CONTENTS

SESSION 1A

COMPRESSOR: FLOW RANGE ENHANCEMENT DESIGN, APPLICATIONS AND MATCHING

C6231/150	Investigation of performance and flow mechanism of a non-axisymmetric casing treatment in centrifugal compressor for turbochargers <i>B T Wang, R Numakura, H Tamaki, IHI Corporation, Japan</i>	3
C6231/136	Turbocharger compressor map enhancement for highly efficient combustion engines <i>T Czapka, D Hagelstein, J Theobald, Volkswagen AG, Germany; J Seume, Leibniz Universität Hannover, Germany</i>	15
C6231/153	Aerodynamic design of a high flow and high pressure ratio centrifugal compressor for a marine-use turbocharger <i>C Mikami, K Yamada, T Kawakubo, IHI Corporation, Japan</i>	33

SESSION 1B

COMPRESSOR: SURGE LINE MEASUREMENT AND INTERACTION

C6231/109	Turbo charger compressor inlet and outlet pipe length and volume, and the effects on the characteristics and location of surge <i>M Whittlesea, E Roberts, Cummins Turbo Technologies, UK</i>	47
C6231/113	Experimental investigation of upstream installation effects on the turbocharger compressor map <i>B Kerres, A Cronhjort, M Mihaescu, KTH Royal Institute of Technology, Sweden</i>	67
C6231/105	Influence of the hot gas test bench piping system on the surge line of an automotive turbocharger compressor <i>C Schäfer, I Sandor, M Klaus, Continental Automotive GmbH, Germany; R Baar, Technische Universität Berlin, Germany</i>	79

SESSION 2A
SUPERCHARGING, TURBOCOMPOUND, V/G AND
2-STAGE

C6231/165	Ultra high efficiency two-stage turbocharging system <i>R Cadle, D Giebert, A Mohamed, S Pees, M Oakes, Honeywell Turbo Technologies, USA and France</i>	95
C6231/112	VTG turbocharger evolution of BorgWarner Turbo Systems <i>R Christmann, R Kopietz, N Buhl, H Breitbach, BorgWarner Turbo Systems, Germany</i>	111

SESSION 2B
GAS STAND AND NOVEL TESTING METHODS

C6231/116	The E-drive: An isentropic compressor performance test rig <i>M Bergmann, P Parma, BorgWarner Turbo Systems Engineering GmbH, Germany</i>	127
C6231/130	An approach to turbine housing validation through the measurement of residual strains using neutron diffraction and operationally induced strains using high temperature strain gauges <i>K Gannon, BorgWarner Turbo Systems and The University of Huddersfield, UK; K Shoghi, BorgWarner Turbo Systems, UK; S H Kilcoyne, The University of Huddersfield, UK; T Pirling, Institut Laue-Langevin, France; S Zhang, Rutherford Appleton Laboratory, UK</i>	143

SESSION 3
ADVANCED SIMULATION

C6231/110	Obtaining bulk flow based heat transfer coefficients for thermal evaluation of turbochargers <i>A Karamavruc, BorgWarner Inc., USA</i>	161
C6231/104	Numerical investigation of the effect of different nozzle clearance at hub and shroud side on variable nozzle turbine performance <i>X Shi, S Guo, B Zhao, C Yang, C Ma, M Qi, Beijing Institute of Technology, China</i>	179

SESSION 4A
BEARINGS, SEALS AND ROTORDYNAMIC DESIGN

C6231/160	Heat flow in a turbocharger shaft and its impact on the bearing system <i>T Kleine Sextro, N Lübbert, H Rätz, J R Seume, Leibniz Universitaet Hannover, Germany</i>	191
-----------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

C6231/137 Experimental and numerical analysis of sealing ring of turbocharger 207
C C Ma, Z Huang, B Jin, H Zhang, Beijing Institute of Technology, China; Y Qu, Y Zheng, Skydragon Turbocharger Manufacturing Co., Ltd, China; S H Huang, Hunan Tyen Machinery Co., Ltd, China

