method for Parabolic Reflector Surface Quality Control	3718
Radar with a Local Positioning Video-system	3723
About the Results of the Processing Route Radarogram Haar Wavelets and Daubechies	3729
Characteristic Modes of Electrically Small Antennas in the Presence of Electrically Large Platforms	3733

A Hybrid Structured-unstructured Meshing Approach for Time Domain EM Analysis of Curved Geometries	3739
Electromagnetic Guided Waves on Infinite and Finite Periodic Linear Arrays of Thin Metallic Wires	3746
Calculation of the Radar Station Field in 3D Space in the Presence of Forest and Other Obstacles by the Method of Parabolic Equation	3754
Design and Simulations of Plasmonic Planar Fiber to Chip Coupler Works at the Optical Communication Wavelength	3758
About Two Approaches to Automation of a Process of Calculating Metamaterial Parameters According to the Scattering-parameter Extraction Method Using Modern Full-wave Simulators	3763
Applications of fs Laser Radiation for Formation of Thermochemical LIPSS on Cr Films and Fabrication of Submicron Amplitude Gratings	3768
Artificial Anisotropic Dielectric Material for Antenna Polarization Rotation	3771
Coherent Perfect Absorption in a Coupled Electric-magnetic-resonator System	3777
The Problem the Frozen Soil Mapping of the Steppe Zone	3781
Effect of Porosity, Pore Size and Permeability on the Complex Relative Permittivity of Sandstone	3786
Efficiency Analysis of Feature Extraction Methods for Pulse Laser Ranging Systems	3790
South African Passive Radar and towards Its Characterisation	3795
Design and Algorithms of the Tiangong-2 Interferometric Imaging Radar Altimeter Processor	3802
Application for Determining the Modulation Transfer Function of the Smartphone Built-in Camera ..	3804
Accurate Design of a W-band Full Band Frequency Tripler Based on Anti-parallel GaAs Schottky Varistor Diode Pair	3809
Design of a Compact Fractional-N PLL-based Frequency Synthesizer for Dual-band DBS Applications	3812
Power Limiter Based on Reflected Phase Shifter with Ferroelectric Varactor	3816
Analog Varactor Phase Shifter	3820
Design of a Wideband CMOS Variable-gain Low Noise Amplifier	3826
Design of a High Speed SP4T Switch at Ka-band	3831
Design Approach for Microstrip PIN-diode Phase Shifters with Equalized Losses	3835
Plasmonic Nanoantenna for Enhancement of Vertical Emission from Whispering Gallery Mode Laser	3842
New Approaches to Electrically Driven Nanoantennas	3847
Ultrafast Tunable Hybrid Yagi-Uda Nanoantenna	3854
Frequency-domain Synthesis of Tapered Slot Antennas	3859
Uniform Microstrip Array Antenna with Low Sidelobe Level for Coastal Surveillance Radar Application at 9.37–9.43 GHz	3866
Line-coupled Microstrip Slotted Patch Antenna with Modified Ground Structure for Next Generation of Wireless Communications	3871
Design Regular Fractal Slot-antennas for Ultra-wideband Applications	3875
Compact and High-gain Quasi-Yagi Antennas with Multi-element Folded Dipole Feed	3881
A Leaky Coaxial Cable Antenna Based on Sinusoidally-modulated Reactance Surface	3887
Design of Compact Wearable Antennas by Using Printed Electronics	3891
Spherical Lens-reflector for Aerospace Communication	3895
Polarization Characteristics of the Paraboloidal Reflector Antenna	3900
Geometrical Optics Synthesis of Dual-reflector Beam-waveguides with Pattern Symmetry and Zero Cross-polarization	3907
Soliton Generation and Stability in the Discrete Left-handed Electrical Network	3915
Numerical Analysis of Nanoscale Resonators Using Material Parameters at THz Frequencies	3923

Design of LLC Converter Using Method Figure of Merit for Perspective Semiconductors and Magnetic Components	3928
Numerical Implementation of Efficient Cross-section Method for the Analysis of Arbitrarily Shaped Dielectric Obstacles in Rectangular Waveguide	3937