C6231/106 The effect of oil film instability on power losses prediction of a turbocharger rotor-fully floating ring bearing system 217
L Tian, M Wakelin, C Lancaster, M Lindsay, Cummins Turbo Technologies, UK

SESSION 4B

MATERIALS, HOUSING, BURST CONTAINMENT, EGR AND FATIGUE LIFE

C6231/101 Explicit dynamic finite element simulation of turbocharger containment and wheel burst 235
L Wang, D M Eastwood, Cummins Turbo Technologies, UK

C6231/164 An improved approach to HCF development for vaneless turbine stages 249
W Smith, C Wilkins, W Magalhaes, B Sirakov, Honeywell Turbo Technologies, USA; D Gouravaraju, Honeywell Technology Solutions, India; Z Neterda, Honeywell Technology Solutions, Czech Republic

C6231/102 The development of a long route EGR turbocharger for commercial engine applications 271
M Burkinshaw, U Mukhtar, L Sullivan, Cummins Turbo Technologies, UK

C6231/103 Development of a high temperature turbocharger for heavy duty applications 287
A Sullivan, D H Brown, D M Eastwood, J Green, Cummins Turbo Technologies, UK; A Dombrowsky, F J Arnau, Universitat Politècnica de València, Spain

SESSION 5A

NOVEL APPLICATION: EURO 7 AND ELECTRIC ASSIST PLUS E-BOOSTING AND DOWN SPEEDING, WASTE HEAT RECOVERY

C6231/123 Low inertia centrifugal compressor wheels: Influence of back disk cavity on aerodynamic losses and axial thrust load 303
T Fischer, H Rätz, M Peters, J R Seume, Leibniz Universität Hannover, Germany

C6231/133 Investigation of an electrically assisted turbocharger with energy recovery for a heavy duty diesel engine 319
A Rezk, M L Jupp, J Allport, University of Huddersfield, UK; J Carter, A K Nickson, BorgWarner Turbo Systems, UK

C6231/119	Design of compressor for electrically decoupled turbocharger in downsized gasoline engine by 3D inverse design <i>I Ghazaly, M Zangeneh, University College London, UK</i>	331
C6231/162	A high-performance electric supercharger to improve low-end torque and transient response in a heavily downsized engine <i>B Richards, K Gray, H Tran, A Andah, Aeristech Limited, UK; M Bassett, J Hall, MAHLE Powertrain Limited, UK</i>	347
C6231/144	Performance testing of an electrically assisted turbocharger on a heavy duty diesel engine <i>E Winward, R Stobart, D Zhao, Z Yang, Loughborough University, UK; J Rutledge, Caterpillar Inc., USA; J Carter, BorgWarner Turbo Systems, UK; A Costall, Imperial College London, UK</i>	363
C6231/155	Design of a turbine-generator-unit for commercial vehicle ORC applications <i>H S Kunte, J R Seume, Leibniz University Hannover, Germany</i>	383

SESSION 5B

TURBINE: UNSTEADY FLOW

C6231/151	The next generation of pulse optimized multi-scroll turbines for automotive applications – DualVolute and TwinScroll <i>M Gugau, F Winkler, S Weiske, T Heuer, R Sauerstein, BorgWarner Turbo Systems, Germany</i>	397
C6231/135	Analyses of flow structure through radial turbine twin-entry volute under pulsatile flows <i>M Cerdoun, Ecole Militaire Polytechnique, Algeria; A Ghenaïet, University of Sciences and Technology USTHB, Algeria</i>	417

FOR PUBLICATION ONLY

C6231/134	Evaluation method of the exhaust system of the turbocharged diesel engine based on exergy and enthalpy analyses <i>C C Ma, M X Qi, Beijing Institute of Technology, China; L W Sun, Beijing Institute of Technology and Dezhou University, China; N Fang, Technical Center of Dongfeng Automobile Company, China</i>	437
